The Equitable Company obtained the Flowery and North Bonanza mines both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has written contract, duly recorded, for a deed, and is in possession of the pro perties, and is now operating them. The sum of $2,000 was paid on the con tract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half o all over and above this $6.25 per ton goes to the former owners till they recei the total sum of $185,000, without interest. There is no stipulation as to amoun of work to be done within any specified time—and no proceeds, no pay. The Com pany can therefore pay it in one year or it can pay it in ten years. Wi this exception the Company is free from debt. Its policy is to pay as it go In this way it has no fear of financial embarrassments. The title to the Kim bark is by "location," under the mining laws of the United States. Wor enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 265-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 ton of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put constantly increasing and all the Company needs is more mill capacity to handl its ore.

ARTHUR S. GARLICK, Meriden, Conn., Secretary

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE S. WILCOX, RICHARD F. DOBBIN,
WILLIAM GARLICK, ARTHUR S. GARLICK, B. F. BARNES

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hindsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is 5x7 feet and in 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs.) is as follows: Copper, 16.05 per cent.; Gold 0.02 ozs.; Silver 92.40 ozs. Total value $90.00. Value of ore in main vein in the shaft and growing richer as depth is attained. *Copper, $6.40; Gold, $6.82; Silver, $254.31.* Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatsoever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years. Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5,500,000 (now claimed to be worth $15,000,000). About six years have elapsed since he purchased it. The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado. New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN."

Mr. Edwin J. Hulbert, M. E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

B. F. BARNES, Fiscal Agent
Room 14, Wilcox Building, Meriden, Conn.

A HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity.

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock, but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely certain to others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

MANY CHANGES IN THE BRITISH WAR OFFICE

The Office of Commander-in-Chief to Be Abolished

London, February 2.—Sweeping changes in the British War Office are announced officially tonight. The Government has issued a blue book containing the report of the War Office Reconstituting Committee, with an accompanying declaration that the King has approved the report, and that in accordance with its recommendations the Government has decided to appoint an Army Council on the lines of the present Board of Admiralty. The Council will be created by Royal patent, and under it the office of Commander-in-Chief will cease to exist. In place of this officer an Inspector-General of the Army will be appointed, whose chief duty will be to report upon the efficiency of the forces for home defence. The report covers all departments of the War Office organization. It is the result of three months' deliberations by three members, Viscount Esher, representing the civil administration, Col. Sir George Clarke, representing the army, and Admiral Sir John Fisher, representing the navy.

EARL ROBERTS TO RETIRE?

Surprise is expressed that the report is adopted as a complete operative scheme, without awaiting the endorsement of Parliament. The appointment of an Army Council and the abolition of the post of Commander-in-Chief by Royal patent points to the King's personal action in the matter. The report does not mention the names of the members of the new council. It is doubtful if the health of Earl Roberts, the present Commander-in-Chief is equal to allowing him to perform the duties of the first Inspector-General.

The report points out the necessity of greater permanence in the Defence Committee in order to insure a continuous policy, and it suggested the addition to the existing Defence Committee of a permanent secretary holding office for five years, two naval officers selected by the Admiralty, two military officers, chosen by the Viceroy of India, and if possible other colonial representatives, holding office for two years.

With regard to the War Office the commission suggests that the Secretary of State for War be placed in the same position as the First Lord of the Admiralty, directly responsible to the Crown and to Parliament. The constitution of the Army Council aims at decentralization of the individual members of the council being entrusted with different branches, such as armament, supply, finance, etc.

In this connection the report remarks significantly:—"New measures demand new men; we therefore attach special importance to the appointment of military members not hitherto closely connected with existing methods and who therefore are not likely to be embarrassed by the traditions of a system which is to be radically changed."

The commission considers the abolition of the post of Commander-in-Chief to be imperative, and it urges the divorce of the administrative from the executive department.

The Inspector-General is to be appointed for five years. He will report upon actual facts without expressing opinions on policies.

The report is most practical and business-like. It says it is "necessary to make a complete breach with the past, and endeavor to reconstitute the War Office with a single eye to the effective training and preparation of the military forces for war," and again it says "the object should be to secure for the British Empire, with the least possible derangement of the existing machinery the immense advantages which a general staff conferred upon Germany."

Contrasting the efficiency of the Admiralty with the inefficiency of the War Office, the report complains that the latter "has no thinking department."

Complete Change at Once.

All the morning newspapers give the utmost prominence to the report, and its recommendations, the subject ousting the Russo-Japanese dispute from the leading place.

The Morning Post declares that no more important administrative decision has been taken by any British Government in a century. There will be a complete change in the personnel of the War Office made immediately.

Some writers welcome the report as an indication that the new Secretary of State for War, Mr. H. O. Arnold-Forster, is really carrying out his programme of reform.

The Times calls the report one of the most important State documents issued in the present generation. Its thoroughness, conclusiveness, and precision are entirely different from the emasculated compromises of the ordinary report. It points out that this committee, with the Foreign Office added, will prevent the recurrence of any such grevious hiatus between political negotiations and military preparations was was revealed in the South African War. The Times recommends the selection for the most important post of permanent secretary of Sir George Clarke, providing an adequate inducement be offered him to abandon his present position as Governor of Victoria. No one has made a closer study of the problem of Imperial defence. He is an authority on naval and military strategy, and his recent Australian experiences will help him to keep colonial aspects closely before his eyes.

"The Premier having no Moltke," says The Times, "we recommend for the post of first military member of the War Office Lord Roberts, a general of profound insight, who turned the tide of the Boer War, or the Duke of Connaught, who is undoubtedly popular and successful."

FROZEN AT HIS KEY

Operator Succumbs to Illness at Lonely Station in Northwest

Erwood, N.W.T., February 2.—Walter Gray, telegraph operator here, died at his key Saturday night, and when found his body was frozen stiff in the little frame depot. He was at work dispatching trains, and at the end of a message said;

"Feel awfully sick; think I am dying."

The operator at the other end tried to get him again, but could not. Three men were sent on a hand car from the nearest station, and after a terrible trip through the blizzard found him dead and the body frozen, the fire having burned out. Even if they had arrived in time little could have been done, as the nearest doctor is fifty miles away. The storm blew down the wires, and they were only replaced this afternoon. Gray had been sick for some time.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000.00. Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 5000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,600 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is to-day giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 150 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, FISCAL AGENTS,

C. L. ARZENO, General Manager. 603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

Creeps Like a Serpent

Catarrh is an insidous diseas, scarcely noticeable at first, but horribly relentless if not checked

No disease makes such inroads into weak constitutions as Catarrh. It spreads from the place of beginning to the lungs, bronchial tubes, stomach, intestines, and before long all the organs of the body are affected.

A splendid remedy, attended with remarkable success in curing Catarrh has lately come prominently to the front. Its name is Catarrhozone, and no case is recorded where it failed to quickly relieve and cure.

The strong points about Catarrhozone are that it is both a local and constitutional treatment. It not only affords quick relief to the local symptoms, but also purifies the blood of all Catarrhal poisons, builds up and strengthens the system.

Catarrhozone Inhaler supplies an abundance of medicated air which is breathed in at the mouth, and after passing through every air cell and air passage of the breathing organs, is slowly exhaled through the nostrils.

This penetrating, volatile antiseptic at once kills the germs that cause Catarrh and prevents the disease from spreading when once established. It is so healing and soothing that the inflamed membranes and sore spots are restored to normal and healthy condition in a few days.

Catarrhozone cleanses the nose and throat and keeps them entirely free of mucous discharge. It prevents dropping in the throat, cures headache and makes breathing easy and the breath pure and sweet

To build up and invigorate the system, a blood purifier and tonic called Ferrozone should be taken after each meal. In conjunction with Catarrhozone it is a valuable aid in establishing such a healthy condition of the body that Catarrh cannot exist.

Other remedies have been known to give relief, but to permanently erradicate every trace of Catarrh you must use Catarrhozone. It is a common-sense, convenient, clean method of cure that is endorsed by the profession and all intelligent pharmacists.

You are sure to be benefited quickly and positively cured by Catarrhozone $1.00. Trial size, 25 cts. Sold by druggists and N. C. Polson & Co., King-

THE CEREAL COMPANY AND SUNDAY WORK

EMPHATIC LETTER FROM THE COMPANY ON THE SUBJECT

Work Entirely Suspended on the Sabbath Except when Machinery Has to be Repaired The Company Does Not Now, Never Has or Never Will, Operate Any Portion of Their Mill on Sunday.

The following statement from Mr. Macdonald, Manager of the American Cereal Company, was given The Times yesterday. In view of the impression that has gained currency in certain quarters that the mills are being operated on Sunday, a Times' representative visited the works yesterday and interviewed the manager. It is needless to say that no work is done on Sunday that can be done on any other day. In fact, Mr. Macdonald has made it a rule to instantly discharge any employee who violates this rule. The following is the statement ;

"We wish," said Mr. Macdonald, "to take this opportunity of placing ourselves right in the estimation of the public, viz: that we do not manufacture goods on Sunday. We have in many instances been asked the question why it is that smoke can be noticed pouring from our smoke-stack every Sunday, if it is the case that we do not manufacture on that day. In answer to this we have to say that the rules of the Fire Underwriters' Association of Canada are such that we must keep our fire pump under 100 lbs. steam pressure at all times, which necessitates operating a portion of our steam plant to do so.

"We have also been asked why it is necessary to have the plant partly illuminated on Sunday night since we do not operate on that day. In answer to this we have again to refer to the rules of the Fire Underwriters' Association, which prohibits the use of lanterns by watchmen where electric light is available consequently we have to burn a sufficient number of electric lamps when the plant is not operating nights to enable our watchmen to carefully patrol and examine each and every room for traces of fire.

"We have also had enquiries from people in different sections of the country who find that it would be to their interest to handle our goods, asking that, providing they would favor us with their business, would we guarantee to them that their orders would be filled from goods made during the week and not from goods made on Sunday. In answer to this we have to say that if we were called upon to fill an odrer from goods made on Sunday we could not do so, from the fact that we only operate from 6 a.m., Monday, to 6 p.m. on Saturday. We never have been known to operate any of our plants on Sunday for the purpose of manufacturing. The only work we do on Sunday is that which cannot be done while the plant is running. The lines upon which we endeavor to operate are those which will best serve the interests of the majority. Anything and everything in the way of repairs that can be done during the week is done. Why? Because it costs more to have this work done on Sunday. In short, there is absolutely no work done by us on Sunday that can be done while the plant is in operation. In order to guard against mishaps and loss of time to the employees during the week we find it absolutely necessary to have a few hands come out on Sunday for the purpose of carefully examining and adjusting the various lines of machinery, a work that can only be done when the machinery is standing still. In fact there are certain lines of machinery that cannot be adjusted under artificial light. There are also certain lines of our machinery connected with the process of drying and steaming where the heat is so intense in operation, that it requires from 12 to 18 hours after the steam has been turned off for the apparatus to cool off sufficiently to permit of the work of repairs and adjustment to be done with safety. We make mention of this so that the people may clearly understand that the inspection and adjustment of certain lines of our machinery could not be attended to nights, even if the opportunity offered. If we were to close down the plant during the week for the inspection and adjustment of such lines of machinery it would mean considerable of a loss of revenue to our employees which would, no doubt, work more or less of a hardship on many of them. In conclusion, what we desire is that the general public become sufficiently conversant with our policy of operation so as to thoroughly understand that we do not, never have, nor never intend to perform work on Sunday that can be done during the week while the plant is in operation."

Surely the above will put an end to any stories that have been circulated regarding Sunday at the Cereal Works.

DIDN'T BELIEVE

That Coffee Was the Real Trouble

Some people flounder around and take everything that is recommended to them but finally find out that coffee is the real cause of their troubles.

"For 25 years I was troubled with my stomach. I was a steady coffee drinker but didn't suspect that as the cause, I doctored with good doctors and got no help, then I took almost everything which someone else had been cured with but to no good. I was very bad last summer and could not work at times.

"On December 2, 1902, I was taken so bad the Doctor said I could not live over twenty-four hours at the most and I made all preparations to die. I could hardly eat anything, everything distressed me, and I was weak and sick all over. When in that condition coffee was abandoned and I was put on Postum the change in my feelings came quickly after the drink that was poisoning me was removed.

"The pain and sickness fell away from me and I began to get well day by day, so I stuck to it until now I am well and strong again, can eat heartily with no headache, heart trouble, or the awful sickness of the old coffee days. I drink all I wish of Postum without any harm and enjoy it immensely.

"This seems like a wonderfully strong story but I would refer you to the First National Bank, The Trust Banking Co., or any merchant of Grant's Pass, Ore., in regard to my standing and I will send a sworn statement of this if you wish. You can also use my name." Name given by Postum Co., Battle Creek, Mich.

Still there are many who persistently fool themselves by saying "Coffee don't hurt me," a ten days' trial of Postum in its place will tell the truth and many times save a life.

"There's a reason."

Look for the little book "The Road to Wellville," in each pkg.

Notice for Ladies

The Ladies Study Class will have a study of China on Wednesday afternoon of this week instead of Tuesday, in the Bible Class rooms of the George street Methodist church at 3.30 p.m. sharp. All ladies are invited to be present. Subject for discussion, "The Minerals of China, its Temples and some glimpses of Confucius."

Rev. J. H. Teney Called

At a meeting of All Saints' congregation it was unanimously decided to extend a call to Rev. J. H. Teney, of Omemee who succeeded Rev. E. A. Langfeldt there, when the latter came to St. Luke's. He preached in All Saints' on Sunday and is spoken of very highly by numbers of the congregation and others who have had the pleasure of hearing him and of making his acquaintance. It is not yet known whether Mr. Teney will accept.

Canadian Press Association

The annual meeting of the Canadian Press Association will be held in Toronto on Thursday and Friday in the council chamber of the Board of Trade. The sessions will begin each day at 10 a.m., with Mr. H. J. Pettypiece, M.P.P., in the chair. It is expected that the attendance will be the largest in the history of the organization. An informal dinner will be held on Thursday evening at 6.15 o'clock.

THE TANKARD FINALS

Peterborough Curlers Worsted Yesterday by Collingwood

Peterborough curlers went up to Toronto yesterday to play in the finals for the Ontario Tankard. In the morning Fergus beat Dundas by one shot, Toronto Caledonians beat Detroit by 7 shots Galt beat St. Mary's by 14 shots and Collingwood beat Peterborough by 9 shots. Galt now plays Collingwood, and Fergus the Caledonians

THE LATE MRS. DAVIDSON

One of North Monaghan's Esteemed Citizens Passes Away

It is with deep regret that we chronicle the death of Mrs. J. M. Davidson, of North Monaghan, which sad event took place on Monday. The deceased had been in ill health for some time, but the end came more suddenly than was expected. Of six sons there are four surviving, Messrs. William Albert, of Belmont, Ont.; Erastus of Alameda; Assa.; Elgin and Clarence at home. The three daughters are Mrs. Robert Deck, Mrs .Thos. Deck, and Mrs. Joseph Bell.

The sincere sympathy of the entire community is tendered Mr. Davidson and family in their irreparable loss.

The funeral will take place to-morrow (Thursday) afternoon, at two o'clock from the family residence, Lot 10, Con. 10, North Monaghan, to Little Lake Cemetery.

INCIDENTS OF THE DAY

Newsy Paragraphs Picked Up By Reporters on Their Rounds

—A blank at the Police Court yesterday.

—Valentines for sweethearts and lovers at Times Bookstore.

—Lindsay proposes to have a government audit of the municipal accounts.

—The bear did not see his shadow yesterday, which is taken to mean an early spring .

—The inaugural meeting of the Board of Education will take place this evening in the Secretary's office.

—There will be a meeting of the Girls' Guild of George street Methodist church in the church parlors to-morrow evening at eight o'clock. All the members are requested to be present as this will be an important meeting.

—See the special bargain we are giving in packages containing twelve sheets of very best quality note paper with envelopes to match, pen holder, and also a sheet of blotting paper for only 5 cents. Times Bookstore.

—Toronto Council has contracted with the Lakefield Portland Cement Co. for its 1904 supply of cement at $3 3-4c. per 100 lbs or $1.84 1-2c. per bbl. of 350 lbs. Edison Portland cement, made in New Jersey was offered at $1.73 1-2c. a barrel.

—Jack Pogue is again in the toils. Last night he was found lying in a snow bank at the corner of George and McDonnell street, and would undoubtedly been frozen had not P. C. Stewart conducted him to the police station. He will come up this morning.

—The annual meeting of the members of the Turf Club, for the election of officers for the ensuing year was held in the Association Rooms yesterday afternoon. The meeting was adjourned, to meet again next Monday, Feb. 8, at 3 o'clock in the afternoon.

—The following is the report of the Nicholls Hospital for the month of January;—Number of patients treated, 84, free patients, 20; pay patients, 64, from town, 55; from other places, 29; number of operations, 24; attending physician for month, Dr. Brown; physicians attending private patients, Drs. Halliday, Boucher, Pigeon, Greer, McCullough, Scott, Eastwood, Carmichael, Bradd Young and McClelland.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Miss Higgins, of Toronto, is the guest of Mrs. Hughes-Charles.

—"Major" Sims, janitor of the Albany Club is laid up with an attack of la grippe.

—Mr T. E. Darcy, manager of the Lakefield Skating Rink, was in town yesterday and gave The Times a call.

—Mr. David Breese is laid up with an attack of la grippe.

—Mr. George Spilsbury, who has been afflicted with a severe attack of appendicitis, we are pleased to learn, is somewhat recovered.

—Mr. A. R. Kidd, the obliging clerk in the Customs House, is recovering from a severe attack of pneumonia, and will be able to be at work again in a few days .

—Mr. W. Carlisle, manager of Mr. Neill's branch store, Lindsay, has been spending a few days in town, the guest of his mother, Mrs. W. H. Anthony, Union street .

—The decorations and furnishings for the interior of the new C.P.R. Hotel at Vancouver, which is now in course of erection has been given to Mrs. Hayter Reed, of Quebec, a cousin of County Warden E. A. Peck, who is noted for artistic taste and judgment. Mrs. Reed will be allowed a handsome sum for her services, in addition to her expenses, and will have at least two years to complete her commission .

The Price of Pleasure.

It is hard for a lovely woman to forego the pleasures of the life which she was created to enjoy and adorn. She may have to be busy all day in office or in store, yet she cannot deny herself the social pleasures which are offered her.

But the fatigue is often too great for her, and she suffers from headache and backache as a consequence of over-exertion.

Women who are tired and worn out will find a perfect tonic and nervine in Dr. Pierce's Favorite Prescription. It cures headache, backache and the other aches and pains to which women are subject. It establishes regularity, dries weakening drains, heals inflammation and ulceration, and cures female weakness. It makes weak women strong and sick women well.

"I am so pleased with your instructions, I hardly know what thanks to give you for your kind favors," writes Mrs. Milo Bryant, of Lota, Thomas Co., Ga. "I suffered so much with great pains in my back and the lower part of my stomach and palpitation of the heart, that at times I could hardly lie down. Could hardly get up in the morning, but after using three bottles of 'Favorite Prescription' and two vials of Dr. Pierce's Pleasant Pellets, I am like a new woman."

Sick women, especially those suffering from diseases of long standing, are invited to consult Dr. Pierce, by letter, *free*. All correspondence is held as strictly private and sacredly confidential. Address Dr. R. V. Pierce, Buffalo, N. Y.

TO THE AFFLICTED.

Dear Reader,—Are you a sufferer from any of the following ills: Lack of ambition, nervous exhaustion, ideas easily confused, irritability of temper, impairment of memory, despondency, general debility, liver not right, kidneys out of order, rheumatism, dyspepsia or indigestion, dizzy or fainting spells? Does your heart palpitate? Do you have smothering or sinking sensations, pimples, or eruptions of the skin, etc, etc.

If you are troubled as above, you can be cured by the use of Dr. Clarke's Wonderful Little Red Pills. A trial order of three boxes for $1.00 will convince anyone that these pills are truly wonderful. We are daily in receipt of letters bearing the highest testimony. We have not space to tell you all about them here, but will answer any enquiries as to their merits. Mrs. John Macdonald, Durham, N.S., writes us, "After taking two boxes of Dr. Clarke's Little Red Pills for indigestion, which I had been troubled with for a number of years, I am now perfectly well. I followed the directions carefully

To every one sending for a trial order and finding good results we ask to observe our special offer enclosed with every box. It is of special interest to every one.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or 3 boxes for $1.00.

E MIGHTY ARMY OF RUSSIANS MILLIONS READY FOR THE FIELD IN CASE OF CONFLICT WITH JAPAN

Case of of Emer-ency 7,500,000 Are Available

st a Fighting Force of 273,268 for Japan

vely discussion is progressing in ropean press concerning the re- chances of Russia and Japan event of hostilities. The cor- resulting in the ill-equipment Russian navy is so notorious inion seems to favor the Japan- having the better chance in case ecisive engagement.

London Spectator says: "For onduct of an Asiatic power in a war there are few precedents, dea which lies at the basis of ean speculation, that Asiatics timid on the water, is contra- by many facts of history and of Chinese and Japanese vessels in to war. But of their capacity to e the huge yet delicate machines are described as fighting ships vidence is imperfect. So is the ce for the Russian management great fleet in war time, and so all is the evidence of the com- ive condition of the rival squad- There have been rumors that ption has been rampant in the y departments of the Russian and that the most experienced als are annoyed by the condition eir ships."

Russia's Great Army.

estimates of the size of the arm- are wholly favorable to Russia. numerical strength of the Russian is largely a matter of conjecture. peace footing is about [illegible] men. y as can be reckoned, the force for carrying on the earlier of war amounts to yearly 1,- But in case of national cy this force could be swelled about 7,500,000 fighting men by the out of the territorial reserve the opolchenie or militia.

Japanese army now consists of officers and men. It is doubt- if, in case of war, this army could raised very greatly above that e.

Comparisons of Armies

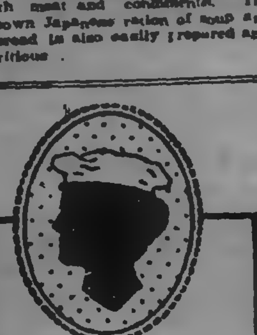
the relative qualities of the Rus- and Japanese infantry, there is much to be said. Both are admir- trained and disciplined. From was seen of the two soldiers in China relief expedition, one might inclined to favor the type repre- by the small, compact, tireless nese foot soldier.

cavalry Russia is numerically and uestionally the superior. She will able to draw upon her vast Cossack until Manchuria is overridden with riders of the plains. Like our cavalry, the Cossack has been ed to fight on foot as well as on eback, and the rapidity of his ements, as well as capabilities for d concentration, will as in the Boer , be a powerful factor in opposing Japanese. But cavalry requires age, and forage requires transpor- n, so that the question of whe- the limited resources of the Man- rian Railway will be able to sup- this vast host, infantry as well as ry, will be a problem for the Rus- transport service.

Japanese artillery forces have y recently been rearmed with a y powerful, quick-fire, field gun— invention of Colonial Arisakan of Japanese army—which is said to rect the recent guns of Krupp and net. Taking the Krupp field piece a standard of comparison, it is be- ved that in range and rapidity of fire Japanese artillery will have the ad- ntage, while the Russians will ulti- ately be able to oppose greater masses artillery to their adversaries. But it ay be, as in the Boer war, that the panese will bring naval guns from ir fleet, and use them both in the duction of Port Arthur, and in oppos- g the relief of that place.

Both Easily Subsisted.

Both armies will be easily subsisted the Japanese perhaps the easier if a eakdown of the Manchurian Railway ystem under the congestion of war is o be anticipated. A Japanese soldier an live on a quart of rice a day, mix- d with meat and condiments. The ell-known Japanese ration of soup and ack bread is also easily prepared and s nutritious.



The housewife who does not use

Cleveland's Baking Powder

is at a disadvantage. She cannot get the same perfect work from any other.

WASHWOMEN FORM UNION.

THE washerwomen of St. Paul, have formed a union Their first demand is an increase in wages from $1.35 a day to $1.50. The women include those who are employed throughout the St. Anthony Hill district. Many of the domestic servants of St. Anthony Hill are unionized, and refuse to do washing. Hence the washerwomen have it in their power to force the housekeepers of "Swelldom Town" to either put up the cash or wear soiled silk stockings. The washerwomen have served notice that they will hold to the union scale, and that no washing will be done unless the increase is paid.

DECLARES THAT WAR IS CERTAIN

WORLD'S FAIR DIRECTOR SAYS THAT CONFLICT IS CERTAIN

WAR CANNOT BE AVERTED

Japan Has Made Such Preparations that War Must Follow

Chicago, February 4.—War between Japan and Russia is certain, in the opinion of Kiyoshi Sugawa, director of the Japanese Exhibitors Association at the St. Louis Fair. He arrived in Chicago yesterday and is at the Palmer House.

"My country has made such preparations for war that the people would not countenance peace," said he. "Japan is ready to fight and expects to fight alone. There is no fear as to the outcome in our minds. Russia is a big country but so was China. China has appealed to Japan to protect her interests in Manchuria and we shall do so even if it is at the point of the bayonet. Russia's advance is a menace to us that every loyal Japanese resents. We hope when the war does come that the American people will treat us fairly and give us their sympathy."

Mr Sugawa formerly lived in New York, being at that time in the importing business, and speaks English fluently. His wife was the daughter of the councillor of the Emperor, who was for eight years governor of one of the principal provinces of Japan. He is accompanied by two secretaries, K. Miyamatsu and S Mayakawa. The party will leave for St. Louis tomorrow.

"We are disappointed at the lack of space which we have for our exhibition at St. Louis," he said, "for we have planned to have 140,000 exhibitions. Instead of this we can only have 70,000 on account of the small space. These, however, will be the choicest, as it has been our aim to show the American people only the very best products of Japan. There is a great interest in the world's fair all through Japan and among all classes. The Japanese press is devoting columns to it and it is widely discussed. There will be sixty people, English-speaking Japanese, in the employ of the exhibit to explain everything to all visitors. Over 400 merchants from all parts of the country will also attend the world's fair to study American products and American methods."

Japan Fixes War Pay.

London, Feb. 3— The correspondent of The Times at Tokio says an ordnance was issued today fixing the war pay of the army and navy. It was also officially denied that any statement of the situation was recently made by Japan to the powers. Russia's answer is expected about the 6th inst. Meanwhile the public anticipates no concessions, though there is an easier feeling in some circles. Japanese residents are withdrawing rapidly from the Liau-tung peninsula. There is no official intimation of the cessation of commercial traffic on the railways.

C. P. R. AND WINNIPEG

The Canadian Pacific Reaches Agreement with Winnipeg

Winnipeg, Man., February 3 — The clauses in the bill to amend the Winnipeg charter validating the subway agreement between the city and the C. P. R were passed on Saturday by a committee of the Legislature on Law Amendments with a few changes. The differences had been amicably arranged beforehand and inside of fifteen minutes the matter which has occupied the city council and Canadian Pacific Railway Company for months was settled, and with the passing of the bill through the House will be finally disposed of, permitting the extensive works to be done by the railway company to be started at once. All the amendments were passed in the bill, with the exception of two which were struck out. One of these was in connection with the frontage tax which the city has sought to settle for two years, but in view of the successful settlement of the more important clauses this is not regarded as disappointing. Although no further delegations were heard, William Whyte, Second Vice-President, and J. A. M. Aikens K.C., solicitor of the C. P. R.; Isaac Campbell, K.C., city solicitor; Mayor Sharpe and several of the aldermen were present, and expressed gratification on the passing of the bill. The city solicitor said so far as the city was concerned the settlement was entirely satisfactory.

EVERYBODY READS THE TIMES.

NEW DANGER TO CHINESE EMPIRE

RUSSIA AND BRITAIN TO COME IN THROUGH REAR

TRIUMPHS IN THIBET

Oscar T. Crosby Declares That England Has the Best of the Present Outbreak

Paris, February 4.—"China is threatened by the invasion through the "rear door" of the country by Russia and Great Britain, whose advance in this direction may become as important in its possible results to the United States as a move of the European powers from the sea. British control will be established in Tibet through the expedition toward L'Hassa, commanded by Colonel Younghusband."

This is the summing up of the observations of Oscar T. Crosby, the American explorer, who has just returned to Paris from a trip through parts of Turkestan and Tibet never before visited by a white man. On his way to Tibet Mr. Crosby visited Chinese Turkestan and later traversed Kashmir and the Karakorum caravan route, probably one of the most difficult used by human beings, in India.

DID NOT ATTEMPT L'HASSA.

"My purpose in visiting central Asia was to study the pas. political and racial questions connected with that region," said Mr. Crosby. "I did not believe it possible to reach L'Hassa, except by force or in disguise, and therefore proposed merely to go as far as I could.

"The British expedition under Colonel Younghusband will be able to enter L'Hassa. The Tibetans cannot resist. Those I saw were mild and peaceful people, governed by priests, who, so far as we know, do not inculcate them with the military spirit, which is contrary to the precepts of Buddhism and Lamaism. The result of the expedition will be some form of British control. Russia is doing nothing to prevent its success, and I do not think anything can be done. I do not believe Russia seriously contemplated acquiring that country, for if a natural frontier ever existed to their empire it certainly lies to the north of the vast deserts, and tremendous mountains which must be crossed before inhabited Tibet can be reached. Russia can stand British control of Tibet because she will take Chinese Turkestan as a set-off. The inhabited part of this territory is rich and populous. Three oases contain 1,500,000 inhabitants.

RUSSIA TO CONTROL.

"The Russians can and will control the commercial situation of all this region because of its proximity to their railroad. Chinese Turkestan is still Chinese to the outward appearance, having officials appointed from Peking, etc., but the Russian consul general at Kashgar, who is guarded by sixty Cossacks, is the real power to the natives and Chinese there. Even if they wished to do so, which I doubt, they would be powerless to resist the Russians. Consul General Petrovsky, while courteous to us, seemed to discourage the appearance of any other than Russians and Chinese in Turkestan, taking the ground that the question of Chinese Turkestan is no great importance to the world at concerns merely Russia and India.

DISMEMBERMENT OF CHINA.

"The importance of the question lies in the fact that the taking of that territory of Tibet, which is under Chinese suzerainty, will be dismembering China. The object of the British is to make it impossible for the Russians to establish themselves in Tibet, and to do this effectively they will have to institute some kind of control. Nevertheless, the United States, which is interested, must turn her attention to the back of the empire and keep an eye there while watching the seacoast.

"With respect to Afghanistan both the Russians and British recognize its value as a buffer state, and do not desire to disturb the situation, though each fears the other may secure an ascendancy above the Ameer."

Mr. Crosby left the United States last May, stopping at St. Petersburg to obtain permission through Russian Turkestan. He took the Transcaspian Road to Andijan, its terminus, and then proceeded by caravan to Tibet.

PARTY SUFFERS SEVERELY.

On the Tibetan plateau, at elevation of from 15,000 to 18,000 feet, the party suffered extremely from the rarefied air, and the loss of his instruments caused Mr. Crosby to pass south of Rudok in Tibet, where he intended to obtain supplies. The country was trackless and uninhabited, and in the unexplored White Desert the horses died rapidly until the party was forced to stop while two men went in search of supplies. They rode 100 miles before they found human beings, and returned at the end of eleven days with camels and provisions. The nomads, who are described as being like the American Indians, refused to go into Tibet, so the company was forced to go into an uninhabited region known as Little Tibet, a part of British Kashmir.

Mr. Crosby has been invited to deliver lectures before the London and French Geographical Societies. He will not return to New York before the last of February.

NEW GOLD MINES

Are Looking for Gold Under a Yukon Town

Dawson, Y. T., February 3— The town of Grand Forks is being undermined in pursuit of gold. This town stands on what was originally claimed No. 6, above discovery on Bonanza Creek. Grand Forks has a population of 500. The town has one long street lined with brick houses, and owners of lots on which they stand, have begun digging under their own buildings, in quest of the yellow metal and are having success.

GAMBLERS EVADE LAW

A Casino is Constructed Outside the Three Mile Limit

Tacoma, February 3— Nome dispatches via Dawson say further complications with the Washington authorities will likely follow the inability of the Federal officers at Nome to carry out President Roosevelt's wish expressed through the Department of Justice, that gambling be absolutely stopped in Alaska. The sporting element of Nome have built a big gambling Casino on the ice off Behring Sea, three miles from there, and are conducting the faro and other games recently closed at Nome. The players claim immunity because they are outside the limit. The Casino was built in sections, and in the spring will be sledded ashore for similar use next winter.

A CRISIS AT HAND

A Chicago Minister Causes a Big Sensation

Chicago, February 3.— Rev. Doctor James S. Stone, rector of St. James Episcopal Church, the membership of which is largely made up of wealthy persons caused comment when in the course of a sermon Sunday, he denounced the rich of Chicago. He said in part; "That there are multitudes in this city that neither fear God nor regard man, is largely due to two causes, one the ignorance and weakness of many congregations, and the other the irreligion of our influential, and well-to-do people. The greater part of the people of financial and social influence in Chicago—the people who are going to suffer the most in that terrible conflict between the classes that is threatening this country, the nearness of which seems apparent, the centre of which will be this very city the end of which no man knows—these people who should be the first in Christian example, and in every good work, are living the lives of pagans; nice pagans, if you will, but surely pagans."

BODIES FOUND

Many Victims of the Great American Desert

Salt Lake, Utah., February 3 —The bodies of between 20 and 30 men who perished from thirst while attempting to cross the desert between Moapa and Las Vegas, Nevada, have been found within a few weeks, according to advices received from the latter place. The men, it is believed, were mostly tramps who attempted to make the long journey on foot without sufficient supplies of food and water to carry them across. Many of the bodies found were without clothing, and it is believed that the victims had gone insane from thirst and wandered about in a nude condition in search of water. Some of the victims are supposed to have drunk water from "Deadman's Well," which is located almost in the centre of the desert. The water from this well, while temporarily alleviating thirst, is sure death to those who drink it.

THE PLAN IS NOW WELL MAPPED OUT

MR. CHAMBERLAIN'S TARIFF COMMISSION PURSUE ENQUIRY

RESEARCH IS COMPLETE

The Colonies are Considered in Every Step Which is Being Taken

London, February 4— The first batch of enquiry forms sent out to all British manufacturers by Mr. Joseph Chamberlain's Tariff Commission indicates what a large place the Colonies are intended to occupy in Mr. Chamberlain's policy.

Manufacturers are asked to state the effect of foreign competition upon their trade, which question, presumably, is not to include Colonial Competition. There still seems to be doubt as to whether Colonial manufacturers are to be subject to import duties proposed on foreign manufacturers, or whether the British preference will cover manufactured goods as well as food products from the Colonies.

Another question which will elicit attention is the extent of Canadian as well as the foreign dumping of iron and steel and other products upon the British markets below the cost price. The third question which will elicit attention is how the Canadian tariff injuriously affects the British export trade, and the manufacturers are asked to state what reduction of outside tariffs such as Canadian, would enable them to compete successfully in Canada, and elsewhere.

The effect of the Canadian preferential tariff will also be ascertained, and the extent of foreign competition which the British manufacturers experience in Canada and other countries will receive consideration.

Much satisfaction is expressed at today's Canadian cablegram showing the general readiness of the Canadian manufacturers to continue the British preference if Canadian industries are sufficiently safeguarded, any increase in duties being directed especially against competition from the United States.

FOR NEW CABLE TO CHINA

Bill in Congress Enables Company to Lay by Way of Alaska

Washington, February 4.—Senator Mitchell introduced a bill today authorizing the North American Telegraph and Cable Company to operate telegraph lines or cables between the shores of Alaska and the State of Washington in order to reach the Aleutian Islands, Siberia, Manchuria, China, the Japanese Empire and the Philippine Islands. The company is required to establish a line within five years between the United States and any of the Aleutian Islands.

SLEEPS YEARS OUTDOORS

Indiana Boy is Curing Himself of Consumption in Open Air

Warsaw, Ind., February 4.—Russell Leonard, 16 years old, residing south of this place, today completed his second year of sleeping in the open air in all kinds of weather. He is battling for his life against tuberculosis.

Only one night within the last two years has Leonard slept in a house. Out on his grandfather's veranda, with no shelter except the roof, but in a warm and comfortable bed, the youth spends each night and sleeps where he can breathe the pure air. He claims this heroic treatment, without any medicine, is restoring his health.

CLING TO DANISH ISLANDS

Members of Nobility Join in Patriotic Movement

Copenhagen, February 4.—The Danish Atlantic Islands Association has been formed here with the object of arousing the nation's interest in its outlying possessions and preventing the diminution of sale or otherwise of territory under Danish sovereignty. The movement originated at the time of the proposed sale of the Danish West Indies to the United States and has been strengthened by the reports that Canada desired to purchase Greenland. Many members of the Danish nobility are among the leaders of this agitation for the retention of the Danish West Indies, Greenland, the Faroe Islands and Iceland.

CHEWS CUD LIKE A COW

Only Case of Merycism Known in American Medicine

St. Louis, Mo., February 4.—John Von Shifferdecker, of 3623 Lafayette avenue, is, according to his own belief, one of the first men known to science as being afflicted with merycism, an affliction which causes an action of the stomach and jaws corresponding to the ruminating of cattle and sheep.

Since early childhood his food has returned to his mouth after being swallowed, to be masticated and swallowed again. In every respect his peculiar practice is similar to the act of cattle commonly known as "chewing the cud."

Physicians state that a similar case in Germany is the only other case reported in medical annals.

RED TIES IN GERMANY

Only People of Revolutionary Tendencies Wear Them

Berlin, February 4.—A prolonged litigation, wherein the propriety of an upper teacher in a high school, wearing a red necktie, was the issue, came to an end Saturday at Plauen, Saxony, by the court deciding that such a cravat is at least undignified, even if not intended by the wearer as a social emblem. Dr. Weidauer, the offender, wore a red tie, as he avers, inadvertently to a school picnic, and thereupon the Plauen Anzeiger criticized him severely as an improper person to teach the youth of the city. He sued for damages, and the court in deciding against Dr. Weidauer, said the editor was quite within his functions when he disapproved of red neckwear, which in Germany is considered to indicate revolutionary principles on the part of the wearer.

EASTERN DAIRYMEN'S ASS'N.

Important Changes Made in the Method of Instruction

To the Editor of The Times:

Sir.—The Board of Directors of the Eastern Ontario Dairymen's Association made some changes during the year 1903 in its management of the dairy business, and among the most important was a change in the method of instruction. The various factories in this Eastern District was formed into groups or syndicates, and an instructor was placed in charge of each, whose duty is as herein outlined.

First.—To instruct the patrons upon the care and handling of milk to make finest cheese. Second.—To look after and urge upon the owners of factories the improvement of their buildings and surroundings, and to persuade them to improve the sanitary conditions thereof. Third.—To instruct the maker, when necessary, to improve the manufacture of cheese. Fourth.—To test the milk of the patrons of the various factories, when found necessary, and to endeavor to improve the product of the factories over which they had control.

While everything in connection with the working of this syndicate system was not as satisfactory as we had hoped yet, the trail has been made, and the results are so convincing, that we are adopting the same system, with few modifications, for this year.

We again have associated with us Mr. G. G. Publow, who will be Chief Instructor, and with him at the head, and the co-operation of the Patrons, Factory Owners and Makers, we hope to make greater progress during 1904 than any previous year.

Factory owners wishing to become members of the various syndicates in their respective districts will kindly notify the Secretary as soon as possible.

R. G. MURPHY,
Secretary.

WEATHER NOTES

Thursday—Continued cold.

TEN THOUSAND YELLOW TOILERS FOR TRANSVAAL

Will be Introduced Into the Transvaal Under Government's Sanction

London, Feb. 3— Replying to Earl Spencer's interrogations regarding the employment of Chinese labor in South Africa Lord Lansdowne declared in the House of Commons that 10,000 laborers would be introduced into the Rand mines experimentally. The Transvaal in this matter would be regarded as a self-governing colony, but nothing would be done until Parliament had accorded ample freedom of discussion.

Earl Spencer spoke of the change in Mr. Chamberlain's arguments in conducting his great campaign. It was an insult to the colonies to declare that their loyalty must be secured through a preference, when their loyalty has always been so magnificently given. Mr. Chamberlain's policy was now protection, owing to the colonial attitude. Canada objected to giving a preference because it was injurious to her manufacturers.

The Morning Post, referring to the increase in the United States navy, says it is very much mistaken if it will not stimulate Canada and Australia to take a livlier interest in Imperial defence.

HON. JOSEPH CHAMBER-LAIN SCORES A POINT

The Liberal Unionists Decide to Maintain Their Organization and Support Candidates

London, Feb. 3— The Liberal-Unionists at a meeting of their Executive Council, held here to-day, decided to maintain their organization. The meeting was called to discuss the situation arising from the publication January 11 of the correspondence between Joseph Chamberlain and the Duke of Devonshire, former president of the Council. Mr. Chamberlain presided and made a speech setting forth the necessity of the existence of the association. He said nothing had happened to in any way interfere with its future usefulness, and added that the danger which the association was formed to combat could only disappear by a declaration of the Irish party that they had abandoned all hope of their intention of converting Great Britain to home rule.

Only two members voted against the resolution providing for the maintenance of the association.

Another resolution instructed the Council to assist the Liberal-Unionist candidates without regard to their opinions on the fiscal question, the only qualification necessary being their readiness to support Premier Balfour.

London, Feb. 3— The Birmingham Daily Post comments upon the part of the speech from the throne referring to the Alaskan boundary which says: "It must, nevertheless, be a matter of congratulation that the misunderstandings in which ancient boundary treaties made in ignorance of geographical facts are so fertile have in this case been finally removed from the field of controversy." The Post goes on to say: "There is an edifying spirit of resignation to the misfortunes of others in this passage which will naturally commend itself more to the people of this country than those of Canada, but it would have been more convincing perhaps if it had been accompanied by some expression of sympathy for the Dominion in its disappointment, and of regret for the part we played in bringing that result about."

John Bull Was Bluffed.

The Express, reviewing the official correspondence on what it calls "the notorious Alaskan award," says that significant facts have not yet been made public, but it reveals the extraordinary facility with which the United States succeeded in bluffing Great Britain into accepting an appeal to arbitration under their own conditions.

The Chronicle says: The Alaska papers remind us that Canada has a serious cause of complaint in the way our Foreign Office managed the negotiations. Lord Lansdowne was unable to attach any precise meaning to the vague phrase, "impartial jurists of repute."

Lansdowne's Views.

Lord Lansdowne in the House of Lords, referring to the Alaska award, which he declared had removed the danger of serious clashing on the spot between Canadian and United States settlers said: "The result of the finding was not entirely satisfactory, and in this respect I do not draw any distinction between the interests of Canada and ours. The question at issue was not merely the question of the position of the frontier of Canada, but the frontier of the British Empire, for the defence and integrity of which we are responsible." He did not believe that anyone expected a favorable verdict all along the line, but he found consolation in the fact that the islands awarded to the Americans had no strategical value whatever.

The St. James' Gazette, commenting on the Alaska Parliamentary paper, says it must be admitted by the most temperate minded that it is remarkable unsatisfactory. Every reader can follow for himself the successive steps by which the clearly conceived aim of the United States Government was permitted to be only too exactly realized.

The Eastern Question.

In the House of Lords, Lord Fitzwilliam (Liberal-Unionist) moved the address in reply to the speech from the throne, which was seconded by Lord Ryton (Conservative.)

Earl Spencer, the Liberal leader in the House, followed. He said he hoped the Government's friendly offices had been offered to both Russia and Japan, especially the latter, and asked for information from the Government regarding Somaliland and Tibet, and the situation in South Africa, to which, he pointed out, no reference had been made in the speech from the throne.

Earl Spencer added that he hoped an early decision in regard to the Government's policy on the fiscal question would be reached, and announced that the Opposition would take every opportunity of bringing the question before the House.

Lord Lansdowne responded. He congratulated the House on the conclusion of the Anglo-French and Anglo-Italian arbitration treaties, deplored the situation in the Near and Far East, and expressed the hope that a pacific solution of the differences in both cases would be reached. Continuing, Lord Lansdowne at some length justified the Somaliland and Tibet expeditions.

In regard to the United States, Lord Lansdowne said the United States had endeavored to translate into practice what was affirmed rather as a maxim of principle in the French and Italian treaties.

Lansdowne Consoled.

Commenting on the Alaskan decision Lord Lansdowne said that, although the tribunal was not, strictly speaking, arbitral, its efforts illustrated the possibility of settling by other than diplomatic means, long-standing, dangerous differences. The condition of Alaska might have brought Great Britain into a serious and acute controversy with the United States. The finding of the tribunal doubtless was not entirely satisfactory to Great Britain, but no one expected it to be an entirely favorable verdict. Lord Lansdowne was inclined to find some consolation in the fact that the military and naval advisers were confident that the two islands in Portland Channel which had gone to the United States were not of any strategical value whatever.

Concerning the Russo-Japanese dispute, Lord Lansdowne said it was an axiom in diplomacy not to offer good offices until they were asked for. Neither of the disputants had asked for it. It was an open secret that one at least of the disputants had said that mediation was not desirable at the present time. But should the opportunity offer his Majesty's Government would gladly avail itself thereof.

Coming to the fiscal question, Lord Lansdowne said the policy recommended by Mr. Chamberlain was not the policy of the Government and Mr. Balfour had clearly defined the Government's policy He (the speaker) did not conceal his sympathy with Mr. Chamberlain's aspiration to draw the Empire more closely together, and to put the affairs of the nation on a more business-like footing. If the reward of the success of such a policy was great, the punishment of failure was irreparable, and the Government was only prudent in declining to be rushed into such proposals.

The address was agreed to, and the House of Lords adjourned at 7.35 p.m.

Oom Paul Kruger, the lion-hearted old man who defied the power of Great Britain, and who is now an exile from his beloved Transvaal, is said to be dying. Some months ago, a number of patriotic Frenchmen visited Mr. Kruger, who was then in Southern France, where he owns an estate. At the time, the old man solemnly informed his visitors that he believed the principles which had cost him such great sacrifices would ultimately triumph.

At eighty, Oom Paul's sight and memory are failing. One can hardly picture in the decrepid, pessimistic old man who now awaits the final summons, the sturdy, defiant President of the Boers. Kruger's love of country still burns brightly in his shrunken breast. But he is a pitiable figure. Irreconcilable, he sits in the gloaming which will soon be followed by everlasting night.

CAN IT BE TRUE?

London Feb. 3 —Winston Churchill, speaking at a free trade demonstration in Edinburgh yesterday, said that 300 Conservative members of parliament were opposed to the policy of Mr. Chamberlain.

Local Sports

The T. A. S. and Keene will play off their tie game at Norwood on Monday night. A special train will leave the C. P.R. station at 7 o'clock, and returning will leave Norwood at 11.30.

The Young Ladies Hockey team defeated Lindsay last night by a score of 3—0.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has both the method and the ability to do as he says Dr Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

The doctor realizes that it is one thing to make claims and another thing to back them up so he has made it a rule not to ask for money unless he cures you and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave, Room Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

PETERBOROUGH, FEBRUARY 4, 1904

ELECTION IRREGULARITIES

The scandal in Toronto, growing out of the municipal elections, tends to pass some discredit upon the plan of voting, which the Queen City has adopted. It is on trial as well as one of the men who are accused of grave irregularities.

It is a question if every returning officer should not inquire of every voter, as a matter of form, whether he has not voted before in other wards? It may be that some men, thoughtlessly or ignorantly, vote when they should not do so and lay themselves open to censure.

The defect of many an election rests with the deputy returning officers, who are green men and men not familiar with their duties. Experience teaches that more care must be taken with the selection of them, and more care with the education of them, so that the man who directs the polling of votes will guard more than he has been doing against election improprieties.

KRUGER IN THE GLOAMING

Oom Paul Kruger, the lion-hearted old man who defied the power of Great Britain, and who is now an exile from his beloved Transvaal, is said to be dying. Some months ago, a number of patriotic Frenchmen visited Mr. Kruger, who was then in Southern France, where he owns an estate. At the time, the old man solemnly informed his visitors that he believed the principles which had cost him such great sacrifices would ultimately triumph.

At eighty, Oom Paul's sight and memory are failing. One can hardly picture in the decrepid, pessimistic old man who now awaits the final summons, the sturdy, defiant President of the Boers. Kruger's love of country still burns brightly in his shrunken breast. But he is a pitiable figure. Irreconcilable, he sits in the gloaming which will soon be followed by everlasting night.

EDITORIAL COMMENT

The plans for the proposed bridge across the Strait of Canso, between Cape Breton and Nova Scotia proper, says a Halifax letter, are now in course of preparation by Waddell and Herrick, an engineering firm of Kansas City. The bridge will be of cantilever structure the centre span of which will be 1,800 feet long, the longest in the world. The total length of the bridge will be 3,000 feet, and will cost in the vicinity of $2,500,000. The bridge will be 150 feet above high-water level, and will take about 35,000 tons of steel in its construction, which will be supplied by the Dominion Iron and Steel Co.

THE COUNTY COUNCIL'S CLOSING SESSION

REPORTS OF THE VARIOUS COMMITTEES

The Members of the Council Appreciate Their Visit to the Cereal Works—A Lot of Business.

At the closing session on Saturday of the County Council the Finance committee reported as follows, through its chairman Councillor Hunter:

The Committee on Finance beg leave to report as follows:

1. Your committee recommend that the following accounts be paid:

Adam Hall	$ 3.12
Alexander & Miller	5.15
Kingan Hardware Company	96
Wm. Nicholls	1.75
W. Stucker	3.00
A Comstock	6.00
P. J. Grady	13.50
Office Specialty Company, balance of account	275.00
Peterborough Water Commission	37.50
M. Carew	60
Review Printing Company	13.50
Review Printing Company	12.00
Central Prison Industries	101.56
A. H. Stratton & Co	7.00
Peterborough Light & Power Company	6.00
Peterborough Light & Power Company	65.00
Peterborough Light & Power Company	336.60
R. H Leary	1.00
R. H Leary	1.00
Ed. Young	4.35
Times Printing Company	282.92
Review Printing Company	4.00
Review Printing Company	182.39
J. & W Metheral	4.75
Thomas Flood, pay lists	41.50
J. E Belcher	15.00
A. McDonald, lumber for Locks bridge	

2. Your committee recommend that a grant of $200 be given to the Children's Aid Society.

3. Your committee recommend that Messrs. T. N. Gall, E. H. Scott, Wm. Spencer, S. R. Airream and Henry Cross be granted one horse peddlers license free of cost for 1904.

4. Your committee recommend that no further sums be granted to men who enlisted for service in South Africa, and that no action be taken upon the application of Mr. Swan for a grant, as he was not a bona-fide resident of this county when he enlisted, and that no action be taken upon the application of Morrison for a grant, as he did not serve with the first or second contingents, but was a member of the South African Constabulary.

5. Your committee recommend that no action be taken upon the application from the Sick Children's Hospital for a grant.

7. Your committee recommend that clause 11 of the report of the Finance committee, adopted on the 31st day of January, 1903, be rescinded.

8. Your committee recommend that the receipt be acknowledged of statements from the Treasurers of the following municipalities in reference to the amounts paid by them to County Treasurer during the year 1903; North Monaghan, $3,116.89; Smith, $4,267.88; Asphodel $3,535, and Northumberland and Durham $101.92; Ashburnham, $1,094.44.

9. Your committee recommend that a by-law be passed to amend By-law No. 771, a by-law for licensing, regulating and governing hawkers and peddlars in the County of Peterborough, passed the 23rd day of June, 1900, by striking out clause No. 14 of the said by-law, and substituting therefor the following schedule.

The sum to be paid for every license shall be according to the following schedule;

For every person carrying a basket	$15.00
For every person hawking or peddling on foot	5.00
For every person hawking or peddling with a push cart	5.00
For every person hawking or peddling with a one horse waggon	25.00
For every person hawking or peddling with a two horse waggon	50.00

10. Your committee recommend that the usual grant of $75 be given to the Peterborough Horticultural Society for 1904

11. Your committee recommend that the County School Inspector be paid a salary of $200 per quarter, as required by the amendments to the Public School Act, 1903, sum to cover salary and all necessary traveling expenses.

12. Your committee recommend that this Council grant the sum of $50, towards the erection of the stand in front of the Court House used in connection with the reception given to the Governor General and party on the occasion of the visit to Peterborough last summer.

13. Your committee recommend that the payments set forth in the memorandum attached of accounts and monies paid by the Treasurer on the authority of the Warden, and under contract entered into, be confirmed.

14. Your committee recommend that the Treasurer be authorized to pay the sum of $10 to each reporter who regularly reports the meetings of this Council and publishes such reports in the newspaper in which each represents.

15. That the subscription to the Municipal World be renewed for 1904.

All of which is respectfully submitted.

T. M. HUNTER,
Chairman.

County Council Chamber, Peterborough, January 30th, 1904.

On motion of Councillor Hunter, seconded by Councillor Fitzgerald, the report was adopted.

APPOINTMENTS

The Committee on Appointments reported as follows through their chairman, Councillor Menogue;

The Committee on Appointments beg leave to report, recommending as follows;

1. That the resignation of Mr. W. B. Roxburgh as Trustee of the Norwood High School be accepted, and that Mr. T. Fraser, of Norwood, be appointed to fill the vacancy caused thereby.

2. That Mr. W. B. Ritchie be reappointed Trustee of the Norwood High School.

3. That Messrs. B. A. Peck and R. C. Strickland be appointed members of the Board of Audit of accounts in connection with the administration of justice.

4. That Mr. John E. Belcher, C.E., be re-appointed County Engineer.

5. That Dr. William Caldwell be reappointed Gaol Surgeon at a yearly salary of $150, payable as formerly, the sum to cover all expenses heretofore charged.

6. That Mr. Henderson Nesbitt be reappointed Caretaker of the Court House at a yearly salary of $175 as formerly.

7. That Mr. Thos. Flood be appointed caretaker of the Pigeon Creek Bridge at a yearly salary of $25 as formerly.

8. That Mr. W. J. McIlmoyle be appointed caretaker of the Buckhorn Bridge at a yearly salary of $5.

9. That the Warden and Messrs. Fitzgerald and Moloney be representatives of this County on the Board of Management of the Peterborough Historical Society.

10. That Mr. Edward Young be appointed caretaker of the Young's Point Bridge at a yearly salary of $5.

11. That Mr. Wm. Luckington be appointed caretaker of the Nassau Bridge at a yearly salary of $5.

12. That Mr. Wm. O'Leary be appointed caretaker of the Mud Lake Bridge at the same salary as last year, and that Mr. O'Leary be notified that he is not to order any material for repairs to the County Bridges or for any other County purposes unless authorized to do so by the Warden, the Chairman of the Road and Bridge committee or the County Engineer.

13. That Mr. J. C. Bates be appointed caretaker of the Burleigh Bridge at a yearly salary of $5.

14. That the appointment of a caretaker of the Gannons Narrows Bridge be left in the hands of Mr. Shaw with power to appoint a caretaker at a yearly salary of $20.

All of which is respectfully submitted.

JOHN MENOGUE,
Chairman.

County Council Chamber, Peterborough, January 30th, 1904.

On motion of Councillor Menogue, seconded by Councillor Crowe, the report was adopted.

Councillor Shaw introduced a by-law amending by 781, respecting the licensing, regulating and governing hawkers and peddlers. The by-law is in accord with the clause of the Finance committee and was passed.

Councillor Shaw introduced a by-law appointing G. W. Bennett and Wm. O'Brien Auditors for 1904. They will be required to make a quarterly audit. The by-law was passed.

By-laws confirming the reports of the Committee on Appointments, Roads and Bridges, County Property, and Finance, and to authorize the Warden and Treasurer to borrow $20,000 to meet current expenses, were passed.

On motion of Councillor Buck, seconded by Councillor Curtis, the County Board of Examiners were appointed to consist of the County Inspector, John Davidson, Norwood; W. E. Hill, Lakefield, and Duncan Walker, Peterborough.

On motion of Councillor Crowe, seconded by Councillor Fitzgerald, the Council adjourned.

Splitting Headaches

CAN BE STOPPED AND THE CONDITIONS WHICH CAUSE THEM CURED BY FERROZONE

Poisons accumulate in the blood and spread with it every movement to all parts of the body. The brain becomes subjected, the nerves irritated, and the result is that awful headache so well known to the female sex.

Most of these poisons are absorbed into the blood from the waste matter that has accumulated in the intestines resulting from indigestion. Matter which should be promptly passed from the system through natural channels.

Ferrozone cleanses the entire intestinal tract, and the liver and kidneys as well. It cures constipation and its many attendant evils. It makes the body strong and the blood pure, induces natural sleep and enables one to eat and drink anything at any time without risk of headache, nervousness or skin eruptions.

Ferrozone is nature's own remedy for headaches. It is a lasting potent tonic and the greatest health maker the world has ever seen. It masters all female derangements, and restores weak, sickly women to a healthy vigorous condition of mind and body.

No other remedy so effectually meets the requirements of a health giving tonic and regulator as Ferrozone. Every woman and growing girl can derive marvellous benefit from its regular use, and if you suffer from Chlorosis, Anaemia, Indigestion, Dyspepsia, Poor Appetite, Nervousness or female disorders of any kind, you can make no mistake in selecting Ferrozone for a cure.

Every reliable druggist recommends and sells Ferrozone for 50 cents a box. Be sure you get the genuine article, and refuse a substitute. Remember the name and insist on only Ferrozone. Sent to your address if price is forwarded to N. C. Polson & Co., Kingston, Ont.

TO THE AFFLICTED.

Dear Reader,—Are you a sufferer from any of the following ills: Lack of ambition, nervous exhaustion, ideas easily confused, irritability of temper, impairment of memory, despondency, general debility, liver not right, kidneys out of order, rheumatism, dyspepsia or indigestion, dizzy or fainting spells? Does your heart palpitate? Do you have smothering or sinking sensations, pimples, or eruptions of the skin, etc, etc.

If you are troubled as above, you can be cured by the use of Dr. Clarke's Wonderful Little Red Pills. A trial order of three boxes for $1.00 will convince anyone that these pills are truly wonderful. We are daily in receipt of letters bearing the highest testimony. We have not space to tell you all about them here, but will answer any enquiries as to their merits. Mrs. John Macdonald, Durham, N.S., writes us, "After taking two boxes of Dr. Clarke's Little Red Pills for indigestion, which I had been troubled with for a number of years, I am now perfectly well. I followed the directions carefully."

To every one sending for a trial order and finding good results we ask to observe our special offer enclosed with every box. It is of special interest to every one.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or 3 boxes for $1.00.

Cures in 1 to 5 days. Guaranteed not to stricture. Prevents Contagion. THE EVANS CHEMICAL CO. CINCINNATI, O. U.S.A.

MEN AND WOMEN.

Use Big G for unnatural discharges, inflammations, irritations or ulcerations of mucous membranes. Painless, and not astringent or poisonous.

Sold by Druggists or sent in plain wrapper by express, prepaid, for $1.00, or 3 bottles $2.75. Circular sent on request.

PULLING UP STAKES IN PETERBOROUGH

No Matter When or Where You See a Bargain, There's a Better One For You At

GOUGH BROS.

GOOD-BYE SALE

The second week adds to the intense interest of this sale. Its an occasion that warrants unbridled enthusiasm. Nothing can stop its progress.

Do you know how we're fixed? $68,000 worth of Suits, Overcoats, Furs, Boots, Shoes, Hats, Caps and Furnishings, must be slashed to pieces to bring down the stock. Are you thinking? Can't you see what this means? Can't you see that we must sell at a heavy loss in order to pull up stakes in time to let in the new firm.

WILL ANYBODY KINDLY RISE IN THE MEETING and say that Gough Bros. ever was or ever will be undersold. The fears of competitors and the frantic efforts of their bosses, cut no figure with us. No cast-iron "transformation" sale bulletin of reduced prices can side-track GOUGH'S GOOD-BYE SALE. We stand by the town and will issue new lists of cut prices every week that must beat the best markings of any other dealer by 25 per cent.

If anybody offers to sell Men's Overcoats and Suits worth $10 for $6.98, down goes Gough's prices to $5.98.

If anybody offers to sell Boys' Suits and Overcoats worth $6.00 for $4.48, down goes Gough's prices to $3.48.

If anybody offers to sell $3.00 Trousers for $2.48, down goes Gough's prices to $1.98. And so on all through the gamut.

Don't you see the logic in our slashing—we're pulling up stakes in Peterborough—necessity knows no law—the stock can't be moved or kept for another season.

Dry Placer Miner, formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. W invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 200 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house of sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer, gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

CURES in 1 to 5 days. Guaranteed not to stricture. Prevents Contagion. THE EVANS CHEMICAL CO. CINCINNATI, O. U.S.A.

MEN AND WOMEN. Use Big G for unnatural discharges, inflammations, irritations or ulcerations of mucous membranes. Painless, and not astringent or poisonous. Sold by Druggists, or sent in plain wrapper, by express, prepaid, for [illegible] or 3 bottles [illegible] Circular sent on request.

'Henry Fielding's Dream'

By CORTLAND MYERS.

He paused a moment and then said: "I did not come to trouble you. I will not disgrace you any more than I have. But I came this way to see you and ask forgiveness, and then go and give myself up."

"Oh, my,' said Elsie, "you shall not do that. Cannot there be something done?"

"Oh, my," said Elsie, "you shall not do that. Cannot there be something done?'

Henry sat with his eyes to the table, and did not know what to say.

Elsie continued "I will do anything for you. We will give up the home, or anything, rather than have you do that."

"No," said he, as he clenched his hand in firmness, and bit his lip. "I must do that, and only that. I cannot hide any longer. I must face the penalty."

Henry looked up, and said: "I would not see you suffer if I could help it, and you have my fullest forgiveness, but what other way is there out?"

"There is none,' said he. "I do not want any. If I am paying the price of my crime, it will be the first and only peace I can get.'

He remained with them only that one night. All persuasion failed, and his determination was immediately carried out.

The hard master, conscience, was obeyed.

The sentence of life imprisonment was the penalty, and the law of the harvest was proven again.

CHAPTER XII.

Is This a Dream?

The week before a new home was to be established, and the harmony of two hearts united to make the sweetest music on earth, Henry was awakened in the night, at the end of a strikingly real dream.

It was one of those clear visions of the night hour, which seemed to possess almost as great, if not greater, reality than that which the eyes see in brightest light.

Everybody recognizes the experience of a sudden start and wakefulness in the night, and the first wonder— whether it is a dream or actual life.

He could hardly make himself believe he was not just what this peculiar part of human life had made him think he was. So vivid had been the lightning flash in the darkness that it kept his eyes open for an hour, and his thoughts rushing against and tumbling over each other. This dream might have had an introduction in the hours of some day, but he did not recognize it.

He had now seen himself suddenly transferred from foreman in the factory to the place of owner and employer. Something like this had once been the star in his sky, but he had thought it a shooting star, and that it had fulfilled its mission and disappeared forever. He had changed his plan of investment, and all his savings had been placed in Elsie's life.

That was a mystery now, but it was the greatest treasure he ever had in this world or the next.

The strangest thing in human existence is the working of Providence, but it is, none the less, a certainty.

Plan, purpose and prayer do not always return in the same garments in which we dress them, as we send them out on their holy errand, but they return laden with richer blessing than hope or faith dared expect.

Henry Fielding had now at last reached his ideal, and desire had been satisfied, but it was a dream. Something only for a night, and a disappointment— a mushroom instead of an oak.

In his dreams he saw himself at the head of a great business, conducting it on Christian principles, and securing the interest and sympathy of all his employes. He had discovered the great secret. There was no clashing, and no outburst of jealousy. There were no bitter, biting sentiments being uttered on either side. There were no strikes, and no possibility of them. The spirit of Christ was not foreign to the spirit of successful commercial enterprise. The Golden Rule and the Sermon on the Mount were not enemies of the employer or employee, either one.

That which awakened him was the sound of his own voice, and he was saying, "Heaven bless your union. Our interests are one."

He held the secret of his dream, but it would not say good-by to either his memory or imagination.

The day before the joyful sound of the wedding bells he had revealed the strange vision to Grace, and said he wished he might, for her sake, as well as his own, change his position, and attempt to reach the ideal of his life.

They were one in spirit and desire to reveal Christ to the world, and especially to the workingmen. Never did two hearts carry sweeter love. There was no chasm— his wish was hers.

The proposition was made by her that a part of her money be used in the purchase of a site and the erection of buildings suitable for the same business as that in which he was now engaged, and that he be at the head of it, to try the effect of the Gospel, and example of Christ in every department of it.

After two years of hardest toil and almost rigid exemplification of the principles of his Christian life, Henry Fielding stood in the presence of all his employes, to say:

"The plan which has been adopted here so far will be continued. We will meet every six months, and talk over the interests of the business, because its welfare concerns you just as much as it does me. I propose that you shall have your just share of its profits. I shall not hold any selfish secret from you. I am not only willing, but desirous, that you shall know the condition of the business, and that you shall pass your opinion concerning the share which you think you should receive.

"The risk is mine, the plan and strain are mine, and I am confident that you will recognize all this. I am willing to trust you, and when I cannot, I must cease to conduct the business. I take you into my confidence, and I want you to call this your business. I do not believe much in some kinds of co-operation. Most all of the attempts in calculating and mathematical methods have failed; but I do believe in this kind of co-operation, and it is a vital part of my Christianity. If I cannot do business right, I will not do it at all. If I cannot do it as a Christian, I will not do it at all. If I cannot do it with your love, and deepest interest and satisfaction, I do not importence. Of what value is money, that is in it is of minor and trivial importance. Of what alue is money, when it rests in the selfish hand, or in the treasure of a slave-holder? Money is only good to invest in other lives, and in eternal interests. That is the way I look at this business. It is the best channel for mutual helpfulness.

"If you have any grievance, don't hold it, and increase it, but come right to me, and we will talk it over as brother men should.

"Shall you continue to have your union? Yes. Make it just as valuable as you possibly can. Protect yourselves and your fellow man. Protect your skill; secure the best legislation. Make the union an educational factor. Increase its power for good. Give the needy in it a share in your prosperity. Look after the sick and the sorrowing. Do not lose sight of the great object of your organization. I am not afraid of it. It is a friend to my factory, if we do as I have suggested, and as I have agreed to do by you. Mutual understanding and mutual sympathy is our salvation.

"I shake hands with every man of you, in a righteous compact to do my part. When you come to understand what it means to furnish the capital, and the risk, and the brains, and the nervous strain, you will not ask anything unjust. I wish you would consider me a member of the union. Of course, I cannot be, and yet, perhaps, that day will come — anyway, when the employer might be an honorary member. I don't see anything impossible or impracticable in my being at your meeting sometimes, or you might consider these meetings, each six months, as union meetings. I promise you it will be more for your good than any other gathering of the organization. At least, I want you all to count me as your best friend."

"We will, sir," came from all over the room, and in every man's heart there was an echo to every word he had uttered.

As they were separating, Henry Fielding hastened to one side of the room, to the side of a man who carried sorrow in his face, and said:

"Charles, I am in sympathy with you in the great loss of your little boy. I only heard of it to-day. I had a little brother die of scarlet fever, and your grief carried me right back to the old home and boyhood days. If I can serve you in any respect, I am ready to do it."

As he turned away, some man who had overheard the conversation whispered to another: "That man is a Christian."

His men were not machines. He knew them as best he could, and respected, yes, almost reverenced, manhood wherever he saw it.

He recognized them when he saw them, and the friendly nod of the head brightened the world for a many a man, and drove him toward better things, and to the side of Christ, because he always felt, if he did not say, "There goes a Christian."

The factory prospered. The men did not strike, and it was at last proven that "Godliness was profitable unto all things." "Did not Christ belong to a labor union?" Was this a dream?

The End.

UP IN THE GRAND OLD MOUNTAINS

Freed from the daily struggle, freed from the cares of earth.
Far from the noise-rent city, teeming with pain and mirth,
Freed from the bonds of labor, hidden from sham and fraud,
Hearing the songs of wild birds, living close up to God!
O what a sense of freedom, O what release from pain,
O what a heavenly calmness soothing the care-worn brain,
Out where the trout are leaping, out where the wild deer play,
Up in the grand old mountains dreaming the hours away.

Lie in the breast of Nature, held in her mighty arms,
Drinking her wondrous beauties, revelling in her charms,
Feeling the mountain breezes, soft as a feathery kiss
Fresh from the lips of Nature, thrilling the soul with bliss!
Flowers of tender beauty gazing with timid eyes
Into the pine tree's shadow, where the intruder lies—
Never is heaven nearer than here on a sunlit day,
Up in the grand old mountains dreaming the hours away.

Dashes the crystal brooklet down through its narrow bed,
Eager to meet in battle the boulder giants ahead,
Fearlessly smites the monsters, pounds at their breasts all bare,
Flinging its misty banners high in the balmy air!
Down through the gorge it dances, babbling a gay refrain
Till hid in the breast of the river that flows through the spreading plain,
Leaving behind the laggard, nor cares if he choose to stay
Hid in the breast of the mountains dreaming the hours away.

This is the dream of leisure, this is the cream of rest,
Far from all care and trouble, hid in old Nature's breast,
Coaxing the red health-roses back to the toil-paled face,
Feeding the brain prostrated and wrecked in the wealth-mad race,
This is the Elysian haven to which we with gladness flee
When worn and sore from the beating of the billows of labor's sea,
Tasting the sweets of idling, drinking the breath of May,
Up in the grand old mountains dreaming the hours away.

—James Burton Adams.

JAPAN STILL PREPARING

London, Feb. 3 —A correspondent of The Times at St. Petersburg says a military officer of high position declares that war is inevitable. The Ministry of War is prepared to allow only fifteen days more of peace. The influence of Admiral Alexieff is still uppermost. He is strongly opposed to any essential concession, and advises that war is preferable.

Japan Fixes War Pay.

London, Feb. 3— The correspondent of The Times at Tokio says an ordinance was issued today fixing the war pay of the army and navy. It was also officially denied that any statement of the situation was recently made by Japan to the powers. Russia's answer is expected about the 6th inst. Meanwhile the public anticipates no concessions, though there is an easier feeling in some circles. Japanese residents are withdrawing rapidly from the Liautung peninsula. There is no official intimation of the cessation of commercial traffic on the railways.

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 15th from 5 cents to 10 cents per share. This company owns 6 claims, 600 x 1500 each. A 70 foot shaft on the Martha claim shows a vein of $20.82 ore 5 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $30.00 to $15,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay them $240 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address.

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-29-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,

DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS, Cincinnati, O. Prescott, Ariz., July 29th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of th ecountry. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Prest.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-28-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

BRITISH PARLIAMENT OPENED BY THE KING

Eyes of the World Will Watch the Proceedings in London

MANY DIFFERENT FACTIONS IN THE HOUSE

A Brilliant Affair—Intense Interest Being Taken in the Political Matters at Present

London Feb. 3—Parliament was opened yesterday by King Edward in full state. This session promises to be one of the most interesting and important in the history of the British Parliament. Every nation in the world is materially concerned in the divisions that will shortly occur in the House of Commons, as out upon their result the futur policy of the British Empire must largely depend. No government of recent times has ever re-faced the Legislature under such altered conditions. Since Parliament adjourned in June last not only has the Cabinet been entirely reconstructed, but the party lines have been completely broken. Seven distinct factions have taken seats in the House of Commons yesterday, namely, the followers of Premier Balfour, who favors a policy of tariff retaliation, but who objects to protection, the Chamberlain party, who insist that protection is necessary to the unity of the Empire; the out-and-out free traders, who are opposed to any tinkering with the fiscal system. The foregoing were all formerly known as Unionists.

The Liberals, though they were almost to a man free traders, are split up into two different factions, one following Sir Henry Campbell-Bannerman, and insisting on Home Rule, and the other regarding Lord Rosebery as their logical leader, and refusing to make Home Rule a plank of their platform.

The Labor party completes the triple division of th Liberal free trade ranks.

John Redmond and the Irish party make the seventh faction.

A COMPLEX SITUATION

In view of this complex state of affairs, the most astute politicians frankly confess themselves to be at sea. So many Cabinet Ministers, including Joseph Chamberlain, Charles T. Ritchie, and Lord George Hamilton were absent from their accustomed places on the front benches, the oldest parliamentary hands will scarcely be able to distinguish between the supporters and the opponents of the Government in fiscal question. The Duke of Devonshire, Lord Avebury, Mr. Goschen, Sir John Gorst Lord George Hamilton, Lord Hugh Cecil, Winston Spencer Churchill, and many others identified with the present party in power, will be Mr. Balfour's most bitter opponents the moment the fiscal question is raised. That will come quickly, for John Morley intends introducing an amendment to the King's speech on this point. It is possible, though hardly probable, that Mr. Morley may turn out the Government. The debates are likely to take several days. Strenuous efforts are now making to get the free trade Unionist party members not only to abstain from voting, but to openly join the Liberal forces in the Opposition lobby. However, even if this is accomplished, and the Duke of Devonshire's followers make common cause with the Liberals who regard Lord Rosebery as their leader, it would not constitute a solution of the differences of opinion which exist between Sir Henry Campbell Bannerman and the Liberal ex-Premier.

Some Amendments.

Besides the amendments by Messrs. Morley and Redmond, the Government will be attacked on the report of the war commission. This will be taken up by Wm S. Robinson, Liberal.

Another amendment will be moved by David Lloyd-George, Liberal, denouncing the Government's Education Act, while the employment of Chinese labor in the Transvaal is likely to come in for severe criticism.

A few months ago these topics would have attracted intense interest, and might have driven the Government into a corner. Now they are almost forgotten in the question of the hour—free trade versus protection.

Many members of the House of Commons scarcely know their own mind as yet on the vital topic, and several are undecided on which side of the House to sit.

Chamberlain Questions.

Joseph Chamberlain's tariff commission has mailed to all manufacturers appearing in trade directors in the United Kingdom an enquiry form with regard to trade conditions as affected by foreign tariffs. The replies are designed to form the basis of further enquiry on which the commission intends to formulate a tariff bill which it will submit to the country.

The form contains eleven questions. The questions follow;

What is the proportion of your output for foreign markets?

What is the proportion of your output for colonial markets?

What branches of your home trade have suffered from competition?

Are any articles similar to those you manufacture imported into our country below your cost price?

Are such articles placed on the British market below the normal cost of production in the country of origin?

Is your trade suffering from the adverse competition of foreign countries owing to difference in wages, hours, etc.?

Has your export trade suffered in recent years owing to the tariff of any foreign country?

What reduction in the tariff of any foreign country would enable you to compete successfully within that country with commodities made therein similar to those you manufacture?

What is your experience with respect to foreign competition in the colonies?

In your trade do you suffer from the operation of patent laws or registration laws of other countries?

HOW THE DOMINION GOT KNOCKED.

Britain Made Practically no Protest in Selection of American Commissioners

London, Feb. 2.—A Parliamentary paper was issued today respecting the Alaska boundary award. It shows that Hon Mr. Sifton, writing to Lord Lansdowne on Oct. 22, said;

"We are much indebted to Sir. Robt. Finlay for his opening argument, which, in dignity, clearness, and mastery of detail, was in every respect worthy of the important character of the issues involved. Hon. E. H. Carson and Mr. Christopher Robinson fully maintained their high professional regutations. Their presentation of the case of His Majesty's Government was all that could be desired. They enjoyed th advantages of the assistance of Hon. Edward Blake, in preparing the case. Mr. Blake's withdrawal, owing to ill-health, was a source of great regret."

Mr. Sifton also expressed appreciation of the efficient manner in which Messrs. Wade, Duff, Geoffrion, Rowlatt and Simon discharged their important duties. "Upon Messrs. Wade, and Rowlatt fell the heaviest portion of the labor attending the preparation I cannot speak too highly of the ability and judgment exhibited by both these gentlemen, who had the advantage of the services of King, the chief astronomer of Canada, whose scientific knowledge is of a high order. Mr. Pope's services were of great value"

Taffy From England.

Lord Lansdowne, replying on Oct. 30, said: "I have received the King's commands to signify to you and those who worked with you, His Majesty's approval of the ability with which you advocated the interests of the Empire in the question of great importance to this country and Canada. I ask you to offer the best acknowledgment of His Majesty's Government for the manner in which Messrs. Robinson Blake, and others of the Canadian Bar, and the public service, who have taken part in the proceedings, have argued the British case before the Tribunal."

The paper shows that in July, 1899, Lord Salisbury wrote the American Ambassador, suggesting that the terms of the Anglo-Venezuelan arbitration treaty be applied to the Alaska question. In reply, the United States thought the terms inapplicable to the Alaskan controversy.

Canada Up Against It

Lord Onslow, replying on February 28, re Canada's objection to the American commissioners, said: "His Majesty's Ministers are as much surprised as the Canadian Ministers at the selection of the American members of th e tribunal." "His Majesty's Government was convinced that it would be useless to press the United States to withdraw the names, but their was virtually nothing but to choose between breaking the negotiations altogether" "which would be a grave misfortune in the interests of Canada" or accepting the American nominations, and "appointing as their colleague representatives appropriate to the altered circumstances of the case."

UNCLE SAM AND BRAZIL

United States Secures Preference From Brazil

Washington, February 3.—Without the sacrifice of a single duty on products entering the United States, and, in fact, without any consideration at all, United States Minister Thompson has secured preferential rates on several lines of staple American products imported into Brazil. The details of the arrangement, as made public, are that Brazil gives preferential rates to the following products of the United States; To flour in barrels, 25 per cent.; to flour in sacks, manufactures of rubber, oils, wines, paints, varnishes, condensed milk, clocks and watches, 20 per cent.

Minister Thompson says that, with the exception of flour, none of these articles are being imported into Brazil from the United States in any quantity at the present time. As for flour, the imports, formerly 1,200,000 barrels per annum, about six or seven years ago, have fallen off to about 500,000 barrels per annum, owing to the excessive duty, which the present agreement will diminish.

—Jack Pogue is again in the 'toils. Last night he was found lying in a snow bank at the corner of George and McDonnell street, and would undoubtedly been frozen had not P.C. Stewart conducted him to the police station. He will come up this morning.

AN IMPOSING FUNCTION

Ceremony in Honor of German Emperor's Birthday

Berlin, Feb. 1—At the Reichstag dinner tonight, given in honor of the emperor's birthday, Count Von Ballestrem president of the reichstag, related a recent conversation between himself and Emperor William during which, in response to Count Von Ballestrem's reference to the emperor having met the czar during his recent illness, his majesty said; "In case of there being anything serious the matter with me, I wished to leave my son in agreeable and neighborly relations."

A great crowd gathered in front of the palace early today both to salute Emperor William on his birthday and to get good places from which to see the members of the royal family and court and other officials offer their congratulations to the emperor. The majesty, surrounded by generals, appeared before a window overlooking the square and acknowledged the acclamations. From that time onward carriages arrived containing those of rank sufficient to permit them offering their good good wishes, beginning with the members of the family and their suites, the cabinet ministers, the heads of the army and navy, visiting kings and princes and ambassadors, among them United States Ambassador Tower. The emperor received the callers in the pillar hall until midday.

JAPAN CALMLY AWAITS ANSWER

DETERMINED THAT DELAY WILL NOT HURT HER CHANCES

RUSSIA VERY PERSISTENT

Recent Negotations Made it Plain That Her Pretentions Extend to Corea

Tokio, February 3.—That Japan will accept a technical victory in Manchuria while suffering a practical defeat should be regarded with suspicion. The Government and the country are determined that Russia's restoration of Manchuria to China shall be good in law and good in fact. The first principle of Japan's policy in this matter is to prevent Russia, from having an excuse for effecting a military occupation of Chinese territory, that would be perilous primarily to Corea and secondarily to Japan itself.

Persistence on Russia's part in perfecting a military and naval machine for the purpose of overshadowing Japan would be a cause of war regardless of the tone or trend of negotiations. The Mikado's advisers would be less unyielding in their opposition to Muscovite plans in Manchuria had not the St. Petersburg Government, in the course of discussion, disclosed the fact that its pretensions extended to Corea.

That discovery showed the Japanese the real nature of Russia's ambitions, and decided them to risk war rather than permit Russia to acquire a position whence it could realize those ambitions by force.

Japan calmly awaits the decision of the St. Petersburg Ministry fully determined that the delay shall not be protracted long enough to injure the Japanese chances. There is good authority for believing that the Mikado will strike first should such a course prove necessary for the defense of the nation's interests.

NEWS NOT REASSURING.

St Petersburg, February 3—Despatches from Vladivostock announce that 16,000 men are expected there this month, to strengthen the garrison, while orders for the mobilization of the reserves in all the territories of the Far East are shortly expected.

Preparations are making for the mobilization of all, the horses liable to Government requisition.

The Japanese, in alarm, are leaving the territory traversed by the Eastern Chinese Railway.

According to the Port Arthur Novykrai, the Japanese are intriguing to create disturbances in Corea, so as to have an excuse for intervention. The Japanese reports of the intentions of the Seoul garrison to mutiny were, it is added, circulated with the object of inducing the Emperor of Corea to seek refuge in the Russian legation. The only result, however, was to determine the Emperor to place himself under the protection of the United States legation in case of necessity.

QUIET AT TOKIO.

London, February 3.—5.50 p.m.—A despatch to Reuter's Telegram Company from Tokio to-day says the Russian answer has not yet arrived there and that there is an absolute dearth of reliable news. But the despatch adds, well informed persons 'continue indisposed to expect a satisfactory answer from Russia."

London February 3.—The correspondent of The Times at Chumbi, says that while rumors still prevail to the effect that an attack on Col. Younghusband and the British mission is likely unless the mission is withdrawn, no blows have been struck. It is known that Thibetan reinforcements are rapidly increasing, and the genral of the Lhasa district, in an interview with Col. Younghusband asked him to withdraw, saying that otherwise the consequences would be serious. Col. Younghusband seems to be confident that there will be no conflict, but it is obvious that any overt act of hostility would wholly change the aspect of the political relations which the Government of India has consistently upheld.

THE NEGRO POPULATION.

The Spectator cordially approves the suggestion that negroes be imported into the Soudan from the Southern States of the union, as free men, of course, to teach gradually the thin population of the Soudan all the methods of cotton cultivation. It says; "The climate will exactly suit the negro, who, when well treated, is a decent citizen, anxious to make money, and accustomed to the ascendancy of the white man. The Soudan in such circumstances will furnish the finest cotton field in the world."

MR. BONAR LAW.

Mr. Bonar Law, M.P., speaking at Edinburgh, said, with the example of China and Germany, there was no need to go abroad to see what retaliation meant.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.68 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $62.68 and $79.00 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present course it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1879, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

The PETERBOROUGH BROKERAGE CO., Fiscal Agts.
PETERBOROUGH, ONTARIO.

Equitable Gold Mining Co.

R. C. LANE, President. E. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 365-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

ARTHUR S. GARLICK, Meriden, Conn., Secretary.

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE S. WILCOX, RICHARD F. DORSEY,
WILLIAM GARLICK, ARTHUR S. GARLICK, B. F. BARNES

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hindsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is 5x7 feet and is 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs) is as follows: Copper, 16.05 per cent.; Gold 0.02 ozs.; Silver 92.40 ozs. Total value $92.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper, $6 40; Gold, $6.82; Silver, $254 31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatsoever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years. Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5.500,000 (now claimed to be worth $15,000,000). About six years have elapsed since he purchased it. The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado. New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN."

Mr. Edwin J. Hulbert, M. E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

B. F. BARNES, Fiscal Agent
Room 14, Wilcox Building, Meriden, Conn.

A HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State o California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity.

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely certain to others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to

J. W. BUTLER, PRESIDENT,
713 Market St., San Francisco, C l.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placers in the ages past.

The Pearl Gold Mining Co. of Idaho

owns seven groups of mines—thirty-seven mining claims and is now working in ore in three of its mines.

The Treasury Stock is offered at a price that will unquestionably make money for those who invest. The Stock is non-assessable—no debts—all clear titles—safe, experienced and conservative management.

FIRST FACTORY GIRLS ARRIVED

BRITISH WOMEN'S IMMIGRATION SOCIETY SENDS OUT WORK WOMEN

POSITIONS AWAITING THEM

Second Party Will Reach Montreal Very Shortly to Get Work in the City

Montreal, Feb. 3—Nine skilled and experienced workwomen have arrived from London to take positions in Montreal.

This is the first detachment of young workingwomen who are being sent out through the assistance of the British Women's Immigration Society, under the auspices of the Hon. Mrs. Joyce, to find work in Canada. Positions have already been obtained for these women, who are all London Club girls, highly recommended as to character and general standing.

The young women came out by the steamship Canada, in charge of a matron, and arrived at Halifax on Sunday morning, coming on to Montreal by the Intercolonial Railway. They were met and taken to the Women's National Immigration Society, on Osborne street, where they will remain until suitable boarding places are found for them by the society. Most of them are skilled dressmakers.

The second party of factory girls will come on the Canada's next trip.

CHAMBERLAIN DEVELOPS.

The eve of Parliament finds Chamberlain undergoing two other interesting developments. Mr. Chamberlain realizes that no policy can succeed in England without the votes of workingmen. No labour representative has been found to serve on his Tariff Commission. Presumably the labour unions are for the moment disposed to boycott the enquiry. Nevertheless, the commission has invited all the labour associations to assist the enquiry by answering questions and sending witnesses. The other development of the Chamberlain policy affects British agriculture. The British farmers have shown increasing uneasiness at the prospect of a preference in the British markets for their most active rivals in Canada and Australia. A special agricultural section of the commission has been formed, therefore, under the leadership of that old-time protectionist ex-Minister Chaplin. Of course, if British agriculturists and manufacturers had their way, the new protection would go far beyond Mr. Chamberlain's modest ten per cent. on foreign imports. Mr. Chamberlain's chief difficulty indeed, will be to keep their support without approaching the McKinley tariff levels.

ENGLISHMEN EXPECT WAR.

Despite the pacific Russian assurances most Englishmen are driven to expect war in the Far East. For them it is a leap in the dark. The governing classes cling to the hope that the Anglo-Japanese treaty will tend to isolate the conflict, believing that the Czar would be unlikely to demand French assistance, when he knows that he thereby would bring the formidable British naval power against Russia, but war once begun has a habit of running its own course. As the Liberal journals point out, there are the questions of the Dardanelles, of coaling stations on the road to the Far East, and of the neutrality of the Suez Canal, on any one of which Japan, as Great Britain's ally, might expect her assistance and an outburst of public opinion might force the hand of the British Government. Finally, there is the chance that advantage might be taken of Russia's preoccupation to force a crisis in the Near East, with all its complications to Europe, hence the appeal which the more reflective journals already are making to English speakers and writers not to whip up so dangerous an element as public opinion against Russia.

BACK TO THE LAND.

Mr. Chamberlain has written a letter to Edgar Wallace, approving of the scheme of replacing on the land agricultural laborers stranded in London.

FACTORY WOMEN FOR CANADA.

The British Women's Emigration Society is endeavoring to raise £30,000 to send 2d women to Canadian factories.

SIR EDWARD GREY.

Sir Edward Grey asked the Manchester Reform Club if they thought there was a case in which any country benefited by retaliation, instead of protectionists being able to throw open Colonial markets to British goods, the Colonies would still further raise the duties.

COLONIES' BEST FRIEND

Lord Strathcona, speaking before the Newport Chamber of Commerce yesterday, said the Colonies regarded Mr. Chamberlain as their best friend, and he had done more for the Empire than any other.

USE OF RADIUM

Has Been Tried Successfully in Restoring Sight

Philadelphia, Feb. 1—Charles H. Sharpe testified today that he had been made totally blind by a fall from a trolley car and that his sight had been restored for the use of radium. He is suing the transit company for damages. He stated that doctors had told him the optic nerve was so seriously involved it could not be reached by treatment and he had resigned himself to blindness, when Dr. J. L. Borsch, an ophthalmologist, returned from Paris with a tube of radium. He bound the tube of radium over one of Sharpe's eyes and allowed it remain there several days. The result was a cure. Dr. Borsch corroborated the testimony of Sharpe. The suit was settled out of court.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA —AND— BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00.
Par value $1 00. Full Paid and Non-Assessable

At 75 Cents per share

This company now owns the well-known Augusta mine and its extension for over 1000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer
for a limited time
only a
SPECIAL BLOCK
OF 50,000
SHARES OF
THE TREASURY
STOCK
of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1 00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is to-day giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 196 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 600 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*
C. L. ARZENO, General Manager.
603-604 Exchange Bldg., Denver, Colorado
ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO,
FISCAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL.
The Peterborough Brokerage Co., Local Agents.
WANTED—GOOD AGENTS IN EVERY CITY.

Cold In The Head.

Cured in Ten Minutes by Simply Inhaling

Actual size.

CATARRHOZONE

THIS SIMPLE INHALER is a most wonderful cure for colds, coughs and catarrhal diseases. Simply inhale the medicated air at the mouth and nostrils. It spreads through every air cell and passage of the breathing organs, clears away mucous discharges, heals sore spots, and relieves congestions. It is pleasant, simple and effective.

ORDINARY COLDS last just about ten minutes when Catarrhozone is breathed deeply into the lungs and exhaled through the nostrils.

COLD ON THE CHEST is relieved quickly and cured with absolute certainty in half a day if Catarrhozone is inhaled ten minutes every hour.

ASTHMA AND BRONCHITIS are relieved right away, and cured to stay cured by the persistent use of Catarrhozone.

CATARRH and DEAFNESS are almost instantly relieved and thoroughly eradicated by inhaling Catarrhozone.

A GUARANTEE is given with every complete Catarrhozone outfit to give satisfactory results, and a trial will convince the most skeptical of its merits. Price $1.00. Sample size 25c. Sold by all druggists and N. C. Polson & Co., Kingston, Ont.

Lakefield Carnival

A grand masquerade skating carnival will take place at the Lakefield skating rink on Tuesday evening, Feb 16th.

Handsome Drop Curtain

A very handsome drop curtain, painted by Mr. Fred Cook, has been added to the stage equipment of the T.A.S. hall. The scene depicted on the curtain is in the Vatican Gardens, Rome, and is done in a very artistic manner, reflecting much credit on Mr. Cook's artistic ability.

The Late J. B. Nicholls

The death occurred at Laporte, Texas, yesterday, of Mr. J. B. Nicholls, a former resident and native of Peterborough. Deceased was well known not only in his native township, Smith, but throughout the district. He was a man of high character, and was greatly esteemed. Miss Nicholls, of the Collegiate Institute staff, is a sister. His host of friends in Peterborough will sincerely regret his demise.

—A special meeting of the George st. Young Men's Guild will be held next Tuesday evening in the Y.M.C.A. at 7.30 o'clock.

The attendance at the

Peterboro' Business College

is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre of Canada.

Over 80% of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write for particulars regarding our correspondence course

WM. PRINGLE,
Principal

The Late Simon Clancy

Mr. Simon Clancy, who was taken ill with appendicitis at McDonald's lumber camp a week ago, and who was removed to his father's home in the 5th ward, passed away on Tuesday. He was 24 years of age and unmarried. The funeral will take place from the family residence this morning at nine o'clock and proceed to St. Peter's Cathedral, thence to the Roman Catholic Cemetery.

A Huge Marl Deposit

Toronto Globe—Mr. Thomas Stewart and H. O. Leary, of Lindsay, and a number of others will call upon Premier Ross on Wednesday morning at eleven o'clock. They wish to discuss with him matters relating to the deposits of marl in Sandy Lake, in Harvey Township, Peterborough County. They have asked for an interview with Hon. E. J. Davis and Hon J. R. Stratton.

Secretary Appointed

On Monday last Mr. James Ellis entered upon his duties as Boys' and Membership Secretary at the Y.M.C.A. The work at the Association is increasing most favorably and the necessity of assistance to Mr. Williamson and Mr. Aplin was quite necessary. Mr. Ellis is a man well qualified for the position and will doubtless prove of great assistance to the staff.

At 104 Years

The death occurred on Friday last at the residence of her son, Mr. John Leahy, Douro, of Bridget Condon, wife of the late Patrick Leahy, at the very old age of 104 years. Her husband came to Canada 70 years ago and settled on the farm where Mrs. Leahy died, Mr. Leahy died in 1871. The deceased enjoyed remarkably good health almost up to the time of her death. Five children survive her, one son, Mr. J. P. Leahy and four daughters, Mrs. Barrie, Mrs. Crowley, Mrs. Lynch, and Miss Leahy, living at home, all of Douro. The late Mrs. Leahy was well known throughout the vicinity and was greatly esteemed and beloved. The funeral took place from the son's residence on Sunday afternoon to Douro cemetery, and was very largely attended.

PETERBOROUGH TURF CLUB

Election of Officers to Take Place on Monday

At the annual meeting of the Turf Club held on Monday, the election of officers for the ensuing year did not take place. Another meeting will be held on Monday afternoon next, when the Club will reorganize for the coming season.

A SMALL FIRE

Grand Central Block Damaged to Extent of $500

Last night about seven o'clock smoke was discovered pouring from the casing which surrounds a chimney in the C.P.R. ticket office, in the Grand Central Block. An alarm was sent in which brought out the Fire Brigade in quick order. After the fire was located the blaze was soon extinguished, but not until damage to the extent of about $500 was done.

The flats immediately above the ticket office were badly soaked.

The fire was caused by an open flue next the casement of the chimney, which is used by Messrs. M. L. Henry & Co.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mrs. J. R. Stratton will not receive today, being out of town.

—Miss Aileen Fair, daughter of Mr. Robert Fair, is ill with la grippe.

—Bowmanville Statesman:—Miss Electa Goard, Peterborough, is visiting her aunt, Mrs. Wm. Foley.

—Rev. W. A. Gustin, M.A., Rector of Port Hope, is visiting Rev. J. L. Holah at St. Luke's Rectory.

—Mr Gladstone Main, of the Bank of Montreal branch, Lindsay, has been transferred to the Peterborough branch.

—Mrs. T. Harrison, who has been the guests of friends in Campbellford for the past two weeks, has returned home.

—The many friends of Mrs. T. G. Hazlett, who has been quite ill with a severe cold will be pleased to learn that she is now able to be up.

—Friends of Mr. Frank Bell, Clerk of the Division Court, will regret to learn of his illness at the Nicholls Hospital.

—Mrs. W. K. Routley and Mrs. John Routley, of Kingston, are the guests of Mr. and Mrs. C. B. Routley, Stewart street.

—Misses Edna Hill, B. Friese and M. Detcher and Mr Geo Robertson are at Campbellford attending the Epworth League Convention.

—Mrs. J. H. Brandon, Fenelon Falls, who has been the guest of Mrs. W. H. Robertson during the past few days, returned home yesterday.

—Mr. Wm. B. Proctor returned to Portsmouth, Ohio, this morning, after spending a week in town on account of the illness and death of his father-in-law, Mr. Captain Henry McDonald. Mrs. Proctor and child will still remain at home for awhile with her mother and sister.

STUDYING MEDICINE

Work That Requires Good Sustaining Brain Food

The medical student like any other brain worker requires food that restores the steadily wasting gray matter in brain and nerves. A doctor of San Francisco says:

"For the first three years of my course at college I suffered much from severe indigestion, with consequent loss of weight and energy of body and mind. At the commencement of last season through the advice of a friend, I purchased a package of Grape-Nuts.

"For two meals daily I ate nothing but Grape-Nuts with good rich cream as directed on the package, and to my extreme satisfaction I found that all the symptoms of flatulence, acid eructations and mental depression disappeared entirely. I gained in weight, strength and cheerfulness, and at the final examination my grades were among the highest in the class and better than those of any previous year.

"Prolonged and hard study lowers the tone of the system generally, the secretions of the stomach being frequently the first to become impaired. In my estimation there is nothing in foods that will cure indigestion so efficaciously as Grape-Nuts.

"The food also possesses great sustaining power and I highly recommend it to all students and brain workers." Name given by Postum Co., Battle Creek, Mich.

To brain workers in particular "there's a reason."

Look in each pkg. for the famous little book, "The Road to Wellville."

ORANGE DEMONSTRATION IN PETERBOROUGH

ANNIVERSARY OF THE BATTLE OF THE BOYNE

To be Observed Here on July 12th if Funds can be Raised for the Purpose

This is Peterborough's turn for the Orange demonstration, which comes our way every four years. The last occasion was on July 12th, 1900, when over 10,000 orangemen and their friends visited Peterborough.

At the annual meeting of the County Orange Lodge, held in the Orange Hall Simcoe street, on Tuesday evening, delegates from every lodge in the county were present, with the exception of Apsley. The bad state of the roads making it impossible for the latter to get down.

It was decided to hold the demonstration in Peterborough on the coming 12th of July, providing the local lodge receives sufficient encouragement from the citizens to warrant them in doing so.

The following officers were elected for the ensuing year;—

Bro. W. A. Kindred	Co. M.
" Dr. J. A. Burgess	D. Co. M.
" J. C. Daldie	Co. Chap
" W. H. G. Armstrong	Co. Sec.
" Col. J. W. Miller	Co. Fin. Sec.
" Ald. Jos. Batten	Co. Treas.
" Wm F. Elliott	D. of C.
" M. B. Weir	Lec.
" Geo. Bartley	Dep. Lec.
" T. C. Houlden	Dep. Lec.

The above officers were duly installed by Bro. J. B. McWilliams, Past Co. Master and Past Jr. Dep. Grand Master, Ontario East.

We have no doubt that ample funds for the demonstration will be forthcoming when the time arrives.

ELECTION OF OFFICERS

Young Men's Guild of the George Street Church

The following officers were elected at the regular meeting of the Young Men's Guild of the George street church;

Hon Pres.—Rev. J. P. Wilson (re-elected).

Hon. Vice-Presidents—J. J. Jeffries, S. R. Armstrong and A. W. Cressman.

President—W. B. Warne, (re-elected)

Vice-President—M. J. H. Hutchinson.

2nd Vice-Pres.—H. Gray

Secretary—W. Wood

Treasurer—S. Galley, (re-elected.)

The following chairmen of committees were appointed;

Social—P. Hetherington.

Lookout—A. B. Boomer.

Musical—B. Turner (re-elected).

Sports—R. Dobbin.

INCIDENTS OF THE DAY

Newsy Paragraphs Picked Up By Reporters on Their Rounds

—How is this for an old-fashioned winter?

—Trains have been demoralized on both roads for some time owing to snow.

—All Saints' Women's Auxiliary will have an oyster supper on Tuesday evening.

To-night there will be a free cooking demonstration in the Y.M.C.A. Building at eight o'clock. Miss Hills, who has come from Toronto to teach the classes in connection with the Y.W.C.A., will give the demonstration.

—John Pogue, a drunk, who was found lying on the sidewalk, was remanded until Friday at the Police Court yesterday. A second drunk was not sufficiently sober to appear.

—Yesterday forenoon a small blaze in the Grand Central Block was extinguished with the chemical extinguishers by the brigade before any material damage was done.

—Toronto World—H. F. Strickland, the well-known electrical engineer, is a grandson of Mrs. Morgan, Peterborough, who is one of the heirs to the large English estate. The doubt cast upon the authenticity of the Canadian heirs, he says, will be easily removed, and the proving of one marriage, which can be done, will be sufficient to acquire the fortune.

BOARD OF EDUCATION

Inaugural Meeting of the Board of Education Last Night

The inaugural meeting of the Board of Education was held last night in the secretary's office, Mr. J. J. Hartley in the chair, and all the members present except Mr. W. H. Hill and Peter Hamilton.

The Committees appointed for 1904 are as follows;

Finance Committee—R. Fair, chairman; and Messrs. L. M. Hays, J. J. McGinn, W. H. Wrighton, J. Stevenson.

Property Committee—V. Eastwood, chairman, H. P. Kennedy, W. G. Ferguson, F. J. Jamieson, R. R. Rogers and J. Crane.

Supervision Committee—Wm. Pringle, chairman, W. H. Hill, Dr. Burnham, R. Morgan and Peter Hamilton.

Committee on Appointments—The whole Board with Mr. W. H. Hill as chairman.

Visiting Committee—The same as last year, with the addition of Messrs. Rogers and Morgan.

The Board adjourned till Monday evening next.

EVERYBODY READS THE TIMES.

ASSOC. FOOTBALL AND CRICKET

Enthusiastic Meeting Held at the Crown Hotel

A meeting for the purpose of forming a Football and Cricket Club, to consist of Old Country players, was well attended last evening at the Crown Hotel. There was great enthusiasm displayed, and every hope is entertained of forming a first class team. Although the meeting was called on short notice, there was considerable business transacted, football being the principal subject discussed, cricket to be considered at the next meeting. It was proposed, seconded and carried, that the name of the club be the "Old Country Wanderers"; that it be impressed upon the public that this is not entirely an Old Country club, the only stipulation being that all players shall be from the "old sod," namely—English, Irish, Scotch and Welsh.

The next meeting—when it is hoped that all true lovers of sport will attend, as all are heartily invited—will be held at the Crown Hotel, opposite the Post Office, next Wednesday evening, Feb 10th, at 8.30 p.m.

Advertise in The Times

OSTRICH LOGIC.

"When I can't see danger there is no danger." That's the logic of the ostrich which hides its head and exposes its body to the hunter. There are not a few people who seem to have gone to the ostrich to learn logic. The most dangerous enemies of humanity are the enemies which can't be seen, the disease breeding microbes which infect the blood. It is harder to get the microbe out of the blood than to keep it out, but Dr. Pierce's Golden Medical Discovery does both, by purifying the blood and then keeping it pure.

If there are eruptions on the skin, boils, pimples, sores or other signs of impure blood, use Doctor Pierce's Golden Medical Discovery, which will purify the blood and cure the eruptions which come from it.

"My blood was all out of order, and I had to go to the doctor," writes Mrs. James R. Moss, New London, Stanly Co., N.C. "He gave me medicine which helped me for a short time. In the winter of 1899 I got worse than I had ever been. My tonsils were enlarged and my neck swollen all out of shape; my throat was sore and I could not cure it. My husband went for the doctor, but he gave me no encouragement. He helped me a little, but it did not last long. He attended me for twelve months, when I heard of a lady whose condition was like mine, who was taking your medicine and was getting well. So I secured some of the medicine and began taking it. In one week I was able to do my cooking. When I began taking the medicine I could sit up only a few minutes at a time, and I could rest or sleep only a little while at a time. My throat was so sore at times I could not even swallow sweet milk, and my tonsils were full of little eating sores. My left side was swollen out of shape and I could hardly get my breath. The doctor said I would not get well, but three bottles of Dr. Pierce's Golden Medical Discovery, three bottles of his 'Pellets,' three bottles of Dr. Sage's Catarrh Remedy and the use of salt water did the work and cured me."

Dr. Pierce's Pleasant Pellets cure constipation and its consequences.

An Unwelcomed Guest

"Mick" Fallon was an unwelcomed guest at a residence at the North end of Water street about 10.30 last night. "Mick" lives at Auburn and during the course of the evening got a superfluous quantity of tanglefoot inside his anatomy, and started out for a constitutional stroll. When he arrived near the above house he evidently found himself in need of a rest, and so entered and ensconced himself by the kitchen fire. The head of the house had retired and the ladies were very much alarmed at such an intrusion, and he was at once aroused and acquainted with the facts of the case. On being questioned "Mick" was found to have lost his memory entirely and in fact did not know who he was. As he had neglected to leave his card when he entered, the only recourse seemed to be the police and Chief Rusael was notified. He called Constable Stewart, who kindly consented to act as "Mick's" body-guard, and conducted him to the police station, and he will appear this morning and answer as to how it was he made a call at such an unseasonable hour.

TO THE AFFLICTED.

Dear Reader,—Are you a sufferer from any of the following ills: Lack of ambition, nervous exhaustion, ideas easily confused, irritability of temper, impairment of memory, despondency, general debility, liver not right, kidneys out of order, rheumatism, dyspepsia or indigestion, dizzy or fainting spells? Does your heart palpitate? Do you have smothering or sinking sensations, pimples, or eruptions of the skin, etc, etc.

If you are troubled as above, you can be cured by the use of Dr. Clarke's Wonderful Little Red Pills. A trial order of three boxes for $1.00 will convince anyone that these pills are truly wonderful. We are daily in receipt of letters bearing the highest testimony. We have not space to tell you all about them here, but will answer any enquiries as to their merits. Mrs. John Macdonald, Durham, N.S., writes us, "After taking two boxes of Dr. Clarke's Little Red Pills for indigestion, which I had been troubled with for a number of years, I am now perfectly well. I followed the directions carefully.

To every one sending for a trial order and finding good results we ask to observe our special offer enclosed with every box. It is of special interest to every one.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or 3 boxes for $1.00.

EXTRAORDINARY SITUATION IN BRITISH HOUSE

The Two Chamberlain's, Son Leads House, Father Looks On

London, Feb. 5— Great animation prevailed yesterday, when the House of Commons assembled for business after the formal opening of Parliament.

Mr Joseph Chamberlain was warmly cheered by the bulk of the Conservatives.

Mr. Austen Chamberlain, Chancellor of the Exchequer, in the absence of Premier Balfour, who is suffering from influenza, temporarily assumed the duties of leader of the House.

Canada Complimented.

The mover and seconder of the address in reply to the speech from the throne both referred with satisfaction to the settlement of the Alaskan dispute, and paid a tribute to the manner in which the award was received by Canada.

Mr. Laurence Hardy (Conservative) mover of the address, alluded to "the war which was threatening a vast area of the far East," and said he would trust the Britian Government to do its utmost to maintain peace.

Sir Henry Campbell-Bannerman, the Liberal leader in the House, followed. After expressing regret at the absence of the Premier, Sir Henry said he desired to question the Government regarding its attitude on the fiscal question, and asked was it a new Government with a new policy? The only way of dealing with the existing confusion, he added, was to appeal to the common sense of the electors of the country.

Sir Henry severely arraigned the Government's attitude on the fiscal question and announced that Mr. John Morley would in a few days introduce a most comprehensive amendment, involving the whole situation.

The Two Chamberlains.

When Mr. Austen Chamberlain rose to reply in behalf of the party of which his own father is supposed to be the most powerful member the House was spellbound. It had been expected Mr. Akers-Douglas, Secretary for Home Affairs, would take the Premier's place, and interest was also heightened by the fact that Sir Henry Campbell-Bannerman, the Liberal leader, had just concluded a merciless satire on Mr. Joseph Chamberlain. The situation was without parallel in the recollection of the oldest politician, and all eyes were fixed alternately upon the father and the son.

Mr. Joseph Chamberlain, who had sat unmoved under the ridicule of the Liberal leader, turned nervously towards his son, who now takes precedence over him. With his monocle in his eye, an orchid in his buttonhole, and his hands clasped across his knees, the most prominent figure in the British Empire listened while his son defended him.

Mr. Austen Chamberlain spoke haltingly and under evident strain; yet when he referred to his father, it was always as "the member from West Birmingham."

Now and again cheers greeted Austen Chamberlain, whereupon, with unmistakable anger, his father turned his glance in the direction of the offender, and occasionally cheered his son on. As Mr Austen Chamberlain neared the conclusion of his defence of the attitude of Premier Balfour and his father towards the fiscal question, the interruptions grew more frequent, and the Chancellor of the Exchequer clutched the brass-bound treasury box, on which Gladstone was so fond of leaning and addressed his remarks almost solely in the direction of his father. Defiantly Mr. Austen Chamberlain accused Sir Henry Campbell-Bannerman of attacking the Premier in his absence, and with a touch of pride he said, "The member from West Birmingham is here; he can speak for and look after himself."

The House regarded the proceeding as extraordinary, and the speech as weak.

On behalf of Premier Balfour, Mr. Austen Chamberlain declared the House of Commons must first decide whether or not it desired any change at all in the fiscal system, and until that point was settled the Opposition demand for details of the Government's fiscal reform plan could not be granted.

For the first time in years Joseph Chamberlain took his seat as a private member of the House of Commons, and was separated from his former colleagues in the Cabinet by a gangway. From this seat he saw his son act as leader of the House of Commons, a position which Mr. Joseph Chamberlain, with all his years of Parliamentary experience, never attained.

Though John Morley's amendment to the address to the throne is not likely to be destructive, the Government is thought to be nearing its end.

The Irish party, which now almost holds the balance of power, held a conference during the day, and decided to take no action until the Government has defined its intentions towards the Catholic University and the amendment to the Land Purchase Act, and for the present will probably abstain from voting on any division that would endanger the Government.

Morley's Amendment.

The text of the amendment to the address in the reply to the speech from the throne, referred to by Sir Henry Campbell-Bannerman, and which was moved by Mr. Morley in behalf of the Opposition is as follows: "It is our duty, however, humbly, to present to your Majesty that our effective deliberation on financial services is impaired by conflicting demonstrations from your Majesty's Ministers. We respectfully submit the judgment of this House that the removal of protective duties for more than half a century actively conduced to the vast extension of the trade and commerce of the realm, and the welfare of the population, and this House believes that while the needs for social improvement are still manifold and urgent, any return to protective duties, and more particularly when imposed upon the food of the people, would be deeply injurious to the national strength, contentment and well-being."

The sitting was suspended at 7.30 p.m

Reign of Terror Exists 'In the City of Hayti

Conspirators Against President Were Shot Down, One Man Killed

Washington, Feb. 5 —Advices from thoroughly authentic sources, which reached several persons in Washington today indicate that a terrifying state of affairs existed recently in Hayti. One letter from Port au Prince says of the happenings:

"Affairs here are in a state of wild and dreadful disorder. While the President, Gen. Nord, was in Gonaives, a conspiracy was discovered to inaugurate a revolution for the purpose of getting control of this city and forcing the President to agree to certain measures respecting the liberation and pardoning of a number of Haytiens implicated in the bank scandal. Learning of the conspiracy the Military Governor of the city, with a number of soldiers, broke into the house where Gen. Maximo Monplaisar, a leader, and a few of his friends were gathered. Orders were given to shoot all those within. Those who were killed were Monplaisar, his son, one or two other persons, and a servant. The owner of the house escaped by jumping out of a second storey window, breaking his leg, but managed to creep to the house of a German, who gave him shelter. The military authorities imprisoned his wife. The man then returned to his house on the condition his wife be released. The authorities found him in bed. Without any ceremony they fired 12 bullets into his body.

"The German Admiral informed the authorities if their action did not cease he would land marines and take possession of the city. The excitement is somewhat allayed, but is still intense and may break out at any moment. Nearly all of the Legations are full of refugees, even the American Legation has fourteen, among whom there are said to be three Senators and two Deputies. Most of these reached the Legation by scaling the rear wall some 17 feet high. The Legation was surrounded by troops when the French steamer left, and a close watch is being kept on it."

London, Feb. 5— A blue book on South Africa issued today contains a patriotic despatch from Lord Milner, British High Commissioner in South Africa, in which, referring to the Transvaal Legislature's approval of Chinese labor, Lord Milner says he realizes the gravity of the action, but there is not the shadow of a doubt as to its wisdom. The depression in business is increasing daily, the revenues are falling off, many people are out of work, and unless the situation soon changes a great exodus of whites is inevitable.

Public opinion, he adds, is decisively in favor of imported labor.

Mr. Rudyard Kipling, speaking at Rondebosch, said the Bond victory meant the shifting of the South African map end for end, and the revival of the old bitter work which was ended at Pretoria.

Chicago, Feb. 4.—The arbitrators in the strike of the livery drivers made announced their decision. The result is a renewal of the old contract, with the exception of two items, which were eliminated in favor of the owners. These two items are that there shall be no more delegates of the unions posted in the stables, and that liverymen are not bound to have uniforms made by union tailors. The men are to receive $12 a week for a 12-hour day, with 25 cents an hour for overtime, with one day off in each week. These were practically the conditions before the strike.

Sensational Developments

Hamilton, Ont., February 5.—The sensational developments promised in connection with the proceedings to quash the telephone by-law, came to light yesterday afternoon when Ald. Stewart and Sweeney were examined for discovery by the solicitors for the plaintiff in action. Under cross examination, Ald. Stewart admitted that when the bylaw was under consideration, he was approached by a prominent business man, who in an indirect way offered him a consideration to vote for the bylaw. He scorned the offer. Ald Sweeney refused to answer questions along the same line. He would not deny that he had been approached, but denied accepting a bribe.

Devonshire Cream.

What is known as Devonshire cream is a species of pasteurized cream and is made as follows:—

"The milk must be taken direct from the cow and strained into the pans in the usual way. It should set in a cool dairy, and I believe for want of this cool apartment many a good housewife has failed to turn out the genuine article. Good, sound pans must be used, as they have to bear constant heating. There is an objectionable plan in some establishments of leaving the milk in the sheds for a time after it is drawn from the cow. Clotted cream made from such milk will not turn out a good flavor, as there is sure to have been more or less tainting of milk while standing about. Just now many Devonians milk out in the open field, and if the cows are quiet the plan has its advantages, for there is no tainting of milk there.

"This requires the most care; indeed, there is nothing else in the whole process but a mere tyro could manage. As soon as the milk is cold, or, say, about nine or twelve hours after brought from the cow, the pans are lifted to the fire. In big dairies there are what are known as Devonshire stoves especially made for the purpose. The stoves so made, heat water in which a number of pans may be set so as to scald a quantity of milk with little trouble. In smaller dairies the kitchen range does duty, the pans of milk being set in vessels of boiling water, or the pans may be set on a heated range. In any case, the object is to scald the milk, and to do it promptly and exactly. It should reach such a temperature that causes a little movement on the surface—a very slight simmer suffices; then it may be removed back to the dairy to get cold. When cold, the cream is taken off at convenience, and that is clotted cream, which is rightly, so highly esteemed. In cold weather the milk is all the better left for twenty-four hours or even thirty-six, before scalded."—Hoard's Dairyman.

Strawberry Cure for Rheumatism.

"The strawberry cure for rheumatism is the latest fad I have heard of," said a druggist. "This cure has, too, some reason and some fact behind it. Linnaeus, the great naturalist, cured himself of rheumatism with strawberries, and it has recently been proved that strawberries contain salicylic acid, which is the rheumatism remedy that all physicians use. Linnaeus, I understand, was very poor and very rash. In studying nature he would go out in all weathers, and it is said that he would often sleep all night in wet clothes. Consequently, rheumatism developed in him. He cured this disease by eating several quarts of strawberries a day. His biographers narrate the story, and in that way the fruit's popularity as a rheumatic specific was achieved. Lately, on account of the discovery of salicylic acid in strawberries, this popularity has increased. I know a great many rheumatic persons who are eating strawberries three times a day, with great benefit to their heath. Salicylic acid, the rheumatic specific, is used also to keep milk fresh and to preserve meat."—Philadelphia Record.

The size of the seed for potatoes influences the yield. In England whole potatoes are used almost in every section, and successful growers in the United States use seed potatoes cut in half, never cutting to smaller sizes. Deep ploughing, deep planting and level culture give better results than hilling. A single plant in a place gives the largest tubers, but not so many as when two or more plants are together.

Humor of the Hour.

The Family Friend—I suppose the baby is the sunshine of your home?

Mama—Sometimes. Frequently he is the storm centre.—Puck.

"To what do you attribute your longevity?" asked the reporter.

"My which?" queried the oldest inhabitant.

"Your longevity," repeated the reporter.

"Never had it. As far as I can remember I ain't never had no sech complaint."—Puck.

Teacher—How far is Philadelphia from Pittsburg?

Tommy—Jist about as fur as it kin be. Pittsburg's got de pennant cinched, an' Philadelphia's wid de tail-enders."—Philadelphia Press.

How, says Mary, with many sighs,
Shall I prevent those nasty fighs
From spoiling this, the best of pighs?
A welcome step is heard—"Arighs!
Sighing will never win the prighs:
Success is hers who only trighs
Poison the crust, and each one dighs!"
Now Mary turns, and with surprighs
Reflected in her wondrous eighs
Before her sees dear Cousin Lighs.
—New York Sun.

"If honesty is the best policy——"

"Well?"

"Why, then most politicians ain't politic."—Chicago Evening Post.

Beulah—Did you have a good time at the beach?

Belle—No! It was awfully stupid. Only a few men there?

Yes; I was engaged to the same man the whole summer.—Yonkers Statesman.

Mr. Kidder—Ah, how-der-do, Doctor! If you have a few minutes to spare, I wish you would come over to my house and chloroform my youngest boy.

Dr. Price—What is the matter with the lad?

Mr. Kidder—Oh, his mother want to comb his hair.—Harper's Bazar.

"Yes," said the dentist, "to insure painless extraction you'll have to take gas, and that's fifty cents extra."

"Oh!" said the farmer, "I guess the old way'll be best; never mind no gas."

"You're a brave man."

"Oh! It ain't me that's got the tooth; It's my wife."—Philadelphia Ledger.

Carrie—I'm sure you misjudge Mr. Sweetser, papa. He is a man of great ambitions. You should hear him tell of the things he is going to do.

Carrie's Papa—And I suppose I'm one of 'em, but I reckon he'll find it harder to accomplish than he fancies it is.—Boston Transcript.

THE MUNICIPAL ACT

To Remain Unchanged—No Increase of Indemnity

The standing committees of the Legislature will be organized early next week. It is probable that the Municipal Committee will have comparatively little business to deal with, as there is a pretty strong feeling among influential members of the House that, in view of the fact that the Municipal Act was consolidated last year, no amendments should be permitted to go through now. There are 55 petitions for private bills in so far, which is about half the number of last year. The time for receiving petitions has been extended to February 10.

Members of the Legislature are already wondering what the sessional indemnity will be this year. It was increased last year from $600 to $1,000, and, in view of the Premier's remarks at that time, it is thought highly probable that it will be allowed to remain at the larger figure, if not permanently, at least for this session.

HOME FROM CONVENTION

Mr. J. J. Hartley Represented a Local Union in Trenton

Mr J. J. Hartley has returned from Trenton, New Jersey, where he represented the local union of Bricklayers and Masons at the international Union Convention, which convened on January 11th, and lasted for two weeks. It was one of the largest conventions ever held there being some four hundred delegates present and many questions of interest to the organization came up. The Executive officers of the Union are—

President—W. J. Bowen

1st Vice-President—Thos. Preece, N.Y., Chicago.

2nd Vice-President—P. M. Canty, Washington, D.C.

3rd Vice-President—Thos. Izzard, of Toronto.

Secretary—W. Doherty, Massachusetts.

Treasurer—Pa. Murry, Albany.

Editor Journal—E. A. McHall.

DIED FROM HIS INJURIES

Fall on the Ice on December 17 Resulted in Death

Yesterday morning an old and esteemed citizen, in the person of Mr. Wm Jackson, passed away. The deceased fell on the pavement on Dec. 17th, while getting out of a sleigh at the Post Office, receiving serious injuries, including a fracture of the arm and injury to the left side. Serious developments followed, and death ensued as above.

The deceased was born in Scotland, and came to Canada 60 years ago. He was a machinist by trade, and came from Kingston to Peterborough 35 years ago, and worked for the Wm. Hamilton Manufacturing Co. for 17 years. He was greatly esteemed by all who knew him and his demise will be sincerely regretted. The surviving children are Messrs. Wm. Jackson, Pontypool; James and Archie, of Peterborough; W. R. of Rochester, and Mrs. James W. Kane, of New York. Two brothers and one sister reside in the Old Country. The late Mr. Jackson was a member of St. Paul's church.

Interment will take place tomorrow in Kingston, the remains being conveyed thither on the G.T.R. train leaving here at 7 a.m.

Railways and Storms.

Newspapers and people who are kicking up such a row about railway trains not running on schedule time during the past few weeks seem to forget the fact that this has been perhaps the coldest and stormiest winter ever experienced since railways began to run in Canada. There has been many heavy falls of snow and not a sign of thaw to remove the accumulation, with the result that there is a greater depth of snow on the ground than there has been seen for many years. In some parts of western Ontario a depth of from five to nine feet of snow is reported. The wonder is that under such circumstances trains are able to get through at all. The Grand Trunk service has come in for, what seems to us, uncalled for and unfair criticism. The officials of the line are always anxious to give the best and most regular service possible, and as far as the division between Toronto and Montreal is concerned, have done very well, considering the unprecedented difficulties in the form of cold and snow that they have had to contend with. People have become so accustomed during recent years to luxuriously equipped trains running sharp on schedule time, that when under adverse conditions, such as have prevailed this winter, there is sometimes a little wait at the point of embarkation or delay in reaching their destination, they become unreasonable critics, and the officials of the railway, who are doing the best they can, are often most unjustly blamed. The railway companies have nothing to gain by not running sharp on time, but from the way some people talk one would think they were keeping the trains late on purpose. If Canadians would only take the trouble to investigate they would discover that they are faring just as well, if not better, than their neighbors across the line on the great railroad systems running into New York, Boston and other places. There for some time trains have been running from one to ten hours late, and traffic outside the passenger service is practically tied up. And the American railways have not half the snow nor nearly the extreme degree of cold to contend with that the lines in Canada have.

Keep easy, gentlemen; give the railways a chance; they are doing the best they can under the adverse circumstances.—Brockville Recorder, Jan. 23.

Immigration

London, Feb. 5.—Mr. James Smart, Canadian Deputy Minister of Immigration, says the prospects for a very large increase of Scottish emigration in 1904 to Canada are exceedingly promising. Mr. Smart goes to Paris this morning.

WEATHER NOTES

EVERYBODY READS THE TIMES.

A SPLENDID REPORT

Presented at Annual Meeting of Anglo-American Fire Insurance Co.

Manager Dean, and those associated with him in the control of the Anglo-American Fire Insurance Company, are to be congratulated on the splendid financial position of the Company, as set forth in the financial statement presented at the fifth annual meeting, held at the head office, Toronto, on Tuesday last. This vigorous young Company has just completed another successful year's business. Although the net gain is not as large as the previous year, as Mr. Lang, the Vice-President, put it in his speech in seconding the adoption of the report of the directors, the steady growth of the business and stability of the Company has well established for itself a reputation for satisfactory adjustment and prompt payment of losses—just the kind of treatment those who insure appreciate.

Mr S. F. McKinnon, Toronto, was re-elected President; J. J. Long, Collingwood, Vice-President, and Mr. Hugh Waddell one of Peterborough's best known and esteemed citizens, was re-elected a director.

The Anglo-American naturally does a large business in Peterborough, being represented here by Ald. Harry Rush.

SEPARATE SCHOOL BOARD

Held Regular Meeting and Transacted Considerable Business

The regular meeting of the Separate School Boards took place Wednesday evening, there being present Messrs. Lynch (chairman), Hall, Henry, Clancy, Primeau, Hickey, Murty, Carveth and Hourigan.

The minutes of the last meeting were read and confirmed.

The report of Inspector Prendergast was received and placed on file.

The report of the attendance for January was received.

Accounts were received from—

A. H. Stratton	$43 20
The Henry Co	1 35
Water Commissioners	7 30
Walter Stocker	1 50
Peterborough Hardware Co	4 70
A. Vinette	3 75
A. McDonald	1 74
Wm. Tucker	3 75
Scott & Hogg	100 00

Referred to Finance Committee.

Mr. Clancy for the Property Committee reported what had been done regarding procuring a supply of wood. The matter was left in the hands of the Committee to deal with.

On motion of Mr. Carveth, seconded by Mr. Henry, a cheque was ordered to be issued for $10 in favor of F. Cook, in full payment of his account.

On motion of Mr Hourigan, seconded by Mr Henry, that the matter of promotion in Murray Street School be referred to the School Management Committee to report at the next meeting.—Carried.

The Board adjourned.

THE LATE JOHN H. HAWKINS

Demise of the Father of Mr. J. A. Hawkins of Town

The Port Hope Guide thus refers to the demise of Mr. J. H. Hawkins, of that town, father of Mr. John A. Hawkins, of Peterborough:

"The familiar form of one of our most respected citizens will no longer be seen upon our streets, Mr. John H. Hawkins having passed away on Monday evening last at the ripe old age of over 84. The deceased was a native of the town of Leicester, England, and came to this country in the early forties. With the exception of a brief stay in Auburn, N.Y., his entire life has circled about Port Hope, he having been a resident of the town for upwards of forty years. Although a woolen manufacturer by profession, yet for many years he carried on the hotel business.

"The deceased was a thorough patriot and dearly loved the land of his adoption, and in 1866, when the Fenians invaded Canada he shouldered his rifle and went to the front in her defence. He prized his medal very highly and wore it with the dignified air of a veteran. Mr. Hawkins was a great reader and could converse intelligently upon any subject, having become well informed upon current topics of the day. In politics the deceased was a staunch Liberal, and a great admirer of Bright, Gladstone, Mackenzie and Laurier. He was a member of the Masonic Fraternity for many years. The funeral which took place this afternoon, was strictly private in accordance with the expressed wish of the deceased. He is survived by his widow, four sons and one daughter, who mourn his decease, and the sons are Geo. W., of Port Hope, John A., of Peterborough, Sydney S., of Port Hope, and Henry G., of Toronto, the daughter being married to Mr. Mark F. Smith of Oshawa."

KEENE.

—Mr. Ed. Wright, formerly of this place, has opened a barber shop in Hastings.

—The ball given by the young gentlemen of Lang on Friday evening was a very enjoyable affair. There were seventy-five couples present. Mr. D. McFarlane supplied excellent music, and, of course, Mr. Archie Moore was floor manager.

—The Hockey team played their return game with Lakefield on Wednesday last, and won by 13—3.

—Mr. James McCarthy, of Aurora, is home for a short holiday.

—Mr. R. English was in Campbellford on Tuesday.

—The second and last carnival will be held on Friday evening, February 19th.

—Mrs. Dr. McWilliams is visiting her parents in Toronto.

—Misses Aggie and Lilian Campbell left on Monday to attend college in Toronto.

—A quiet wedding took place in St. John's Roman Catholic church on Wednesday morning, at 10 o'clock, when Miss Anna O'Keeffe was united in marriage to Mr. James Walsh, of Douro. The ceremony was performed by Rev. Father O'Brien, of Peterborough, in the presence of a large number of friends of the contracting parties. Miss Mary O'Keefe, sister of the bride, was bridesmaid, while Mr. R. Walsh assisted the groom. The bride was attired in a handsome gown, with white picture hat to match. The wedding march was played by Mrs. McCarthy, organist. After the ceremony the happy couple drove to the bride's home, where a sumptuous wedding breakfast was served. The young couple will reside in Douro, and The Times joins with their many friends in wishing them a long life of happiness.

—Mr. Maurice Mulcahey, of Edmonton, is visiting his parents at present.

—The Peterborough II. Hockey team having dropped out of the league, Keene and T.A.S. are a tie. The deciding game will be played in Norwood on Monday night.

HAS THE PEACE PARTY ABANDONED ALL HOPE OF AVERTING WAR?

The Situation in the East Has Become no Longer Tolerable to Japan

THE CZAR IS FOR PEACE BUT NATION WANTS WAR

It is Believed That Hostilities May Begin at Any Moment—Japan Will be the Agressor

London, Feb. 5—The Daily Mail's Tokio correspondent says that hostilities are likely to break out at any moment. Japan is irrevocably pledged to assail Russia in her Manchurian policy, and war must come. It is only a matter of a few days.

FROM ST. PETERSBURG.

Copenhagen, February 5 — Warlike rumors reached the Danish court from St. Petersburg. It is declared that the Czar has been assured by the war party that Japan purposes driving Russia out of the Far East, if that be possible.

Nicholas has been further informed in any event the Mikado is straining every nerve to wrest Manchuria from its present occupants, to close the straits of Corea, and to advance Japanese influence in Pekin to a position of incontestable predominance. It is stated that these representations have impressed His Majesty and have left the peace party almost hopeless.

JAPAN'S VIEW.

Pekin, February 5.—Japanese officials decline to acquiesce in the view of the St. Petersburg Government that Russia would suffer disastrously in respect of prestige should the Czar yield to Japan's demand for a guarantee of the political and territorial integrity of China. Speaking to a press correspondent this morning a statesman of the first rank said,

"Japan does not ask Russia to submit to moral humiliation. On the contrary it wants Russia to vindicate its honor by adhering to the pledges made to the principal cabinets of the world. The Japanese Government stands ready to guarantee that it will respect Chinese sovereignty. It asks nothing more of Russia. If there is no moral disaster involved in this course for Japan, why should there be any for Russia?"

IMPORTANT MOVEMENTS.

Port Arthur, Feb. 5—The arrivals of Japanese coal have been stopped.

In consequence of the military authorities monopolizing the use of the railways the latter have declined to transport any more commercial freight.

The telegraph company declines to accept any more press or private messages so they will have to be routed via Che Foo. Forty-eight hours' quarantine has been ordered against Che Foo on account of smallpox.

The authorities declare the naval and military dispositions should be regarded as precautionary, not as offensive.

Port Arthur is quiet.

OCCUPIED BY JAPANESE.

St. Petersburg, February 5.—The Seoul-Fusan railroad has been occupied by Japanese troops, according to a despatch from Vladivostock, which adds that the Japanese have taken field guns to Seoul for the protection of their legation, and that they are building barracks for the accommodation of cavalry.

FALSE SENSE OF SECURITY

London, February 5—"Corea appears to consider the responses of the powers to her declaration of neutrality," cables the Seoul correspondent of the Times, "as tantamount to a guarantee of territorial integrity and consequently a false sense of security is manifested at the palace here."

GERMANS STORMED THE CAMP OF NATIVES.

Garrison in Africa Made Gallant Fight--Outnumbered by Thousands

Berlin, Feb. 5— The following cablegram has been received from Swakopmund, German South-west Africa, from the commander of the German gunboat Habickt:—

"The garrisons at Windhoek and Okahandja have been relieved by Francke's company with two guns. The relief of Okahandja occurred Jan 27, Emperor William's birthday, and was without losses.

"On Jan. 28 there occurred a terrific battle between the gallant little German force and the enemy, who numbered thousands. The engagement lasted for six hours, and ended with the storming of the main camp of the enemy, situated on Kaiser Wilhelm Mountain. Four Germans were wounded.

"After this defeat the enemy withdrew to the Onjatiangati Hills. The enemy devasted all the farms, and railroad stations in the Windhoek and Okahandja district, a portion of the Karabib, and the barracks of the Mountain battery at Johann Albrechts Heights. The losses so far are known to be 44 settlers, including women and children, killed, and in most cases the bodies were mutilated. The military losses amount to 26, and there have been 30 other fatalities. It is probable that Gobadis has been besieged since Jan. 16. The march on Omaruru will begin to-morrow. Col. Leutwein, Governor of German South-west Africa, is expected here by steamer on Feb. 6. Lieut. Winkler has arrived here with supports from the steamer Ernest Woermann."

London, Feb. 4— The Duke of Argyll, writing to the Times, declares that Lord Spencer was unjust in his reference to the colonial preference to the Motherland. Lord Spencer does not understand the necessity of each colony to foster industry in its territories manufactures. Canada, New Zealand, and Australia were pressing forward on the lines of the conference of the Premiers. Instead of minimizing the colonial efforts at preferential trade within the Empire, we should acknowledge the hearty brotherhood which in peace or war desires to work with us. The Duke adds that Mr. Bowling's 5 per cent. preference against foreign manufacturers would be quite enough to show our good-will, and its withdrawal would not be resented if it proved harmful to home interests.

Will be Fleeced No More.

The Glasgow Herald says the action of the United States Government in the Alaska case suggests an amount of duplicity not pleasant to impute either to nations or individuals. It is certain that in future arbitrations, whether or not the Dominion obtains the treaty-making power Sir Wilfrid Laurier thinks she ought, that she will drive bargains that will give duplicity no chance.

The Rev. Mr. Chisholm, from Manitoba told an Edinburgh audience that if a man was seen idle in Canada it was a sign that he was unwilling to work.

The Chronicle says the cold snap in Canada served to bring out the great resources of the railway systems there in feeding the passengers, and contrasts it with the wretched meals at the English stations on the arrival of the Continental night boat.

Blake on Irish Affairs.

Hon. Edward Blake, speaking in the House of Commons last night, said he wanted to see a university agreeable to the bulk of the Irish people instead of to Londonderry alone, under home rule, not Rome rule. It would remove the differences aroused by religious beliefs, make Ireland united, and change the whole front of national life.

MacMillan's Magazine contains an article on prohibition in Fredericton, N.B., where, it says, whiskey is sold as openly as tea. The police magistrate testified that open drunkenness had greatly diminished, but there was adequate provisions for domestic drinking.

OPERATION WAS SUCCESSFUL

Treatment for Hip Disease Effective on a Seventeen Year Old Girl

New York, February 5—Louise Marguerite Dethlifsen, the seventeen year old daughter of Mr. and Mrs. Lawrence Dethlifsen, East Orange, N.J., returned home yesterday, after having spent three months in the hospital during which she underwent the Lorenz treatment for the cure of hip disease.

She had been a sufferer ever since she was four years of age. She was able to walk, but was badly deformed. The operation has been perfectly successful and the result is looked upon as more remarkable because Miss Dethlifsen is many years past the age when operations of this kind are looked upon as likely to turn out well. Miss Dethlifsen shows no trace of her former deformity.

The girl was admitted to the Hospital for Ruptured and Crippled in New York on November 2nd, where the Lorenz operation was performed by Dr. West.

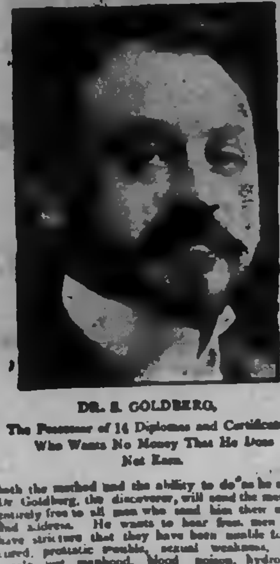
Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has



DR. S. GOLDBERG,
The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says, Dr Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. I would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply Dr. S. Goldberg, 208 Woodward Ave., Room Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

A SPLENDID PROPOSITION

The Bannie Gold Mining and Milling Company

We call the attention of investors to the splendid proposition of the Bannie Gold Mining and Milling Co., which is to be found on our mining page. This company is ably officered by gentlemen of high integrity and business ability, and we can recommend it to the attention of Canadian investors. Mr. Kidd, the local agent, will be pleased to give further information to those who will call at his office on George street. He, or his agents, will call on the leading investors in the course of the next few weeks. The following is a report on the mine, made by Mr. J. A. Conlee, one of the best known mining engineers in the country;

Herewith find a full report of the Bannie Group of Mines, consisting of nine, and two fraction mining claims, situated in Yavapai County, Walker Mining District, 12 miles east of the town of Prescott;

The principal work is done on the Jupiter and Northern Belt, being a true fissure and contact vein, a granite foot wall, a schistose slate and porphyry for the hanging wall; the trend being northeast and southwest with a very slight dip to the west. The oxidized ores are quartz with a porphyritic gangue highly impregnated with oxide of iron. From the first level, 75 feet in length, to surface is an oxidized ore. On the surface where the 35-foot shaft is shown on map there is a bold outcropping of quartz from the mouth of the 75-foot tunnel to the summit, which is beyond the 35-foot shaft. This shaft is in the high grade chute of ore. The northwest end of this high grade chute of ore passes down through the workings to the 200-foot level, as shown on map. From the 75-foot level to the surface, 400 feet driven in on the 75-foot level gives a height of 200 feet to the surface. This is 400 feet by 200 feet—5 feet width of vein—which gives 400,000 cubic feet of ore of a good grade, some of it of a high grade, working up to a net value of $14.97 per ton, without selecting. In the center of this 75-foot tunnel a winze has been sunk 70 feet passing through a vein or ore full five feet deep in width at the 100 foot level. The drift on the 100-foot level from the shaft is intersected by this 70-foot winze. This drift from the shaft is nearly 800 feet in length, carrying a vein of ore to the width of fully five feet. This level or drift is run where the oxidized ore is changing to sulphide. In that change in all mines the ores lose their value to a certain extent. Some very high grade ore is found in bottom of this level. The bottom of this level shows that the high grade sulphides are coming in. This level, 100 feet by length, 80 feet up to the 75-foot level, virtually blocks out an ore body. Six hundred feet long, 80 feet high, 5 feet wide, gives 240,000 Cubic feet. The 200-foot shaft was sunk west of the vein some 20 feet. At the bottom of the shaft, at the 200 foot level, a crosscut has been made, cutting the vein, showing a vein of oxidized ore to the width of 30 feet that will work $18 per ton, with two feet of sulphide ore on the wall assaying up to $160. Running northwest on the vein 600 feet, being 100 feet to the upper drift, gives 600 feet length, 100 feet height, not less than 5 feet width, equals 300,000 cubic feet of ore. Then at the 200-foot level running a level northeast 600 feet gives the block of ground to the surface of 600x200 feet, 5 feet width of vein, or 600,000 cubic feet. The mill tests from all the openings above the 100-foot level give $14.90 per ton net. At the 200-foot level where the sulphides are encountered a much higher grade is found, and settles all question of doubt of permanency of the Bannie property to any practical mining man. A mine that has come to stay.

Take all the surroundings of the Bannie. Here Lynx Creek, which has produced millions from its placers, passes within one mile of the property. The Mudhole, just above the Bannie, has been a dividend paying property for years. The Victor, opposite the Mudhole, a dividend paying property. The Poland tunnel, running through the mountain, from the Lynx Creek side to connect with the tunnel from the Big Bug side, which when finished the railroad will pass through. The Poland mine has been a producer for several years, running a 20 stamp mill, treating over 400 tons per day on the Big Bug side. The Monroe Consolidated, above the Victor mine. This property has been opened up the past year and large ore bodies exposed. They are now preparing to install large reduction works. Passing over to the Big Bug side, across the divide first below Poland is the Old Mesa mine with a tunnel run in nearly 600 feet to tap the Mesa ledge, famous for its rich ore deposits worked years ago. Next comes the Merchants' Mining Company, running full blast on high grade ore and shipping it to the smelter. The adjoining claim is the Postmaster, a dividend paying property running their own mill. A recent strike on their ore runs up in the hundreds. Next comes the Red Rock, not working now, but has a good record when worked. Next, the Little Annie, a producer. Next comes the Henrietta, a dividend paying mine for years. Passing over into Chaparal Gulch we find the Little Jessie, that has paid large dividends. The Dividend, Leland, Gladstone, the McCabe, Bunker Hill and many other properties, all good producers. At the mouth of the Chaparal Gulch we come to the Iron King mine and the Extension. The Iron King is destined to excel any mine in the territory, not barring any. The Smelter close to the Iron King has all it can do. The railroad passes close to its doors. There is the Marshall Group, the Clark Group, the Murray Group. They all have the ear marks of good properties, especially the Clark group of mines. Those properties mentioned are above the average found in the Lynx Creek and Walker Districts. There is no mining district in Yavapai county that can make such a showing. All of those properties mentioned are within a radius of four miles of the Bannie Group. The smelter is within four miles of the Bannie, and the nearest point on the railroad is the same distance, but with the completion of the Poland tunnel the railroad will pass within two miles of the Bannie property. The Bannie has abundance of timber on its ground, also water. The mine is easily worked—a big, open vein. There is a good wagon road to Prescott, a distance of 12 miles. Such are the conditions of the Bannie Group of Mines.

DO YOU FEEL SEEDY?

If You are Nervous, Depressed, Sleepless, and Suffer from Sick Stomach, Headache, Constipation and Indigestion, You need a Good Tonic like Ferrozone to Build Up the System.

Thousands are in this dreadful condition, only half alive, unable to stand the strain of work and worry. There is no sense or reason in trying to be comfortable with the idea that it will pass off, and that you are going to be better soon. Unless the system is cleansed of the impurities that poison the blood, you will never be better.

The best remedy is Ferrozone. It achieves marvellous results in chronic wasting diseases, nervous prostration, faulty nutrition, heart disease and stomach troubles.

Ferrozone promotes healthy digestion which results in all food being assimilated. Nutrition is vastly improved, the blood grows rich and red and gives stability to the entire system. the store of nerve energy and force increase daily by the use of Ferrozone. The process of waste is arrested, and in its place a rebuilding of the whole system takes place.

Diseased conditions cannot exist where Ferrozone is used. It attacks disease at its very foundation, and by keeping the body well nourished and supplied with strong blood and a powerful nervous organization prevents and keeps away all manner of sickness.

There is no blood builder, nerve tonic and strength producer that can equal Ferrozone, and few people are so well that could derive great benefit from its use. It is valuable in Nervous Dyspepsia, Anaemia, Weakness, Impure Blood, Bronchitis, Neuralgia and Rheumatism. It is prepared in the form of a chocolate coated tablet and is both pleasant and convenient to use.

Ferrozone produces that high standard of health so much desired by everyone. It brings back the rosy tint to the pale cheeks of the Anaemic girls and women. It puts grace and elasticity into their movements, gives lustre and brightness to the eye, and symmetry and roundness to the form. It gives a man new strength and energy, with which to pursue his daily toil, and can be relied upon at all times to benefit and give perfect satisfaction.

You can't invest half a dollar to better advantage than in a box of Ferrozone. Your druggist has it, or it will be mailed to your address if price is forwarded to N. C. Polson & Co., Kingston, Ont.

LOST THE STRIKE

Chicago, Feb. 4—The arbitrators in the strike of the livery drivers have announced their decision. The result is a renewal of the old contract, against which the men struck, with the exception of two items, which were eliminated in favor of the owners. These two items are that there shall be no more delegates of the unions posted in the stables, and the liverymen are not bound to have uniforms made by union tailors.

The men are to receive $12 a week for a 12-hour day, with 25 cents an hour for overtime, with one day off in each week. These were practically the conditions before the strike.

Ayer's Hair Vigor

So young? And hair turning gray? Why not have the early rich color restored? It is easily done, every time. J. C. Ayer Co., Lowell, Mass.

Anglo-American Fire Insurance Company.

The Fifth Annual Meeting of Shareholders was held at the Company's Head Office, McKinnon Building, Toronto, on Tuesday, 2nd February, when the following Report and Financial Statement for the year ending 31st December, 1903, was presented by the Directors;—

Your Directors have great pleasure in presenting their Fifth Annual Report and Financial Statement of the Company's business for the year ending 31st of December, 1903, as duly certified by the Auditors.

The premiums for the year ending 31st December, 1903, less rebates for cancellation	$347,944 58
Interest on the Company's investments	7,722 15
Total income	$355,666 73

Showing an increase of income over the year 1902 of $46,920.44

The unadjusted losses at the 31st of December, 1903, amounted to only $5,747.00, of which $1,400.00 is covered by reinsurance.

The Company's net income for the year 1903, after deducting all reinsurances is $278,305.69

The operations of the Company for the year show that, after payment of all losses, charges and expenses, and providing for unadjusted claims, a balance of $34,115.16 remains.

The Company now has a Reserve Fund of $114,664.33, and a balance at the credit of Profit and Loss of $18,228.27.

Your Directors have declared and paid the usual annual dividend of 7 per cent.

Your Directors have much pleasure in expressing their appreciation of the faithful manner in which the Manager, Office Staff, General Agents and Representatives of the Company have discharged their duties during the past year.

Your Directors all retire, but are eligible for re-election.

S. F. McKINNON,
President.

ARMSTRONG DEAN,
General Manager.

To the President, Directors, and Shareholders of the Anglo-American Fire Insurance Company;—

Gentlemen,—We, the undersigned, having examined the vouchers, checked the bank balances and audited the books of the Anglo-American Fire Insurance Company for the year ending 31st December, 1903, certify that we have found them correct, and that the annexed Balance Sheet is a true Statement as at above date.

J. P. LANGLEY, F.C.A.
RICHARD LEE,
Auditors.

Toronto, 26th January, 1904.

The Report was adopted on motion of the President, seconded by the Vice-President, both of whom took occasion to congratulate the Shareholders on the Company's prosperity for the year just ended, the strength of its position, and the bright prospects for an increasing and profitable business.

The following gentlemen who served as Directors for the past year were duly re-elected, namely;—

PRESIDENT;

S. F. McKinnon, Esq. (S. F. McKinnon and Co.) ...Toronto.

VICE-PRESIDENT;

J. J. Long, Esq. (The T. Long and Brother Co.) ...Collingwood.

DIRECTORS;

A. A. Allan, Esq. (Messrs. A. A. Allan and Co.) ...Toronto.
John R. Barber, Esq. Pres. Toronto Paper Co., of Cornwall...Georgetown.
Dr. George H. Bowlby ...Berlin.
A. D. Cunningham, Esq., Barrister ...Kingston.
H. P. Eckardt, Esq (Messrs. H. P. Eckardt and Co.) ...Toronto.
John Flett, Esq. (Flett, Lowndes and Co., Limited ...Toronto.
W. J. Gage, Esq. (The W. J. Gage Co, Limited) ...Toronto.
John Knox, Esq. (Messrs. Knox, Morgan and Co.) ...Hamilton.
R. Millichamp, Esq (Messrs. Millichamp, Coyle and Co.) ... Toronto.
J. N. Shenstone, Esq., Sec.-Treas. Massey-Harris Co. Limited ...Toronto.
Dr. Uriah M. Stanley ...Brantford.
Hugh Waddell, Esq. ...Peterborough.
Emil Nerlich, Esq. (Messrs. Nerlich and Co.) ...Toronto.

The thanks of the shareholders were tendered to the General Manager, Mr. Dean, the Office Staff and Agents of the Company, for the care and attention given to the Company's business.

PULLING UP STAKES
IN PETERBOROUGH

No Matter When or Where You See a Bargain, There's a Better One For You At

GOUGH BROS.

GOOD-BYE SALE

The second week adds to the intense interest of this sale. Its an occasion that warrants unbridled enthusiasm. Nothing can stop its progress.

Do you know how we're fixed? $68,000 worth of Suits, Overcoats, Furs, Boots, Shoes, Hats, Caps and Furnishings, must be slashed to pieces to bring down the stock. Are you thinking? Can't you see what this means? Can't you see that we must sell at a heavy loss in order to pull up stakes in time to let in the new firm.

WILL ANYBODY KINDLY RISE IN THE MEETING and say that Gough Bros. ever was or ever will be undersold. The fears of competitors and the frantic efforts of their bosses, cut no figure with us. No cast-iron "transformation" sale bulletin of reduced prices can side-track GOUGH'S GOOD-BYE SALE. We stand by the town and will issue new lists of cut prices every week that must beat the best markings of any other dealer by 25 per cent.

If anybody offers to sell Men's Overcoats and Suits worth $10 for $6.96, down goes Gough's prices to $5.98.
If anybody offers to sell Boys' Suits and Overcoats worth $6.00 for $4.48, down goes Gough's prices to $3.48.
If anybody offers to sell $1.00 Trousers for $2.48, down goes Gough's prices to $1.98. And so on all through the gamut.

Don't you see the logic in our slashing—we're pulling up stakes in Peterborough—necessity knows no law—the stock can't be moved or kept for another season.

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-20-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit, Yours very truly,
R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,
D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-22-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,
SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,
ED. BLOCK.

Address all communications to Robert Kidd, Fiscal Agent, Peterborough, or to W. J. WILSEY, Prescott, Arizona.

THE
STONY PASS MINING CO.
OF SILVERTON, COLORADO
Has opened an office in
China Hall Block, Peterborough

where investors are invited to call and inspect samples of ore taken from the mines of the Company. There never was a better investment offered the people of Peterborough.

ROBERT HARRISON
Manager.

TEN THOUSAND YELLOW TOILERS FOR TRANSVAAL

Will be Introduced into the Transvaal Under Government's Sanction

London. Feb. 3— Replying to Earl Spencer's interrogations regarding the employment of Chinese labor in South Africa Lord Lansdowne declared in the House of Commons that 10,000 laborers would be introduced into the Rand mines experimentally. The Transvaal in this matter would be regarded as a self-governing colony, but nothing would be done until Parliament had accorded ample freedom of discussion.

Earl Spencer spoke of the change in Mr. Chamberlain's arguments in conducting his great campaign. It was an insult to the colonies to declare that their loyalty must be secured through a preference, when their loyalty has always been so magnificently given. Mr. Chamberlain's policy was now protection, owing to the colonial attitude. Canada objected to giving a preference because it was injurious to her manufacturers.

The Morning Post, referring to the increase in the United States navy, says it is very much mistaken if it will not stimulate Canada and Australia to take a livlier interest in imperial defence.

HON. JOSEPH CHAMBERLAIN SCORES A POINT

The Liberal Unionists Decide to Maintain Their Organization and Support Candidates

London Feb. 3— The Liberal-Unionists at a meeting of their Executive Council, held here to-day, decided to maintain their organization. The meeting was called to discuss the situation arising from the publication January 11 of the correspondence between Joseph Chamberlain and the Duke of Devonshire, former president of the Council. Mr. Chamberlain presided and made a speech setting forth the necessity of the existence of the association. He said nothing had happened to in any way interfere with its future usefulness, and added that the danger which the association was formed to combat could only disappear by a declaration of the Irish party that they had abandoned all hope of their intention of converting Great Britain to home rule.

Only two members voted against the resolution providing for the maintenance of the association.

Another resolution instructed the Council to assist the Liberal-Unionist candidates without regard to their opinions on the fiscal question, the only qualification necessary being their readiness to support Premier Balfour.

London. Feb. 3— The Birmingham Daily Post comments upon the part of the speech from the throne referring to the Alaskan boundary which says: "It must, nevertheless be a matter of congratulation that the misunderstandings in which ancient boundary treaties made in ignorance of geographical facts are so fertile have in this case been finally removed from the field of controversy." The Post goes on to say: "There is an edifying spirit of resignation to the misfortunes of others in this passage which will naturally commend itself more to the people of this country than those of Canada, but it would have been more convincing perhaps if it had been accompanied by some expression of sympathy for the Dominion in its disappointment, and of regret for the part we played in bringing that result about."

John Bull Was Bluffed.

The Express, reviewing the official correspondence on what it calls "the notorious Alaskan award," says that significant facts have not yet been made public, but it reveals the extraordinary facility with which the United States succeeded in bluffing Great Britain into accepting an appeal to arbitration, under their own conditions.

The Chronicle says: The Alaska papers remind us that Canada has a serious cause of complaint in the way our Foreign Office managed the negotiations. Lord Lansdowne was unable to attach any precise meaning to the vague phrase, "impartial jurists of repute."

Lansdowne's Views.

Lord Lansdowne in the House of Lords, referring to the Alaska award, which he declared had removed the danger of serious clashing on the spot between Canadian and United States settlers said: "The result of the finding was not entirely satisfactory, and in this respect I do not draw any distinction between the interests of Canada and ours. The question at issue was not merely the question of the position of the frontier of Canada, but the frontier of the British Empire, for the defence and integrity of which we are responsible." He did not believe that anyone expected a favorable verdict all along the line, but he found consolation in the fact that the islands awarded to the Americans had no strategical value whatever.

The St. James' Gazette, commenting on the Alaska Parliamentary paper, says it must be admitted by the most temperate minded that it is remarkable unsatisfactory. Every reader can follow for himself the successive steps by which the clearly conceived aim of the United States Government was permitted to be only too exactly realized.

The Eastern Question.

In the House of Lords, Lord Fitzwilliam (Liberal-Unionist) moved the address in reply to the speech from the throne, which was seconded by Lord Ryton (Conservative.)

Earl Spencer, the Liberal leader in the House, followed. He said he hoped the Government's friendly offices had been offered to both Russia and Japan, especially the latter, and asked for information from the Government regarding Somaliland and Thibet, and the situation in South Africa, to which, he pointed out, no reference had been made in the speech from the throne.

Earl Spencer added that he hoped an early decision in regard to the Government's policy on the fiscal question would be reached, and announced that the Opposition would take every opportunity of bringing the question before the House.

Lord Lansdowne responded. He congratulated the House on the conclusion of the Anglo-French and Anglo-Italian arbitration treaties, deplored the situation in the Near and Far East, and expressed the hope that a pacific solution of the differences in both cases would be reached. Continuing, Lord Lansdowne at some length justified the Somaliland and Thibet expeditions.

In regard to the United States, Lord Lansdowne said the United States had endeavored to translate into practice what was affirmed rather as a matter of principle in the French and Italian treaties.

Lansdowne Consoled.

Commenting on the Alaskan decision Lord Lansdowne said that, although the tribunal was not, strictly speaking, arbitral, its efforts illustrated the possibility of settling by other than diplomatic means long-standing, dangerous differences. The condition of Alaska might have brought Great Britain into a serious and acute controversy with the United States. The finding of the tribunal doubtless was not entirely satisfactory to Great Britain, but no one expected it to be an entirely favorable verdict. Lord Lansdowne was inclined to find some consolation in the fact that the military and naval advisers were confident that the two islands in Port-Channel which had gone to the United States were not of any strategical value whatever.

Concerning the Russo-Japanese dispute, Lord Lansdowne said it was an an axiom in diplomacy not to offer good offices until they were asked for. Neither of the disputants had asked for it. I was an open secret that one at least of the disputants had said that mediation was not desirable at the present time. But should the opportunity offer his Majesty's Government would gladly avail itself thereof.

Coming to the fiscal question, Lord Lansdowne said the policy recommended by Mr. Chamberlain was not the policy of the Government and Mr. Balfour had clearly defined the Government's policy He (the speaker) did not conceal his sympathy with Mr. Chamberlain's aspiration to draw the Empire more closely together, and to put the affairs of the nation on a more business-like footing. If the reward of the success of such a policy was great, the punishment of failure was irreparable, and the Government was only prudent in declining to be rushed into such proposals.

The address was agreed to, and the House of Lords adjourned at 7.25 p.m.

Oom Paul Kruger, the lion-hearted old man who defied the power of Great Britain, and who is now an exile from his beloved Transvaal, is said to be dying. Some months ago, a number of patriotic Frenchmen visited Mr. Kruger, who was then in Southern France, where he owns an estate. At the time, the old man solemnly informed his visitors that he believed the principles which had cost him such great sacrifices would ultimately triumph.

At eighty, Oom Paul's sight and memory are failing. One can hardly picture in the decrepid, pessimistic old man who now awaits the final summons, the sturdy, defiant President of the Boers. Kruger's love of country still burns brightly in his shrunken breast. But he is a pitiable figure. Irreconcilable, he sits in the gloaming which will soon be followed by everlasting night.

NEW DANGER TO CHINESE EMPIRE

RUSSIA AND BRITAIN TO COME IN THROUGH REAR

TRIUMPHS IN THIBET

Oscar T. Crosby Declares That England Has the Best of the Present Outbreak

Paris. February 4.—"China is threatened by the invasion through the "rear door' of the country by Russia and Great Britain, whose advance in this direction may become as important in its possible results to the United States as a move of the European powers from the sea. British control will be established in Tibet through the expedition toward L'Hassa, commanded by Colonel Younghusband."

This is the summing up of the observations of Oscar T. Crosby, the American explorer, who has just returned to Paris from a trip through parts of Turkestan and Tibet never before visited by a white man. On his way to Tibet Mr. Crosby visited Chinese Turkestan and later traversed Kashmir and the Karakorum caravan route, probably one of the most difficult used by human beings, in India.

DID NOT ATTEMPT L'HASSA.

"My purpose in visiting central Asia was to study the past political and racial questions connected with that region," said Mr. Crosby. "I did not believe it possible to reach L'Hassa, except by force or in disguise, and therefore proposed merely to go as far as I could.

"The British expedition under Colonel Younghusband will be able to enter L'Hassa. The Tibetans cannot resist. Those I saw were mild and peaceful people, governed by priests, who, so far as we know, do not inculcate them with the military spirit, which is contrary to the precepts of Buddhism and Lamaism. The result of the expedition will be some form of British control. Russia is doing nothing to prevent its success, and I do not think anything can be done. I do not believe Russia seriously contemplated acquiring that country, for if a natural frontier ever existed to their empire it certainly lies to the north of the vast deserts, and tremendous mountains which must be crossed before inhabited Tibet can be reached. Russia can stand British control of Tibet because she will take Chinese Turkestan as a set-off. The inhabited part of this territory is rich and populous. Three oases contain 1,500,000 inhabitants.

RUSSIA TO CONTROL.

"The Russians can and will control the commercial situation of all this region because of its proximity to their railroad Chinese Turkestan is still Chinese to the outward appearance, having officials appointed from Peking, etc., but the Russian consul general at Kashgar, who is guarded by sixty Cossacks, is the real power to the natives and Chinese there. Even if they wished to do so, which I doubt, they would be powerless to resist the Russians. Consul General Petrovsky, while courteous to us, seemed to discourage the appearance of any other than Russians and Chinese in Turkestan, taking the ground that the question of Chinese Turkestan is no great importance to the world at concerns merely Russia and India.

DISMEMBERMENT OF CHINA.

"The importance of the question lies in the fact that the taking of that territory of Tibet, which is under Chinese suzerainty, will be dismembering China. The object of the British is to make it impossible for the Russians to establish themselves in Tibet, and to do this effectively they will have to institute some kind of control. Nevertheless, the United States, which is interested, must turn her attention to the back of the empire and keep an eye there while watching the seacoast.

"With respect to Afghanistan both the Russians and British recognize its value as a buffer state, and do not desire to disturb the situation, though each fears the other may secure an ascendancy above the Ameer."

Mr. Crosby left the United States last May, stopping at St. Petersburg to obtain permission through Russian Turkestan. He took the Transcaspian Road to Andijan, its terminus, and then proceeded by caravan to Tibet.

PARTY SUFFERS SEVERELY.

On the Tibetan plateau, at elevation of from 15,000 to 18,000 feet, the party suffered extremely from the rarefied air, and the loss of his instruments caused Mr. Crosby to pass south of Rudek in Tibet, where he intended to obtain supplies. The country was trackless and uninhabited, and in the unexplored White Desert the horses died rapidly until the party was forced to stop while two men went in search of supplies. They rode 100 miles before they found human beings, and returned at the end of eleven days with camels and provisions. The nomads, who are described as being like the American Indians, refused to go into Tibet, so the company was forced to go into an uninhabited region known as Little Tibet, a part of British Kashmir.

Mr. Crosby has been invited to deliver lectures before the London and French Geographical Societies. He will not return to New York before the last of February.

A CRISIS AT HAND

A Chicago Minister Causes a Big Sensation

Chicago. February 3.— Rev. Doctor James S. Stone, rector of St. James Episcopal Church, the membership of which is largely made up of wealthy persons caused comment when in the course of a sermon Sunday, he denounced the rich of Chicago. He said in part: "That there are multitudes in this city that neither fear God nor regard man, is largely due to two causes, one the ignorance and weakness of many congregations, and the other the irreligion of our influential and well-to-do people. The greater part of the people of financial and social influence in Chicago—the people who are going to suffer the most in that terrible conflict between the classes that is threatening this country, the nearness of which seems apparent, the centre of which will be this very city the end of which no man knows—these people who should be the first in Christian example, and in every good work, are living the lives of pagans; nice pagans, if you will, but surely pagans."

BODIES FOUND

Many Victims of the Great American Desert

Salt Lake, Utah., February 3.—The bodies of between 20 and 30 men who perished from thirst while attempting to cross the desert between Moapa and Los Vegas, Nevada, have been found within a few weeks, according to advices received from the latter place. The men, it is believed, were mostly tramps who attempted to make the long journey on foot without sufficient supplies of food and water to carry them across. Many of the bodies found were without clothing, and it is believed that the victims had gone insane from thirst and wandered about in a nude condition in search of water. Some of the victims are supposed to have drunk water from "Deadman's Well," which is located almost in the centre of the desert. The water from this well, while temporarily alleviating thirst, is sure death to those who drink it.

RED TIES IN GERMANY

Only People of Revolutionary Tendencies Wear Them

Berlin, February 4.—A prolonged litigation, wherein the propriety of an upper teacher in a high school, wearing a red necktie, was the issue, came to an end Saturday at Plauen, Saxony, by the court deciding that such a cravat is at least undignified, even if not intended by the wearer as a social emblem. Dr. Weidauer, the offender, wore a red tie, as he avers, inadvertently to a school picnic, and thereupon the Plauen Anzeiger criticized him severely as an improper person to teach the youth of the city. He sued for damages, and the court in deciding against Dr. Weidauer, said the editor was quite within his functions when he disapproved of red neckwear, which in Germany is considered to indicate revolutionary principles on the part of the wearer.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.68 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $68.66 and $70.90 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the vein it would contact a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group, is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mines for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

The PETERBOROUGH BROKERAGE CO., Fiscal Agts.
PETERBOROUGH, ONTARIO.

Equitable Gold Mining Co.

R. C. LANE, *President.* W. F. NORTON, *Secretary and Treasurer.*

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, uprises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $3,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 265-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

THE PETERBOROUGH BROKERAGE CO.
FISCAL AGENTS

APPEARANCE

Is such an important feature on the table It makes a heap of difference to the pleasure of the meal whether you have a good or a poor looking Sugar on the table

St. Lawrence Extra Granulated Sugar

is the whitest and best looking Sugar to be had, and besides, it has the advantage of being the best quality and greatest strength.

Dry Placer Miner, formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine—Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house of sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

CZAR'S ARMY

In Case of of Emergency 7,500,000 Are Available

Against a Fighting Force of 273,268 for Japan

A lively discussion is progressing in the European press concerning the relative chances of Russia and Japan in the event of hostilities. The corruption resulting in the ill-equipment of the Russian navy is so notorious that opinion seems to favor the Japanese as having the better chance in case of a decisive engagement.

The London Spectator says: "For the conduct of an Asiatic power in a naval war there are few precedents. The idea which lies at the basis of European speculation, that Asiatics grow timid on the water, is contradicted by many facts of history and of many Chinese and Japanese vessels in the late war. But of their capacity to manage the huge yet delicate machines which are described as fighting ships the evidence is imperfect. So is the evidence for the Russian management of a great fleet in war time, and so above all is the evidence of the comparative condition of the rival squadrons. There have been rumors that corruption has been rampant in the supply departments of the Russian navy and that the most experienced admirals are annoyed by the condition of their ships."

Russia's Great Army.

The estimates of the size of the armies are wholly favorable to Russia. The numerical strength of the Russian army is largely a matter of conjecture. Its peace footing is about 900,000 men. As nearly as can be reckoned, the force available for carrying on the earlier stages of war amounts to nearly 3,100,000. But in case of national emergency this force could be swelled to about 7,500,000 fighting men by the calling out of the territorial reserve and the opolchenie or militia.

The Japanese army now consists of 273,268 officers and men. It is doubtful if, in case of war, this army could be raised very greatly above that figure.

Comparisons of Armies

Of the relative qualities of the Russian and Japanese infantry, there is not much to be said. Both are admirably trained and disciplined. From what was seen of the two soldiers in the China relief expedition, one might be inclined to favor the type represented by the small, compact, tireless Japanese foot soldier.

In cavalry Russia is numerically and professionally the superior. She will be able to draw upon her vast Cossack army until Manchuria is overridden with these riders of the plains. Like our own cavalry, the Cossack has been trained to fight on foot as well as on horseback, and the rapidity of his movements, as well as capabilities for rapid concentration, will as in the Boer war, be a powerful factor in opposing the Japanese. But cavalry requires forage, and forage requires transportation, so that the question of whether the limited resources of the Manchurian Railway will be able to supply this vast host, infantry as well as cavalry, will be a problem for the Russian transport service.

The Japanese artillery forces have only recently been rearmed with a very powerful, quick-fire, field gun—the invention of Colonial Ariskan of the Japanese army—which is said to excel the recent guns of Kruppp and Canet. Taking the Krupp field piece as a standard of comparison, it is believed that in range and rapidity of fire the Japanese artillery will have the advantage, while the Russians will ultimately be able to oppose greater masses of artillery to their adversaries. But it may be, as in the Boer war, that the Japanese will bring naval guns from their fleet, and use them both in the reduction of Port Arthur, and in oppposing the relief of that place.

Both Easily Subsisted.

Both armies will be easily subsisted—the Japanese perhaps the easier if a breakdown of the Manchurian Railway system under the congestion of war is to be anticipated. A Japanese soldier can live on a quart of rice a day, mixed with meat and condiments. The well-known Japanese ration of soup and black bread is also easily prepared and is nutritious.

DECLARES THAT WAR IS CERTAIN

WORLD'S FAIR DIRECTOR SAYS THAT CONFLICT IS CERTAIN

WAR CANNOT BE AVERTED

Japan Has Made Such Preparations that War Must Follow

Chicago, February 4.—War between Japan and Russia is certain, in the opinion of Kiyoshi Sugawa, director of the Japanese Exhibitors Association at the St. Louis Fair. He arrived in Chicago yesterday and is at the Palmer House.

"My country has made such preparations for war that the people would not countenance peace," said he. "Japan is ready to fight and expects to fight alone. There is no fear as to the outcome in our minds. Russia is a big country but so was China. China has appealed to Japan to protect her interests in Manchuria and we shall do so even if it is at the point of the bayonet. Russia's advance is a menace to us that every loyal Japanese resents. We hope when the war does come that the American people will treat us fairly and give us their sympathy."

Mr Sugawa formerly lived in New York, being at that time in the importing business, and speaks English fluently. His wife was the daughter of the councilor of the Emperor, who was for eight years governor of one of the principal provinces of Japan. He is accompanied by two secretaries, K. Miyamatsu and S. Mayakawa. The party will leave for St. Louis tomorrow.

"We are disappointed at the lack of space which we have for our exhibition at St. Louis," he said, "for we have planned to have 140,000 exhibitions. Instead of this we can only have 70,000 on account of the small space. These, however, will be the choicest, as it has been our aim to show the American people only the very best products of Japan. There is a great interest in the world's fair all through Japan and among all classes. The Japanese press is devoting columns to it and it is widediscussed. There will be sixty people, English-speaking Japanese, in the employ of the exhibit to explain everything to all visitors. Over 400 merchants from all parts of the country will also attend the world's fair to study American products and American methods."

Japan Fixes War Pay.

London, Feb. 3.—The correspondent of The Times at Tokio says an ordinance was issued today fixing the war pay of the army and navy. It was also officially denied that any statement of the situation was recently made by Japan to the powers. Russia's answer is expected about the 5th inst. Meanwhile the public anticipates no concessions, though there is an easier feeling in some circles. Japanese residents are withdrawing rapidly from the Liau-tung peninsula. There is no official intimation of the cessation of commercial traffic on the railways.

C. P. R. AND WINNIPEG

The Canadian Pacific Reaches Agreement With Winnipeg

Winnipeg, Man., February 3.—The clauses in the bill to amend the Winnipeg charter validating the subway agreement between the city and the C. P. R. were passed on Saturday by a committee of the Legislature on Law Amendments with a few changes. The differences had been amicably arranged beforehand and inside of fifteen minutes the matter which has occupied the city council and Canadian Pacific Railway Company for months was settled, and with the passing of the bill through the House will be finally disposed of, permitting the extensive works to be done by the railway company to be started at once. All the amendments were passed in the bill, with the exception of two which were struck out. One of these was in connection with the frontage tax which the city has sought to settle for two years, but in view of the successful settlement of the more important clauses this is not regarded as disappointing. Although no further delegations were heard, William Whyte, Second Vice-President, and J. A. M. Aikens K.C., solicitor of the C. P. R.; Isaac Campbell, K.C., city solicitor; Mayor Sharpe and several of the aldermen were present, and expressed gratification on the passing of the bill. The city solicitor said so far as the city was concerned the settlement was entirely satisfactory.

THE PLAN IS NOW WELL MAPPED OUT

MR. CHAMBERLAIN'S TARIFF COMMISSION PURSUE ENQUIRY

RESEARCH IS COMPLETE

The Colonies are Considered in Every Step Which is Being Taken

London, February 4.—The first batch of enquiry forms sent out to all British manufacturers by Mr. Joseph Chamberlain's Tariff Commission indicates what a large place the Colonies are intended to occupy in Mr. Chamberlain's policy.

Manufacturers are asked to state the effect of foreign competition upon their trade, which question, presumably, is not to include Colonial Competition. There still seems to be doubt as to whether Colonial manufacturers are to be subject to import duties proposed on foreign manufacturers, or whether the British preference will cover manufactured goods as well as food products from the Colonies.

Another question which will elicit attention is the extent of Canadian as well as the foreign dumping of iron and steel and other products upon the British markets below the cost price. The third question which will elicit attention, is how the Canadian tariff injuriously affects the British export trade, and the manufacturers are asked to state what reduction of outside tariffs such as Canadian, would enable them to compete successfully in Canada and elsewhere.

The effect of the Canadian preferential tariff will also be ascertained, and the extent of foreign competition which the British manufacturers experience in Canada and other countries will receive consideration.

Much satisfaction is expressed at today's Canadian cablegram showing the general readiness of the Canadian manufacturers to continue the British preference if Canadian industries are sufficiently safeguarded, any increase in duties being directed especially against competition from the United States.

FOR NEW CABLE TO CHINA

Bill in Congress Enables Company to Lay by Way of Alaska

Washington, February 4.—Senator Mitchell introduced a bill today authorizing the North American Telegraph and Cable Company to operate telegraph lines or cables between the shores of Alaska and the State of Washington in order to reach the Aleutian Islands, Siberia, Manchuria, China, the Japanese Empire and the Philippine Islands. The company is required to establish a line within five years between the United States and any of the Aleutian Islands.

NEW GOLD MINES

Are Looking for Gold Under a Yukon Town

Dawson, Y. T., February 3.—The town of Grand Forks is being undermined in pursuit of gold. This town stands on what was originally claimed No. 6, above discovery on Bonanza Creek. Grand Forks has a population of 800. The town has one long street, lined with brick houses, and owners of lots on which they stand, have begun digging under their own buildings, in quest of the yellow metal and are having success.

THE TIMES BOOKSTORE
MARKET BLOCK,

BIG BARGAINS

Below is a few items of the many big bargains now on sale for the balance of this month.

Webster's Dictionary

Webster's Dictionary, indexed, containing 1500 illustrations and an appendix of 10,000 words. Sale price.............. **$1.90**

Tennyson's Poems

We have for sale some very handsomely bound volumes of Tennyson's Poems, complete, size 11x9. Sale price.............. **$1.25**

PROSPECTUS

THE COLORADO AND CONNECTICUT GOLD MINING COMPANY

(Incorporated under the laws of South Dakota.)

Main Office: MERIDEN, CONNECTICUT.

Capital $400.000. 80,000 Shares at $5.00 each, full paid and non assessable

OFFICERS

WILLIAM GARLICK, Wholesale and Retail Ice Dealer, Meriden, Conn., President
J. H. & A. THOMPSON, Investment Securities, New York City, 1st Vice-President
GEORGE B. WILCOX, Retired Manufacturer, Meriden, Conn., 2nd Vice-President
B. F. BARNES, Manufacturer, Meriden, Conn., Treasurer
WILLIAM O. CORVES, Miner, Meriden, Conn., Superintendent
ARTHUR B. GARLICK, Meriden, Conn., Secretary

BOARD OF DIRECTORS

JOHN R. THOMPSON, GEORGE B. WILCOX, RICHARD F. DORSEY,
WILLIAM GARLICK, ARTHUR B. GARLICK, B. F. BARNES

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hindsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is 5x7 feet and in 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs) is as follows: Copper, 16.05 per cent.; Gold 0.02 ozs.; Silver 92.40 ozs. Total value $92.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper, $6 49; Gold, $6 82; Silver, $254 31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatsoever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years. Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5,500,000 (now claimed to be worth $15,000,000). About six years have elapsed since he purchased it. The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado. New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN."

Mr. Edwin J. Hulbert, M. E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

B. F. BARNES, Fiscal Agent
Room 14, Wilcox Building, Meriden, Conn.

A HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity.

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely certain that others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to

J. W. BUTLER, PRESIDENT,
713 Market St., San Francisco, Cal.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placers in the ages past.

The Pearl Gold Mining Co. of Idaho

owns seven groups of mines—thirty-seven mining claims and is now working in ore in three of its mines.

The Treasury Stock is offered at a price that will unquestionably make money for those who invest. The Stock is non-assessable—no debts—all clear titles—safe, experienced and conservative management.

REFERENCES—The Governor of the State, and any bank in Boise, Idaho. Write the Company for particulars. Address,

GEO. W. E. DORSEY, President,
Boise City, Idaho.

Peterborough.

A Groom's Voluntary.

Sir Frederick Bridge, the English musician, is a good story teller, according to T.A.T., and has a fund of amusing personal experiences to draw upon. One of the great musician's best stories is about a provincial church organist, who was once a pupil of his. This young man was appointed to an important church in the Midlands. In course of time he married. During his absence his voluntaries were much missed by the congregation. They had always been appreciated, and their renewal was looked forward to. "Imagine," says Sir Frederick Bridge, "the intense amusement of the people when the newly-married organist gave as his first voluntary, upon his return, Handel's 'Waft Her, Angels, to the Skies'"

To Build Cruisers.

As a result of the recent naval manoeuvres the British authorities are considering the advisability of building some "dogging" cruisers, to pursue battleship fleets of the enemy and pounce on those which are forced to fall behind. The Bacchante and the Aboukir "dogged" Lord Charles Beresford's fleet in this way almost to the Azores. The flagship Majestic had something the matter with her engines. She was frequently compelled to slow down. Then the big, heavily armed cruisers of the pursuing fleet would swoop down on her. It was necessary to slow down the entire squadron several times for her protection.

"Another point of much interest is that of speed in battleships," writes a British naval authority. "Those who have been engaged in the manoeuvres would have done much better with a few knots more in hand. There are experienced flag officers who say that high speed in battleships is not essential. Yet if gun powder and protection go before it, speed is, in nine cases out of ten, the only thing that can enable a strong fleet to bring a weak one to action. It is the factor that enforces victory and will enable the British fleet to carry on its old policy of seeking out the enemy to destroy him wherever he may be found."

The Wrong Man.

They had been married only a few months, and the wife stood by the side of her husband looking into one of the department store windows. A handsome tailor-made dress took her fancy, and she left her husband to examine it more closely. Then she went back to him, still talking.

"You never look at anything I want to look at any more," she complained. "You don't care how I dress. You don't care for me any more. Why, you haven't kissed me for two weeks."

"Indeed, I am sorry, but it is not my fault," said the man.

Turning, the lady looked at him and gasped. She had taken the arm of the wrong man.—Philadelphia Ledger.

A Baloon Trip.

There is nothing exciting about a balloon voyage. You take your place in a shallow wicker basket; decide to take a picture of the crowd as you leave the earth; hear the order "let go," and before you can press the button the crowd has evaporated—sunk out of sight—and the rest is a moving picture show, with no sense of motion, the air delightfully cool and absolute silence. Presently a voice, apparently from another balloon a long way off, asks how you like the journey. You have exactly the same trouble with your hearing you had while in the caisson, but from an opposite cause—there pressure, here rarefaction. In this case, too, the act of swallowing brings relief. A balloon trip is for all the world like sitting in a dentist's chair and taking a whiff of gas, followed by a pleasant dream. But, of course, instead of taking gas, gas is taking you. Photography under these conditions is a very simple matter—pointing the lens over the edge of the basket, waiting until the desired object comes into view, and the snapshot is taken.—W. N. Jennings, in Booklovers' Magazine.

A Quiet Village.

It seems hardly credible, says The London Telegraph, that not more than thirty minutes from all the noise and bustle of Paris there lies a village that is so quiet, so peaceful and so old-fashioned that one would imagine one's self at least one hundred miles away from the gay capital. Here at this village, La Frette by name, and about fifteen minutes' walk from Cormeilles, preparations for midday and evening repasts have to be made very early in the morning, for no such thing as a good shop is anywhere near, and the walk to Cormeilles is one which one considers twice before taking, for it is up steep and rough roads. So daily butcher, baker and greengrocer pass this quaint little place, and the villagers gather round the various tradesmen and make their purchases for the day. They also buy their clothes in this way, and may often be seen trying on bonnets, dresses and boots in the middle of the street. From a scenic point of view, all artists have agreed that there is no place to equal La Frette between Paris and Havre. To the left of the village is the park of Maisons Laffitte, and facing the park is Sartrouville, while opposite lies the forest of St. Germain, in all its green splendor. To the right is Herblay, quite an important place, whose church is visible for miles along the Seine. La Frette itself has the quaintest villagers possible. Many of them speak worse French than those of the Midi, and it is an event indeed when one takes a journey up to the capital. They are thriftiest of the thrifty. Only a short time ago one of the peasants gave his daughter no less a sum than 200,000 francs on her wedding day, and another is to receive the same amount on her approaching marriage. And yet this man, who must be worth 4,000,000 or 5,000,000 francs at least, lives in a patched-up old house and digs in the fields from early morning till late at night.

Be Regular in Milking.

The cow is a creature of habit, and therefore the time and manner of milking should vary as little as possible from day to day. The yield of milk will sometimes vary by reason of matters of such small moment that we fail to reckon them. From our results a change in milkers showed a small average loss in yield. Some cows were not affected at all, while others gave a slightly reduced yield. This will depend, however, upon the ability of the milker. Carlyle found no appreciable difference in the frequent changing of milkers. Tracy found by a good milker following a careless one an increase with five cows of 244 pounds of milk in two weeks.

Cows fed at milking time are apt to hold their milk when the customary feed is withheld. This may occur even when the animals have access to abundant pasture. This is so noticeable with some of the station cows that it is advisable to give them a little grain through the summer season to induce them to give down their milk. Emery notes that a cow that gave over seven pounds of milk gave only two pounds when her customary feed was withheld at milking time.

Allowing cows to miss a milking has a tendency to dry them up, and is liable to cause an injury to the udder, some cows being affected much more than others in this respect.—(Bulletin No. 106, Kentucky Agricultural College.)

An hour of passion is worth a year of experience, but it may prove even more expensive.

Lookers-on see most of the game, but they have to cultivate a wicked imagination sometimes.—R. H. W. Hill.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA —AND— BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00.
Par value $1 00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 7000 feet in addition to other claims approximating a total acreage of 200 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore which cannot be exhausted in five years already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer
for a limited time
only a
SPECIAL BLOCK
OF 50,000
SHARES OF
THE TREASURY
STOCK
of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate
to your heart's content,
and quickly, then let us
hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1 00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is to-day giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 196 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 800 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*

C. L. ARZENO, General Manager.
603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO,

FISCAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL

The Peterborough Brokerage Co., Local Agents.

WANTED—GOOD AGENTS IN EVERY CITY.

A Dangerous Disease

Owing to its tendency to spread to all parts of the system Catarrh should be checked in it incipient stages

Catarrh commences generally with a slight cold, and because slight, it is often neglected. But the seed thus sown brings forth a dangerous harvest, — perhaps it is the harvest of consumption, which is the harvest of death.

Better spend a few moments each day inhaling Catarrhozone, an aromatic, antiseptic remedy that is breathed in through the mouth, and after permeating all the respiratory organs, is slowly exhaled through the nostrils.

The immediate effect of Catarrhozone is magical—so prompt and efficient. Relief is instantaneous, throat and nose cleared in a few moments, by the penetrating vapor from the Inhaler. Ferrozone, taken in conjunction with Catarrhozone, purifies the blood, cleanses it of all poisons, and builds up the system so that Catarrh cannot exist.

You are sure to receive lasting benefit from Catarrhozone if bothered by Catarrh in any part of the system. It is highly recommended for Bronchitis, Asthma, and Lung Trouble, and used for Coughs and Colds in the head it has no equal.

Remember that Catarrhozone is both a local and constitutional treatment, and is warranted under all circumstances to give satisfaction. Money refunded if it fails.

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

Lakefield Carnival

A grand masquerade skating carnival will take place at the Lakefield Skating Rink on Tuesday evening, Feb 16th.

Moving Pictures

Don't miss the Moving Picture Entertainment in St. Andrew's School Hall tonight. Admission 10 cents.

Batchelor's Ball

Those having invitations to the Bachelors' Ball at Lakefield this evening, will please take notice that busses will leave Leary's livery stable at 7.30 sharp.

Purse Lost

On Thursday afternoon, between 3 and 4 o'clock on George st., a folding purse, containing four 5 dollar bills and about 15 cents in silver. Finder will receive reward by leaving same at this office. 77t

How to Cook

The demonstration of Free Cooking was held in the Y. M. C. A. building last night. The programme for the week is—On Thursday and Friday evenings at 7.30 plain cooking; Wednesday and Saturday afternoons at three, household cooking. Monday and Thursday morning at ten, superior cooking.

A Treat in Store

All desirous of a treat should go Friday night at 8 o'clock to the Y.M.C.A. and hear Mr. T. W. Glover, "The Man from New Zealand," give his lecture on that country, and Temperance, for the Good Templars, illustrated with splendid stereopticon views, to be shown by Mr. Stubbs. The admission is free. Mr. Glover leaves on Saturday for Ottawa.

Three Drunks at Court

Magistrate Dumble had three drunks before him yesterday morning. Wm. Brown a man 40 years of age, was found drunk, and was grateful for having been rescued by the police. He was allowed to go. M. Fallen, another drunk, pleaded guilty, and was fined $2 or ten days in gaol. The third drunk was sent up on the hill for a week.

The Late Cocking Main

The Times is in receipt of a complaint regarding the cocking mains that take place from time to time in this neighborhood, without any attempt on the part of the authorities to stop them or punish those who participate in this questionable sport. The complaint pointed out the necessity that exists for the establishment of a Humane Society in Peterborough and suggested that philanthropic and religiously-inclined people should take the matter up.

--Don't fail to read our large bookstore advertisement in Saturday's issue of this paper. Bargains that will interest everyone.

The attendance at the
Peterboro' Business College
is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre of Canada.

Over [illegible] of those graduating are placed in good positions in Peterborough. A [illegible] school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write for particulars regarding our correspondence course

WM. PRINGLE,
Principal.

Obituary

On Wednesday evening the death occurred of Mrs. Anna C. Godard, wife of the late Alphonse Goddard, who passed away at the residence of her son-in-law, Mr. Walter C. Bourne, 174 McDonnel st. Deceased was 80 years of age, her death being caused by old age. The funeral will take place from the family residence tomorrow morning and proceed to the G.T.R. station, whence the remains will be taken to Grafton on the 11.45 train, for interment.

$10 GRAND EXCURSION TO WASHINGTON AND RETURN $10.

On February 26th the Lehigh Valley R.R. will run a special ten day excursion from Suspension Bridge to Washington and return for $10. Tickets good ten days. Stop over allowed at Philadelphia on return trip. Tickets good on all express trains, including "Black Diamond Express." For tickets, Guide to Washington, and further particulars, call on or address Robt. S. Lewis, Canadian Passenger Agent, 33 Yonge street, Toronto, Ont.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mrs. John Crane will not receive during February.

—The Misses Wellthy and Gertie Davidson have returned to Trent Bridge after a four week's visit here.

—Mrs. A. D. Stewart, of Toronto, is visiting her sister, Mrs. Leary, McDonnell street.

—Mrs. W. F. Nelson will receive at her home, "The Pines," Ward Five, on the first and third Fridays.

—Mr. D. Corkery, proprietor of the Lakeview House, Harwood, Rice Lake, and Mr. Allen Young, mate of the Str. Water Lily, were in town yesterday on business.

—Miss Mamie Roberts, a former Peterborough young lady, who is now a resident of Toronto, took first prize as Dolly Varden at the fancy dress carnival held in Berlin last week.

—Mr. Will Routley, of Toronto, son of Mr. C. B. Routley, of Town, and Miss Clara Thompson, daughter of Mr. Harvey Thompson, Bobcaygeon, were united in marriage on Wednesday at Bobcaygeon.

—*Chicago Record-Herald*—Miss Jellyman, 6216 Kimbark avenue, was hostess Tuesday evening at a dinner, and later a reception in honor of her guests, Mmes. Ullyot and Rubidge, of Peterborough Canada.

INCIDENTS OF THE DAY

Newsy Paragraphs Picked Up By Reporters on Their Rounds

—Comic and fancy valentines galore at Times Bookstore.

The Examiner hockey team defeated the Review team last night by 3—1.

—Rev. Alex. Esler, of Toronto, will lecture to the young people of the town in St. Andrew's church on Monday evening next. Special music has been arranged.

—*Saturday Night*—"Girls employed in the post offices are, as you probably know, not famed for civility or attention to the public whom they are paid to serve. Charlie told me of a friend of his who went to buy stamps and found a young woman with her elbows on the counter gazing in abstraction into space. After waiting a few seconds he took off his hat and said in a deep reverential manner; 'Madam, if you are engaged in prayer, I will wait till you have finished.' She attended to him at once with an angry sparkle in her eye." This g. f. j. rises to say that Peterborough does not come under this list. The ladies who assist in our local office are both diligent and exceedingly obliging.

Committed to Gaol

Toronto, February 5 —William Goddard was committed to gaol for thirty days in the Police Court on the charge of interfering with and assaulting Geo. A. Gallagher, a non-union workman in the employ of the McGregor & McIntyre Iron Works Company. Goddard is a union man. The complainant and several others were working in the Temple Building, when Goddard called them all "scabs," and a fight ensued, in which Gallagher's cheek was cut open.

DIDN'T GO BACK

The Doctor's Daughter was Too Smart for that

A Doctor's daughter, herself a trained nurse made a mistake, but profited by what she learned about coffee. She says:

"For years I was such a slave of coffee that never a meal seemed worth eating without it.

"There seemed every reason why I should be perfectly well, but I was frequently having spells of gastritis when everything I eat would cause agony. After a long time of such ill health I went on a visit to a friend who was a staunch believer in the merits of Postum but of course I would not believe it would do me any good but I had promised her I would take it every morning for one week and not touch coffee; after that time I was to have my coffee.

"Morning after morning I found I liked the Postum better, and the dull, sick, early morning headaches had gone. A good appetite for breakfast came, and in every way I was feeling better.

"I did not go back to coffee at the end of that week, I had too much sense for that, but continued to use Postum for the last two years and have had no return of the stomach trouble, headaches or other troubles that I used to suffer when I drank coffee.

"When I went home I got my father who is a physician and suffered with stomach trouble for years, to quit coffee and use Postum and now he would not be without it, says there is something about it which seems to soothe his stomach if it is made just as directed on the package. Father prescribes it in his practice now to a great many people.

"I know most people don't suspect coffee—that was the way with me—but I think if every coffee drinker would try well-made Postum just one week they would never go back to coffee." Name given by Postum Co., Battle Creek, Mich.

A ten days trial proves things. There's a reason. Look in pkg. for the book, "The Road to Wellville."

The Science of Flowers.

It is to be feared that among the embellishments of life, writes Sir Edwin Arnold in The London Telegraph, flowers too often afford an example of how people will turn pleasures into toils. I noticed lately a tender little wail which arose from a lady who found herself overburdened with the too frequent task of arranging buds and blossoms for the passages and apartments of her London house. A lover of flowers, as everybody of good taste must be, she confessed to feeling something not unlike what the prisoner experiences when his day's allowance of oakum to be picked has just been served out, to see her butler climb the staircase, holding at arm's length on a vast tray the confused heap of blooms and foliage; behind him at the same time would come the parlormaid, staggering under a load of glasses and vases and what not, destined to hold the costly plunder of the morning. At first a delightful labor and always a graceful and sweet-scented one, it had come, said the fair complainant, to be a heavy and time-consuming task, growing more and more burdensome as the fashion of floral display extended, and the country every morning sent up to town such tempting wealth of roses and lilies and the rest.

It is not the fault of the flowers, of course, except because, being so fragrant, so delicate, and so beautiful, they make slaves of all who serve them. On the contrary, it would decidedly tend to shock the mind of many a fair arranger of flowers if science went to the unkind pains of explaining to her how entirely free from any wish or intention to give pleasure are those exquisite roses and all those dainty blossoms. If there were, indeed, a language of flowers, and the products of the parterre could speak, they would say, "Madam (or Miss), do not flatter yourself that one petal of us has been tinted, one bud expanded, one green leaf spread to the sunshine, or one single calyx among us has opened its wonderful apparatus of stamen and pistil to nestle in your silken tresses or to repose in not unequal rivalry above your rosy cheeks or upon your lily-white necks and bosoms. Not for you, however much the poets have lied to you, were we created, and never for you have we grown up to the glory and the grace for which we have become to-day your unwilling victims. We were made so lovely, so delicate and variously tinted, perfumed so divinely, and loaded with little chalices of nectar distilled from earth and sky by such chemistry as your Royal Society never knew, wholly and solely to please a beetle, to attract a bee, to woo into our secret service the painted butterfly or fluttering moth.

"Your great and learned Mr. Darwin, if you will only read him, can show you why we wear these colors and display these stains and patches and lines of scarlet and gold, of purple and amber. They are simply traps and baits to lure the wandering insects, who thus become the marriage-makers of almost all our families, because the law stands that it is best for plants and trees to wed abroad instead of to wed at home."

The Japanese are perhaps the only people on the earth who have understood all this, and who do not allow the flowers to embarrass or overwhelm them. Sensitive in every nerve to the glory of line and splendor of color in nature, they economize their admiration and confine it to a profound enjoyment of a few, instead of the wholesale collections indulged in by western people. They would no more regard one of our vast bouquets or bowpots as a proper mode of arranging flowers than we should call the motley crowd of spectators in the pit of a theatre an evening party. Their leading idea, entirely opposed to ours, is to get the full delight of shape and outline of natural balance and contrast from one or two floral specimens, and by no means to mass and thereby confuse them, so that even the truest eye and most subtle nostrils become bewildered in the tumult of beauty, like the ass of Buridanus between his equal bundles of hay.

Ruskin has somewhere expressed the opinion that flowers ought never to be plucked from their stalk, but left to grow, because their chief charm is their life, which is forfeited when the blossom is broken off. But, although a flower is never so charming as where it is seen alive and fulfilling its floral purpose, that would sadly limit popular enjoyment of it. Perhaps this enjoyment is keenest among those who least comprehend the magic and the mystery of their being, and I am half afraid that the country girl who puts a flower in her hair, or the little ones who fill their small fingers with blue bells and May blossoms, have a pleasure in that glory of theirs which our Lord declared to be greater than Solomon's, untasted by mighty Darwin when counting the seeds in a single capsule of an orchid, and showing how, but for a preventive law, that single the whole globe with orchis maculata plant in four generations could cover

Benefit of Spraying Apple Orchards

The experimental spraying operations carried on during the spring and summer by the Fruit Division, Ottawa, in the Woodstock and Ingersoll districts have been satisfactory beyond expectations. Mr. W. A. MacKinnon, chief of the Fruit Division, says that they furnish the best illustration of the necessity of spraying that he has ever seen. Aside from the opportunities for comparison between sprayed and unsprayed orchards, chance has provided some remarkable proofs of the value of the operations. In every case where a single tree, or part of a tree, in one of the sprayed orchards was neglected the fruit on such tree or part of tree is to-day hardly worth the trouble of picking, while on all sprayed portions scab is hardly to be found.

Whenever a woman who is carrying a fat baby meets a man leading around a little dog, she always looks indignant at him.

When a woman tells a man he ought to be ashamed of himself for doing something, half of the time it means that she would have been ashamed of him if he hadn't.

Nature never did betray the heart that loved her.—Wordsworth.

There are truths which are not for all men, nor for all times.—Voltaire.

A day for toil, an hour for sport, but for a friend a life is too short.—Emerson.

$500 REWARD FOR WOMEN
WHO CANNOT BE CURED.

Backed up by over a third of a century of remarkable and uniform cures, a record such as no other remedy for the diseases and weaknesses peculiar to women ever attained, the proprietors of Dr. Pierce's Favorite Prescription now feel fully warranted in offering to pay $500 in legal money of the United States, for any case of Leucorrhea, Female Weakness, Prolapsus, or Falling of Womb which they cannot cure. All they ask is a fair and reasonable trial of their means of cure.

The Vice-President Independent Order of Good Templars.

An experience which many women have was related by Miss Agnes Stebbings, of 191 East 19th Street, New York City, as follows: "I had very poor health for a year until life looked dark and dreary to me. Had headaches, backache, also pain, my sleep was broken and fitful. I longed for health. Tried several medicines but none were of any lasting benefit until I took Doctor Pierce's Favorite Prescription. I soon realized that I had found the right remedy. It helped nature to throw off the poisons that saturated the system, removed all pains and strengthened the digestive organs, and brought the roses of health back to my cheeks. This medicine if taken occasionally keeps the system in perfect condition, helping it to throw off the disease and consequences of exposure to dampness. I am pleased to give it my endorsement."

"Favorite Prescription" makes weak women strong, sick women well. Accept no substitute for the medicine which works wonders for weak women.

Dr. Pierce's Common Sense Medical Adviser is sent *free* on receipt of 31 one-cent stamps for the paper-covered book, or 50 stamps for the cloth-bound. Address Dr. R. V. Pierce, Buffalo, N. Y.

TO THE AFFLICTED.

Dear Reader,—Are you a sufferer from any of the following ills: Lack of ambition, nervous exhaustion, ideas easily confused, irritability of temper, impairment of memory, despondency, general debility, liver not right, kidneys out o order, rheumatism, dyspepsia or indigestion, dizzy or fainting spells? Does your heart palpitate? Do you have smothering or sinking sensations, pimples, or eruptions of the skin, etc, etc.

If you are troubled as above, you can be cured by the use of Dr. Clarke's Wonderful Little Red Pills. A trial order of three boxes for $1.00 will convince anyone that these pills are truly wonderful. We are daily in receipt of letters bearing the highest testimony. We have not space to tell you all about them here, but will answer any enquiries as to their merits. Mrs. John Macdonald, Durham, N.S., writes us, "After taking two boxes of Dr. Clarke's Little Red Pills for indigestion, which I had been troubled with for a number of years, I am now perfectly well. I followed the directions carefully.

To every one sending for a trial order and finding good results we ask to observe our special offer enclosed with every box. It is of special interest to every one.

Dr. Clarke's Little Red Pills are a positive and certain cure for rheumatism, asthma, paralysis, coughs, lame back, indigestion, all stomach and liver troubles, female complaints, even when the diseases have been standing for many years; the most stubborn cases will yield. For sale by Ormond & Walsh, Peterborough. 50c. per box, or 3 boxes for $1.00.

ONLY MORNING DAILY BETWEEN TORONTO & OTTAWA

VOL. 32., NO. 30 PETERBOROUGH ONTARIO, SATURDAY FEBRUARY 6 1904. PRICE TWO CENTS

THE MORNING TIMES WAR DESPATCHES.

War seems unavoidable in the Far East. The people of Canada—which is one of the potential great powers of the Pacific—are intensely interested in the struggle between mighty Russia and the numble Jap. By special arrangement the Morning Times is enabled to print London Times cables simultaneously with their issue in the greatest of newspapers. The Times has long had the best sources of information at Pekin and Tokio. Morrison, The Times correspondent at Pekin, being the De Blowitz of the Orient. The Times will be represented in the field by able war correspondents, and the special cables to the Morning Times may be depended upon to give the latest and most reliable news alike from the two capitals and from the front.

TO-DAY MAY WITNESS OPENING OF CONFLICT THE EASTERN WAR CLOUD ABOUT TO BURST

000 Troops Have Left for Port Arthur Fully Equipped

HOSTILITIES CANNOT POSSIBLY BE AVERTED

Officers of Guards will be Allowed to Volunteer

All hope of peace has been abandoned in Tokio, the Japanese capital.

It is officially announced at St. Petersburg that officers of all regiments of the Guards, will be allowed to volunteer for service in the Far East.

Five thousand Russian troops have Port Arthur in transports, escorted by warships for Seoul.

A prominent London firm trading with Japan received a cipher message cancelling the execution of a large order which was about to be despatched, indicating that the Russo-Japanese negotiations have been broken off.

London, Friday, Feb. 5.—Any view framed on the latest Far Eastern despatches can be hardly other than that the war cloud is about to burst. The concentration of Russian troops on the Yalu River, which has been frequently mentioned in despatches to The Times, is stated to be proceeding rapidly. It is added that many of the troops have already crossed the Corean frontier. The departure of the Russian fleet from Port Arthur, whether, as reported, to cover the transportation of troops to Chemulpo or not, is regarded here as little short of direct menace. Some correspondents at Tokio profess that the question of war has passed the debatable stage.

A prominent London commercial firm trading with Japan received a cipher message yesterday afternoon, cancelling the execution of a large order which was about to be despatched. The circumstances connected with the transmission of the message indicate that the Russo-Japanese negotiations have been broken off. On the other hand, it is contended in St. Petersburg that the continued delay in presenting the Russian reply keeps open the door of hope. It is stated that the opinions of the heads of the various Government departments concerned have not yet been all received, and that the reply will not be sent until they are all received. It is added that even the probable date of sending the reply to Japan cannot yet be fixed. One despatch states that the reply was sent to Tokio last night.

The St. Petersburg correspondent of the Times says it is almost impossible to believe that war can be averted. Russia will make no concession. The Czar's hesitation has been overcome.

The Japanese Legation in London professes that the warlike newspaper despatches do not justify pessimism. The officials say that the Russian reply may be expected any day, but pending its reception the abandonment of hope is needless. The Legation admits, however, having received official information of greatly increased military activity by the Russians in Manchuria. It has also been informed that the Japanese at Vladivostock have been warned to be ready to leave. According to the newspapers, if the Japanese at Vladivostock have not withdrawn when the probable declaration of a state of seige is made, they will be sent to Khabarovsk.

Among the speculations on the reasons of the departure of the Russian fleet from Port Arthur is one that suggests it has gone to intercept the new Japanese cruisers, Nisshin and Kasuga, which are due to arrive at Japanese waters in a few days. If the report from Port Arthur that the warships returned at 4 o'clock yesterday is true, these speculations can be dismissed.

Meanwhile not a word can be learned of the movements of the Japanese fleet, owing to the thoroughness with which the censorship is being enforced.

KING AS PATRON

London, Feb. 4— The King has consented to be the patron and the Prince of Wales president of the Colonial Exhibition. A sketch of the scheme, as unanimously approved by the Exhibition Committee of the British Empire League, was submitted and the King accorded warm approval.

FEAR STRIKE OF SOFT COAL MINERS

OPERATORS AT JOINT CONFERENCE INSIST ON RETURN TO OLD SCHEDULE

MEN REFUSE TO ACCEDE

Adjournment Follows with Trouble Sight for April, What Each [illegible] Has to Say

Indianapolis, Ind., February 6.—A joint conference between the operators and the mine workers has adjourned without an agreement. A sub-committee of one miner and one operator for each state has been appointed to fix a date for a future conference.

This committee will meet in Indianapolis on February 15, to arrange for another conference. The conference yesterday was called to hear the report of the Joint Scale committee of operators and miners, which had been considering the wage scale for the Indiana, Ohio, Pennsylvania and Illinois bituminous fields for some days.

There was great excitement among the delegates when it was seen that the moment for a declaration of a disagreement had arrived. The Scale committee had reported the present wage scale as their ultimatum, and the operators insisted that nothing less than 1902 scale, which is equivalent to a reduction of 12 per cent. in wages, it is claimed, would satisfy them.

The convention then adjourned, the operators leaving the hall, and the miners going into executive session.

MAY BE TROUBLE.

The possibility of a final disagreement and suspension of work on April 1, is a topic of conversation among the miners and operators today.

"All I will say at this time," said W. D. Ryan, secretary-treasurer of the Illinois miners, and chairman of the Joint Scale committee, "is that a suspension in the bituminous fields would be a national calamity, and if continued for any lenght of time would, in comparison of effects, dwarf the anthracite strike into insignificance."

W. S. Bogle, the Indiana operator, said "This is not the time to discuss such questions, but I will say this much—the country will have almost sixty days in which to prepare for a suspension if it comes. The other districts produce a great deal of coal, and I do not think that a suspension in April would cause great inconvenience."

It is not known what the miners' policy would be in case if April 1, should arrive without an agreement.

The fight for the reduction, however, has been essentially that of the Ohio and Pennsylvania operators, who insist that the H. C. Frick Company, in Pennsylvania; the Jamison Coal & Coke Company, of Greenburg, Pa., and the Pocahontas Coal Company, in West Virginia, have all reduced wages in the last month, and that they must receive a lower mining rate with which to meet their competition.

The miners claim this competition is not as keen as the operators would have them believe.

It is charged that the Ohio and Pennsylvania operators have stored 4,000,000 tons of coal on the lakes and at other points.

The miners have $1,000,000 in their national treasury. The Illinois miners have $600,000 in their own treasury, and the other states have at least $400,000, making $2,000,000 of cash available for any emergency. A suspension of operations in the four states would mean 117,000 of the membership would go out.

WON'T PAY $500

Ottawa, Feb. 4— Not a single Chinaman has been reported up to date as having paid the $500 poll tax for entry into Canada, which went into force at the beginning of the year.

WEATHER NOTES

Saturday—Snow or sleet.

ONLY WEAPON AGAINST RUSSIA

OPINION OF AN ENGLISHMAN RETURNING FROM TRIP TO JAPAN

THAT COUNTRY ALL READY

May Beat Russia in Early Stages and Give No Chance for Recuperation

Montreal, February 6.—"It has been inevitable for some time past. War is the only weapon with which to fight Russian aggression. Japan is ready, but Russia is merely delaying matters until such a time as she has everything in readiness and then the bear will show its claws and the flame will be kindled. Japan must not wait for that time. Today she has Russia at a disadvantage. Tomorrow the opportunity may be lost."

These were the words at the Windsor Hotel, of Mr. George P. Hamilton, of London, England, who is just returning from a trip to Japan. Mr Hamilton came through from Vancouver and is leaving for New York, sailing from New York today. Like all Englishmen, Mr Hamilton is a firm believer in the justice of Japan's cause. He is also full of strong belief in the fighting strength on land and sea of the subjects of the Mikado, and inclines to the opinion that if the blow is struck hard and early Russia will be so trounced in the earlier stages of the fight that there will be no time for recuperation and Japan will win.

When the question of the participation of England in the struggle was mentioned, Mr. Hamilton said that that was one of the most serious phases of the matter. The long and tedious Boer war had crippled to a certain extent the trade of the old land. Although the splendid fabric of British trade was unshaken, there were several spots not quite as strong as they might be and the nation of shopkeepers wished to be about their business without having another war on their hands just now. "Of course, if we are dragged into it," said Mr. Hamilton, "we shall do all we can to help Japan along, but really we are not looking for anything more in the way of expensive wars just now."

When Mr. Hamilton left Tokio the whole country was clamoring for war and there was every confidence expressed on all sides in the Government. Marquis Ito, who Mr. Hamilton regards as one of the shrewdest of Oriental statesmen, was steadily preparing for the clash, that even at that time seemed to be inevitable. Once Japan sets her hand to the plough of battle there would not be any turning back until the last furrow was reached.

Mr. Hamilton, speaking of his run through Canada, said he was much impressed with the enormous expanse of territory through which he had passed. "I think you have a wonderful country here," he said, "and just think of it. British, all British."

Pekin, February 6.—Japanese officials decline to acquiesce in the view of the St. Petersburg Government that Russia would suffer disastrously in respect of prestige should the Czar yield to Japan's demand for a guarantee of the political and territorial integrity of China. Speaking to a press correspondent this morning a statesman of the first rank said;

"Japan does not ask Russia to submit to moral humiliation. On the contrary it wants Russia to vindicate its honor by adhering to the pledges made to the principal cabinets of the world. The Japanese Government stands ready to guarantee that it will respect Chinese sovereignty. It asks nothing more of Russia. If there is no moral disaster involved in this course for Japan why should there be any for Russia?"

FROM ST. PETERSBURG.

Copenhagen, February 5 — Warlike rumors reached the Danish court from St. Petersburg. It is declared that the Czar has been assured by the war party that Japan purposes driving Russia out of the Far East, if that be

RUSSIAN REBELS HARD AT WORK

REVOLUTIONARY DOCUMENTS HAVE BEEN FOUND IN CANADA

AN APPEAL TO THE PEOPLE

Scattered Through the Russian Barracks—Much Trouble Ahead

Montreal, February 6.—The following circular, prepared by the Russian Revolutionary Bund, with head quarters in London, has been secretly scattered throughout the various barracks and depots in Russia, where the first and second reserves replace the regulars, hastily mobilized and hurried to Manchuria, in view of the threatened conflict in the East.

Some of them have made their appearance in this city.

"Brothers, you have been snatched from your sorrowing families, your home ties broken, that you might replace the standing army called away to slay the people of other lands. Now that the army has seized you in its iron grip, robbing you of your time, which is your money, you are become machines to do its bidding without question.

"You are required not only to kill, but to be killed; you are told that it is an honor to die for your country. When they have slain you, will you have perished for your country. No one is invading Russia, you are fighting not your foes, but those whose property the Great Czar desires.

"Should you win, you will reap no benefit. The land will go to the nobles who oppress you, and the power of the rich will be increased.

"The hand that strikes against the Japanese, slew your brothers, your fathers, your friends when at St. Petersburg, Moscow, Jaroslav, Riga, Kieffe, and Odessa, they arose and demanded a fair return for their labors. In turn it will smite you and grind you in the dust when you demand what is yours by right. The nobles live upon your toil. The Czar with his hordes of servants live by your labors.

"We appeal to you, brothers, when your brethren arise, as they shortly will rise, to shake off the yoke that crushes you, throw down your arms, join them and impel your comrades to join them in the great work of freeing Russia.

"Remember, brothers, that but a little time ago you yourselves were working men, ground in the dust by the strong arm of the masters. If now you oppose the cause of liberty, how will you face your parents with the blood of your brethren on your hands.

"As patriots, as Christians, rise now and strike like men."

For the translation of the above circular, the press representative is indebted to Mr O. D. Zwirek, of 505 St. Lawrence street, this city, a member of the Central Revolutionary Committee, with headquarters at London.

Mr. D Zwirek is a marked man. He was compelled to flee from Russia at an early age and has taken part in various demonstrations both in London and New York.

Mr. Zwirek, in discussing the situation observed;

"The Cossack will find in time that he cannot go on indefinitely knouting the peasants into obedience. It is true that the revolutionary committees are compelled to hold their deliberations on foreign soil, they are all marked men in Russia, still the good work is growing and the league has spread all over the fatherland. The very closeness of the espionage of the police, shows how they dread the results, of the persistent agitation, kept up by patriots. Five years ago the last printing press on Russian soil was discovered, and as a result 150 persons were exiled to Siberia.

When asked about the condition of the Russian Army, Mr. Zwirek continued; "All Russians at 21 years of age are compelled to serve four years in barracks. Then for the next five years, they become members of the first reserve, and are liable to be called upon to do garrison duty at any time. For the succeeding ten years they are members of the second and third reserves in turn. At forty a man is exempt from military service."

ACTUAL WAR MOVES ACCREDITED TO RUSSIA--DECISION AT ANY TIME.

Answer From Russia Has Been Sent to Tokio

Warns Japanese They Had Better Leave.

London, Feb. 5— The correspondent of The Times at St. Petersburg says it is impossible to believe that war can be averted, as Russia will make no concessions, the Czar's hesitation having been overcome.

Responsibility Upon the Czar.

An official of the Foreign Office said yesterday it was open to the Czar to alter the entire tenor of the answer to Japan at the last moment, so that nothing absolute could be affirmed as to the contents or the time of its despatch.

Will Not Discuss Manchuria.

It is reported in well-informed quarters that Russia practically concedes Japan's demands as to Corea, but refuses to record recognition of the sovereignty of China in Manchuria, or even to discuss Manchuria with Japan. It is believed that soon after the answer is sent Russia will publish an official communication on the subject.

Delay in the Reply.

There is some talk of a probable ulterior move for the extraordinary delay in answering Japan's note, but the official explanation is that it was necessary to consult Admiral Alexieff, the Russian Viceroy in the far east, and that time was also required for the framing of a reply to conform with the wish of the Czar that it be as unobjectionable as possible.

An Ominous Order.

During the last few days there has been a sensible increase in pessimism at St. Petersburg and much depression in financial and commercial circles. It is regarded as ominous that the general orders announce that officers of all the regiments of guards be permitted to volunteer for service in the far east. Such an order has not been issued since the war with Turkey in 1877.

Attack on United States.

In the opinion of the Novoe Vremya and its correspondent at Port Arthur, the United States now occupies the position hitherto held by Britain as the aider and abettor of Japan. In this rather extraordinary attack, Americans are represented as the instigators of both Chinese and Japanese against western Europe, for the purpose of seizing and monopolizing fresh markets for America, and flooding the old world with American scientific inventions and machinery. Americans are compared to the Martians in the fantastic novel by Mr. Wells, swooping down upon the older peoples of the world with the yellow races as their skirmishers.

Military Movements.

The correspondent of The London Daily Mail at Chefoo says a Russian fleet, comprising all the battleships, excepting the Sebastopol, and six cruisers and two destroyers, is cruising along the coasts of the peninsula.

SOFT COAL STRINGENCY

Toronto. February 6— Mr. Noel Marshall, of the Standard Fuel Company, says that the snow blockades on the railways limited the deliveries of soft coal in the city during the past month. About 400 carloads, some of which had been consigned to him on December 11, were still on the way and could not be located. The hard coal situation is not so stringent, as there is a big supply on hand.

THE EDITOR

Got a Food Lesson Never to be Forgotten

The financial editor of a Cleveland paper has written an interesting article describing his experience with food. He says;

"I suffered from nervous trouble for years, at first confined to muscular twitching, but grew worse and involuntary contractions of the muscles accompanied by indescribable severe pains were the penalty of over-exertion, catching cold, or just bad weather, even when the greatest care was exercised.

"The sciatic nerve and the nerves of the back became so sensitive I could only remove my underclothing with the greatest care and sometimes left it on at night rather than suffer the torture of removing it and putting on a night shirt.

"I was almost a nervous wreck and was treated by numerous physicians without any improvement. In fact matters went on from bad to worse each attack becoming more severe and more lasting until I broke down completely last winter. For weeks at a stretch I suffered so terribly and continuously that I got no natural sleep. I became practically helpless, could not walk and at one time thought I had lost the use of one of my legs.

"The doctors got me down to skim milk but that didn't do so they put me on Grape-Nuts at meal times and Postum Cereal and both agreed with me from the start in the most wonderful manner.

"I could soon sit up and my improvement has been rapid. I no longer suffer the pains which at times were almost unbearable and I get good, sound, restful sleep, better than I have for years. Best of all I have recovered the use of my leg and prospects are good for complete recovery. I have no doubt my improved condition is due to the Grape-Nuts diet." Name given by Postum Co., Battle Creek, Mich.

Brain and nerve building food that is predigested will bring health to anyone suffering from disease caused by a poor selection of food.

There's a reason.

Look in each pkg. for the famous little book. "The Road to Wellville."

Russia's Warlike Actions.

London, Feb. 4—A despatch to the Central News Agency from Seoul, Corea, says—

About 6,000 Russian troops have Sailed from Port Arthur, and will Endeavor to land at Chemulpo, the Port of Seoul, to-day.

Port Arthur, Feb. 4— The Russian fleet returned here at 4 o'clock this afternoon.

The Fleet was manoeuvring against 60 Japanese Warships of Wei Hai Wei. It has taken up anchorage outside the harbor.

MARRIED TO SISTER IN MISTAKE

A STORY THAT IS STRANGER THAN ANY FICTION

LIVED AND RAISED FAMILY

Before the Horrible Truth was Revealed by an Accident

In a quiet country farm home, only a few miles from Campbellford, lives a very respectable family of seven persons, father, mother, and five children.

The parents were married about 25 years ago, when quite young, worked hard, and all through the difficulties and ordinary troubles and perplexities incident to life, managed to establish a very comfortable and well regulated farm home.

Whilst diligently and faithfully pursuing the ordinary routine of country life, all of a sudden, and by mere accident, the truth of a strange state of affairs was forced upon them. They suddenly became aware that as well as being husband and wife they were likewise brother and sister.

The very strange event came about in this way. When one of them was very young one of the parents died, leaving the child to the care of a friend of the family The surviving parent married again and the other children were born. In the course of time they all drifted from one of the old lands to this country, the first child taking the name of the family with whom it was brought up. The two children met, became acquainted with each other, fell in love and finally married, neither one knowing much of the former history of the other, and certainly never dreaming they were half brother and sister.

When the facts became known to them they became prostrate with grief. The father fell seriously ill, and nearly lost his reason. The mother bore up for a while, but, finally, she too broke down, and both lives were despaired of. But as health and reason slowly returned they formed the wisest resolution possible, concluding to continue on in the home with the several children that have been born to them, but not as they had began life. Most of the family are living, and entirely ignorant of their former family history.

Very few cases of this nature ever come to light, but, no doubt, similar ones exist, happily unknown to the parties themselves. The subjects of this yet true event are most highly respectable people, to whom no blame or disgrace can or has ever been attached for this unfortunate experience. Those that know them best speak in the highest terms of them. They are living a Christian life and no one doubts their reward.

A NEW NATION BORN IN SOUTH AMERICA

A FRENCH OFFICER FOUNDS A REPUBLIC IN SOUTH AMERICA

Paris February 6.—Adolphe Brezet, formerly a captain in the French army, and now claiming to be president of what he terms, "The Republic of Counani," in South America, has arrived here and is seeking to obtain the recognition of his Government by France. Brezet says that "Counani" comprises the territory which was in dispute between France and Brazil, and which was finally awarded to Brazil by a President of Switzerland, to whom the matter was submitted for arbitration. Brezet declares, further, that the people of "Counani" refused to accept the decision of the arbiter, and organized a new Republic, recognition of which is now sought of all the powers. He says also that the hour has not yet arrived to inform the press of the character of the pour parlers being exchanged with the French Government. According to the President of the new Republic "Counani" is two or three times as large as France, with a population of about 300,000 colonists and a million Indians, who support the new Government.

It is expected here that Brazil will take measures to assert her sovereignty over the territory in result.

Hopes of Peace are Now Abandoned.

Refuses to Discuss Manchuria with Japan

The Czar's wish for peace has undergone no change, for what he said on New Year's Day he repeated on Wednesday at the luncheon in honor of the German Emperor's birthday. The greatest danger Russians pretend to see is the strength of the war party in Japan, in comparison with which the Russian war party, they say, is insignificant.

London, Feb. 5—The correspondent of The Times at Tokio says:—According to official news received at Tokio houses for the billeting of Russian soldiery are being hastily prepared at Kaichau, Haicheng Liauyang and elsewhere. At Liauyang 1,000 carts have been requisitioned, of which 100 are being despatched daily for the transport of ammunition and provisions to Fenghwangchen.

Warships Leave Port Arthur.

The Russians have begun the despatch of troops to the Yalu River, and all their powerful warships except one, the Government is advised, left Port Arthur yesterday; but their destination is unknown.

The Japanese Warned.

The Japanese commercial agent at Vladivostock received notice yesterday from the commandant that a state of siege might be declared at any moment upon orders from St. Petersburg, therefore the Japanese should be prepared to leave, otherwise they would be ordered to repair to Khabarovka. All this contrasts strangely with Russia's peaceful professions.

The Seoul correspondent of The London Daily Mail says that a Russian army is moving south from Mukden, while the correspondent of this same paper at Port Arthur says that both Russia and Japan have placed an embargo upon coal shipments.

A telegram received here from Copenhagen declares that eighteen foreign steamers have just been chartered by Russia to convey war material from Odessa and Libau to the far east.

All Hope of Peace Gone.

London, Feb. 5— A despatch to the Reuter's Telegram Company, under yesterday's date, from Tokio, says;—"The general impression here is that all hope of peace is gone. The elder statesmen had a conference this afternoon, at which the Emperor was present. It is believed a weighty decision was reached."

War Has Been Declared

London, Feb. 6—Special, 2.20 a.m.—The Russian troops are arriving at the mouth of the Yalu River, and great excitement prevails.

London, Feb. 6—Special, 2.45 a.m.—All the powerful Russian warships have set sail, but their destination is unknown.

London, February 6— Special 3 a.m.—The residents of Vladivostock are in a state of great excitement as it is expected that a state of siege may occur at any time.

London, Feb. 6—Special 3.20 a.m.—An unconfirmed despatch has been received that war has been declared and that the conflict has begun at the port of Chemulpo, where the Russians attempted to land forces.

$10—GRAND EXCURSION TO WASHINGTON AND RETURN—$10.

On February 26th the Lehigh Valley R.R. will run a special ten day excursion from Suspension Bridge to Washington and return for $10. Tickets good ten days. Stop over allowed at Philadelphia on return trip. Tickets good on all express trains, including "Black Diamond Express." For tickets, Guide to Washington, and further particulars, call on or address Robt. S. Lewis, Canadian Passenger Agent, 33 Yonge street, Toronto, Ont.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. I would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room [illegible] Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

[illegible] paper is the only Morning Daily published between Toronto and Quebec and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at [illegible] per month, and to outside points at [illegible] per year strictly in advance.

UNION LABEL

PETERBOROUGH, FEBRUARY 6, 1904

NEW ASSESSMENT LAW

The assessment bill has undergone considerable change since it was submitted to the special committee of the legislature. In its present form it appears to be simpler and yet effective as a tax producer.

The business tax is the feature of the new measure, and it is one which, in its application, will be so fair and so general that while no man escapes there will be no ground for complaint and the feeling of unfairness. The tax will be an equitable one and be governed by the volume of business. The subjects of it will be divided into classes, and made to pay a rate which is associated with the class as follows: Distillers, 25 per cent. more than the full value of the land they occupy; brewers, full value; wholesale merchants and financial institutions, 75 per cent. of the full value; department stores, hotels, professional men, etc., 50 per cent.; ordinary retail dealers, 25 per cent. No business man is to be assessed for less than $100, which means that every business man must pay a business tax of $2 at least.

The old bill had a provision in regard to house taxing which was exceedingly confusing. This provision has been expunged, and it is as well. While there was an element of fairness in it, and while it was desired to favor the poor at the expense of the rich, the operation of the clause would have led to much misunderstanding and many heart-burnings.

The manufacturers will be helped by the exemption of his machinery from all taxes. The telegraph and telephone companies will pay, in addition to the business tax, municipal rates upon 5 per cent. of their gross receipts, the later being in lieu of the taxation of their street lines and plants. Steam and street railways will be taxed as never before, and the revenues from the steam lines will be distributed by a scale or plan which will give all the municipalities and the province a pro rata share of two or three million dollars a year. The great corporations have hitherto escaped taxation, and will now begin to pay the people something in reason for the franchises they have so long and so largely enjoyed.

Outing for February.

In view of the sensation created last month by Robert Dunn's frank diary of the Mt. McKinley expedition, the extracts in February Outing are bound to interest every reader. This month's article, "Into the Mists of Mt. McKinley," uniquely combines a fascinating story of exploration with all the bickerings, the quarrelings, the fierce tempers of weary, tortured men, living under wholly abnormal conditions.

Many readers may prefer, at this time of disturbances in Morocco, to turn to Albert H. Danforth's first-hand account of a journey "Through the Rebel Country of the Moors," with human-interest photographs by the author.

An article of very different character, but of equal interest, is Clifton Johnson's "Among the Georgia Crackers," a study from within of untoward conditions, where babies take snuff and women do all the work.

Caspar Whitney's graphic account of his experiences among the Sumatra Malays has a very Kiplingesque title, "Jin Abu Finds an Elephant." Mr. Whitney intends to combine the series of travel-studies he has been writing into a volume called "The Jungle Hunter."

The fiction in this number is notable, including the most interesting chapter of Stewart Edward White's best story, "The Silent Places" or "The Trail of Jingoes," and a fragrant coaching story "The Tip," by Emery Pottle, with some Penfield drawings that suggest a love story. Just as interesting as fiction is Emerson Hough's intimate study of "Sam Houston," one of the unique series of articles on the Outdoor Men of History.

The regular department devoted to "Outdoor Men and Women" contains characteristic anecdotes of two brothers of the angling craft, Wm. C. Harris and Charles Hallock. Herbert K. Job, who has been photographing rare birds on Florida keys for Outing readers, has returned with some remarkable snapshots, now published for the first time. Mr. Harris has something to say on when to fish in the same region.

Of equal interest to sportsmen and general readers are Dr. McKenzie's illustrated article on "Breathlessness," or the progress of fatigue as seen in the human face; Edwyn Sandy's monthly talk. R. Hinton Perry's "Animals in Art" and timely instructions from John A Roosevelt and Dan Beard on how to sail ice yachts and the art of skate sailing. "A Country Club in Oklahoma" is suggestive of long strides from the days of Indian reservations.

In the Sportsman's Viewpoint, Caspar Whitney discusses in his usual vigorous way the development of horseflesh in this country and the intelligent effort that has made our Horse Show the equal of any in the world.

Photographs full of the outdoor feeling, a little nature verse and a great many inspiring drawings by the most distinguished artists complete the magazine.

Grand Trunk at World's Fair

The extensive and comprehensive exhibit which the Grand Trunk Railway System are arranging for the World's Fair, held at St. Louis during 1904, is now in course of preparation. The proposed pavilion which it is the intention of erecting is one combining beauty, elegance and artistic merit and the designs submitted to the Exposition authorities were greatly admired and accepted. The pavilion will be erected in the "Fish and Game Building, facing on three aisles, will be of the Corinthian and Doric architectural style, embellished with emblematic designs of fish and game, and it is claimed will be one of the handsomest structures at the Exposition. Canadian haunts will be the predominating feature of the display.

The mammoth palaces that form the main picture of this "World's Fair"—the Foreign and State buildings and the "Pike" (Midway)—are at the present time much further advanced before the opening date than the buildings of any other of the great expositions that have been held in the past; in fact, the installation of exhibit is now being proceeded with in many of the buildings.

One good feature of St. Louis is the Union Station; there being only this one, all trains from all points with the exception of excursion trains from a distance of one or two hundred miles of St. Louis will arrive and leave from the one depot, and as the street car lines pass the station visitors will have no trouble in reaching their hotels or boarding houses without difficulty and early after arrival.

People who have seen the grounds for the first time marvel at the magnitude of this colossal undertaking and do not hesitate in forming the opinion that it will be the greatest event from an instructive, educational and amusement point of view, that the world has ever seen.

Two hundred and fifty conventions have already signified their intention of visiting, and have completed arrangements for St. Louis during the "World's Fair."

Prof. Dorenwend —OF— Toronto

The Greatest Hair Goods Artist in America

Is Coming to Peterborough

WILL BE AT

Oriental Hotel, on Thursday, February 18th

LADIES—If you appreciate the added charm and the younger appearance lent to the face by having beautiful hair, do not fail to see the grand assortment of SWITCHES, BANGS, POMPADOURS, WAVY FRONTS and WIGS, which Prof. Dorenwend will have with him. Consultation entirely free, and demonstrations given regarding these beautiful conceptions in natural hair.

GENTLEMEN WHO ARE BALD—Even though you are bald or partially so you can regain your former appearance by wearing Dorenwend's Wigs and Toupees. They are made to match any shade of hair. They are a protection to the head and a cure for chronic cold in the head and catarrh. They are perfectly fitted to the head and bear no trace of artificiality.

DORENWEND'S TOUPEE'S

Prof. Dorenwend will take measurements and demonstrate the merits of his Wigs.

Don't forget the day and date

You are Weak Instead of Strong

A Weak, Pale, Despondent, Specimen of Humanity, Lacking in Vigor, Strength and Ambition.

Make Yourself a New Being;—Renew, Revitalize, Reinvigorate Your Lost Strength.

You're a discouraged, weak, miserable wreck—old before your time. Instead of a place of happiness the world is full of strife, worry and distress.

You are sick and not aware of it, just able to drag yourself around, but totally incapable of exertion or hard work.

Your stomach is crying out for assistance. Hadn't you better give it some Ferrozone!

Your nerves require a good bracing tonic, and the best thing for them is Ferrozone. Why don't you use this sovereign remedy? It is intended for cases just like yours.

Ferrozone is superior for the blood and nerves to any curative agent the world has ever known. Its recuperative powers are beyond description as a trial will demonstrate.

With the use of Ferrozone comes strength to overcome the difficulties and battles of life. Digestion and assimilation will improve, appetite soundly, and presto—before long you will be healthy, strong and well.

These blessings are all obtained by the regular use of Ferrozone, and can be purchased at any reliable drug store for 50c., or three boxes $1.25. Sent by mail to your address if price is forwarded to N. C. Polson & Co., Kingston, Ont.

OPERATION WAS SUCCESSFUL

Treatment for Hip Disease Effective on a Seventeen Year Old Girl

New York, February 5—Louise Marguerite Dethlifsen, the seventeen year old daughter of Mr. and Mrs. Lawrence Dethlifsen, East Orange, N. J., returned home yesterday, after having spent three months in the hospital during which she underwent the Lorenz treatment for the cure of hip disease.

She had been a sufferer ever since she was four years of age. She was able to walk, but was badly deformed. The operation has been perfectly successful, and the result is looked upon as more remarkable because Miss Dethlifsen is many years past the age when operations of this kind are looked upon as likely to turn out well. Miss Dethlifsen shows no trace of her former deformity.

The girl was admitted to the Hospital for Ruptured and Crippled in New York on November 2nd, where the Lorenz operation was performed by Dr. Wenk.

APPLICATION TO PARLIAMENT

Notice is hereby given that an application will be made on behalf of the Town of Peterborough to the Legislative Assembly of the Province of Ontario at the next session thereof for an act for the following purposes;

1. That the said Town of Peterborough may be incorporated as a City, with all the rights, powers and privileges of cities under The Consolidated Municipal Act 1903.

2. To declare that it has been and shall be lawful for the Commissioners of the Peterborough Town Trust, with the approval of the Municipal Council, to invest a portion of the sinking fund received by them in the purchase of the buildings and other permanent improvements erected and made by tenants under lease from the Commissioners on any land vested in the Commissioners.

3. To provide for the vesting of the real estate and sinking fund which belonged to the Corporation of the former Village of Ashburnham in, and the management of the same by, the Commissioners of the Peterborough Town Trust.

4. To amend section 3 of 3, Edward VII., chapter 50, so as to authorize the Council without the assent of the electors to borrow sums not exceeding $15,000 in any year for the purpose of making extensions, repairs, improvements and alterations in the waterworks, and to pass by-laws for that purpose.

5. To ratify and confirm By-Law number 1053 of the Corporations of the Town of Peterborough, entitled, "A By-Law to aid the Colonial Weaving Company" being a By-Law to fix the assessment of the said Company at $4,000 for a period of ten years from the first day of January, 1904, upon the conditions in said By-Law mentioned.

6. To ratify and confirm By-Law number 1050 of the said Corporation, being a "By-Law to authorize the purchase of certain real property required for the use of the Corporation of the Town of Peterborough and to borrow the sum of $10,000 to pay for same and to authorize the sale of any part of said land not required for Municipal purposes."

7. To authorize the Council, without the consent of the electors, to borrow money for the purpose of erecting an Isolation Hospital or Hospitals, and to pass By-laws for that purpose.

8. To confirm the purchase by The Little Lake Cemetery Company of part of Lot number Forty-six and Lots numbers Forty-seven and Fifty-seven on Registered Plan No. 50 for the Town of Peterborough.

9. To make alterations in the number term of office, manner of appointment and duties of the Town Trust Commissioners.

10. To provide for the reduction of the number of members of the Board of Education.

11. To provide for the election of Aldermen for a term of two years and for one half of the members of the Council retiring each year.

12. To provide for the appointment by the Council of a Court of Revision consisting of three members, none of whom shall be a member of the Council.

13. To ratify and confirm By-Laws passed by the Council of the late Village of Ashburnham exempting the property of The Dickson Company, of Peterborough, situated on Burnham's Point, and the property of The Canadian Ultimator Company, Limited, situated on the south side of Elizabeth Street, from taxes, except school taxes, for a period of ten years, upon the conditions in said By-Law mentioned.

Dated at Peterborough this sixth day of January, 1904.

PULLING UP STAKES IN PETERBOROUGH

No Matter When or Where You See a Bargain, There's a Better One For You At

GOUGH BROS.

GOOD-BYE SALE

The second week adds to the intense interest of this sale. Its an occasion that warrants unbridled enthusiasm. Nothing can stop its progress.

Do you know how we're fixed? $68,000 worth of Suits, Overcoats, Furs, Boots, Shoes, Hats, Caps and Furnishings, must be slashed to pieces to bring down the stock. Are you thinking? Can't you see what this means? Can't you see that we must sell at a heavy loss in order to pull up stakes in time to let in the new firm.

WILL ANYBODY KINDLY RISE IN THE MEETING and say that Gough Bros. ever was or ever will be undersold. The fears of competitors and the frantic efforts of their bosses, cut no figure with us. No cast-iron "transformation" sale bulletin of reduced prices can side-track GOUGH'S GOOD-BYE SALE. We stand by the town and will issue new lists of cut prices every week that must beat the best markings of any other dealer by 25 per cent.

If anybody offers to sell Men's Overcoats and Suits worth $10 for $6.98, down goes Gough's prices to $5.98.

If anybody offers to sell Boys' Suits and Overcoats worth $6.00 for $4.48, down goes Gough's prices to $3.48.

If anybody offers to sell $3.00 Trousers for $2.48, down goes Gough's prices to $1 98. And so on all through the gamut.

Don't you see the logic in our slashing—we're pulling up stakes in Peterborough—necessity knows no law—the stock can't be moved or kept for another season.

MEN'S SUIT SLAUGHTER

Men's Black and Blue Worsted Serge Suits, Regular $10.00, for	$5 75

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 15th from 5 cents to 10 cents per share. This company owns 6 claims, 600 x 1500 each. A 90 foot shaft on the Martha claim shows a vein of $30.83 ore 5 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $30.83 to $19,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay them $240 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address,

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,

DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O.

The Prescott National Bank,
Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,

KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-23-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock.

The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 21, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

EXTRAORDINARY SITUATION IN BRITISH HOUSE

The Two Chamberlain's, Son Leads House, Father Looks On

London, Feb. 3—Great animation prevailed yesterday, when the House of Commons assembled for business after the formal opening of Parliament.

Mr Joseph Chamberlain was warmly cheered by the bulk of the Conservatives.

Mr. Austen Chamberlain, Chancellor of the Exchequer, in the absence of Premier Balfour, who is suffering from influenza, temporarily assumed the duties of leader of the House.

Canada Complimented.

The mover and seconder of the address in reply to the speech from the throne both referred with satisfaction to the settlement of the Alaskan dispute, and paid a tribute to the manner in which the award was received by Canada.

Mr. Laurence Hardy (Conservative) mover of the address, alluded to "the war which was threatening a vast area of the far East," and said he would trust the British Government to do its utmost to maintain peace.

Sir Henry Campbell-Bannerman, the Liberal leader in the House, followed. After expressing regret at the absence of the Premier, Sir Henry said he desired to question the Government regarding its attitude on the fiscal question, and asked was it a new Government with a new policy? The only way of dealing with the existing confusion, he added, was to appeal to the common sense of the electors of the country.

Sir Henry severely arraigned the Government's attitude on the fiscal question and announced that Mr. John Morley would in a few days introduce a most comprehensive amendment, involving the whole situation.

The Two Chamberlains.

When Mr. Austen Chamberlain rose to reply in behalf of the party of which his own father is supposed to be the most powerful member the House was spellbound. It had been expected Mr. Akers-Douglas, Secretary for Home Affairs would take the Premier's place, and interest was also heightened by the fact that Sir Henry Campbell-Bannerman, the Liberal leader, had just concluded a merciless satire on Mr. Joseph Chamberlain. The situation was without parallel in the recollection of the oldest politician, and all eyes were fixed alternately upon the father and the son.

Mr. Joseph Chamberlain, who had sat unmoved under the ridicule of the Liberal leader, turned nervously towards his son, who now takes precedence over him. With his monocle in his eye, an orchid in his buttonhole, and his hands clasped across his knees, the most prominent figure in the British Empire listened while his son defended him.

Mr. Austen Chamberlain spoke haltingly and under evident strain, yet when he referred to his father, it was always as "the member from West Birmingham."

Now and again cheers greeted Austen Chamberlain, whereupon, with unmistakable anger, his father turned his glance in the direction of the offender and occasionally cheered his son on.

As Mr Austen Chamberlain neared the conclusion of his defence of the attitude of Premier Balfour and his father towards the fiscal question, the interruptions grew more frequent, and the Chancellor of the Exchequer clutched the brass-bound treasury box, on which Gladstone was so fond of leaning, and addressed his remarks almost solely in the direction of his father. Defiantly Mr. Austen Chamberlain accused Sir Henry Campbell-Bannerman of attacking the Premier in his absence, and with a touch of pride he said, "The member from West Birmingham is here, he can speak for and look after himself.

The House regarded the proceeding as extraordinary, and the speech as weak.

On behalf of Premier Balfour, Mr. Austen Chamberlain declared the House of Commons must first decide whether or not it desired any change at all in the fiscal system, and until that point was settled the Opposition demand for details of the Government's fiscal reform plan could not be granted.

For the first time in years Joseph Chamberlain took his seat as a private member of the House of Commons, and was separated from his former colleagues in the Cabinet by a gangway. From this seat he saw his son act as leader of the House of Commons, a position which Mr. Joseph Chamberlain, with all his years of Parliamentary experience, never attained.

Though John Morley's amendment to the address to the throne is not likely to be destructive, the Government is thought to be nearing its end.

The Irish party, which now almost holds the balance of power, held a conference during the day, and decided to take no action until the Government has defined its intentions towards the Catholic University and the amendment to the Land Purchase Act, and for the present will probably abstain from voting on any division that would endanger the Government.

Morley's Amendment.

The text of the amendment to the address in the reply to the speech from the Throne, referred to by Sir Henry Campbell-Bannerman, and which was moved by Mr. Morley in behalf of the Opposition is as follows: "It is our duty, however, humbly, to present to your Majesty that our effective deliberation on financial services is impaired by conflicting demonstrations from your Majesty's Ministers. We respectfully submit the judgment of this House that the removal of protective duties for more than half a century actively conduced to the vast extension of the trade and commerce of the realm, and the welfare of the population, and this House believes that while the needs for social improvement are still manifold and urgent, any return to protective duties, and more particularly when imposed upon the food of the people, would be deeply injurious to the national strength, contentment and well-being."

The sitting was suspended at 7.30 p.m

A REIGN OF TERROR EXISTS AT HAYTI.

CONSPIRATORS AGAINST THE PRESIDENT SHOT DOWN ONE KILLED

Washington, Feb. 3—Advices from thoroughly authentic sources, which reached several persons in Washington today indicate that a terrifying state of affairs existed recently in Hayti. One letter from Port au Prince says of the happenings,

"Affairs here are in a state of wild and dreadful disorder. While the President, Gen. Nord, was in Gonaives, a conspiracy was discovered to inaugurate a revolution for the purpose of getting control of this city and forcing the President to agree to certain measures respecting the liberation and pardoning of a number of Haytiens implicated in the bank scandal. Learning of the conspiracy the Military Governor of the city, with a number of soldiers, broke into the house where Gen. Maximo Monplaisir, a leader, and a few of his friends were gathered. Orders were given to shoot all those within. Those who were killed were Monplaisir, his son, one or two other persons, and a servant. The owner of the house escaped by jumping out of a second storey window, breaking his leg, but managed to creep to the house of a German, who gave him shelter. The military authorities imprisoned his wife. The man then returned to his house on the condition his wife be released. The authorities found him in bed. Without any ceremony they fired 18 bullets into his body.

"The German Admiral informed the authorities if their action did not cease he would land marines and take possession of the city. The excitement is somewhat allayed, but is still intense and may break out at any moment. Nearly all of the Legations are full of refugees, even the American Legation has fourteen, among whom there are said to be three Senators and two Deputies. Most of these reached the Legation by scaling the rear wall some 17 feet high. The Legation was surrounded by troops when the French steamer left, and a close watch is being kept on it."

London, Feb. 3—A blue book on South Africa issued today contains a pessimistic despatch from Lord Milner, British High Commissioner in South Africa, in which, referring to the Transvaal Legislature's approval of Chinese Labor, Lord Milner says he realizes the gravity of the action, but there is not the shadow of a doubt as to its wisdom. The depression in business is increasing daily, the revenues are falling off, many people are out of work, and unless the situation soon changes a great exodus of whites is inevitable.

Public opinion, he adds, is decisively in favor of imported labor.

Mr. Rudyard Kipling, speaking at Rondebosch, said the Bond victory meant the shifting of the South African map end for end, and the revival of the old bitter work which was ended at Pretoria.

Chicago, Feb. 3—The arbitrators in the strike of the livery drivers have announced their decision. The result is a renewal of the old contract, against which the men struck, with the exception of two items, which were eliminated in favor of the owners. These two items are that there shall be no more delegates of the unions posted in the stables, and the liverymen are not bound to have uniforms made by union tailors.

The men are to receive $13 a week for a 12-hour day, with 25 cents an hour for overtime; with one day off in each week. These were practically the conditions before the strike.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.66 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $62.66 and $72.06 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present course it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

The PETERBOROUGH BROKERAGE CO., Fiscal Agts.
PETERBOROUGH, ONTARIO.

Equitable Gold Mining Co.

R. C. LANE, President. F. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 6x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—*the most of which is in ore*. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 20th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 265-tunnell; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

Dry Placer Miner, formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer-gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 200 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine—Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house or sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

CURES in 1 to 5 days. Guaranteed not to stricture. Prevents Contagion. THE EVANS CHEMICAL CO. CINCINNATI, O. U. S. A.

MEN AND WOMEN
Use Big G for unnatural discharges, inflammations, irritations or ulcerations of mucous membranes. Painless, and not astringent or poisonous. Sold by Druggists, or sent in plain wrapper, by express, prepaid, for $1.00, or 3 bottles $2.75. Circular sent on request.

If I Die Shall I Live Again?

"No, and I Don't Want To," answers Frederic Harrison.

Aroused by Mr. Myer's remarkable book on the survival of human personality after death, the Positivists or freethinkers of England are giving vent to their ridicule and contempt, and the chief of them, the eminent critic, Frederic Harrison, in the "Nineteenth Century" gives a brilliant description of his dream of the future life. He tells how he dreamed, and having cast aside his mortal body, passed into the Infinite, where, in his dream, he seemed to revel in the tornadoes of astral volcanoes, and to find rest in icy regions where the very ether had frozen into a liquid:—

"One seemed? who seemed? who felt? who saw? who passed? What, or who, was I? Individuality, personality, subjectivity, had slipped off as easily as the dried husk they were now laying out for burial. How childish, how brutish, how selfish did it seem now to conceive of any me! There was an end of Me, with its outlook of blind kitten or wriggling earth worm. Should it be rather We—was I now a Gas, a Force, an Emanation? Should it be rather They?—was I an indefinite unit of a limitless Power extended in Space, and contemporaneous with all Time? The pettiness, the feebleness, the squalor of the sense of being Me was too evident. A more glorious We took the place of Me: and We in turn became They; and *They in a flash became All.*

"What a miserable insect should I have been in this immeasurable Universe if, by miracle hardly conceivable of Omnipotence, the individual Me had survived! Personality was all very well in the muddy speck men call Earth; dust to dust, ashes to ashes. But in the blaze of an *Infinite Universe*, scintillating in its every atom with unquenchable light, throbbing not with momentary sensations, but with ideas, ideas intercommunicable from one point in the boundless All to every other point, without need of language, and without effort, act, or delay, to drag up into this *Immensity the soiled rags* of 'human personality'—'twould be better to be the parasite of the anopheles gnat, spreading death and disease in its passion for blood. When the entire Universe is continuously and eternally apparent as a whole; when all its infinite and interminable ideas are simultaneously cognizable *throughout its limitless field*; when Motion is extinct, by reason that everything is everywhere, and Sound is swallowed up in one endless circumambient Harmony, then, assuredly, there is no place left for Sight, Hearing, Speech or Thought. The wretched makeshifts of human sensation are as meaningless and sterile as the eyes of a mole. In this new world the craving for Personality is seen to be a sordid lust of the flesh.

"The transition from the dusty cribbed and fetid prison of the Body to the radiant immensity of the Universe, wherein all the uses of bodily sense, and all the notions of terrestrial mind are meaningless and void, was a change so sudden and tremendous that it could not become familiar at first. Remnants of ideas and instincts belonging to the old world of sense still lingered in the new world of transcendence. On earth one had played with conundrums of a geometry of four dimensions. The new world presented dimensions at once infinite in number, at once infinite and infinitesimal in quantity; rather it had no dimensions at all; for everything was everything else: and also was nothing. And so, too, in the world numeration was infinite—all numbers were at once infinity and zero. Two plus two now added up x millions raised to the nth power, and instantaneously flashed back into minus 0. Had shame been possible in the world of the Absolute, it would have been fit to mark this absurd attempt to count—this survival of gross materialism from the world of Relation and Matter.

"The dregs of consciousness, of some flickering sensation of an individual Me, would now and then break out, like a forgotten weed in a well-tended garden. I tried to think of myself as Me. . . . Such petty egoisms belong only to a world of limitations, of parts, of relations, of organisms. They drop off like dead leaves in winter in a world of infinites, of absolutes, a world which knows neither structures, nor parts, nor limits, nor substances, nor organs.

"Once, whilst the sound of human voices had hardly faded from my memory, I essayed to communicate some vague idea to the world around me. The stupidity of such a wish, its wild absurdity and gross animalism, was beamed forth in the myriad flashes of circumambient Lightning. Millions after millions of electric welkins pulsated across the Heaven, amidst the joyous peal of infinite Thunder claps. They had recognized my wish before it had been expressed; nay, before it had been formed. They were Me; I was They; We were It. The All now absorbed the Many; it had engulfed all individual entities, so that personality had ceased to have existence or meaning."

The Automobile and The Cart Horse.

A swift Automobile once swept proudly past a Tired Cart Horse.

"Hello, Old Stick-in the Mud!" it called, tauntingly. "Back to the Bone-yard, you Dead One!" So saying, it disappeared in a Cloud of Steam.

A little farther down the Pike, the Tired Cart Horse came upon the Swift Automobile, now Busted.

"Aha!" said the Steed, with a Horse Laugh, "who is Stick-in the-Mud now? You are indeed far from your Happy Home."

While the Cart Horse was thinking up other Biting Sarcasms of this Nature, they hitched him up to the Damaged Vehicle, and he was compelled to yank it laboriously to the stable, fourteen miles away on an Up Grade.

This fable teaches us that it is Wrong to gloat over the *Downfall of* our Enemies, until we are sure they can no longer injure us.—Ex.

The Unweaker Vessel.

"You are accused of mashing women," said the stranger.

"I know it," replied the street car conductor. "But 'tain't the women that gits mashed, so much as 'tis the small kids and old men. I s'pose on account of the women mostly wearin' corsets."

"Was his marriage a success?" "I should say it was. He has tried to secure a divorce in South Dakota, New York, Oklahoma, and England, and his marriage still holds."—Brooklyn "Life."

The Blushing Bride—The deacon done go ask me ef I take Washington foh bettah or foh wuss.

The Bride's Father—He di-id?"

"Ya-as, an' I dun go tell him foh bettah, if you please."—Yonkers Herald.

Bellows—Does your daughter play on the piano?

Old Farmer (in tones of deep disgust)—No, sir. She works on it, pounds on it, rakes it, scrapes it, jumps on it, and rolls over on it; but there's no play about it, sir.—Tit-bits

WILL THERE BE WAR?

Situation in the East Has Become No Longer Tolerable to Japan

London, Feb. 5.—The Daily Mail's Tokio correspondent says that hostilities are likely to break out at any moment. Japan is irrevocably pledged to assail Russia in the Manchurian policy, and war [illegible]. It [illegible] of a few days.

FROM ST. PETERSBURG

Copenhagen, February 5.—Warlike rumors reached the [illegible] from St. Petersburg. It is declared that the Czar has been assured by the war party that Japan purposes driving Russia out of the Far East, if that be possible.

Nicholas has been further informed in any event the Mikado is straining every nerve to wrest Manchuria from its present occupants, to close the straits of Corea, and to advance Japanese influence in Pekin to a position of [illegible] predominance. It is stated that these representations have impressed His Majesty and have left the peace party almost hopeless.

JAPAN'S VIEW.

Pekin, February 5.—Japanese officials decline to acquiesce in the view of the St. Petersburg Government that Russia would suffer disastrously in respect of prestige should the Czar yield to Japan's demand for a guarantee of the political and territorial integrity of China. Speaking to a press correspondent this morning a statesman of the first rank said,

"Japan does not ask Russia to submit to moral humiliation. On the contrary it wants Russia to vindicate its honor by adhering to the pledges made to the principal cabinets of the world. The Japanese Government stands ready to guarantee that it will respect Chinese sovereignty. It asks nothing more of Russia. If there is no moral disaster involved in this course *for Japan* why should there be any for Russia?"

IMPORTANT MOVEMENTS.

Port Arthur, Feb. 5—The arrivals of Japanese coal have been stopped.

"In consequence of the military authorities monopolizing the use of the railways the latter have declined to transport any more commercial freight.

The telegraph company declines to accept any more press or private messages as they will have to be routed via Che Foo. Forty-eight hours quarantine has been ordered against Che Foo on account of smallpox.

The authorities declare the naval and military dispositions should be regarded as precautionary not as offensive.

Port Arthur is quiet."

POSSIBILITIES OF THE POSTAL SYSTEM.

Cheap Mail Facilities One of the Chief Factors in Our Prosperity and Progress.

"Common is the commonplace." The most valuable of civil benefits is such a commonplace matter, that we scarcely give it a thought. It would take a winter on a whaler nipped in an ice floe to make us truly appreciable of the worth of the postal service. What a wonderful thing it is! Wonderful in its organization, with its vast machinery for the collection and distribution of letters, its railway mail cars, its route riders, the unfailing order and precision of its methods. Wonderful it is too in its results. It knits together families widely separated. It carries across the sea some tender lover's message or perhaps a little flower picked from the daisied grave of an English churchyard. Every hour of every day the mail bag is packed with words which waken love and laughter, and words which deepen the furrow in the cheek and dim the failing sight with bitter tears.

But with all this there is going on through the mail service a dissemination of human knowledge, a reaching out of human help which is one of the crowning blessings of our century. The correspondence schools led by Chautauqua, are sending to every village and hamlet the broader knowledge which is so eagerly craved by many who are shut in to the homely duties of a humble life. Without the mail system this plan of education would be impracticable.

Every mail, too, carries from the great centers, the advice of great physicians, which it would be impossible for the distant public to obtain were it not for the mails. Few people realize how many thousand people depend on the mail service for medical treatment. Not long ago when some postal affairs were being discussed in connection with the erection of the new postoffice building in Buffalo, N. Y., some light was thrown on this subject by the statement that the mail by Dr. R. V. Pierce amounted daily to something over 1,500 pieces. Of course this is not a common case, because Dr. Pierce's relation as chief consulting physician to Buffalo's famous institution, The Invalids' Hotel and Surgical Institute, makes his advice and that of his staff of nearly a score of skilled and experienced specialists much sought after, especially by women, to the treatment and cure of whose special diseases Dr. Pierce has devoted over thirty years of almost constant labor. But though this example is out of the ordinary, it may serve as an evidence of the amazing benefits reaped by the public from the mail service. It puts every outlying hamlet in touch with the most advanced medical specialism of the day. It gives at a cost of a two-cent stamp, the skill and experience that it has taken years to acquire. Literally at the cost of a two-cent stamp, since Dr. Pierce invites sick women to consult him by letter without charge. And this would seem to be one of the most remarkable services rendered by the postal system, perhaps the supreme service of all. For while it is a splendid thing to be able to shop in New York while living in Kansas, and a grand thing to be able to command the learning of great professors while working in the Michigan woods, it is a still grander thing that by means of this cheaply supplied service, men like Dr. Pierce, who have the disposition to be helpful, are enabled to place their skill and knowledge at the disposal of those who are being dragged down by disease, without the possibility of help from those about them. When one contemplates the vast and far reaching benefits of the mail service, so briefly touched upon in this article, it makes the familiar gray uniform of the postman the most glorious of all uniforms, for it is worn by the soldiers of the army of peace. It makes one feel like taking his hat off to the on-rushing mail train, and cheering the work and wisdom of Uncle Sam.

PROSPECTUS

THE COLORADO AND CONNECTICUT GOLD MINING COMPANY

(Incorporated under the laws of South Dakota.)

Main Office: MERIDEN, CONNECTICUT.

Capital $400,000   80,000 Shares at $5.00 each, full paid and non assessable

OFFICERS

WILLIAM GARLICK, Wholesale and Retail Ice Dealer, Meriden, Conn., President
J. H. A. THOMPSON, Investment Securities, New York City, 1st Vice-President
GEORGE S. WILCOX, Retired Manufacturer, Meriden, Conn., 2nd Vice-President
B. F. BARNES, Manufacturer, Meriden, Conn., Treasurer
WILLIAM O. CORVES, Miner, Meriden, Conn., Superintendent
ARTHUR S. GARLICK, Meriden, Conn., Secretary

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE S. WILCOX, RICHARD F. DORSEY,
WILLIAM GARLICK, ARTHUR S. GARLICK, B. F. BARNES.

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hinsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is 5x7 feet and is 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs.) is as follows: Copper, 16.05 per cent.; Gold 0.02 ozs.; Silver 92.40 ozs. Total value $90.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper, $6 40; Gold, $6.82; Silver, $254 31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatsoever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years. Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5,500,000 (now claimed to be worth $15,000,000). About six years have elapsed since he purchased it. The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado. New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN."

Mr. Edwin J. Hulbert, M. E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

B. F. BARNES, Fiscal Agent
Room 74, Wilcox Building, Meriden, Conn.

HIGH CLASS INVESTMENT

ZACUALPA RUBBER PLANTATION COMPANY

corporated Under the Laws of the State o California.

Zaluaipa Rubber Plantation is situ- in the best location in Mexico for cultivation of rubber. It has been for a great many years as a choice strip of rubber land and subse- experience has shown that it is to all that has been claimed for The affairs of the company are in hands of men of undoubted integrity high reputation as successful men To those seeking a safe in- which will secure a good in- for life, this proposition offers a opportunity

in La Zacualpa Rubber Planta- are not capital stock of a corpora- and carry none of the responsi- and obligations, or liability to of capital stock; but repre- an undivided interest in the planta- itself.

twelve thousand acres comprising plantation are divided into twelve shares, each share represent- one acre of land, and the holders in La Zacualpa Rubber Plan- are the actual owners of one un- acre of land, for each share held, a guarantee expressed upon the by La Zacualpa Rubber Plan- Company, under its official seal, two hundred or more rubber per acre for each share sold, and for same for a period of five and at the expiration of that time the first harvest and deliver proceeds thereof to the share-

other words, La Zacualpa Rubber Company sells to each share- one undivided acre of land in La Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely certain others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to

J. W. BUTLER, PRESIDENT,
3 Market St., San Francisco, C l.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placers in the ages past.

The Pearl Gold Mining Co. of Idaho

owns seven groups of mines—thirty-seven mining claims and is now working in ore in three of its mines.

The Treasury Stock is offered at a price that will unquestionably make money for those who invest. The Stock is non-assessable—no debts—all clear titles—safe, experienced and conservative management.

HOME RULE A DREAM SAYS MR. WYNDHAM

HE DECLARES THERE IS NO IDEA OF GRANTING SEPARATION

London, Feb. 3— Irish affairs occupied a considerable portion of the time of the House of Commons today, and the Government was subjected to a fierce attack by the Irish members. Mr. Wyndham, Secretary for Ireland, made it abundantly clear that the Government had no intention of granting Home Rule. He promised, however, an amendment to the Land Act, which the Irish members had declared had fallen far short of expectations.

Redmond Insists on Home Rule.

"For the Irish party there is no no such thing as an alternative policy to Home Rule," declared John Redmond, the leader of the Irish Parliamentary party as he resumed the debate on the address in reply to the speech from the throne. Mr. Redmond proceeded in a speech of great length, to detail the various grievances of Ireland, incidentally informing the Liberals that it was a delusion to suppose they could count on Irish support by promising an alternative policy to Home Rule, because the Irish obtained the valuable Act last year remedying some of the evils of past government, some persons seemed to think that the Irish question was shelved; but no concession could weaken the demand for self-government. On the contrary, every concession they had obtained or might obtain would be used for the furtherance of the contest for Home Rule. The Irish would rather govern themselves badly than be governed well by another nation

Attacks Educational Policy.

Mr. Redmond bitterly attacked the Government's attitude on education in Ireland, describing it as grossly absurd are irreparably harmful to the youth of Ireland. The Government's course on the Irish University question, he added, was a dishonest evasion of an admitted duty and a grievance which poisoned the life of Ireland and condemned her to failure in the struggle of nations.

The Government, continued Mr. Redmond, had played the "devil's game of false promises" too often, and if the Government desired the support of the Irish in Parliament and at the polls nothing short of the introduction of the requisite legislation wolud secure it.

Referring to the land question, Mr. Redmond said the failure of last year's Act proved that this Parliament had neither time nor capacity to legislate satisfactorily for Ireland. The Act must be amended forthwith, alike in the interests of the tenants and landlords.

Mr. Redmond concluded with a few scathing remarks concerning "that irritant anachronism known as Dublin Castle," declaring the present Government of Ireland was too rotten to be mended, and must therefore be ended. It would be the duty of the House to oppose the Government, unless the latter foreshadowed some appreciable advance on the road to Home Rule.

Will Amend Land Act.

Mr. Wyndham, Chief Secretary for Ireland, in reply, announced the Government's intention to introduce an Act to amend the Irish Land Act and clearing all the doubtful points.

In regard to the university, Mr. Wyndham said the Government had no intention of explaining at present. The question ought to be settled, but it was useless to attempt anything until a more substantial agreement had been arrived at between all the parties in Ireland.

With reference to Mr. Redmond's demand for Home Rule, Mr. Wyndham said Mr. Redmond's object seemed to be to prove that he was the real head of the third party in the House of Commons, and that it demanded a separate Parliament for Ireland. The Chief Secretary denied that he ever had proposed Irish legislation with the view of giving Home Rule to Ireland, or as a concession for the purpose of changing the views of the Nationalists. He also denied that he had any understanding with the Irish party for any purpose. He had been careful not to delude the Irish by rosy, ambiguous periods, but he would insist that Ireland derive a fair share of the financial resources of the Empire.

Mr. Wyndham did not believe the Irish question would be settled for at least fifty years. Even if Ireland had her own Parliament, she could not, in the present state of the money market, find $750,000,000 for the purpose of carrying out the provisions of the Land Act.

The Attack Continued.

The debate continued until the sitting was suspended at 7.30 p.m., a number of Irish members participating.

At the night session of the House Joseph Devlin bitterly denounced the Government as "double-faced and hypocritical," and said the only remedy for the Irish grievances was a measure of self-government.

E. J. Saunderson replied that the greatest difficulty of supporters of Home Rule was explaining their attitude of the last ten years, during which the Nationalists had shown their loyalty by rejoicing at every British reverse.

Mr. Redmond said the present Government of Ireland was a dismal failure.

Mr. Blake, speaking in the House, said he wanted to see the university agreeable to the bulk of the Irish people instead of the Londonderry quarter. Home Rule was not Rome Rule. It would remove differences in religious beliefs, make Ireland united, and change the whole front of national life.

BOUNTY INSTEAD OF DUTY

London, Feb. 4— The Standard this morning, says it understands that the Government and Joseph Chamberlain are considering a suggestion which has been made that, instead of a duty on foreign wheat, a bounty should be given on wheat grown in Great Britain and the colonies, as a proposal less objectionable than a protective tax.

BEING TREATED

Ottawa, Feb. 4 —Sir Richard Cartwright has gone to a sanitarium for treatment. He will be absent about ten days.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA —AND— BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00. Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per share

This company now owns the well-known Augusta mine and its extension for over 7000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 130 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer
for a limited time
only a
SPECIAL BLOCK
OF 50,000
SHARES OF
THE TREASURY
STOCK
of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,000,000 Shares. Par value $1 00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company in t day giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 190 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*

C. L. ARZENO, General Manager.
603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO,

DASHES HERE AND THERE BY TIMES' REPORTERS

The Regimental Colors

The new colors for the 57th Regiment have been removed from the Customs House, and placed in a safety vault, prior to their formal presentation in May.

At the Police Court

At the Police Court yesterday John Pogue appeared on two charges, one of being a vagrant, and a second of being drunk and disorderly. He was remanded to gaol for one week. A man who has been in gaol for some time charged with insanity, was discharged

Park Street Church

Rev. A. H. Brace, the pastor, preaches morning and evening in the Park st. Baptist church tomorrow. Morning subject: "Jesus Sat Down with the Twelve." Evening: "Decision of Character." Ordinance of baptism will be observed in the evening, and those recently baptized will take their first communion in the morning.

Injured At New Power House

While superintending the installation of the electrical equipment at the Peterborough Hydraulic Power Company's new power house, Mr. Simmons was injured. A large piece of machinery was being raised preparatory to being placed in position by means of a chain fall lift. The chain broke, and one end of it struck Mr. Simmons on the left arm. Dr. McNulty was consulted, and placed the arm in splints. It was not known whether the bone was broken or not.

LAKFIELD CARNIVAL

Don't forget the Grand Masquerade Skating Carnival at Lakefield Monday Night—Admission 25c

—The Council meets in Committee of Whole tonight.

The attendance at the

Peterboro' Business College

is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre of Canada.

Over 90% of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write for particulars regarding our correspondence course

WM. PRINGLE,
Principal.

THE CLOSING MEETING

Bethany Tabernacle Crowded to the Doors Last Night

Evangelist Stephens closed a very successful series of evangelistic meetings last night in Bethany Tabernacle. Much interest has been taken in the meetings, Mr. Stephens being an eloquent and forcible speaker. Last night he delivered a stirring address dealing with the all-important subject of salvation.

During these special meetings, Rev. Mr. Stenernagel, the esteemed pastor, was most assiduous in his endeavors to promote the success of the meetings.

DIED IN LINDSAY

Mrs. Cottingham, Sister of Mrs. E. Rebill of Town

Lindsay Watchman-Warder—Deep regret was caused on Sunday evening by the news that Mrs. Cottingham had died suddenly of heart failure. Deceased was the widow of Mr. Anthony Cottingham, who died about 35 years ago. She had been in ill health for several months but her sudden taking-off was unexpected.

Mrs. Cottingham's maiden name was Hannah Rea; she was a daughter of the late W. Rea, who came to Ops from Ireland nearly a century ago. About 1866 she and Mr. Cottingham were married and came to Lindsay. A family of four survive her. They are—Jennie, at home, William and Albert of town; and Walter of Chicago. Mrs. J. Parsons, of Omemee, and Mrs. S. Rebill, of Peterborough, are sisters of the deceased.

Mrs Cottingham was a member of the Methodist church, and the funeral to Riverside on Monday was conducted by the Rev. G. W. Henderson.

TO MAKE TURBINES

Big Engines to be Made by the C. G. E. Company

Toronto News—The Canadian General Electric Company have received an order from the Toronto Electric Light Company for a number of steam turbine generator units, of a capacity of 2,500 horse power each. These are now being manufactured at the Peterborough Works of the company, and mark the beginning of the manufacture in Canada of Curtis steam turbines the Canadian General Electric owning the patents for Canada.

The new plant will be installed at the Electric Light Company's works at the foot of Scott street, a new building for it having been erected during the past season.

Electric light business has increased so rapidly of late that the company has found it necessary to provide for increased power, before the power from Niagara will be available. Mr. Frederic Nicholls states that even after such power is available in Toronto, such large machines held in reserve could be promptly put into action in case of accident to the Niagara power service.

APPEAL TO THE CITIZENS

Horticultural Society Desires Assistance to Increase Interest

To the Public.—The Horticultural Society desires the assistance of the citizens in arousing an increased interest in the culture of vegetables, plants and flowers, and in the development of taste in the maintenance of public and private grounds. The annual Horticultural Show is believed to be an effectual agent in cultivating an honorable competition amongst those who interest themselves in the ancient and noble art of horticulture. Every year it is found that a large number of persons who grow good stuff, either from modesty or neglect, fail to exhibit, and so fail in a duty to assist an art which has their approval.

The society asks citizens to undertake this spring to help them by growing for competition either flowers, plants or vegetables. There is plenty of time to get fine seeds. A copy of the prize list will be sent by Mr. Beal, the secretary, to every applicant. Grow something with the aim that it shall win a prize. This year the society will send to your homes for whatever you may desire to exhibit and will return it after the exhibition. A united effort and a spirit of competition will ensure pleasure to the grower, a successful show and benefit to the community.

D. W. DUMBLE, President.
H. BEAL, Secretary.

INCIDENTS OF THE DAY

Newsy Paragraphs Picked Up By Reporters on Their Rounds

—The hospitals seem to be the latest popular winter resort for a good many of our citizens.

—With coal becoming scarcer this year, this great family journal is of opinion that spring is an absolute necessity.

—December was the coldest in 37 years, January the worst in 60 years, and February has started to make it 80 years I think.

—Miss Spaulding will address the gospel meeting in the Y.W.C.A. on Sunday afternoon. Miss Bella Bicome will sing.

—Rev. Father Phelan, of Young's Point, was recently presented by one of his parishoners with two handsome statues. One was placed in St. Mary's church Young's Point, and the other in the Lakefield church.

—The Globe says that it is proposed to introduce a bill at the next session of Parliament to abolish filthy lucre. In this connection we might state that there were several introduced to this g. f. j. at the beginning of the year wiped out most of ours.

—An entertainment will be given in aid of the Deep Sea Mission on Monday evening, February 15th, in St. John's School House. A unique and pleasing programme is promised, and as the object is a worthy one, it is hoped that the entertainment will be a grand success

—Hastings Star—A large owl was captured on the farm of Mr. Thos. Landon, Asphodel, on Tuesday morning, by his son Eddie, who had set a trap for the intruder of the chicken coop. The owl was quite large, measuring 48 inches from tip to tip of the wings. After the Peterborough taxidermist, to whom the bird was sent, gets through with it, it will not feel like having chicken pie for dinner.

—A well-dressed stranger, with a large bank roll, went suddenly insane while in a New York Central train between Buffalo and Rochester, N.Y., on Saturday. He smashed considerable property in the buffet car, but, apparently regaining his reason temporarily, he settled for the damage done by paying $50. He was next heard of at the plant of the Defender Photo Company, which he insisted was an hotel, and because he was refused admission he broke windows and was jailed. He gave his name as Dr. Frank Zwick, Stirling, Ont., and said his wife's action for divorce has driven him crazy.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Ex-Reeve John Smith, of Ashburnham, is home for a few days.

—We are pleased to state that Miss Aileen Fair, who has been quite ill with la grippe, is recovering.

—Mr. W. H. Hill, who has bee laid up with a severe cold, is now able to be around again.

—Mrs. C. McClelland charmingly entertained the members of the Murray street Baptist church choir last night, at her residence, Downie street.

He Found His Money

On Thursday Mr. Johnston, caretaker of the Murray street separate school, had the misfortune to lose his pocketbook containing $21 in bills. Like a sensible man that he is, he put a small ad. in The Times, and yesterday afternoon the pocketbook and money was returned to him, the finder being Mr. Samuel McCabe, who left the purse at The Times Bookstore. It always pays to advertise in The Times.

Mr. Richard Chowen Caned

A very pleasing event took place at the residence of Mr. Richard Chowen, 711 Water street, on Thursday evening when the choir of the George street Methodist Church was entertained by Mr. and Mrs. Chowen. A very enjoyable time was spent, and those present took advantage of the occasion to show their appreciation of Mr. Chowen's valuable services to the choir by presenting him with an address, accompanied by a handsome gold-headed cane. Mr. Chowen returned thanks in suitable language.

Interesting Lecture

Mr T. W. Glover, "The Man from New Zealand," delivered a very interesting lecture last evening in the Y.M.C.A. Hall on the temperance cause and its good work in the Australian continent. Mr. Glover had a considerable number of lantern views to illustrate his address which were much appreciated by those present.

Mr. Glover who has been the guest of Mr. Walter Dredge during his stay in town, leaves today for Ottawa.

LAKEFIELD CARNIVAL

Don't forget the Grand Masquerade Skating Carnival at Lakefield Monday Night—Admission 25c.

Local Sports

The persistent reports that there will be a meeting of the Peterborough Turf Club for the elections of officers next Monday is totally unfounded. Probably the false statement is being circulated by those who made repeated attempts to stuff the ballot box by putting in bogus votes. No date for the adjourned meeting has yet been fixed by the President, Mr. R. H. Jackson, and he will see that the shareholders have notice in good time. No attention should be paid to unauthorized announcements of meetings not called constitutionally by the president and with his name to them.

R. H. JACKSON.

The secretary of the Turf Club on the strength of a majority of the members of the Association, announces that a meeting will positively be held on Monday afternoon at 3 o'clock in the club rooms—regardless of any reports to the contrary. As to what business will be transacted is not yet known.

The members are at a loss to know and cannot ascertain why Mr. Jackson so persistently contradicts notices of the meeting which is bound to take place, when it is the unanimous desire of the members.

A. ROUNTREE,
Secretary.

The Junior Colts defeated The P.C. I.'s in a hotly contested match yesterday afternoon by a score of 4—2.

—The Children's Aid Society wish to acknowledge the receipt of two dozen tuques sent by Mr. Thomas Barrie, and which will prove a very acceptable donation

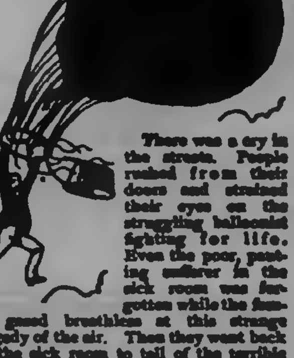
The Latest Humor.

"Mrs. Talkyer-Blind can say some of the most cutting things."

"Yes. If she could only keep her mouth closed for five minutes you could have her arrested for carrying concealed weapons."—Life.

In facing a sleeve, turn it, and place the facing inside the sleeve before sewing it on.

Gathers should always be set on the right side, but never with a needle; a large pin



There was a cry in the streets. People rushed from their doors and strained their eyes on the struggling balloonist fighting for life. Even the poor, panting sufferer in the sick room was forgotten while the family gazed breathless at this strange tragedy of the air. Then they went back to the sick room to tell of the terrible struggle for life they had just witnessed. It did not occur to them that under their very eyes a more terrible, more pathetic struggle was going on daily.

There can be nothing more pitiful than the struggle the consumptive makes against disease. The greatest help in this struggle is gained by the use of Dr. Pierce's Golden Medical Discovery. It cures obstinate coughs, weak and bleeding lungs, emaciation, and other ailments which if neglected or unskillfully treated find a fatal termination in consumption.

"In 1898 one of my daughters was suffering on account of a severe cough, hectic fever, wasting of flesh and other symptoms of diseased lungs," writes Rev. Joseph H. Fesperman, of Barium Springs, Iredell Co., N. C. "I promptly gave her Dr. R. V. Pierce's Golden Medical Discovery with gratifying success, and she now enjoys excellent health. This being true, I heartily endorse your medicine."

Accept no substitute for "Golden Medical Discovery." There is nothing "just as good" for diseases of the stomach, blood and lungs.

Dr. Pierce's Pleasant Pellets assist the action of the "Discovery."

Grand Trunk at World's Fair

The extensive and comprehensive exhibit which the Grand Trunk Railway System are arranging for the World's Fair, held at St. Louis during 1904, is now in course of preparation. The proposed pavilion which it is the intention of erecting is one combining beauty, elegance and artistic merit and the designs submitted to the Exposition authorities were greatly admired and accepted. The pavilion will be erected in the "Fish and Game" Building, facing on three aisles, will be of the Corinthian and Ionic architecture style, embellished with ornamental designs of fish and game, and it is claimed will be one of the handsomest structures at the Exposition. Canadian haunts will be the predominating feature of the display.

The mammoth palaces that form the main picture of this "World's Fair"—the Foreign and State buildings and the "Pike" (Midway)—are at the present time much further advanced before the opening date than the buildings of any other of the great expositions that have been held in the past; in fact, the installation of exhibit is now being proceeded with in many of the buildings.

One good feature of St. Louis is the Union Station; there being only this one, all trains from all points with the exception of excursion trains from a distance of one or two hundred miles of St. Louis will arrive and leave from the one depot, and as the street car lines pass the station visitors will have no trouble in reaching their hotels or boarding houses without difficulty and early after arrival.

People who have seen the grounds for the first time marvel at the magnitude of this colossal undertaking and do not hesitate in forming the opinion that it will be the greatest event from an instructive, educational and amusement point of view, that the world has ever seen.

Two hundred and fifty conventions have already signified their intention of visiting and have completed arrangements for St. Louis during the "World's Fair."

Ropy Milk.

Concerning the trouble, which is caused by an outside germ which gets into the milk after it is drawn, Prof. Farrington recommends the following:—

The best way to overcome this trouble is to carefully wash the cow's udder and brush her legs, afterwards drying both with a clean towel; then the milker should wash his hands, thoroughly steam the pail into which he milks, and after throwing away the first streams of milk drawn, milk the cow with dry hands into this clean pail. The milk should be protected as carefully as possible from dust and then strained into the cans in which it is to be transported or in which it is set for cream rising. The strainer cloth, carrying cans and separator, if one is used, should be given an extra washing and scalding in order to destroy any of these germs which have been the cause of the ropy milk. There is no doubt that this trouble may be overcome in this way, and the success one has in doing it will depend entirely on how carefully he protects the milk from the germs, which must get into the milk after it is drawn from the cow.

An hour of passion is worth a year of experience, but it may prove even more expensive.

Lookers-on see most of the game, but they have to cultivate a wicked imagination sometimes.—R. H. 9). Hill.

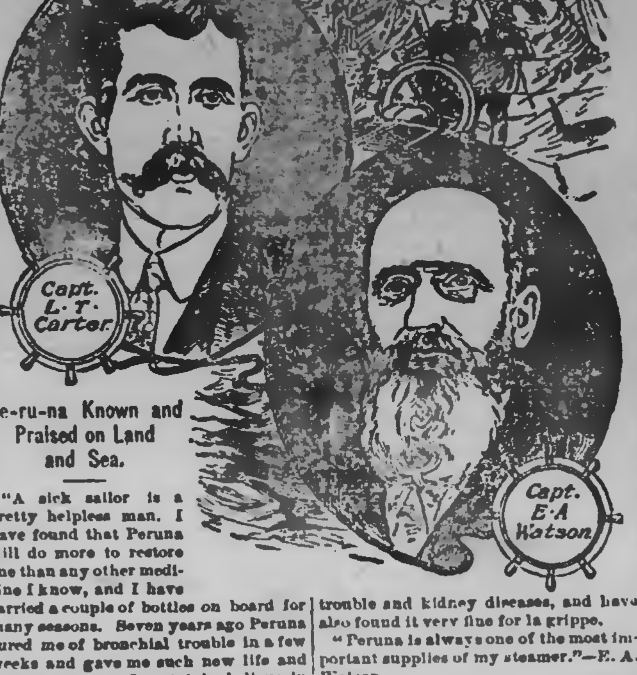
CAPTAINS ON MANY SEAS NEVER WITHOUT PE-RU-NA.

"Give Me My Compass and Pe-ru-na and I Will Steer Clear of All Wrecks."



Pe-ru-na Known and Praised on Land and Sea.

"A sick sailor is a pretty helpless man. I have found that Peruna will do more to restore one than any other medicine I know, and I have carried a couple of bottles on board for many seasons. Seven years ago Peruna cured me of bronchial trouble in a few weeks and gave me such new life and nerve force that I certainly believe in telling you of it.

"Give me my compass and Peruna and I will steer clear of wrecks of all kinds and land in port safe and well with vessel and men."—Capt. L. T. Carter, 123 10th Avenue, Pensacola, Florida.

Capt. E. A. Watson, M. E., 48 Elizabeth street, Ottawa, Ont., writes:

"Peruna has my heartiest endorsement. If there is any place that you are helpless when ill it is on board a steamer, at sea, miles away from any assistance. Sometimes two or three of my men would be sick at one time and seriously cripple the force, but since we have learned of the value of Peruna, by taking a few doses they recuperate very quickly. We use it for colds, lung trouble and kidney diseases, and have also found it very fine for la grippe.

"Peruna is always one of the most important supplies of my steamer."—E. A. Watson.

With a bottle of Peruna aboard sailors have a remedy on which they can rely.

Commodore U. S. Navy.

Commodore Somerville Nicholson, of the United States Navy, in a letter from 1837 R St., N. W., Washington, D. C., says:

"I unhesitatingly recommend Peruna to all persons suffering from catarrh."—S. Nicholson.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

RUSSIA WOULD CRUSH BRITAIN AS WELL AS JAPAN

St. Petersburg, February 7—Russian generals, now that war is almost universally believed to be unavoidable, are amazingly outspoken as to the purposes that inspire the Government's policy. "What the nations are about to witness," said a very prominent soldier to a press correspondent this morning, "is a grand turning movement on the part of Russia against its old, dogged opponent, Britain. An an incident of this operation Japan must be crushed. They must be cleared off Russia's flank, otherwise the advance of the Czar's forces cannot be continued across China. Japan now stands between Russia and the aim of which she has never lost sight—to turn the British off their position in India and to shatter the British wall that blocks the Russian path in the Persian Gulf and the Bosphorus. Lord Lansdowne, the British Foreign Minister, not long ago, boldly announced in the House of Lords that Britain would fight any power that might presume to share the advantages of the Persian Gulf. All I have to say is that that is a question of strategy and strength, rather than a question of official pronunciamentos."

RUSSIAN GENERALS DECLARE THAT ULTIMATE OBJECT IS TO CRUSH GREAT BRITAIN AS WELL AS JAPAN

Situation at Port Arthur, Concentration of Russian Troops

Question of Peace or War Rests With the Great Russian Ruler.

BRITAIN WOULD COMMAND A HALT.

Should Japan Prove Unable to Resist the Enemy

Tokio, February 8.—Japan is growing impatient and is likely to initiate measures very shortly that will compel Russia to disclosure whether it means to fight or abide by its pledges. Certain observers think it possible that the threats made by St. Petersburg correspondents with the sanction of the censor, together with the movements of Russian troops and ships, do not necessarily reflect the real intentions of the Czar's Government, but are intended to bluff the Tokio authorities into accepting the forthcoming Russian proposals. If such is their purpose they are doomed to failure. When the unalterable resolve of Japan is appreciated at St. Petersburg some optimists will believe the Czar will force his belligerent counsellors to the rear, but there is really little hope of such action.

BOASTFUL RUSSIAN OFFICERS.

St. Petersburg, February 8.—Russian generals, now that war is almost universally believed to be unadvoidable, are amazingly outspoken as to the purposes that inspire the Government's policy. "What the nations are about to witness," said a very prominent soldier to a press correspondent this morning "is a grand turning movement on the part of Russia against its old, dogged opponent, Britain. As an incident of this operation Japan must be crushed. They must be cleared off Russia's flank, otherwise the advance of the Czar's forces cannot be continued across China. Japan stands between Russia and the aim of which he has never lost sight—to turn the British off their position in India and to shatter the British wall that blocks the Russian path in the Persian gulf and the Bosphorus. Lord Lansdowne, the British Foreign Minister, not long ago boldly announced in the House of Lords that Britain would fight any power that might presume to share the advantages of the Persian Gulf. All I have to say is that this is a question of strategy and strength rather than a question of official pronunciamentos."

EVERY HOPE ABANDONED.

Paris, February 8.—Nearly every hope of peace in the Far East has been abandoned and official France feels gloomy. Although the Foreign Office repeats its statement that "France in no way can be drawn into the conflict," the uneasiness which is confessed in the corridors of the Chamber and the Senate is remarked wherever serious people gather. It also exists in the Quai d'Orsay. At the Foreign Office this morning a press correspondent conversed with a prominent Parisian merchant with large interests in the Far East. He had just left M. Delcasse, the Foreign Minister. "The minister," he said, "Gave me solemn assurance of his conviction that there would be no foreign intervention in the conflict, but added that in any case apprehension of France's ultimate participation was based on the most improbable contingencies."

Meantime, in spite of the Russian alliance the rank and file of Frenchmen are bitterly opposed to the view that neutrality is unjust whatever may happen or whatever Britain may do in event of war. More over French public men believe a large share of blame will fall on the English press and Government. The King's speech at the opening of Parliament is not considered as at all representative of the regal feelings or secret intentions of the British Cabinet.

EIGHTEEN STEAMERS CHARTERED.

Copenhagen, February 8. — Eighteen steamers from nearly every port in Europe were chartered to-day by the East Asiatic Company, from April 1 Mr. Andersen, general manager of the company, said to a press correspondent to-day "I am ordered by the Russian Government to acquire all the tonnage available to run with provisions, not war material, from the opening of the war from Odessa to the Far East. The Siberian Railway is not capable of carrying all the provisions needed for the campaign." Mr. Andersen thinks a Russian victory would benefit his company immensely, whereas defeat would mean stagnation for European commerce altogether, as China would consider a Russian defeat the occasion for reaction against European progress, and European capital would not be invested in the East for years to come.

BRITAIN'S INTERESTS.

London, February 8.—Every day that brings war nearer in the Far East directs attention to Britain's vital relations to the crisis. It is recognized that Russia is threatening a principle to which the country is thoroughly committed, and which is conceived to underlie British commercial well being and even political security in Asia. Earl Percy's statement in the House of Commons last night that Lord Lansdowne had made repeated representations to St. Petersburg on the subject of Russia's promised withdrawal from Manchuria indicates the embarrassment the Government would feel should Russia decide to annex the province by conquest.

Should war break out, and Japan prove unable to resist the enemy, many well-informed diplomatists believe Britain would command Russia to halt. The atmosphere in Downing street is charged with mystery and anxiety.

A SERIOUS ACCIDENT AT A LUMBER CAMP

A MAN IN DIGBY TOWNSHIP WAS BADLY INJURED BY A SAW LOG

Lindsay Post—A shantyman, named Edward McFadden, whose home is in Digby township, was badly crushed by a rolling sawlog in a lumber camp on the border of Peterborough county. The unfortunate fellow was helping to load some heavy logs onto a sleigh when the end of one not solidly in place, slewed round, knocking him down, and passed over his body from the waist to the head, crushing him badly, but not fatally.

The injured man was conveyed to Gooderham, a 30 mile ride—where Dr. Sutton gave him every attention. Finding that the patient manifested symptoms of having contracted pneumonia as a result of exposure on his long trip from camp, the Dr. decided to remove him to the Ross Hospital, and set out with him Wednesday afternoon. The trip over the I. B. & O. Railway to Irondale Junction was made on time, but owing to the blockade on the Haliburton line the doctor and his patient did not reach Lindsay till 1 o'clock Thursday morning, when a hack was secured and the injured man transferred to the Hospital, where he is doing well. Dr. Sutton is still in attendance, no train having left for the north since his arrival.

LEAD POISONING

Budapest, Hungary, Feb. 6— An epidemic of lead poisoning has broken out in the Villages of Obream, Marge, and Glantoka in Krasso-Szorney County, as the result of drinking brandy made in lead-lined stills. Over one hundred of them are dead. The distillers claim that lead-lined stills give a higher degree of alcohol than other kinds of stills.

A RAVING MANIAC

New York, Feb. 6—A despatch to The Press, from Derby, Ct., says;—As the result of drinking a quart of patent catarrh medicine, Mrs. Mary Healy of this place, has been violently insane for four days. To get quick results she drank the medicine all at once. In two hours she was raving, screaming and tearing out handfuls of hair. When locked in her room by her boarding mistress she kicked out the windows and smashed the furniture. Doctors have worked three days without improving her condition. Doctors say her reason has been permanently destroyed.

FROM ST. PETERSBURG.

Copenhagen, February 6 — Warlike rumors reached the Danish court from St. Petersburg. It is declared that the Czar has been assured by the war party that Japan purposes driving Russia out of the Far East, if that be possible

THE T. V. CANAL BEING DISCUSSED

JOURNAL OF COMMERCE HAS SOMETHING TO SAY

CANAL MUST BE COMPLETED

The Western Country Repuires that the Work be Finished

The Journal of Commerce, Montreal, says that the appointment of the transportation commission by the Dominion Government has aroused in the vicinity of Peterborough, a revival of interest in the question of the Trent Valley Canal and its effect on the transportation problem, which is pretty generally admitted to be one of the most important claiming the attention of the legislators. The fact, says a Peterborough report, that Mr. Bertram has stated that the commission will hold a sitting at Peterborough and go over the proposed route of the canal for the purpose of obtaining information as to the possibilities of the canal, has had the effect of arousing public bodies to the necessity of bringing to the attention of the members of the commission the great national advantages of having the canal completed speedily.

The question formed the chief subject of discussion at a banquet recently given by the newly-elected Warden of the County of Peterborough, Mr. R. A. Park, when his Worship, Mayor Roger, in replying to a toast, remarked that he believed the greatest question claiming the attention of Peterborough public bodies was that of the Trent Valley Canal. Dr. Jeffs, a prominent citizen, and one of the officials of the Peterborough Sugar Company, stated that he had been informed on good authority from Mr. Stuart, the Treasurer of the new cereal company with which Hon. Senator Cox is prominently Associated, that this company had plans already prepared for the erection of an immense flour mill, the construction of which would be commenced as soon as assurances were given that the canal would be pushed to speedy completion. The company ship their products very largely to Great Britain, and the completion of the canal it is claimed, would greatly benefit them in shipping rates. The company has just completed the erection of a 5,000 horse power electric plant, of which they are now using 1,500 horse power, and if the canal were completed they would build manufactories which would require the entire quantity generated at the plant to operate.

The local benefit is shown by the fact that while at the present time the freight on coal from Oswego to Port Hope by water is 20 cents per ton, that to Peterborough, 30 miles farther, is $1.25 a ton, because of the rail haul.

EVERYBODY READS THE TIMES.

WHAT WILL EUROPEAN POWERS DO?

IN CASE OF WAR BRITAIN MAY BE FORCED TO HELP JAPAN

A GENERAL WAR POSSIBLE

France Would be Expected to Unite with Russia

London, February 8.—The Post says; If war breaks out between Russia and Japan, the situation in Europe will become delicate and interesting. Formally, Britain is an ally of Japan, and France of Russia; but while British interests would suffer tremendously if Japan were to be crushed, it is difficult to see what possible difference it makes to France whether Russia is rebuffed in Manchuria. The withdrawal of Russia would mean an "open door," from which France, with all the world, would profit.

Still if Britain intervened to help Japan Russia would undoubtedly call upon France—and then would come the test. France might remember that Russia has not been over-eager to take up her quarrels in the past. In fact, it is just possible that the peace feeling which seemed to sweep over Russia a little while ago, may have arisen from some plain talk from its ally in which the Northern Colossus was given to understand that an alliance is not all "take" and no "give."

Another influence which might affect France would be the attitude of Germany. A word from the Kaiser; and France would be abundantly justified in saying that she must concentrate her forces at home for self-protection. Even is the Kaiser makes no sign, can France go to war in the East, with the entire Triple Alliance watching her exhaustion?

Now none of these things affect Britain. Germany could not keep her quiet; and, if she ventured to try it, the United States would almost infallibly range itself with the British-Japanese alliance. The Britain would be fighting for positive and real interests; and not merely for the sake of her ally. This would undoubtedly mean a great difference in the attitude of the British people.

Then again, if both Britain and France became involved in the East with Russia and Japan, what would be the position of Germany? Plainly all it must do is to "sit tight"; and when the four powers have exhausted themselves take whatever it fancies. After a costly war in the East, who, for instance, would interfere if Germany occupied Vienna and The Hague—of course, with the consent of the German-Austrians and the German-Dutch? This would make Germany the arbiter of Europe.

Could France take this risk? Then the relations between France and Britain are now happily very close. It would require considerable pressure to drive either country into war with the other. Stranger things have happened than that the pressure would only result in breaking the Franco-Russian alliance, and of bringing about a Franco-Italian-British understanding. Put the United States into this combination and there could be even no challenge of its command of the sea.

Thus it may come about that Russia will find herself isolated in the East—especially in the event of beating Japan, and thus threatening the trade of northern China. Of course, Germany might buy the valuable friendship of Russia by going over to her now; but that would almost certainly dislocate the entire European combination and bring about a new alignment. In any case if hostilities come, the European capitals will be, at least, as well worth watching as the Corean waters; for there in where any really dangerous conflagration will start.

WEATHER NOTES

Cold and windy.

A WILD REPORT IN LONDON SAYS THAT A SEVERE NAVAL ENGAGEMENT HAS TAKEN PLACE

In Which Three Russian and Two Japanese Ships were Destroyed.

Great Excitement Prevails in London Over This Report.

St. Petersburg, Feb. 6— The Japanese Minister, M. Kurino, is making preliminary preparations for his departure from St. Petersburg

St. Petersburg, Feb. 6— The Russian reply has been handed to the Japanese Government by Baron De Rosen, the Russian Minister at Tokio.

London, Feb. 6— The Times prints prominently a despatch sent from Tokio last evening, saying that the situation is now regarded as hopeless.

The Times says editorially there is reason to believe that all expectation of a peaceful settlement of the Russo-Japanese dispute must be abandoned.

London, Feb. 6, 2.51 p.m.—The scare in city circles here was exemplified today by a wild report current on the Stock Exchange that a severe naval engagement has taken place, in which three Russian and two Japanese ships were sunk.

BURNED TO DEATH

House Caught Fire While the Family was Asleep

Montreal, Feb. 5— Four sleeping inmates of a dwelling at 176 Cadieux street were suffocated early this morning, and three others were badly burned and injured, one of whom will probably die.

The dead are; Mr. Edward Crawford 60 years of age; his wife, Mrs. Edward Crawford, 60 years of age; Wm. Crawford, 15, her son; and James Hare, 23, son-in-law.

The injured are Mrs. Ethel Hare, 22 years, burned on hands and face, and arms cut; Jas. E. Hare, 8 months infant son of Mrs. Hare, badly burned, will die; Thos. Hare, 25 years of age, face and hands burned.

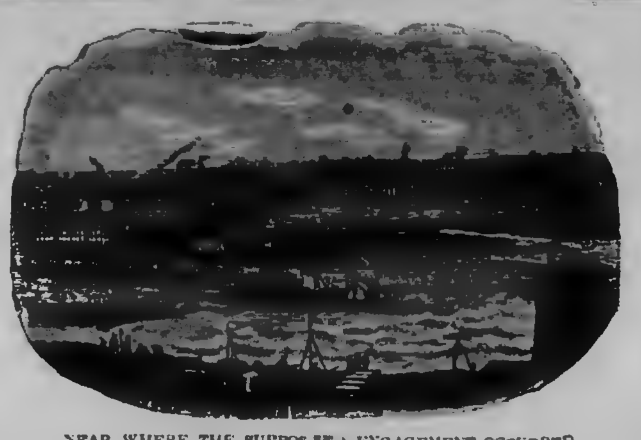
Three of the inmates, Mrs. Hare, with her infant, and Thos. Hare, jumped from the second storey of the burning building. The other occupant Edward Crawford, was carried out, after he was badly burned.

An Overheated Stove.

The fire evidently started from an overheated kitchen stove in the lower flat, and spread to the sleeping apartments before the people in the house were awakened. The first to awaken was Thos. Hare, who rushde to a window, in the front and jumped to the street. He was half-crazed and ran up the street until he was noticed by the police, who, in conjunction with the firemen, responded to the alarm. He was put in the patrol wagon and sent to the Royal Victoria Hospital. Mrs. Hare was also awakened by the smoke and the mother, with her infant in her arms, jumped into a bank of snow on the street. Both were taken to the General Hospital. Mr. Crawford was rescued by the firemen, and sent to the General.

When the firemen reached the scene dense smoke poured out of the second-storey windows and flames burst from the lower flat. Hose was laid, the door was broken in, and the men, as soon as possible, entered. It took but a few minutes to put out the fire. When the firemen rushed upstairs they found Mr. Crawford half suffocated in the rear room.

On the floor in a front room, in their nightclothes, with faces disfigured, were Mrs. Crawford and her 15-year-old son Willie. Both were curled up, and had evidently been overcome by smoke while attempting to get out of their rooms. Seated on a trunk, with his head leaning against the wall, was Jas. Hare, 23 years old. He had his clothes on, and had apparently dressed before he was overcome by the smoke.



NEAR WHERE THE SUPPOSED ENGAGEMENT OCCURRED

WILL WE RETURN BRITAIN'S FAVOR

SUGGESTED THAT EMPIRE BE REPRESEENTED ON CANADA'S DEFENCE COMMITTEE

CRY 'ORDERS FROM LONDON'

Paper Asks Whether Sir Frederick will Remain on the Defence Committee

London, Feb. 7— Mr. Weltodd, formerly of Canada, writing to the Graphic says; "If a Canadian Minister can sit as a member of a committee of the British Cabinet through that committee, a reciprocally defined committee must be placed in a position to give advice to the Canadian Government through their Ministers. To us such an arrangement appears entirely reasonable, but it is possible that any attempt to carry out such an idea would be met with the cry that the colonial Government was taking instructions from the Home Government."

Gratifying Progress.

The Birmingham Daily Post says; "It is gratifying, indeed, to observe that a closer union on grounds of Imperial defence now seems well within the range of practical politics."

The Liverpool Daily Post says; "Whether Sir Frederick Borden was formally authorized by the Canadian Government to take his seat on the Imperial Defence Committee, Premier Balfour does not say. Nor does he mention what matters were discussed, nor whether Sir Frederick will remain a member of the committee. Premier Balfour gives a casual invitation to the colonial Minister to take a seat on the defence Committee while Canadian militia affairs were being discussed. This can scarcely be the beginning of a movement toward Imperial unity such as the Liberals have in view."

The Manchester Courier says; "A casual visitor to London, in the person of the Canadian Minister for War, has been welcomed to the councils for Imperial defence. It is to be hoped that this example will spread."

A HATCHERY NEEDED

St. Paul, Minn., Feb. 6— Executive Agent Fullerton of the State Game and Fish Commission, in his annual report, to Governor Vansant, recommends that the State or National Government co-operate with the Government of Canada in establishing a fish hatchery at the Lake of the Woods. Mr. Fullerton says that sturgeon in that lake are caught in large quantities, and that unless something is done to restock the lake it will soon be depleted.

SCRATCH CREW AFLOAT ON RAFT

JOHN MORLEY'S DESCRIPTION OF BRITISH CABINET

RETALIATION NOT POSSIBLE

Presented with Freedom of Arbroath Preference Scheme Endorsed

London, Feb. 7— The developments of Jacques Lebaudy's "Empire of Sahara," is about to take a new turn, M. Lebaudy has decided to draw the officers and non-commissioned officers for two battalions of Imperial Life Guards from Great Britain and the United States, and in pursuance of this idea he will submit to President Roosevelt an invitation to name any officers of his former Rough Riders whom he can personally recommend for commissions. The British officers will be drawn from the 17th English Lancers and the Royal Horse Artillery.

The battalion will be the Emperor's guard. Col. Geo. Gouraud, who was Governor-General of Sahara, and is organizing a military establishment for M. Lebaudy, said today: It is proposed besides the formation of a battalion of Life Guards to organize a Sahara constabulary, which will police the country somewhat along the lines of the Canadian North-West Mounted Police. This constabulary will be composed wholly of American negroes, but whether under white or colored officers has not yet been decided. The management of the entire force will be in the hands of a retired British army officer, who has already been selected—a man with an unsurpassed war record.

"Extensive farm lands will be alloted on which ex-officers and the men of the constabulary can obtain homestead rights if they choose at the end of the period of enlistment.

"We purpose also to encourage the emigration of the American negroes to the new Empire, selecting only approved settlers who will be chosen by thoroughly reliable agents, scattered throughout the United States. Personally I believe this scheme will secure the support of the American negroes to an extent which no other emigration plan has ever yet attained."

SOFT COAL STRINGENCY

Toronto, February 6— Mr. Noel Marshall, of the Standard Fuel Company, says that the snow blockades on the railways limited the deliveries of soft coal in the city during the past month. About 400 carloads, some of which had been consigned to him on December 14, were still on the way and could not be located. The hard coal situation is no so stringent, as there is a big supply on hand.

Yesterday's Storm Causes Great Destruction.

Telegraph and Telephone Poles Blown Down--A Great Set Back to the Railroads

The prediction of the weather man Saturday morning, that, accompanied with the mild spell would come sleet and rain was all too true. Early that morning we had the snow and sleet, followed later by a drizzling rain which kept up almost continually until Sunday afternoon about five o'clock, when a high wind arose. As the rain fell it froze, forming the branches of the trees into a mass of icy net work. The wires connected with the telegraph and telephone poles, together with electric light wires were burdened down with ice, causing a great weight on the poles on which they were strung, as was evidenced by the great havoc done throughout the country.

The wind blew with terrible velocity and caused great destruction of property, both in the town and country. Orchards were completely devasted in some parts, the limbs of the trees being broken and hurled to the ground.

The telephone and telegraph companies suffered great loss from poles being broken off and wires blown down. At the north end of Water street—from London to Smith streets—the wind laid low no less than 17 poles, so great was the strain caused by the wires waving to and fro. As the poles fell, they came in contact with the electric wires of the Peterborough Light and Power Company, breaking them down and doing other damage.

Manager Doan, of the Bell Telephone Company, soon had a gang of men at work, as did also the Peterborough Light and Power Company, clearing away the debris and disconnecting live wires, which for a time made traffic to the public dangerous, for had any person came in contact with one of them, it meant instant death. It is not known to what extent damage has been done, as many places are entirely cut off from communication.

Report That Czar Intends to Seize Pekin and Tien-Tsin

Relief will be Felt in Europe Even if the Storm Breaks.

London, Feb. 6— The prospect of a great war breaking out in the Far East next week, which is acknowledged even in hitherto most pacific quarters, has been brought appreciably nearer by the developments of the last day or two. That a Russo-Japanese conflict will be followed by a Balkan outbreak, which in time is liable to develop into a widespread European conflagration, is also considered as extremely probable, and increases the depression pervading all political and commercial circles in England and on the Continent.

The news from St. Petersburg of the preparations of M. Kurino, the Japanese Minister, for departure, is not yet known in London; but official circles, the press, and the public, have already practically unanimously decided that nothing can avert war, and probably the termination of the long delay and suspense when the first gun is fired, will occasion a sense of relief.

RUSSIA ATTACK CHINA?

Report That Czar Intends to Seize Pekin and Tien-Tsin.

New York, Feb. 6—A despatch to the Sun from Hong Kong says;

The Russian Minister has informed the Chinese Grand Councillors that in the event of war Russia may be compelled to seize Tien-Tsin and Pekin, and that if China favors Japan she should consider the situation thoroughly before declaring her intentions. In consequence of this the Chinese Ministers fear that Russia will attack China first.

Local Sports

A large crowd will accompany the T.A.S to Norwood tonight, where they go to do battle with the Keene seven. The team winning tonight's game will be champions of this district, and will go into the semi-finals. The T.A.S. team will be the same that figured in the games with the Peterborough II.'s. A special train will leave the C.P.R. station at seven o'clock. Tickets can be had at the station or the T.A.S rooms

-The Junior Alerts defeated the Beavers by a score of 8—0 on the Tannery ice Saturday. The teams were

Alerts	Beavers
J. Barraclough	J. Croker
B. Cute	A. Metheral
W. Heaslip	M. Hartel
H. Carr	W. Taylor
H. Heap	D. Johnson
P. Perrington	O. Hooper
Roy Harper	Norm. Lawson

Grand Trunk at World's Fair

The extensive and comprehensive exhibit which the Grand Trunk Railway System are arranging for the World's Fair, held at St. Louis during 1904, is now in course of preparation. The proposed pavilion which it is the intention of erecting is one combining beauty, elegance and artistic merit and the designs submitted to the Exposition authorities were greatly admired and accepted. The pavilion will be erected in the "Fish and Game" Building, facing on three aisles, will be of the Corinthian and Doric architecture style, embellished with emblematic designs of fish and game, and it is claimed will be one of the handsomest structures at the Exposition. Canadian haunts will be the predominating feature of the display.

The mammoth palaces that form the main picture of this "World's Fair"—the Foreign and State buildings and the "Pike" (Midway)—are at the present time much further advanced before the opening date than the buildings of any other of the great expositions that have been held in the past; in fact, the installation of exhibit is now been proceeded with in many of the buildings.

One good feature of St. Louis is the Union Station; there being only this one, all trains from all points with the exception of excursion trains from a distance of one or two hundred miles of St. Louis will arrive and leave from the one depot, and as the street car lines pass the station visitors will have no trouble in reaching their hotels or boarding houses without difficulty and early after arrival.

People who have seen the grounds for the first time marvel at the magnitude of this colossal undertaking and do not hesitate in forming the opinion that it will be the greatest event from an instructive, educational and amusement point of view, that the world has ever seen.

Two hundred and fifty conventions have already signified their intention of visiting, and have completed arrangements for St. Louis during the "World's Fair."

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG.
The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply Dr. S. Goldberg, 208 Woodward Ave., Room [illegible], Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month, and to outside points at $3 per year strictly in advance.

JAPAN'S STAND FOR CIVILIZATION

There is much that is admirable in the attitude of Japan at this moment, but in nothing does it appear to be more wisely guided than in its interpretation of Russian policy and motives.

For some years past it has been the fashion in England to ignore the incessant Muscovite encroachments upon countries other than British; France has found in an illusory and probably dangerous alliance diversion from its historic jealousy of Russian aggression, and Germany, having designs of its own, has manifested no interest in the movements of its big neighbor.

Yet the Russian lust for conquest which is so well understood by Japan and which of late has been busy in northern China is identical with the spirit which for more than a century kept Europe embroiled over the possession of Constantinople.

For the time being Russia's covetousness of the Golden Horn takes second place to its covetousness of Manchuria but whether on the Levant or on the Yellow Sea the inspiration of Muscovite energy is always aggression, always land hunger, always conquest.

If Russian intrigue and Russian legions do not now threaten the peace of Europe in the Balkan region it is because they are fully engaged elsewhere. There has been no abandonment of imperial enterprise in that direction. It is merely in abeyance.

A despotism holding fast from generation to generation to the one idea of expansion may be defeated at times in diplomacy or in battle, but its purpose endures and time and change are in its favor.

Many bloody wars have been fought to keep Russia out of Constantinople and to exclude its warships from the Bosphorus, in all of which Europe has managed in one way or another to defeat the aspirations of the Czar, yet it is probable that today Russian influence is paramount at the Turkish capital, and it is known that Russian ships of war have passed from the Black Sea to the Mediterranean.

A measure of freedom has been granted to some of the petty states of the Danube and the Balkans by reason of these wars and treaties, but so far as the interest of England and France are concerned the lives and money which they have sacrificed for the purpose of checking Russian conquest have been wasted.

Russia is doing today the very thing which the Crimean war was waged to prevent it from doing.

Japan understands the nature of the remorseless tyranny with which it has to deal. It knows that treaties and fine words and reassuring promises mean nothing. It perceives that with a despotism such as that which is enthroned at St. Petersburg there is no haste, for no changes of sovereigns or of ministers or of public opinion or of representatives of the people are to be reckoned with.

Czars come and go, but not one of them forgets or neglects the legacy of greed transmitted from Peter and Catherine. What one generation fights for for another is able to win by merely waiting or to gain by a sharp bargain in which advantage is taken of the necessities of others.

Thus in peace and in war, by threats of war and by promises of peace, by cajolery and by trickery, by sleepless aggression, by colonization, by colossal expenditure, by secrecy and by falsehood and dissimulation Russia moves onward in some direction carelessly upon the possessions of its neighbors.

Bonaparte's prophecy that Europe would be either republican or Tartar has not been fulfilled, but more than half of Europe is Tartar already and the present Russian movement upon Asia, the original home of the Tartars, with the great powers of Europe indifferent or made helpless by mutual jealousy, gives promise of a development quite as alarming.

In the present storm center itself Japan is alive to all the perils of the situation. It knows it must fight for life some time. It knows that in spite of promises and treaties Russia does not stop. It knows that a greed which absorbed Manchuria yesterday may seize Corea tomorrow and a little later lay claim to Japan itself.

It used to be held by the states of western Europe that Russian aggression was inimical to civilization, freedom and progress. Japan so believes today. No doubt Japan is right. The important question is whether single handed it will be able to withstand and to turn back the oncoming fight.

DENMARK MUST BE WARY

War between Russia and Japan appears to be inevitable. In the event of the nations now concerned in the Korea-Manchuria dispute resorting to the arbitrament of the sword, complications might arise that would involve other nations in the disagreement.

A recent dispatch from St. Petersburg to the Paris edition of the New York Herald, announced that Germany and Denmark have entered into an agreement which, upon the first manifestation of hostilities in the Far East will be followed by Germany's "friendly occupation" of Copenhagen. The dispatch declared that such an occupation would be for the purpose of effectually closing the Baltic and preventing the Russians from leaving or the British, as allies of Japan, from entering that sea.

The reason, if there be any reason, for Germany and Denmark desiring to close the Baltic against hostile fleets, is, that the Kaiser desires to protect Russia against the powerful warships of Great Britain, if such protection be desired.

That Denmark has consented to permit a "peaceful occupation" of her soil by military and naval forces is seriously doubted. The people of Denmark know that the powerful empire to the south of them has long sought to secure a hold upon their little kingdom; and the knowledge that any powerful nation with a greed for territory seldom evacuates the territory which it happens to occupy, will cause the Danes to fear that the German army and navy keep out of the country they desire to annex.

Nervous Dyspepsia

A Disease very common to the American people, but now quickly remedied.

A SURE CURE.

In a case of Nervous Dyspepsia a doctor sees two things, first, that the digestion is deranged, and second that the nerves are in a starved, irritable condition.

If abreast of the times, and in touch with the latest discoveries the doctor is sure to advise Ferrozone, which is now universally prescribed in cases of acute Indigestion and Dyspepsia.

Ferrozone is prepared specially for diseases of the stomach and bowels, and as a sure cure for Nervous Dyspepsia has proved itself a thousand times to be superior to all others.

Where Ferrozone is taken after each meal, it is impossible for Dyspepsia, or Indigestion to exist. It digests the food before it has had time to ferment in the stomach, and by its regular use one is enabled to eat and drink anything at any time, without fear of bad results.

Ferrozone relieves that distressing headache, and burning feeling in the stomach peculiar to dyspepsia. It regulates the action of the bowels, kidneys and liver; strengthens the nerves and makes the sad looking dejected dyspeptic feel like a new man in twenty-four hours.

The general manager of a Toronto Manufacturing Company, who used Ferrozone with very marked results, says: "The strain of conducting a large business brought on a siege of Nervous Indigestion about a year ago, which I endeavored in vain to shake off. Doctors told me only a complete rest would cure me, but not being able to spare the time, I used Ferrozone instead. It perfectly restored my good health in a short time. I have confidence in the merits of Ferrozone, and am pleased to recommend it."

What Ferrozone can do for you can be best proven by giving it a trial. Every reliable druggist recommends and sells it, price 50c. a box, or three boxes for $1.25. Sent to your address by mail if price is forwarded to N. C. Polson & Co., Kingston, Ont.

Ayer's Cherry Pectoral

Ask your doctor if this is the medicine that cured his hard cold. Doctors have used it for over sixty years.

Prof. Dorenwend —OF— Toronto

The Greatest Hair Goods Artist in America

Is Coming to Peterborough

WILL BE AT

Oriental Hotel, on Thursday, February 18th

LADIES—If you appreciate the added charm and the younger appearance lent to the face by having beautiful hair, do not fail to see the grand assortment of SWITCHES, BANGS, POMPADOURS, WAVY FRONTS and WIGS, which Prof. Dorenwend will have with him. Consultation entirely free, and demonstrations given regarding these beautiful conceptions in natural hair.

GENTLEMEN WHO ARE BALD—Even though you are bald or partially so you can regain your former appearance by wearing Dorenwend's Wigs and Toupees. They are made to match any shade of hair. They are a protection to the head and a cure for chronic cold in the head and catarrh. They are perfectly fitted to the head and bear no trace of artificiality.

DORENWEND'S TOUPEE'S

Prof. Dorenwend will take measurements and demonstrate the merits of his Wigs.

Don't forget the day and date

The Equity Fire Insurance Co.

SIXTH ANNUAL MEETING.

The Directors of the Equity Fire Insurance Co. beg to present herewith to the shareholders the 6th Annual Report and financial statement of the company for the year ending Dec. 31st, 1903, duly certified by the Auditors.

We have pleasure in calling your attention to the fact that the company's income has increased from $175,281.74, in the year 1902, to $196,226.05, in the year 1903, and that the expenses of the company have been less for 1903 in proportion to the volume of business than in any preceding year.

The company closed the year with a surplus revenue of $60,266.12, after providing for all fire losses and all other expenses. Your Directors, therefore, have declared and paid a dividend of 6 per cent.

The agency organization has improved, and the company in other respects is better prepared to handle larger lines of insurance and to more fully share in the increase of business which is bound to come with the rapid development of Canada and increased public confidence in Canadian institutions.

We regret to report that the company has lost the services of Mr. W. H. Biggar, K.C., as a Director. He, having changed his residence to Montreal, found it impossible to attend the meetings of the board, and accordingly resigned. Mr. Wm. Greenwood Brown was elected by the board in Mr. Biggar's place for the unexpired term.

Your Directors desire to commend the staff and the agents for their interest and zeal in behalf of the company.

The time for which the Directors were appointed now expires. They are eligible for re-election.

All of which is respectfully submitted.

W. GREENWOOD BROWN, Secretary.
THOMAS CRAWFORD President

PULLING UP STAKES
IN PETERBOROUGH

No Matter When or Where You See a Bargain, There's a Better One For You At

GOUGH BROS.
GOOD-BYE SALE

The second week adds to the intense interest of this sale. Its an occasion that warrants unbridled enthusiasm. Nothing can stop its progress.

Do you know how we're fixed? $68,000 worth of Suits, Overcoats, Furs, Boots, Shoes, Hats, Caps and Furnishings, must be slashed to pieces to bring down the stock. Are you thinking? Can't you see what this means? Can't you see that we must sell at a heavy loss in order to pull up stakes in time to let in the new firm.

WILL ANYBODY KINDLY RISE IN THE MEETING and say that Gough Bros. ever was or ever will be undersold. The fears of competitors and the frantic efforts of their bosses, cut no figure with us. No cast-iron "transformation" sale bulletin of reduced prices can side-track GOUGH'S GOOD-BYE SALE. We stand by the town and will issue new lists of cut prices every week that must beat the best markings of any other dealer by 25 per cent.

If anybody offers to sell Men's Overcoats and Suits worth $10 for $6.98, down goes Gough's prices to $5.98.

If anybody offers to sell Boys' Suits and Overcoats worth $6.00 for $4.48, down goes Gough's prices to $3.48.

If anybody offers to sell $3.00 Trousers for $2.48, down goes Gough's prices to $1.98. And so on all through the gamut.

Don't you see the logic in our slashing—we're pulling up stakes in Peterborough—necessity knows no law—the stock can't be moved or kept for another season.

MEN'S SUIT SLAUGHTER

Men's Black and Blue Worsted Serge Suits, Regular $10.00, for	$5 75
Men's Black and Blue Worsted Serge Suits, Regular $8.00, for	$4.50

Drs. KENNEDY & KERGAN

The Leading Specialists of America. 25 Years in Detroit. Bank Security.

Nine out of every ten men have been guilty of transgression against nature in their youth. Nature never excuses, no matter how young, thoughtless or ignorant he may be. The punishment and suffering corresponds with the crime. The only escape from its ruinous results is proper scientific treatment to counteract its effects. The DRAINS, either by nightly losses, or secretly through the urine, must be stopped—the NERVES must be built up and invigorated, the blood must be purified, the SEXUAL ORGANS must be vitalized and developed, the BRAIN must be nourished. Our New Method Treatment provides all these requirements. Under its influence the brain becomes active, the blood purified so that all pimples, blotches and ulcers disappear; the nerves become strong as steel, so that nervousness, bashfulness and despondency disappear; the eyes become bright, the face full and clear, energy returns to the body, and the moral, physical and sexual systems are invigorated; all drains cease—no more vital waste from the system. The various organs become natural and manly. We invite all the afflicted to call and consult us confidentially and free of charge. **Cures Guaranteed or no Pay.** We treat and cure: **Varicocele, Blood Diseases, Stricture, Gleet, Emissions, Urinary Drains, Spermatorrhoea, Unnatural Discharges, Kidney and Bladder Diseases.**

CONSULTATION FREE. BOOKS FREE.

If unable to call, write for a QUESTION BLANK for Home Treatment.

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 15th from 5 cents to 10 cents per share. This company owns 6 claims, 600 x 1500 each. A 70 foot shaft on the Martha claim shows a vein of $30.83 ore 3 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $30.83 to $19,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay them $240 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address,

W. D. WALRATH,
NOTTINGHAM BUILDING, - SYRACUSE, N.Y.

60 CENTS PER SHARE FOR 60 DAYS ONLY

The money obtained from this sale is to be us d for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 1-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O.
The Prescott National Bank,
Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit.

Yours very truly,
R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of th country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment.

Respectfully,
D. LEVY & CO., (Inc.) by N. Levy, Prest.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 1-31-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment.

Yours truly,
SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 21, 1903.

Gentlemen— • • • • • • The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section.

Yours very respectfully,
ED. BLOCK.

Address all communications to Robert Kidd, Fiscal Agent, Peterborough, or to W. J. WILSEY, Prescott, Arizona.

THE
STONY PASS MINING CO.
OF SILVERTON, COLORADO

Has opened an office in
China Hall B'ock, Peterborough

where investors are invited to call and inspect samples of ore taken from the mines of the Company. There never was a better investment offered the people of Peterborough.

ROBERT HARRISON
Manager.

FEAR STRIKE OF SOFT COAL MINERS

OPERATORS AT JOINT CONFERENCE INSIST ON RETURN TO OLD SCHEDULE

MEN REFUSE TO ACCEDE

Adjournment Follows with Trouble in Sight for April, What Each Has to Say

Indianapolis, Ind., February 6.—A joint conference between the operators and the mine workers has adjourned without an agreement. A sub-committee of one miner and one operator for each state has been appointed to fix a date for a future conference.

This committee will meet in Indianapolis on February 15, to arrange for another conference. The conference yesterday was called to hear the report of the Joint Scale committee of operators and miners, which had been considering the wage scale for the Indiana, Ohio, Pennsylvania and Illinois bituminous fields for some days.

There was great excitement among the delegates when it was seen that the motion for a declaration of a disagreement had arrived. The Scale committee had reported the present wage scale as their ultimatum, and the operators insisted that nothing less than 1902 scale, which is equivalent to a reduction of 12 per cent. in wages, it is claimed, would satisfy them.

The convention then adjourned, the operators leaving the hall, and the miners going into executive session.

MAY BE TROUBLE.

The possibility of a final disagreement and suspension of work on April 1, is a topic of conversation among the miners and operators today.

"All I will say at this time," said W. D. Ryan, secretary-treasurer of the Illinois miners, and chairman of the Joint Scale committee, "is that a suspension in the bituminous fields would be a national calamity, and if continued for any length of time would, in comparison of effects dwarf the anthracite strike into insignificance."

W. S Bogle, the Indiana operator, said: "This is not the time to discuss such questions, but I will say this much—the country will have almost sixty days in which to prepare for a suspension if it comes. The other districts produce a great deal of coal, and I do not think that a suspension in April would cause great inconvenience."

It is not known what the miners' policy would be in case if April 1, should arrive without an agreement.

The fight for the reduction, however, has been essentially that of the Ohio and Pennsylvania operators, who insist that the H. C Frick Company, in Pennsylvania; the Jamison Coal & Coke Company, of Greenburg, Pa., and the Pocahontas Coal Company, in West Virginia, have all reduced wages in the last month, and that they must receive a lower mining rate with which to meet this competition.

The miners claim this competition is not as keen as the operators would have them believe.

It is charged that the Ohio and Pennsylvania operators have stored 4,000,000 tons of coal on the lakes and at other points.

The miners have $1,000,000 in their national treasury. The Illinois miners have $600,000 in their own treasury, and the other states have at least $400,000, making $2,000,000 of cash available for any emergency. A suspension of operations in the four states would mean 117,000 of the membership would go out.

ONLY WEAPON AGAINST RUSSIA

OPINION OF AN ENGLISHMAN RETURNING FROM TRIP TO JAPAN

THAT COUNTRY ALL READY

May Beat Russia in Early Stages and Give No Chance for Recuperation

Montreal, February 6.—"It has been inevitable for some time past. War is the only weapon with which to fight Russian aggression. Japan is ready, but Russia is merely delaying matters until such a time as she has everything in readiness and then the bear will show its claws and the Japanese will be killed. Japan must not wait for that time. Today she has Russia at a disadvantage. Tomorrow the opportunity may be lost."

These were the words at the Windsor hotel of Mr. George P. Hamilton, of London, England, who is just returning from a trip to Japan. Mr Hamilton came through from Vancouver and is leaving for New York, sailing from New York today. Like all Englishmen, Mr Hamilton is a firm believer in the justice of Japan's cause. He is also full of strong belief in the fighting strength on land and sea of the subjects of the Mikado, and inclines to the opinion that if the blow is struck hard and early Russia will be so trounced in the earlier stages of the fight that there will be no time for recuperation and Japan will win.

When the question of the participation of England in the struggle was mentioned, Mr. Hamilton said that that was one of the most serious phases of the matter. The long and tedious Boer war had crippled to a certain extent the trade of the old land. Although the splendid fabric of British trade was unshaken, there were several spots not quite as strong as they might be and the nation of shopkeepers wished to "8 about their business without having another war on their hands just now. "Of course, if we are dragged into it," said Mr. Hamilton, "we shall do all we can to help Japan along, but really we are not looking for anything more in the way of expensive wars just now."

When Mr. Hamilton left Tokio the whole country was clamoring for war and there was every confidence expressed on all sides in the Government. Marquis Ito, who Mr. Hamilton regards as one of the shrewdest of Oriental statesmen, was steadily preparing for the clash, that even at that time seemed to be inevitable. Once Japan sets her hand to the plough of battle there would not be any turning back until the last furrow was reached.

Mr. Hamilton, speaking of his run through Canada, said he was much impressed with the enormous expanse of territory through which he had passed. "I think you have a wonderful country here," he said, "and just think of it, British, all British."

Pekin, February 6.—Japanese officials decline to acquiesce in the view of the St. Petersburg Government that Russia would suffer disastrously in respect of prestige should the Czar yield to Japan's demand for a guarantee of the political and territorial integrity of China. Speaking to a press correspondent this morning a statesman of the first rank said:

"Japan does not ask Russia to submit to moral humiliation. On the contrary it wants Russia to vindicate its honor by adhering to the pledges made to the principal cabinets of the world. The Japanese Government stands ready to guarantee that it will respect Chinese sovereignty. It asks nothing more of Russia. If there is no moral disaster involved in this course for Japan why should there be any for Russia?"

FROM ST. PETERSBURG.

Copenhagen, February 6.—Warlike rumors reached the Danish court from St. Petersburg. It is declared that the Czar has been assured by the war party that Japan purposes driving Russia out of the Far East, if that be possible.

RUSSIAN REBELS HARD AT WORK

REVOLUTIONARY DOCUMENTS HAVE BEEN FOUND IN CANADA

AN APPEAL TO THE PEOPLE

Scattered Through the Russian Barracks—Much Trouble Ahead

Montreal, February 6.—The following circular, prepared by the Russian Revolutionary Bund, with head quarters in London, has been secretly scattered throughout the various barracks and depots in Russia, where the first and second reserves replace the regulars, hastily mobilized, and hurried to Manchuria, in view of the threatened conflict in the East.

Some of them have made their appearance in this city.

"Brothers, you have been snatched from your sorrowing families, your home ties broken, that you might replace the standing army called away to slay the people of other lands. Now that the army has seized you in its iron grip, robbing you of your time, which is your money, you are become machines to do its bidding without question.

"You are required not only to kill, but to be killed; you are told that it is an honor to die for your country. When they have slain you, will you have perished for your country. No one is invading Russia, you are fighting not your foes, but those whose property the Great Czar desires.

"Should you win, you will reap no benefit. The land will go to the nobles who oppress you, and the power of the rich will be increased.

"The hand that strikes against the Japanese, slew your brothers, your fathers, your friends when at St. Petersburg, Moscow, Jaroslav, Riga, Kieffe, and Odessa, they arose and demanded a fair return for their labors. In turn it will smite you and grind you in the dust when you demand what is yours by right. The nobles live upon your toil. The Czar with his hordes of servants live by your labors.

"We appeal to you, brothers, when your brethren arise, as they shortly will rise, to shake off the yoke that crushes you, throw down your arms, join them and impel your comrades to join them in the great work of freeing Russia.

"Remember, brothers, that but a little time ago you yourselves were working men, ground in the dust by the strong arm of the masters. If now you oppose the cause of liberty, how will you face your parents with the blood of your brethren on your hands.

"As patriots, as Christians, rise now and strike like men."

For the translation of the above circular, the press representative is indebted to Mr O. D. Zwirek, of 165 St. Lawrence street, this city, a member of the Central Revolutionary Committee, with headquarters at London.

Mr. D Zwirek is a marked man. He was compelled to flee from Russia at an early age and has taken part in various demonstrations both in London and New York.

Mr. Zwirek, in discussing the situation observed:

"The Cossack will find in time that he cannot go on indefinitely knouting the peasants into obedience. It is true that the revolutionary committees are compelled to hold their deliberations on foreign soil, they are all marked men in Russia, still the good work is growing and the league has spread all over the fatherland. The very closeness of the espionage of the police, shows how they dread the results of the persistent agitation, kept up by patriots. Five years ago the last printing press on Russian soil was discovered, and as a result 150 persons were exiled to Siberia."

When asked about the condition of the Russian Army, Mr. Zwirek continued: "All Russians at 21 years of age are compelled to serve four years in barracks. Then for the next five years, they become members of the first reserve, and are liable to be called upon to do garrison duty at any time. For the succeeding ten years they are members of the second and third reserve in turn. At forty a man is exempt from military service."

Outing for February.

In view of the sensation created last month by Robert Dunn's frank diary of the Mt. McKinley expedition, the extracts in February Outing are bound to interest every reader. This month's article, "Into the Mists of Mt. McKinley," uniquely combines a fascinating story of exploration with all the bickerings, the quarrelings, the fierce tempers of weary, tortured men, living under wholly abnormal conditions.

Many readers may prefer, at this time of disturbances in Morocco, to turn to Albert H. Dunforth's first-hand account.

An article of very different character, but of equal interest, is Clifton Johnson's "Among the Georgia Crackers," a study from within of untoward conditions, where babies take snuff and women do all the work.

Caspar Whitney's graphic account of his experiences among the Sumatra dyaks has a very picturesque title, "Jim Abu Finds an Elephant." Mr. Whitney intends to continue the series of travel-studies he has been writing into a volume called "The Jungle Hunter."

The fiction in this number is notable, including the most interesting chapter of Stewart Edward White's best story, "The Silent Places" or "The Trail of Jaguar," and a fragrant coaching story "The Tip," by Emery Pottle, with some Penfield drawings that suggest a love story. Just as interesting as fiction is Emerson Hough's intimate study of "Sam Houston," one of the unique series of articles on the Outdoor Men of History.

The regular department devoted to "Outdoor Men and Women" contains characteristic anecdotes of two brothers of the angling craft, Wm. C. Harris and Charles Hallock. Herbert K. Job, who has been photographing rare birds on Florida keys for Outing readers, has returned with some remarkable snapshots, now published for the first time. Mr. Harris has something to say on when to fish in the same region.

Of equal interest to sportsmen and general readers are Dr. McKenzie's illustrated article on "Breathlessness," or the progress of fatigue as seen in the human face; Elwyn Sandys's monthly talk, R. Hinton Perry's "Animals in Art" and timely instructions from John A Roosevelt and Dan Beard on how to sail ice yachts and the art of skate sailing. "A Country Club in Oklahoma" is suggestive of long strides from the days of Indian reservations.

In the Sportsman's Viewpoint, Caspar Whitney discusses in his usual vigorous way the development of horseflesh in this country and the intelligent effort that has made our Horse Show the equal of any in the world.

Photographs full of the outdoor feeling, a little nature verse and a great many inspiring drawings by the most distinguished artists complete the magazine.

EASTERN WAR CLOUD ABOUT TO BURST

FIVE THOUSAND TROOPS HAVE LEFT FOR PORT ARTHUR FULLY EQUIPPED

All hope of peace has been abandoned at Tokio, the Japanese capital.

It is officially announced at St. Petersburg that officers of all regiments of the Guards, will be allowed to volunteer for service in the Far East.

Five thousand Russian troops have Port Arthur in transports, escorted by warships for Seoul.

A prominent London firm trading with Japan received a cipher message canceling the execution of a large order which was about to be despatched, indicating that the Russo-Japanese negotiations have been broken off.

London, Friday, Feb. 5.—Any view framed on the latest Far Eastern despatches can be hardly other than that the war cloud is about to burst. The concentration of Russian troops on the Yalu River, which has been frequently mentioned in despatches to The Times, is stated to be proceeding steadily. It is added that many of the troops have already crossed the Corean frontier. The departure of the Russian fleet from Port Arthur, whether, as reported, to cover the transportation of troops to Chemulpo or not, is regarded here as little short of direct menace. Some correspondents at Tokio proclaim that the question of war has passed the debatable stage.

A prominent London commercial firm trading with Japan received a cipher message yesterday afternoon, canceling the execution of a large order which was about to be despatched. The circumstances connected with the transmission of the message indicate that the Russo-Japanese negotiations have been broken off. On the other hand, it is contended in St. Petersburg that the continued delay in presenting the Russian reply keeps open the door of hope. It is stated that the opinions of the heads of the various Government departments concerned have not yet been all received, and that the reply will not be sent until they are all received. It is added that even the probable date of sending the reply to Japan cannot yet be fixed. One despatch states that the reply was sent to Tokio last night.

The St. Petersburg correspondent of the Times says it is almost impossible to believe that war can be averted. Russia will make no concession. The Czar's hesitation has been overcome.

The Japanese Legation in London proclaims that the warlike newspaper despatches do not justify pessimism. The officials say that the Russian reply may be expected any day, but pending its reception the abandonment of hope is needless. The Legation admits, however, having received official information of greatly increased military activity by the Russians in Manchuria. It has also been informed that the Japanese at Vladivostock have been warned to be ready to leave. According to the newspapers, if the Japanese at Vladivostock have not withdrawn when the probable declaration of a state of seige is made, they will be sent to Khabarovsk.

Among the speculations on the reasons of the departure of the Russian fleet from Port Arthur is one that suggests it has gone to intercept the new Japanese cruisers, Nisshin and Kasaga, which are due to arrive at Japanese waters in a few days. If the report from Port Arthur that the warships returned at 4 o'clock yesterday is true, these speculations can be dismissed.

Meanwhile not a word can be learned of the movements of the Japanese fleet, owing to the thoroughness with which the censorship is being enforced.

SOFT COAL STRINGENCY

Toronto, February 6.—Mr. Noel Marshall, of the Standard Fuel Company, says that the snow blockades on the railways limited the deliveries of soft coal in the city during the past month. About 400 carloads, some of which had been consigned to him on December 14, were still on the way and could not be located. The hard coal situation is not so stringent, as there is a big supply on hand.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.68 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $62.68 and $79.08 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite, and by driving this tunnel five or six hundred feet on the present course it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

The PETERBOROUGH BROKERAGE CO, Fiscal Agts.
PETERBOROUGH, ONTARIO.

Equitable Gold Mining Co.

R. C. LANE, President. F. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 3,250 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 525 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $4.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 265-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

THE PETERBOROUGH BROKERAGE CO.
FISCAL AGENTS

APPEARANCE

Is such an important feature on the table It makes a heap of difference to the pleasure of the meal whether you have a good or a poor looking Sugar on the table

St. Lawrence Extra Granulated Sugar

is the whitest and best looking Sugar to be had, and besides, it has the advantage of being the best quality and greatest strength.

THE
Toronto General Trusts Corporation
ESTABLISHED 1882
TORONTO WINNIPEG

PAID UP CAPITAL $1,000,000
RESERVE FUND 290 000

PRESIDENT:
JOHN HOSKIN, K.C., LL.D.,
VICE-PRESIDENTS:

A. EDWARD ROEBER, VICE PRESIDENT, With the John J. Mitchell Company.	NEW YORK
M. K. GOLD, SECRETARY AND TREASURER, Formerly with the Clark Syndicate Companies.	NEW YORK
HOWARD E. MARSH, CONSULTING ENGINEER, Marsh Manufacturing Company.	NEW YORK
FRED'K DALTON PARKER, LAWYER,	LOS ANGELES, CAL.
GEORGE T. ORDWAY, COMMISSION BROKER,	CHICAGO, ILL.
EGBERT CHAMBERLAIN, Dry Placer Miner formerly of California.	NEW YORK

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine—Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house or sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-3c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

Refuses to Discuss Manchuria with Japan

The Czar's wish for peace has undergone no change, for what he said on New Year's Day he repeated on Wednesday at the luncheon in honor of the German Emperor's birthday. The greatest danger Russians pretend to see is the strength of the war party in Japan, in comparison with which the Russian war party, they say, is insignificant.

London, Feb. 5—The correspondent of The Times at Tokio says:—According to official news received at Tokio houses for the billeting of Russian soldiery are being hastily prepared at Kaichau, Haicheng, Liauyang and elsewhere. At Liauyang 1,000 carts have been requisitioned, of which 100 are being despatched daily for the transport of ammunition and provisions to Fenghwangchen.

Warships Leave Port Arthur.

The Russians have begun the despatch of troops to the Yalu River, and all their powerful warships except one, the Government is advised, left Port Arthur yesterday; but their destination is unknown.

The Japanese Warned.

The Japanese commercial agent at Vladivostock received notice yesterday from the commandant that a state of siege might be declared at any moment upon orders from St. Petersburg, therefore the Japanese should be prepared to leave, otherwise they would be ordered to repair to Khabarovka. All this contrasts strangely with Russia's peaceful professions.

The Seoul correspondent of The London Daily Mail says that a Russian army is moving south from Mukden, while the correspondent of this same paper at Port Arthur says that both Russia and Japan have placed an embargo upon coal shipments.

A telegram received here from Copenhagen declares that eighteen foreign steamers have just been chartered by Russia to convey war material from Odessa and Libau to the far east.

All Hope of Peace Gone.

London, Feb. 6— A despatch to the Reuter's Telegram Company, under yesterday's date, from Tokio, says:—"The general impression here is that all hope of peace is gone. The elder statesmen had a conference this afternoon, at which the Emperor was present. It is believed a weighty decision was reached."

War Has Been Declared

London, Feb. 6—Special, 2.30 a.m.—The Russian troops are arriving at the mouth of the Yalu River, and great excitement prevails.

London, Feb. 6—Special, 2.45 a.m.—All the powerful Russian warships have set sail, but their destination is unknown.

London, February 6— Special 1 a.m.—The residents of Vladivostock are in a state of great excitement as it is expected that a state of siege may occur at any time.

London, Feb. 8—Special 3.30 a.m.—An unconfirmed despatch has been received that war has been declared and that the conflict has begun at the port of Chemulpo, where the Russians attempted to land forces.

MARRIED TO SISTER IN MISTAKE

A STORY THAT IS STRANGER THAN ANY FICTION

LIVED AND RAISED FAMILY

Before the Horrible Truth was Revealed by an Accident

In a quiet country farm home, only a few miles from Campbellford, lives a very respectable family of seven persons, father, mother, and five children.

The parents were married about 25 years ago, when quite young, worked hard and all through the difficulties and ordinary troubles and perplexities incident to life, managed to establish a very comfortable and well regulated farm home.

While diligently and faithfully pursuing the ordinary routine of country life, all of a sudden, and by mere accident the truth of a strange state of affairs was forced upon them. They suddenly became aware that as well as being husband and wife they were likewise brother and sister.

The very strange event came about in this way. When one of them was very young one of the parents died, leaving the child to the care of a friend of the family. The surviving parent married again and the other children were born. In the course of time they all drifted from one of the old lands to this country, the first child taking the name of the family with whom it was brought up. The two children met, became acquainted with each other, fell in love and finally married, neither one knowing much of the former history of the other, and certainly never dreaming they were half brother and sister.

When the facts became known to them they became prostrate with grief. The father fell seriously ill, and nearly lost his reason. The mother bore up for a while, but, finally, she too broke down, and both lives were despaired of. But as health and reason slowly returned they formed the wisest resolution possible, concluding to continue on in the home with the several children that have been born to them, but not as they had began life. Most of the family are living, and entirely ignorant of their former family history.

Very few cases of this nature ever come to light, but, no doubt, similar ones exist, happily unknown to the parties themselves. The subjects of this yet true event, are most highly respectable people, to whom no blame or disgrace can or has ever been attached for this unfortunate experience. Those that know them best speak in the highest terms of them. They are living a Christian life and no one doubts their reward.

Grand Trunk at World's Fair

The extensive and comprehensive exhibit which the Grand Trunk Railway System are arranging for the World's Fair, held at St. Louis during 1904, is now in course of preparation. The proposed pavilion which it is the intention of erecting is one combining beauty, elegance and artistic merit and the designs submitted to the Exposition authorities were greatly admired and accepted. The pavilion will be erected in the "Fish and Game" Building, facing on three aisles, will be of the Corinthian and Doric architectural style, embellished with ornamental designs of fish and game, and it is claimed will be one of the handsomest structures at the Exposition. Canadian haunts will be the predominating feature of the display.

The mammoth palaces that form the main picture of this "World's Fair"—the Foreign and State buildings and the "Pike" (Midway)—are at the present time much further advanced before the opening date than the buildings of any other of the great expositions that have been held in the past; in fact, the installation of exhibit is now being proceeded with in many of the buildings.

One good feature of St. Louis is the Union Station; there being only this one, all trains from all points with the exception of excursion trains from a distance of one or two hundred miles of St. Louis will arrive and leave from the one depot, and as the street car lines pass the station visitors will have no trouble in reaching their hotels or boarding houses without difficulty and early after arrival.

People who have seen the grounds for the first time marvel at the magnitude of this colossal undertaking and do not hesitate in forming the opinion that it will be the greatest event from an instructive, educational and amusement point of view, that the world has ever seen.

Two hundred and fifty conventions have already signified their intention of visiting and have completed arrangements for St. Louis during the "World's Fair."

A NEW NATION BORN IN SOUTH AMERICA

A FRENCH OFFICER FOUNDS A REPUBLIC IN SOUTH AMERICA

Paris, February 6.—Adolphe Brezet, formerly a captain in the French army, and now claiming to be president of what he terms, "The Republic of Counani," in South America, has arrived here and is seeking to obtain the recognition of his Government by France. Brezet says that "Counani" comprises the territory which was in dispute between France and Brazil, and which was finally awarded to Brazil by a President of Switzerland, to whom the matter was submitted for arbitration. Brezet declares, further, that the people of "Counani" refused to accept the decision of the arbiter, and organized a new Republic, recognition of which is now sought of all the powers. He says also that the hour has not yet arrived to inform the press of the character of the pour parlers being exchanged with the French Government. According to the President of the new Republic "Counani" is two or three times as large as France, with a population of about 200,000 colonists and a million Indians, who support the new Government.

It is expected here that Brazil will take measures to assert her sovereignty over the territory in revolt.

Valpy's Dinners.

I have more than once referred to Mr. L. R. Valpy as a friend of Howell and Rossetti, and an extensive purchaser of the latter's works, writes "Sigma" in his reminiscences in "Blackwood." Mr. Valpy was by profession a Lincoln's Inn Fields family lawyer of good position and repute; but though a strenuous worker in his vocation, his heart was divided between two curiously antagonistic predilections—the "austere" and the "sensuous," his religious tendencies being sternly Calvinistic, and his artistic sympathies chiefly identified with the school of Rossetti and Burne-Jones. This singular contrast of proclivities led not infrequently to scenes and situations of a distinctly comical nature. Many a time have I met in his dining-room, hung with a superb line of Rossetti's red-chalk studies, a solemn assemblage of Exeter Hall lawyers and Low Church clergymen who looked upon their host's cherished drawings either as autotype reproductions or the work of some inspired madman! Two instances of this Philistinism I particularly remember. The hero of one of them was an eminent commercial solicitor, who, after inspecting some newly-acquired treasure contemptuously for half a minute, turned on his heel with the comment that "faces of that kind were usually symptomatic of scrofula!" The other offender, a gormandising clergyman, was even more flagrant. Uplifting his eyes from his empty plate during a change of courses, he happened to catch sight for the first time of three new purchases from Rossetti's studio. "Queer-looking affairs those, Valpy," he remarked with a pitying sneer; "where did you pick them up?" "They are the work of one Rossetti," replied Valpy with simmering irony. "Rossetti, Rossetti? Never heard of him," rejoined the appalling guest. Then glancing at an idealized study of his hostess, which formed the center of the three drawings he added, "And who, may I ask, is that ill-looking woman over the mantelpiece?" "That, sir," replied Valpy with what Dizzy used to call "a superb groan"—"that, sir, is my wife!" Yet, strange to say, Valpy persisted to the last in entertaining these uncongenial guests, who never failed to drive him nearly frantic with their outrageous comments. Occasionally, however, in his bachelor days he would invite one or two artists, and perhaps myself or some other more sympathetic friend, to what he called a quiet dinner, but which really was almost Spartan in its provender. I suppose he imagined that artists were too ethereal to care for the succulent fare which he set before parsons and lawyers, a theory wherein he was, of course, grievously mistaken. I well recollect dining with him once to meet Rossetti and Samuel Palmer, when the menu actually consisted of nothing more luxurious than thin pea-soup, cold boiled beef (as the waiters say, "low in cut"), and a "roly-poly" pudding! Samuel Palmer rose superior to this fare, and was cheery and charming throughout the evening; but it was otherwise with poor Rossetti, who, without being a gourmand, was constitutionally unable to appreciate plain diet. His normal melancholy deepened into positive gloom, and I cannot recollect his uttering a syllable during the whole of dinner, at which he sat like one of the figures at the banquet in Holman Hunt's picture of Isabella and the Pot of Basil. Valpy seemed quite unconscious of offence, and to see him persistently plying Rossetti with "roly-poly," which the poet-painter as persistently refused in ever more deeply accentuated tones of weary dejection, was to me especially comic.

PROSPECTUS

THE COLORADO AND CONNECTICUT GOLD MINING COMPANY

(Incorporated under the laws of South Dakota.)

Main Office: MERIDEN, CONNECTICUT.

Capital $400.000. 80,000 Shares at $5.00 each, full paid and non-assessable

OFFICERS

WILLIAM GARLICK, Wholesale and Retail Ice Dealer, Meriden, Conn., President
JOHN A. THOMPSON, Investment Securities, New York City, 1st Vice-President
GEORGE S. WILCOX, Retired Manufacturer, Meriden, Conn., 2nd Vice-President
B. F. BARNES, Manufacturer, Meriden, Conn., Treasurer
WILLIAM U. CORVES, Miner, Meriden, Conn., Superintendent
ARTHUR S. GARLICK, Meriden, Conn., Secretary

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE S. WILCOX, RICHARD F. DORSEY,
WILLIAM GARLICK, ARTHUR S. GARLICK, B. F. BARNES

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hinsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is 527 feet and in 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs.) is as follows: Copper, 16.05 per cent.; Gold 0.02 ozs.; Silver 92.40 ozs. Total value $90.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper, $6 40; Gold, $6.82; Silver, $254 31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatsoever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years. Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5,500,000 (now claimed to be worth $15,000,000). About six years have elapsed since he purchased it. The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado. New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN."

Mr. Edwin J. Hulbert, M. E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

B. F. BARNES, Fiscal Agent
Room 24, Wilcox Building, Meriden, Conn.

A HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and [illegible] experience has shown that it is [illegible] to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a [illegible] opportunity.

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment, of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same careful attention forever, making it absolutely certain to others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to

W. BUTLER, PRESIDENT,
713 Market St., San Francisco, C l.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placers in the ages past.

The Pearl Gold Mining Co. of Idaho

owns seven groups of mines—thirty-seven mining claims and is now working in ore in three of its mines.

The Treasury Stock is offered at a price that will unquestionably make money for those who invest. The Stock is non-assessable—no debts—all clear titles—safe, experienced and conservative management.

REFERENCES—The Governor of the State, and any bank in Boise, Idaho. Write the Company for particulars. Address

GEO. W. E. DORSEY, President,
Boise City, Idaho.

Peterborough.

NEW ZEALAND'S PREMIER IS ALARMED.

FEARS GROWTH OF RUSSIA'S NAVAL STRENGTH IN THE FAR EAST

London, Feb. 6.—Premier Seddon of New Zealand, speaking of the Far Eastern crisis, said it was essential for the safety of New Zealand that Russia should not become a great naval power in the Far East. The revenue of the colony, he said, for the ten months ending January 31st, showed an increase of £400,000, compared with the same period for the previous financial year. Premier Seddon said he anticipated a thumping surplus.

Colonial Secretary Lyttleton, in the House of Commons, informed Dr. Stephen, M.P., that Agents-General of the colonies, under responsible government, were entirely under the control of the colonial Ministers.

To Overthrow the Government.

Mr. Stannard, referring to [illegible] said the [illegible] against the presence of Chinese coolies as guests. In reality it is not a protest against fiscal reform, but their main purpose is to overthrow the Government.

Hon. Mr. Long, President of the Local Government Board, informed representatives of the Association of Municipal Corporations that he had heard no arguments yet in the evidence before the Royal Commission, or speeches in the Commons to justify the taxation of land values. Ground taxation was a branch of a much larger subject than local taxation.

Australia's Military Strength.

Australia's military strength will be [illegible] on a peace footing, and [illegible] on a war footing, with a reserve of unattached officers, cadets, and rifle clubs, making a full total of [illegible]. The new scheme of organization provides for the division of the forces into a field force, inter-state defence, garrison troops for State defence, the peace establishments proportions are: Field force, 13,831; garrison force, 11,000.

Mr. Lyttleton, replying to Mr. Lough, said that the British Government, being of opinion that the introduction of Asiatic labor was desired by the people of the Transvaal, could not agree to a referendum. The question was urgent, and the Government could not postpone its decision much longer.

British Workmen or Chinese Slaves.

The New Reform Club Political Committee has issued a twenty-page pamphlet entitled, "British Workmen or Chinese Slaves." It argues that the real demand for Chinese labor is due to the fear that the influx of the white laborers will speedily end the political influence of the mining magnates. The New South Wales Labor party has emphatically protested against Asiatic labor in South Africa.

THE KAISER'S VOICE

Taken by a Phonograph for Permanent Preservation

Berlin, Feb. 4.—A phonographic record of Emperor William's voice on metal matrices will be the first deposits made in the phonetic archives that are to be kept in Harvard University and in the Congressional Library, and the National Museum at Washington. The Emperor, upon the application of Dr. Edward W. Scripture, the psychologist of Yale University here, has given two cylinders of his voice for permanent preservation.

Dr. Scripture, describing the meaning of his request, said,—"The phonetic archives are to include records from such persons as will presumably have permanent historical interest for America. The importance of the undertaking can be estimated by considering what would have been the present value of voice records of Demosthenes, Shakespeare, or Emperor William the Great. An advisory committee of American Americans has prepared a list of ten living Americans of the first historical importance, whose voices will be preserved. I wish to record His Majesty's voice as the first European record deposited in the archives."

BRITAIN'S OWN AFFAIR

A Canadian Opinion of the Fiscal Policy

London, Feb. 4.—Messrs. Montagu and Hegbert, who are candidates for seats in the British Parliament, stated that during their recent visit to Canada they threshed out the question of [illegible] with representatives of all classes. They found that the Canadians [illegible] that [illegible] policy is Britain's own affair, [illegible]. Chamberlain's proposals on the ground that they would endanger British prosperity, or the general prosperity of the empire, would not cause any serious dissatisfaction in Canada.

THE ARMY REFORM

London, Feb. 5.—In pursuance of the army reforms all the heads of departments of the War Office today received letters of dismissal, and were notified that they will be employed elsewhere.

The following have been invited to join the new army corps:

Lord Roberts, commander-in-chief of the forces.

Lieut.-General Grenfell, commanding the Fourth Army Corps.

Lieut.-General Sir John French, in command of the First Army Corps.

Sir William Butler, commanding the west district has been invited to join the new Army Council.

TOWN DESTROYED

Amsterdam, Holland, Feb. 5.—Advices received here say that an entire town in the Island of Java, Dutch East Indies, is reported to have been swallowed up by a volcanic eruption, and that hundreds of persons were killed.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.
Capitalized at $2,000,000 00. Par value $1.00. Full Paid and non-Assessable
At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 7000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.
1,000,000 Shares. Par value $1.00. Full Paid and Non-Assessable.
Selling at 75c a Share

Like its sister Company is to-day giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 150 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, FISCAL AGENTS.
C. L. ARZENO, General Manager. 603-604 Exchange Bldg., Denver, Colorado
ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble
but a
Good, Safe Investment

THE STOCK OF THE
BRET HARTE GOLD MINING COMPANY
IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO,
SOAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL
The Peterborough Brokerage Co., Local Agents.
WANTED—GOOD AGENTS IN EVERY CITY.

MINISTERS PRAISE CATARRHOZONE

Rev. D. K Smith of White Head N S was cured of Catarrh by CATARRHOZONE.

The following statement coming from one of Nova Scotia's prominent churchmen carries conviction of the fact that Catarrhozone is all right.

"For years I tried all the advertised remedies for Catarrh, but was unable to get relief until I used Catarrhozone. Before I had used the inhaler half an hour my nostrils became free and clear so that I could breathe easily through them. In one day Catarrhozone helped me immensely, stopped my coughing and hawking and cured a dull pain that was continually over my eyes. I have great pleasure in recommending Catarrhozone. I have proved it the best remedy for Catarrh and diseases of the throat, lungs and bronchial tubes."

There is certainly no remedy that is so well spoken of by the clergy as Catarrhozone and this can be accounted for by the fact that it gives perfect satisfaction.

It is the only remedy that reaches all diseased parts and gives quick relief without bad after effects. Catarrhozone contains no cocaine nor morphine. It is nature's own remedy, soothing and healing, and pleases everybody that uses it.

Catarrhozone is a local and constitutional treatment. The inhaler clears the air passages, stops the headache, and Ferrozone Tablets that are included in every complete Catarrhozone outfit, never fail to drive impurities from the blood. This builds up and strengthens the system so that Catarrhal conditions cannot exist.

The speediest cure for Coughs, Colds, Catarrh, Bronchitis and Asthma is Catarrhozone. Two months' treatment, price $1.00; small size, 25 cents; at druggists, or N. C. Polson & Co., Kingston, Ont.

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

The Lakefield Carnival

Through a mistake an item appeared in Saturday's issue to the effect that a grand masquerade skating carnival would take place at Lakefield this evening, whereas it should have read, Tuesday, 16th inst.

A Poor Market

Saturday's market was exceedingly light, the country roads being so blocked that farmers were unable to get to town. Butter brought from 22 to 24c; eggs, 30c; chickens from 40 to 90c pair; ducks 70c. to $1, and turkeys from $1 up.

Will Remove to Lakefield

Mr. Alex. Fitzgerald, late village constable and street inspector of Ashburnham, has purchased the wood and coal business of the late Samuel Nelson, Lakefield, and will remove his family to that village in a short time. The Fifth Ward loses a good citizen in the departure of Mr. Fitzgerald.

A Quiet Town

Lindsay Watchman-Warder—"J. Pierpont Morgan, the American capitalist, is in Montreal for a rest. If Pierpont wants a real quiet time, he should come up to Peterboro." Our contemporary means by this that Pierpont would have the time of his life if he should "strike" Peterborough. Some people talk backwards and mean the opposite of what they say.

26th Anniversary

Court Peterborough, C.O.F., has decided to fittingly mark their 26th anniversary by holding an at home which will take the form of a tea and musical entertainment. Tea will be served from 6 to 8 o'clock followed by a concert, after which a social time will be spent. The details were referred to a strong committee of members. Court Peterborough is also making arrangements for a fancy dress carnival in Brock street rink, fuller particulars of which will be announced later.

$10—GRAND EXCURSION TO WASHINGTON AND RETURN—$10.

On February 26th the Lehigh Valley R.R. will run a special ten day excursion from Suspension Bridge to Washington and return for $10. Tickets good ten days. Stop over allowed at Philadelphia on return trip. Tickets good on all express trains, including "Black Diamond Express." For tickets, Guide to Washington, and further particulars, call on or address Robt. S. Lewis, Canadian Passenger Agent, 33 Yonge street, Toronto, Ont.

The attendance at the

Peterboro' Business College

is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre of Canada.

Over 9?% of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write for particulars regarding our correspondence course

WM. PRINGLE,
Principal

A SPLENDID REPORT

Presented at Sixth Annual Meeting of Equity Fire Insurance Company

The shareholders of the Equity Fire Insurance Company are to be congratulated on the result of the year's operations as set forth in the annual report which appears in another column. As pointed out in the report, the company's income has increased from $175,-2?1.?4 in 1902 to $196,2?6.66 in 1903, while the expenditure has been less for 1903 in proportion to the volume of business than in any preceding year. After providing for losses and all contingencies, the company closed the year with a surplus of $60,2?6.12, enabling the directors to pay a dividend of six per cent.

The company is represented in Peterborough by Mr. W. H. Hill.

THE LATE JOHN MANIECE

Demise of an Old and Esteemed Resident of the East Ward

We regret to chronicle the death of Mr. John Manice, of Ashburnham, which sad event took place at his late residence, in the Fifth Ward, on Saturday morning, after a lingering illness, at the age of 42 years. Mr. Manice was born in Ashburnham, and lived there all his life. He was a son of the late John Manice, and leaves three brothers and one sister, the latter being Mrs. E. A. Sedgewick, of Otonabee, and the former William, Robert and Thomas B., all of Peterborough. The deceased was a consistent member of St. Luke's church and for 22 years had been a trusted employee of Mr. Harry Calcutt. The funeral will take place this afternoon to Little Lake Cemetery.

WEDDED AT BOBCAYGEON

Nuptials of Mr. W. C. Routley and Miss Clara Thompson

A very interesting wedding was celebrated on Wednesday at the Rockland, Bobcaygeon, when Miss Clara May Thompson was married to Mr. Wm. C. Routley of Toronto, son of Mr. and Mrs. W. C. Routley, of Peterborough. Only the immediate relatives were present, and the ceremony was performed by Rev. Mr. Smith, of that place. Miss Cora Thompson, sister of the bride, was bridesmaid, while Mr. Alf. Kemp, of Peterborough supported the groom.

After the ceremony a very pleasant time was spent at the home of the bride's parents. The wedding trip was postponed for a few days on account of the snow blockade on the northern railway. Mr. and Mrs. Routley will reside in Toronto.

INCIDENTS OF THE DAY

Newsy Paragraphs Picked Up By Reporters on Their Rounds

—Charity Board meets to-night.

—The county roads in many cases are practically impassable.

—The Board of Education will meet this evening at the Secretary's office.

—Merchants say that Saturday was the poorest for business of any Saturday for 6 months.

—Court Queen I.O.F., will give an "At home" this evening, in the Foresters' Hall, Simcoe street.

—Rev. Mr. Shaw, of Neepawa, Manitoba, addressed Men's Meeting at the Y.M.C.A. yesterday afternoon at 4 p.m.

—The Ministerial Association will hold their regular monthly meeting this morning at ten o'clock in the parlor of the Y.M.C.A.

—Miss C. Lyle, Park street, has left on a visit with friends in Bowmanville and Oshawa.

—At the annual meeting of the Skating and Curling Rink Company, Mr. W. G. Ferguson was re-elected President, and Mr. J. Crane, Secretary.

—A big effort is being made this month by the Y.M.C.A. to add 100 members to the roll. It is a most worthy institution, and affords a pleasant and profitable centre for young men.

—It is a common opinion among railway men that the worst is yet to come of the snow blockade. They point out that while there have been heavy snowfalls this winter, there has not been much wind. This they expect in the next month or two, and consequent snow blockades.

Those who have been blaming the management of the railways for the irregularity of trains during the past few weeks, should consider the extra difficulties to be contended against in the severe cold and snow storms we have had.

—"Galesburg" the new post office in Douro, was opened on Tuesday, and Mr. B C. Gale is now a full-fledged postmaster. The mail will leave Lakefield for Galesburg and Hall's Glen every Tuesday, Thursday, and Saturday. It will arrive from Hall's Glen and Galesburg the same days. Mr. D. Madill of Hall's Glen, has secured the contract for carrying the mail.

SURE

The Robust Physique Can Stand More Coffee than a Weak One

A young Virginian says, "Having a naturally robust constitution far above the average, and not having a nervous temperament, my system was able to resist the inroads upon it by the use of coffee for some years, but finally the strain began to tell.

"For ten years I have been employed as telegraph operator and typewriter by a railroad in this section and until two years ago I had used coffee continually from the time I was eight years old, nearly 20 years.

"The work of operating the telegraph key is a great strain upon the nerves and after the day's work was over I would feel nervous, irritable, run down and toward the last suffered greatly from insomnia and neuralgia. As I never indulged in intoxicating liquors, drugs or tobacco in any form I came to the conclusion that coffee and tea were causing the gradual break-down of my nervous system and having read an article in the Medical Magazine on the composition of coffee and its toxic effects upon the system, I was fully convinced that coffee was the cause of my trouble.

"Seeing Postum spoken of as not having any of the deteriorating effects of coffee I decided to give up the stimulant and give Postum a trial. The result was agreeably surprising. After a time my nerves became wonderfully strong. I can do all my work at the telegraph key and typewriter with far greater ease than ever before. My weight has increased 25 pounds my general health keeping pace with it, and I am a new man and a better one." Name given by Postum Co., Battle Creek, Mich.

There's a reason.

Look in each pkg. for the famous little book, "The Road to Wellville."

STABBING AFFRAY MAY BE FATAL.

DRUNKEN ITALIAN BRUTALLY ASSAULTS HIS OWN BROTHER.

INJURED MAN MAY DIE.

Stabbed in Five Different Places—The Victim Still Living

A serious stabbing affray took place at 540 Donegal street, on Friday last, when an Italian named Guiseppe Depalo was cut and slashed by his brother Pantaloni. The affair arose from a petty disagreement between two brothers and when it was concluded one of them had been stabbed severely in the back and received other cuts from the knife used by his brother.

It appears that the brothers were sitting at the tea table with some other Italians. A dispute arose over the ownership of the dishes, and Pantalope grabbed a knife and, before he could be prevented, gave his brother five wounds, one of which nearly severed an ear from his head. He then left the house and went to a doctor to have his lip, which had been slightly cut, in the melee, attended to. From there he went to an Italian boarding house on Bethune street where he was arrested.

Dr. McNulty was summoned and had the injured man conveyed to St. Joseph's Hospital.

The prisoner appeared before Magistrate Dumble Saturday morning and was remanded until Friday next. The two witnesses of the stabbing, Domingo Natale and Guiseppe Carinilie, were let free upon securing $200 bail each.

The two brothers were under the influence of liquor. They are both married with families living in Italy. They have been in town about two years, and have been employed at the Cereal Company's dam.

Last night it was learned that the injured man was still alive, and likely to recover, should no complications set in.

Met with Serious Accident

Mr. Jack Thornbeck, assistant caretaker of the Brock street rink, met with a painful accident on Saturday afternoon. He was on the ice indulging in a game of friendly hockey when he fell and broke his collar bone. Dr. Pigeon was called and attended his injuries. Jack's many friends will wish him a speedy recovery.

Mr. McPherson Honored

Mr. John McPherson, captain of the Peterborough H. Trent Valley League hockey team, was presented with a gold locket on Friday night at Long's Palm Parlors, where he was entertained by the members of the team. Those present were Messrs. Cameron, Lee, Ford, Graham, Glover, Dillon, Hamilton, Comstock, Renton, Rush, MacPherson and Morgan. Mr. E. Wasson sent his regrets at his inability to be present. The address was read by the Secretary, Mr. Glover, and Mr. Gordon Lee made the presentation. Mr. McPherson, who is about to leave town, made a suitable reply.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Miss Florence Fairbairn, of Smith, is at present visiting with friends in town.

—Mrs. H. McMahon, and daughter, of Merrickville, Ont., is visiting her mother Mrs. M. O'Connell, Concession st., Fifth Ward.

—Mr. Donald of the Sarnia branch of the Bank of Montreal, has arrived in town to fill the vacancy on the local staff caused by the transfer of Mr Jack McPherson to Amherst, N.S.

Curlers Lost

Bobcaygeon Independent—Four curlers left here for a bonspiel in Toronto on Monday, and have not since been heard of. Should anyone find four stray curlers, having evidence of hailing from this town they will be good enough to ship them home. Four other curlers went to Fenelon on Monday afternoon and after spending a day and a half at the railway station, and a few odd quarters at Brooks', returned safely home. They appear to have picked up a large amount of interesting information about railways during their short stay at the station, and it is no wonder that men who give their lives to the business become such inscrutable oracles of wisdom. The curling contest for the Governor General's Prize was held at Toronto this week but Bobcaygeon was not in it. Bobcaygeon got hyphenated, the Bobcay was at Fenelon, and the geon in Toronto, and the dignity of the curling Association would not permit of playing anything on the half shell.

MISLED KRUGER

London, Feb. 6—Joseph Chamberlain declined to accept the individual responsibility for the South African War or its conduct, and said that peace was made impossible because Kruger hoped for foreign assistance, and was misled by the attitude of the British Parliamentary Opposition into believing that Great Britain was not in earnest.

PROHIBIT THEIR CATTLE

Vienna, Feb. 6—The Government has prohibited the delivery of Argentine beef, which has been ordered with the object of reducing the high prices of meat here. It threatens to adopt the same measures with American beef. Dr. von Koerber, the Austrian Prime Minister and Minister of the Interior, told a deputation that it would be highly regrettable if the Government were menaced with the importation of American beef, but it did not fear that this would occur.

Brides

Are always "beautiful" and always "happy" according to the society reporters, and in this case the report is mostly true. There may be unhappy brides in fiction, but there are few in real life. But how hard it is to look upon many of the wives we know, and believe that they were once beautiful and happy. Pain, the result of womanly disease, has marred beauty and undermined happiness.

$500 REWARD FOR WOMEN WHO CANNOT BE CURED.

Backed up by over a third of a century of remarkable and uniform cures, a record such as no other remedy for the diseases and weaknesses peculiar to women ever attained, the proprietors of Dr. Pierce's Favorite Prescription now feel fully warranted in offering to pay $500 in legal money of the United States, for any case of Leucorrhea, Female Weakness, Prolapsus, or Falling of Womb which they cannot cure. All they ask is a fair and reasonable trial of their means of cure.

"I have thought for some time I would write you and tell you of the great improvement in my health since taking your 'Favorite Prescription,'" says Mrs. H. B. Jones, of Forest, N. C. "When I began its use I was a physical wreck and had despaired of ever having any health again. Could not sit up all day, and was so weak I could not walk one quarter of a mile. I noted a great improvement in my health before the first bottle was used. Was suffering with almost every pain that a woman is subject to; had inflammation of ovaries, painful and suppressed periods, and other symptoms of female disease. After taking six bottles of 'Favorite Prescription,' I felt like a new person. Can ride horseback and take all kinds of exercise and not feel tired."

If you are looking for a perfect laxative try Dr. Pierce's Pleasant Pellets.

JAPAN RELUCTANT BUT HAD TO DRAW SWORD

Russian Gunboat at Nagasaki May be An Easy Capture--Fleeing to Safety

London, Feb. 8— The correspondent of The Times at Tokio says Baron de Rosen, having been instructed to prepare to leave Tokio, has transferred the care of Russian interests to the Austrian Minister, and exchanged farewell visits with Baron Komura.

Fleeing to Safety.

The Japanese residents have nearly all withdrawn from Vladivostock, Harbin and other places in Manchuria and also from the Yalu.

Would Be an Easy Capture.

The Russian gunboat Mandjur, which is in the dock at Nagasaki, will probably be unable to leave before hostilities begin.

Japan Reluctant.

The leading journals declare that Japan was most reluctant to draw the sword but had no choice. They republish Russia's note of 1895, when Japan was made to evacuate Manchuria, declaring that the retention of the Liaotung peninsula by a foreign power would imperil the Chinese capital, render the independence of Corea illusory, and jeopardize the peace of the Orient. They invite a repetition of Trafalgar and Waterloo, since Japan fights as Russia fought, to crush a military despotism, and secure equal rights for all nations in eastern Asia.

Baltimore Swept by Fire; Damage $200,000,000

The Whole Business Section of the Maryland City Wiped Out

The City of Baltimore, Maryland, has suffered a severe disaster in the destruction of practically its whole business centre by fire. Every wholesale and retail house, bank, railway, and shipping office, newspaper and telegraph office, for a space of half a mile long, and six blocks wide, has been destroyed. Only one life has been so far reported lost. The monetary loss will exceed $200,000,000 and will probably equal, if it does not exceed, that of the great Chicago fire, in October, 1871, which was $200,000,000. Some of the Canadian insurance companies are interested, and will share the enormous loss, which will fall upon the underwriters.

Baltimore, Feb. 8— The monetary loss in the terrific conflagration which started on Sunday afternoon, will probably reach $200,000,000.

Only one life is known to have been lost, so far, that of Jacob Iliginfritz, of the Laurel Fire Company, of York, Pa., who was killed early this morning.

Acres of most valuable property in the wholesale, dry-goods, produce, lumber, shipping, railway and financial districts have been destroyed. Notwithstanding heroic effort on the part of the local fire department, reinforced by almost numberless firemen from Washington, Philadelphia, Wilmington, Newark, N.J., Newark, Del., Harrisburg and New York City, the fire at this hour is raging as furiously as it was an hour after it originated in the cellar of the John E Hurst Company at Liberty and German streets. The origin of the fire is said to have been from spontaneous combustion, but no tangible evidence to this effect has thus far been secured.

Big Business District Swept.

The area of the fire district extends from Liberty street on the west, to Jones Falls on the east, a distance of about three-quarters of a mile, and from Fayette to Pratt streets, north and south, a distance of four city blocks.

Newspapers All Burned Out.

All the buildings of the Baltimore newspapers, including the offices of the Associated Press, were destroyed by midnight. All of the publishers arranged immediately to have their editions printed on the presses of Washington papers.

BOARD OF EDUCATION

Met in Special Session Last Night and Transacted Business

The Board of Education met in special session last night for the purpose of transacting business. Mr J. J. Hartley occupied the chair and there were present Messrs. J. J. McHain, V. Eastwood, W. Wrighton, J. Crane, R. Fair, G. Stevenson, R. B. Rogers, W. G. Ferguson, L. M. Hays, Wm. Pringle, F. J. Jamieson, H. P. Kennedy, H. Morgan and W. H. Hill, president.

ACCOUNTS.

A very large number of accounts were referred to the Finance Committee.

COMMUNICATIONS.

From Miss Lottie Perrin, asking for an extension of leave of absence. —Granted.

From Miss S. G. Davidson asking for leave of absence, owing to ill health, and enclosing a doctor's certificate —Granted.

From Jacob Doupe, janitor of Fifth Ward school, asking for an increase of salary—Referred to Committee on Appointments.

From C. Fessenden, stating that the Nicholls Scholarship of $50 had been won by Miss Isabel Edwards and that of $30 by Miss Effie Munroe.

From Mr. Duncan Walker, Inspector of Public Schools, recommending the appointment of substitutes on the teaching staff to fill vacancies.

ATTENDANCE.

Summary of attendance at Public schools for month of Dec, 1903—On roll, 1389, average 1164. Attendance for month of January, 1904—On roll 1545, average 1299.

Summary of attendance at Collegiate Institute for the month of January, 1904 —On roll, 221, average 196. Attendance for month of Dec. 1903—On roll, 222, average 208.

MONIES RECEIVED.

The total amount of monies received during the month of January was $4,-225.63.

FINANCE COMMITTEE.

Mr. R. Fair, chairman of the Finance Committee, presented for confirmation a number of accounts that had been paid and also the General Statement for the past year, which was referred to the auditors. The estimates of expenditures for the year 1904 were also read and adopted.

PROPERTY COMMITTEE.

A letter was read by the chairman of the Property Committee, submitting the plans and specifications for the proposed new Collegiate Institute Building.

COMMITTEE ON APPOINTMENTS

Mr. J. J. McHain, chairman of the Committee on Appointments, reported having engaged Miss L. Oulton, of Campbellford to fill one of the vacancies in the Public School staff at a salary of $275 per annum, duties to commence Jan. 4th, 1904.—Adopted.

Mr. H. P. Kennedy moved an amendment to the Public School Act to fix the salary of the teachers for the future with the object of securing the best available talent in the case of vacancy. This motion was carried. Mr. Kennedy also moved that increased accommodations be provided for the Public Schools, and that a by-law be prepared to authorize the same and be submitted to the ratepayers at an early date.

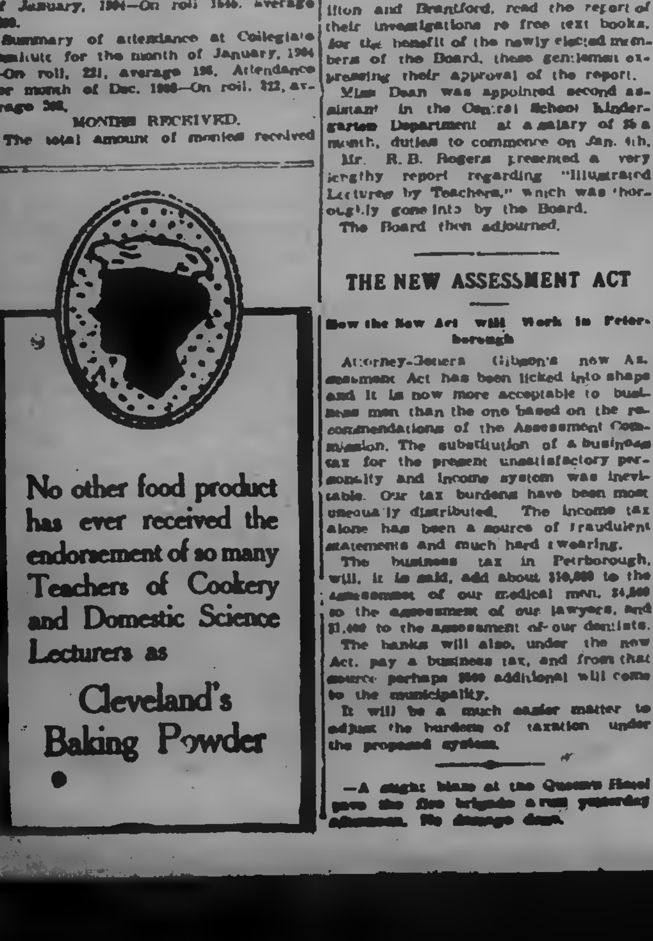
The Fifth Ward Kindergarten was placed, by a motion on the same basis as those in Peterborough.

Mr. Pringle, chairman of the Special Committee, which visited Toronto, Hamilton and Brantford, read the report of their investigations re free text books, for the benefit of the newly elected members of the Board, these gentlemen expressing their approval of the report.

Miss Dean was appointed second assistant in the Central School Kindergarten Department at a salary of $5 a month, duties to commence on Jan. 4th.

Mr. R. B. Rogers presented a very lengthy report regarding "Illustrated Lectures by Teachers," which was thoroughly gone into by the Board.

The Board then adjourned.



No other food product has ever received the endorsement of so many Teachers of Cookery and Domestic Science Lecturers as Cleveland's Baking Powder

THE NEW ASSESSMENT ACT

How the New Act will Work in Peterborough

Attorney-General Gibson's new Assessment Act has been licked into shape and it is now more acceptable to business men than the one based on the recommendations of the Assessment Commission. The substitution of a business tax for the present unsatisfactory personalty and income system was inevitable. Our tax burdens have been most unequally distributed. The income tax alone has been a source of fraudulent statements and much hard swearing.

The business tax in Peterborough, will, it is said, add about $10,000 to the assessment of our medical men, $4,000 to the assessment of our lawyers, and $1,000 to the assessment of our dentists.

The banks will also, under the new Act, pay a business tax, and from that source perhaps $800 additional will come to the municipality.

It will be a much easier matter to adjust the burdens of taxation under the proposed system.

—A slight blaze at the Queens Hotel gave the fire brigade a run yesterday afternoon. No damage done.

CONDEMNATION OF LAURIER'S POLICY

SIR CHARLES TUPPER TREATS BOUNDARY CASE IN LONDON TIMES

TREATY MAKING POWERS

Sir Charles Claims That Experienced Canadians Condemn the Idea

London, February 9.—Sir Charles Tupper's column and one-half letter which the London Times prints in leader type, is a complete eye opener to Englishmen.

The letter is similar to that the Montreal Star recently published and informs Englishmen, for the first time, that Sir Wilfrid Laurier's demand for full treaty-making powers is strongly opposed by experienced Canadian statesmen, and secondly that Sir Wilfrid Laurier has a chance to nullify the bad effect produced by packing the United States side of the Alaska tribunal by appointing three Canadian Commissioners, all equally reliable. Instead, he himself proposed Lord Alverstone.

Thirdly, that Lord Dundonald denies that there is any strategical value to the two Portland canal islands ceded to the United States," and fourthly, that Hon. Clifford Sifton and Sir Wilfrid Laurier both surrendered what was really the vital parts of Canada's case by admitting in the Parliament of 1898 that Dyea and Skagway were in undisputed possession of the United States. The last paragraph of Sir Charles Tupper's letter reads:

"In view of these facts what can be more puerile than the hue cry raised against the British Government by Sir Wilfrid Laurier in an endeavor to cover his own failure to discharge the duties incumbent upon him by the impracticable demand for Canada's right to make her own treaties."

INDUCED TO STEAL

Want Driven Young Woman to Crime in New York

New York, Feb. 8— The Herald this *morning says*: Frail, and weakened by a long struggle against hunger, her body racked by serious ills, a young woman was a prisoner in Jefferson Market Police Court yesterday afternoon, charged with the theft of $15, and a pocketbook containing a diamond ring valued at about $60.

The policeman who arrested the young woman testified that he had been called into a tailoring shop on east 17th street where the young woman had been detained.

For one day only the young woman had been employed with fifty other girls in the tailoring shop. None of the other girls paid particular attention to the new comer, although they commented on her pale face. Nellie Cullen, one of the employes, returned from her luncheon at noon yesterday, and as she entered the cloak room she laid her chatelaine bag, containing her money and a diamond ring, on a table nearby. When she came out of the cloak room, the bag was gone. The Schneider girl was arrested and it was said the money was found hidden in her hair.

Hunger the Cause.

"I was very ill and very hungry," Miss Schneider said in court, her voice choking with sobs. "I have not been strong lately, having undergone two operations for appendicitis while in Bellevue hospital, and unable to obtain employment, I could get very little to eat. I do not know what possessed me, but when I saw how much money there was in the book, I took it. My home is in Montreal, where I have two brothers, but I have no father or mother."

The young woman was held for further examination today, and a probation officer was assigned to investigate her story.

TWELVE SHIPS, 63,583 TONS.—This includes the Kagul, launched, June, 1903; the Aurora, trial trip October, 1903, and the Almaz, launched in June, 1903. Save two, all the ships of this class were built since 1896. Nine have a speed greater than 20 knots.

RURIK.—10,940 tons, 18 knots; launched, November, 1892; armament, 4 8-inch, 16 6-inch, 6 4.7-inch, 6 torpedo tubes 2 various, 768 men.

*This tonnage includes all the vessels of this class owned by Russia. Many of them are in or on the way to Eastern waters.

JAPAN WILL SEEK TO AT ONCE SECURE THE COMMAND OF THE SEAS.

Japan's Fleet Sets Sail for Korea; Will Strike to Take Masampho--There will be a Great Sea Fight?--Japan's Plan of the Campaign

The suspension of diplomatic relations between Russia and Japan has been quickly followed by the departure of the Japanese fleet for an unknown destination, probably for Korea. It is understood that Admiral Yamamoto the Japanese commander, will strive to seize Masampho, and thus secure a base from which he can circumvent all the plans of the Russian Viceroy, Admiral Alexieff. Japan has at present the advantage in naval strength, but Russia will gain by every day's delay, and will apparently act on the defensive until spring.

London, Feb. 8— The God of battles has flung the dice. The destiny is in His hands at last and with the stern echo of that terrible cast, the peace of the world is at an end. When and how it will be restored no living man dare say.

The severance of diplomatic relations between Russian and Japan, announced yesterday ends the tension which has existed for so many months, but it may, or may not, presage immediate war. The Russians will undoubtedly strive to delay the first clash of arms as long as possible, but Japan's game is to force the fighting, and it is possible with this end in view that the Japanese squadron sailed yesterday from Sasebo. Their destination is unknown, but is supposed *to be either Chemulpo or Masampho,* Korea.

RUSSIAN SHIPS ALREADY SEIZED BY JAPANESE

An Advance Detachment of Russian Troops Left Mukden for Korea.

London, Feb. 8— A special despatch from Berlin says that a strong fleet of Japanese warships, reported to be on its way to Chemulpo, has seized several Russian trading steamers.

The Muscovites Advancing.

An advance detachment of Russian cavalry is leaving Mukden for Korea. A telegram from Mukden announcing the departure of the cavalry, adds:

"Russia's love of peace has been exhausted by Japan's demands. Troops therefore have been concentrated at the Yalu River.

The Russian troops are in the best spirits. The Japanese everywhere are hurrying homewards."

The Mukden despatch repeats the rumor that a Japanese squadron is off Wei-Hai-Wei, on the north coast of the Shang-Tung Peninsula, with the object of intercepting the Russian ships coming from Europe.

AN EXCITING INCIDENT

Desperate Battle with Wolves in Manitoba

Winnipeg, February 9.—Alex Morrisey, of Turtle River, near Dauphin, Man., had a thrilling experience with a pack of wolves while crossing Round lake, an arm of Lake Manitoba. A considerable distance from shore, he was surrounded and attacked by twelve or fifteen ferocious animals that he possesses no language capable of describing the battle. At the time Morrisey had with him two hounds and an axe and had it not been for these he says there is no doubt at all but that he would have been torn to pieces by the wolves.

The hounds fought hard and one of them was killed in the encounter. Morrisey claims to have done great execution with his axe and more than one wolf bit the dust, while others were badly wounded. The track in the snow from where the attack commenced to the shore is described by Mr. Morrisey as a trail of blood.

When the exhausted man reached land he sought the protection of a friendly tree and remained there till the wolves departed at dark.

STILL ANOTHER BIG IMPERIAL SCANDAL

MEMBER OF THE ROYAL FAMILY HAS FLED WITH THE DAUGHTER OF A RESTAURANT KEEPER

Vienna, February 9.—Austria's latest Imperial matrimonial sensation is the engagement of Archduke Joseph Ferdinand to the daughter of an insignificant restaurant keeper in this city. The man's name is Nitzko. The infatuated couple had fled from Austria, and it is believed that they have gone to Germany, where they intend to get married. The Archduke is a brother of the former Crown Princess of Saxony, who eloped with the tutor of her children. His brother is Archduke Leopold Salvator, who assumed the name of Leopold Weilling when he married a soubrette named Adamowicz, in 1902.

JAPANESE AND RUSSIAN WORDS

Russia and Japanese Words and Their Meaning

In view of the imminence of war between Russia and Japan, the following glossary of native terms will be found of value in interpreting news despatches from the Far East:

TERMS IN MANCHURIA.

Fu-To the name of a city indicates capital of province, a city of the first class.

Chou- Indicates city of the second class

Yi.—A small post town, as Yehang-Ti.

Kiang, Ho, Ychuan, Ychu.—All mean stream or river.

Hai.—Sea, sometimes lake.

Shan—Mountain.

Kuan.—Camp, strong, fortified place.

Shan-Hai-Kuan.—The fortified camp where the mountains and the sea meet aptly illustrates these three terms.

Ling.—Pass over a mountain.

Ycheng, Chen, Holo.— Town, large village

In Corea the termination—

Po or Pho —Indicates that the place is a port or harbor on navigable waters, for instance— Yongampho, the harbor near the mouth of Yalu river, Masampho, the disputed naval base on the southern shore of the peninsula

Do.—As termination indicates that the place is a province, and means therefore, "the district of," or that it is the capital city of such a province.

Han.—River.

At the beginning of geographical names the following prefixes may generally be translated:

Ya—Great, large; Siao—Small, little; Pee—north; Nan—South; Hei—Black, Huang—Yellow; Si—West; Tung—East; Shang—Upper; Hia—Lower.

CLOSING FIRE TRAPS

Orders Issued Closing Several New York Theatres

New York, February 9.—Mayor McClellan has ordered President Darlington, of the Board of Health, and Police Commissioner McAdoo, to close the following theatres;

Grand Opera House, Madison Square Theatre, Princess Theatre, Vaudeville Theatre, Hurtig and Seamans, and the theatre part of Huber's Museum.

Last week Mayor McClellan served notice on 19 theatres that unless certain alterations for safety were made by midnight Tuesday, he would order them closed.

The Grand Opera House referred to is that at 23rd street and 8th avenue, and is not the Metropolitan, where Grand Opera is now being given.

Local Sports

—Big [illegible]

Queens, weakened by the loss of two of its best men, beat the senior St. George's' strongest team by 5—3 last night, A. W. McPherson was referee. Peterborough beat Queens 6—3 early in the season.

The Peterborough Business College hereby challenge a picked team from the printers behind the "Times" the "Easy-walk-over Examiner," and the "Never-Runs Review," to a game of hockey to be played on a date satisfactory to both parties.

Bartle's Bedelias hereby accept the challenge of the machinists of the Canadian General Electric Co.

The Junior team of the Canadian General Electric Co. hereby challenge the Junior Cordage team to a friendly game of hockey for a date in the near future.

The Ontario Bank septette will play the Business College seven tonight from 8 to 9 o'clock.

St. George's were to have been here Wednesday, but Webster injured his ankle, and Armagh is ill; and rather than play with a weak team, they will not be down till next week.

There will be regular hockey practices by the senior team as usual this week in anticipation of exhibition games about to be arranged.

The Aberdeens hereby accept the challenge of the Junior Cordage hockey team for next Saturday.—H. Belleghem, captain.

—On account of the dangerous condition of the rink at Norwood, owing to the snow on the roof, the T.A.B.—Keene match did not come off last night.

MARRIED IN SARNIA

Sarnia Observer,—Wednesday evening the residence of Mr. and Mrs. Jas. Fry, 117 Bright street, was the scene of a happy and joyous event, when their daughter Miss Lois May Fry, became the bride of Mr. N. W. Pollard, formerly of Peterborough. The marriage was performed at seven o'clock by Rev. Canon Davis, of St. George's church, in the presence of about 80 invited guests. The bride entered the parlor on the arm of her father, by whom she was given away, and presented a charming appearance in a gown of cream silk with point lace trimmings and carrying white roses. The house decorations consisted of a profusion of palms and carnations. Miss Lottie Fry, sister of the bride, assisted as bridesmaid, and was handsomely gowned in green crepe de chene with cream trimmings. She carried red carnations. The duties of flower girl were performed by Miss Glenn Fleetham, cousin of the bride, who was prettily attired in old rose cashmere, and carried white carnations. The groom was supported by Mr. Howard MacArthur. The wedding march was played by Miss Elma Chase. The ceremony over the bridal party and guests partook of a recherche wedding breakfast, and the happy couple received the congratulations of their many friends. The bride is one of Sarnia's fairest daughters and her popularity was amply testified to by the extensive array of wedding tokens of which she was the recipient. The groom is well and favorably known to a large circle of friends, with whom he is deservedly popular. The groom's gift to the bride was a beautiful pearl ring; to the bridesmaid a pearl crescent; to the flower girl a pearl brooch, and to the groomsman a pearl scarf pin. The young couple left on the G.T.R express for a wedding trip to Toronto, Peterborough and other eastern cities. The bride's travelling dress was of green zebilene, with hat to match. On their return to Sarnia they will take up their residence in the cottage at the corner of College and Maria streets.

Mr. and Mrs. Pollard are visiting in town.

PETERBOROUGH IN SUGAR COATING

SHOW OF JACK FROST'S SKILL AS CONFECTIONER;

TREES WERE BEAUTIFUL.

Everything Covered with White Frosting—Queer Effects of Saturday Nights' Frost

Peterborough awoke yesterday morning to further proof that this is the most spectacular of winters. The whole town was sugar-coated or ice-plated.

The rough, granular snow of the night before constituted the sugar-coating of streets and all flat surfaces, a spectacle to drive pastry cooks and confectioners to envy and despair. More wonderful and beautiful, however, was the work of the sleet storm, as exhibited on trees and shrubs and any bit of waving sedge or tall grass in the parks.

The Otonabee bridge was more than ever like a miracle in spun glass. In a breeze at the temperature of zero, the mailed trees creaked and crackled and the shrubbery rustled as if suddenly petrified.

Victoria Park was like a vast bejewelled creation of crystal. The bare deciduous trees were stiffened to the tiniest twig in purely transparent, glittering ice, and the evergreens in specially exposed spots looked as if a small Niagara had poured over them in the night.

Those evergreens that were more lightly plated exhibited each individual spiny needle in a shining silvery case of crystal. Each particular variety of tree declared itself by its conduct and aspect beneath its load of icy splendor.

The larger trees in Jackson Park made a great glittering cathedral, not without the charm of stained glass when the sun shone on them from a fleckless, wintry sky of mocking sub-tropical blue.

When one managed to get into right relation with the sun and the icy splendors of Victoria Park or any long row of trees, the effect was nothing less than magical.

Here burned single amber drops like great yellow diamonds. There sparkled a myriad of white electric brilliants, dazzling the eye until the gazer was fain to turn away.

Again the sunlight was split into its splendid component elements, and shifting fires of blue and red, and violet made an intolerable splendor. Where the woodland stood in shadow it was a mass of ghostly white limbs and twigs, a sort of living symbol of winter, an Arctic world of pitiless cold glitter.

—Owing to the lights going out this morning about 1 o'clock, we must apologize for the late appearance of The Times this morning.

WEATHER NOTES

Tuesday—Decidedly cold.

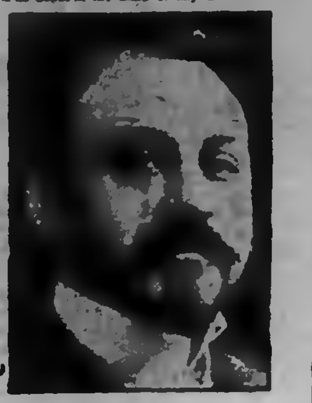
CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has both the method and the ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.



DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply, Dr. S. Goldberg, [illegible] Woodward Ave., Room [illegible], Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at [illegible] per month, and to outside points at [illegible] per year strictly in advance.

PETERBOROUGH, FEBRUARY 9, 1904

A BAD BEGINNING

Germany appears to be making a bad beginning as a colonizer. The uprising in her possessions in South-West Africa is said to be due to the tyranny of military authorities and to the dishonest transactions of merchants and traders in their dealings with the native blacks who are known as the Hereros. According to a traveller recently returned from a German settlement in South-West Africa, the traders, who are largely discharged soldiers, purposely get the natives into debt. Goods are sold on credit, and when the improvident blacks get so deeply in debt that they can not meet their obligations, the traders take or seize cattle. This traveller declares that he found the merchants got an average of 70 per cent. profit, and the traders 100 per cent., besides securing 20 per cent. more on the cattle taken in payment. Between merchant and trader any member of the Hereros tribe who has transactions with the cunning foreigners must pay about 190 per cent. on all goods purchased.

Anselm Wolf, of Brooklyn, who recently returned from the German colony, says the Hereros are stalwart, handsome men and brave fighters. Mr. Wolf insists that the brutal treatment of the natives by the German soldiers who control affairs in the colony is largely responsible for the present uprising. "The natives," asserts Mr. Wolf, "could never become accustomed to German rule. The cruelties practiced by the military, which culminated in the imprisonment of Prince Ahrenberg a few years ago, the irksome regulations laid down by the Germans, the ridiculous attempts to introduce police regulations in the wilds of Africa, and, finally, the forcing of thousands of natives into a state of practical slavery, accounts for the cordial hatred of the Germans. The recent influx of Boers, with their cruelties, only further incensed the Hereros."

As German South-West Africa is several times the size of Germany, and the natives number 2,000,000, the Kaiser's authorities had better manifest good judgment in future dealings with the natives. What German South-West Africa needs today is a German official who shall have authority to repress tyranny of the military, and who shall be ready to compel merchants and traders to treat the natives with the fairness which seems to have been lacking since the Germans first commenced trading with the Hereros.

DANGERS OF HANDSHAKING.

A savant has just published in Brussels a treatise on shaking hands, which practice he pronounces to be extremely dangerous. When two men clasp hands they exchange thousands of microbes, according to the Brussels gentleman's discoveries, there being an average of about 80,000 Germans of various kinds upon every square half inch of the manly hand.

It must not be supposed, however, that every hand is as bad as that. The Brussels savant admits that a maiden fair whose hands are soft and white may not have more than 40,000 or 50,000 microbes scattered over both of her palms. Hence we may conclude that holding her hands is attended with but small risk to the holder. But she, on her part, should be very careful. The Brussels savant says doctors, surgeons, nurses, hair dressers, barbers, butchers, sausage-makers, tripe merchants, tanners and leather dressers have very microby hands. Therefore it is always best for a lady to make sure, before permitting a gentleman to take her hands in his and hold them fondly there, that he isn't a surgeon or a sausage-maker or a purveyor of tripe. To be absolutely on the safe side she should never allow any men save those who are metal workers to hold her hands. Metal workers, it has been found have few microbes in their palms since metal sets up an oxidation which acts as an antiseptic.

The results of the Brussels savant's investigation are exceedingly interesting and serve as a further proof that hand-shaking is even as risky as it is foolish. Let us give up the habit and so cease to cause thousands of microbes daily to be stricken with nostalgia. Humane considerations alone should be sufficient to make men relinquish this senseless practice.

STUDY THE CONTRACT

Life insurance has come to be such a staple that any special commendation of it is unnecessary. But there remains on the part of the buyer the need of knowing that he is either getting the best or at least that he is securing that which is undoubtedly good. To this end, he should study his contract and learn exactly what he is buying, how and when the goods are to be delivered and at just what cost to himself. There are policies and policies, adapted to every wish and need, but the average buyer is less familiar with the exact character of what he is paying for and going to receive in life insurance than in any other valuable commodity.

All this, while a tribute to the excellence and fine record of the companies is hardly good sense. A man should understand the nature of a life insurance purchase as much as that of a purchase of real estate, bonds, stocks or goods of any kind. He ought to understand it even better, for the final realization of his life insurance investment often comes after he has passed away and when he can do nothing whatever to retrieve any mistake.

Hence the necessity of his knowing fully and correctly what he is doing right at the start. Let him study his contract.

STUFF OF WHICH HEROES ARE MADE

Heroism is not confined to grown men and women; it frequently crops out in children. Recently a little girl in Buffalo was so badly burned that it was necessary to graft 240 square inches of skin on her body to save her life. Many of her schoolmates, boys and girls, volunteered to supply the cuticle from their own bodies. The first volunteer to be taken into the operating room was a boy 9 years old, who refused to give his name. He said he was "little Zip," and that "Belle would know." The surgeon removed three inches of skin from his arm, and the boy almost fainted from pain, while the tears rushed to his eyes. Then he turned to the surgeon and said; "If it will help Belle you can take another slice off me." "Little Zip" has a brave and stout heart. There's the making of a hero in that boy.

How Are Your Kidneys?

This Simple Test Will Tell.

If any of your family have been troubled with kidney disease, make a test of the urine, and satisfy yourself whether you need a good remedy before the disease has caused serious complications.

To-morrow morning put some urine in a glass or bottle, and let it stand for twenty-four hours. If it shows particles or germs floating about, is milky or cloudy, or contains a reddish sediment, then your kidneys are diseased.

Commence at once to take Ferrozone to arrest these unnatural conditions. Ferrozone is especially intended for the immediate relief and cure of kidney and bladder troubles, and its health giving, strengthening properties will be felt at once in new pure blood, healthy circulation, good color, increased vigor, and a general strengthening of the system.

Ferrozone quickly corrects urinal disorders, headache, and pain in the back. It improves the appetite, digests the food, and makes it nourish the nerves, makes them strong and enduring, and fits one for lots of hard work.

Don't be misled by cheap, so called kidney cures offered by dealers for the sake of extra profits. There is only one safe and reliable specific for Bladder, Liver, and urinal troubles, and its name is Ferrozone.

Refuse point blank to accept a substitute, and insist on your druggist supplying the genuine Ferrozone; it is the best. Price 50 cts. per box, or three boxes for $1.25. At all druggists or by mail from N. C. Polson & Co., Kingston, Ont.

$10—GRAND EXCURSION TO WASHINGTON AND RETURN—$10.

On February 26th the Lehigh Valley R.R. will run a special ten day excursion from Suspension Bridge to Washington and return for $10. Tickets good ten days. Stop over allowed at Philadelphia on return trip. Tickets good on all express trains, including "Black Diamond Express." For tickets, Guide to Washington, and further particulars, call on or address Robt. S. Lewis, Canadian Passenger Agent, 33 Yonge street, Toronto, Ont.

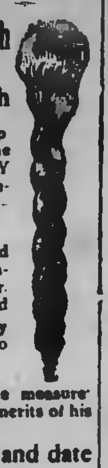
Prof. Dorenwend —OF— Toronto

The Greatest Hair Goods Artist in America

Is Coming to Peterborough

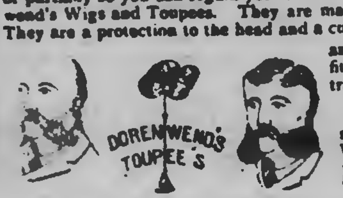
WILL BE AT

Oriental Hotel, on Thursday, February 18th



LADIES—If you appreciate the added charm and the younger appearance lent to the face by having beautiful hair, do not fail to see the grand assortment of SWITCHES, BANGS, POMPADOURS, WAVY FRONTS and WIGS, which Prof. Dorenwend will have with him. Consultation entirely free, and demonstrations given regarding these beautiful conceptions in natural hair.

GENTLEMEN WHO ARE BALD—Even though you are bald or partially so you can regain your former appearance by wearing Dorenwend's Wigs and Toupees. They are made to match any shade of hair. They are a protection to the head and a cure for chronic cold in the head and catarrh. They are perfectly fitted to the head and bear no trace of artificiality.



Prof. Dorenwend will take measurements and demonstrate the merits of his Wigs.

Don't forget the day and date

For the Farmer.

The process of tearing down, or what is commonly termed "wearing out" our land, has been the work of generations, and the building up must necessarily be the effort of years. On the ordinary farm, with its five or six year rotation, each particular tract is reached and worked only six or seven times in one generation, which should prompt us to make as much improvement as possible when opportunity offers.

Sheep are necessary on some farms in order to save much of the waste materials. Sheep will eat many plants that other animals will not touch. It may not be profitable for some farmers to keep large flocks of sheep, but a dozen sheep will cost almost nothing. The same may be said of one or two pigs, which give a profit because they consume materials that would otherwise go to the manure heap, but too many sheep or pigs may make the item of labor too costly to allow of a profit.

Value of Shredded Fodder.

Ask men who have made a practice of feeding shredded foder why they do it, and they will tell you that they feed it because their cattle, horses and sheep like it so well and thrive so well upon it, and because they cannot afford to let it go to waste and feed hay which could be sold for two or three times as much as the prepared fodder costs. When the farmer computes the cost of cutting and shredding his fodder it looks high, but he must remember that, although it does cost him from $2.50 to $3.50 per ton, it takes the place of hay which has a market value from two to three times that amount. Men who have made a practice of feeding shredded fodder state that it costs from $3 to $5 an acre to prepare it, and that an acre of average corn will yield from one and one-half to two and one-half tons of dry fodder. They say further that a ton of fodder has as much or perhaps more feed value than a ton of average hay. Corn used for shredding is bound and shocked when the grains are well dented and glazed over, but before the stalk has shown many signs of ripening. When thoroughly dry it is run through the husker and shredded and stowed away in the mow.—Iowa Agriculturist.

Double Yolked Eggs.

Many poultry dealers are proud that their hens produce double-yolked eggs, and I have known numerous cases in my experience of hens laying eggs with three yolks. The habit, however, is one to be discouraged in every possible way, says a writer in London Farmer and Stockbreeder, for it is not an indication of productiveness, but rather of disease. It is caused either by some sudden disturbance from the ordinary conditions of life, as a severe fright, or else it is due to weakness of the egg organs—the natural process of formation not being gone through properly and regularly. In almost every case this condition is brought about by overfeeding—a too rapid development of the yolks causing more than one to leave the ovary at a time to enter the oviduct. A hen which once gets into this habit will always be liable to illness, which usually takes the form of loss of power in the legs, even if an actual rupture does not occur internally. Such a hen should therefore be put at once on short rations with a view to checking for the time being the development of eggs. It is not the hen which lays a double-yolked egg occasionally that is a profitable hen. What the poultry farmer should aim at is a higher general standard in egg production—a better average size and more regular laying. Some hens only lay once every two or three days. These are the "unprofitables," and they are often the birds which are addicted to the "double yolk" evil.

Great Demand for Poultry.

The Dominion Department of Agriculture has received communications from British dealers who desire to purchase Canadian poultry. One of the dealers, Mr. James Blackburn of Manchester, Eng., is at present in Canada negotiating for the shipment of poultry. For four years the Department of Agriculture has exported the chickens fatted at the illustration stations to Mr. Blackburn. The dealings have been perfectly satisfactory, and the prices obtained for the chickens have been profitable. Mr. Blackburn said that he would like to handle 3,000 cases of chickens per week.

Mr. Hare, chief of the Dominion Poultry Division, states that prices offer substantial inducements to Canadian exporting firms to ship poultry to Great Britain. The poultry should be forwarded in a steamship equipped with cold storage. The railway and steamship companies will inform shippers when suitable steamships will leave St. John or Halifax. Even on small consignments of poultry the freight charges will not be over one cent per pound.

The chickens fatted at the illustration stations have been sold in Toronto, Montreal, St. John, N.B., Halifax, N.S., Sydney, C.B., and Charlottetown, P.E.I., and also to dealers in other smaller cities. The price obtained for fatted chickens in Toronto was 11c per pound, in Montreal 13c per pound, and in the cities in the Maritime Provinces, with the exception of Charlottetown, 11c per pound. The chickens were sold in Charlottetown at 10c per pound.

The fatted chickens sold to the merchants gave perfect satisfaction, and it would be to the interest of farmers to fatten their chickens before they are marketed. The department could have sold several times as many fatted chickens if an extra number could have been bought from the farmers in the vicinity of the fattening stations. A Charlottetown merchant stated: "We have a reply from the party to whom we shipped the last lot, and he speaks of them as being very fine, and expressed surprise that we could produce such chickens in this country." Almost any farmer in this country can produce fatted chickens equal to the Government chickens at little extra expense for labor and feed.

"Do you take this woman for better or for worse"—began the clergyman, but before he could proceed further he was interrupted:

"It's too early to tell yet," answered the groom; "you'll have to give me time, sir."—Boston Post.

Witherby—I made the mistake of my life this morning. I told my wife I didn't like her new gown.

Plankington—What, was she angry?

Witherby—Oh, no, it wasn't that; but she wants another.—New Yorker.

Mrs. Church—Do you enjoy going to the theatre?

Mrs. Gotham—No, I can't say that I do; the cars are so frightfully crowded, don't you know? But I always enjoy it after I get there. — Yonkers Statesman.

Camera Fiend—Shall I take you, Miss Passee?

Miss Passee—Oh, you original man! How sudden! — Houston Post.

Knippe—Yes, by making mutual concessions, my wife and I get along very smoothly. For instance, I gave up smoking cigars the other day.

Tocque—What did your wife give up?

Knippe—Oh, she gave up scolding me for indulging in the habit.—Syracuse Herald.

Lawyer—What was the thing that led to your financial downfall? You seemed to be doing a good business.

Bankrupt—I was, but one day I started out to see if I could borrow some money. I found it so easy that I kept on borrowing.—Somerville Journal.

There's a girl in our model apartment
Who practises singing all day;
The neighbors declare her a nuisance,
And wish they could drive her away.
I think that she sings like an angel,
And hope she will stay in the place—
No, pardon me, I'm not her sweetheart,
But simply—the girl in the case.
—New York Sun.

The War Office is waking up. We were scandalously short of "materiel" when the Boer war broke out, but that is now being rectified with all energy. A Parliamentary paper issued yesterday shows that during the past year the War Office entered into the following contract abroad, being presumably unable to obtain at home the article so urgently required:—

Powder puffs.................£23

If we are to believe Sir Archibald Hunter's version of the siege of Ladysmith, the order was, no doubt, on behalf of the 4.7 naval guns.—London Star.

PULLING UP STAKES
IN PETERBOROUGH

No Matter When or Where You See a Bargain, There's a Better One For You At

GOUGH BROS.
GOOD-BYE SALE

The second week adds to the intense interest of this sale. Its an occasion that warrants unbridled enthusiasm. Nothing can stop its progress.

Do you know how we're fixed? $68,000 worth of Suits, Overcoats, Furs, Boots, Shoes, Hats, Caps and Furnishings, must be slashed to pieces to bring down the stock. Are you thinking? Can't you see what this means? Can't you see that we must sell at a heavy loss in order to pull up stakes in time to let in the new firm.

WILL ANYBODY KINDLY RISE IN THE MEETING and say that Gough Bros. ever was or ever will be undersold. The fears of competitors and the frantic efforts of their bosses, cut no figure with us. No cast-iron "transformation" sale bulletin of reduced prices can side-track GOUGH'S GOOD-BYE SALE. We stand by the town and will issue new lists of cut prices every week that must beat the best markings of any other dealer by 25 per cent.

If anybody offers to sell Men's Overcoats and Suits worth $10 for $6.98, down goes Gough's prices to $5.98.

If anybody offers to sell Boys' Suits and Overcoats worth $6.00 for $4.48, down goes Gough's prices to $3.48.

If anybody offers to sell $3.00 Trousers for $2.48, down goes Gough's prices to $1.98. And so on all through the gamut.

Don't you see the logic in our slashing—we're pulling up stakes in Peterborough—necessity knows no law—the stock can't be moved or kept for another season.

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 15th from 5 cents to 10 cents per share. This company owns 6 claims, 600 x 1500 each. A 70 foot shaft on the Martha claim shows a vein of $30.31 ore 5 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $30.50 to $19,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay them $240 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address,

Letters from prominent people regarding the Bannie Mine

KROHN BROS. Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,

DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)

Wholesale and Retail Dealers in General Merchandise,

KROHN BROS. Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of th ecountry. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS. Cincinnati, O. Prescott, Ariz., 7-31-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

RUSSIAN GENERALS DECLARE THAT ULTIMATE OBJECT IS TO CRUSH GREAT BRITAIN AS WELL AS JAPAN

Situation at Port Arthur, Concentration of Russian Troops

Question of Peace or War Rests With the Great Russian Ruler.

BRITAIN WOULD COMMAND A HALT.

Should Japan Prove Unable to Resist the Enemy

Tokio, February 8.—Japan is growing impatient and is likely to initiate measures very shortly that will compel Russia to disclosure whether it means to fight or abide by its pledges. Certain observers think it possible that the threats made by St. Petersburg correspondents with the sanction of the censor, together with the movements of Russian troops and ships, do not necessarily reflect the real intentions of the Czar's Government, but are intended to bluff the Tokio authorities into accepting the forthcoming Russian proposals. If such is their purpose they are doomed to failure. When the unalterable resolve of Japan is appreciated at St. Petersburg some optimists will believe the Czar will force his belligerent counsellors to the rear, but there is really little hope of such action.

BOASTFUL RUSSIAN OFFICERS.

St. Petersburg, February 8.—Russian generals, now that war is almost universally believed to be unavoidable, are amazingly outspoken as to the purposes that inspire the Government's policy. "What the nations are about to witness," said a very prominent soldier to a press correspondent this morning "is a grand turning movement on the part of Russia against its old, dogged opponent, Britain. As an incident of this operation Japan must be crushed. They must be cleared off Russia's flank, otherwise the advance of the Czar's forces cannot be continued across Asia. Japan stands between Russia and the aim of which he has never lost sight—to turn the British off their position in India and to shatter the British wall that blocks the Russian path in the Persian gulf and the Bosphorus. Lord Lansdowne, the British Foreign Minister, not long ago boldly announced in the House of Lords that Britain would fight any power that might presume to share the advantages of the Persian Gulf. All I have to say is that this is a question of strategy and strength rather than a question of official pronunciamentos."

EVERY HOPE ABANDONED.

Paris, February 8.—Nearly every hope of peace in the Far East has been abandoned and official France feels gloomy. Although the Foreign Office repeats its statement that "France in no way can be drawn into the conflict," the uneasiness which is confessed in the corridors of the Chamber and the Senate is remarked wherever serious people gather. It also exists in the Quai d'Orsay. At the Foreign Office this morning a press correspondent conversed with a prominent Parisian merchant with large interests in the Far East. He had just left M. Delcasse, the Foreign Minister. "The minister," he said, "Gave me solemn assurance of his conviction that there would be no foreign intervention in the conflict, but added that in any case apprehension of France's ultimate participation was based on the most improbable contingencies."

Meantime, in spite of the Russian alliance the rank and file of Frenchmen are bitterly opposed to the view that neutrality is unjust whatever may happen or whatever Britain may do in event of war. More over French public men believe a large share of blame will fall on the English press and Government. The King's speech at the opening of Parliament is not considered as at all representative of the regal feelings or secret intentions of the British Cabinet.

EIGHTEEN STEAMERS CHARTERED.

Copenhagen, February 8.—Eighteen steamers from nearly every port in Europe were chartered to-day by the East Asiatic Company, from April 1 Mr. Andersen, general manager of the company, said to a press correspondent to-day "I am ordered by the Russian Government to acquire all the tonnage available to run with provisions, not war material, from the opening of the war from Odessa to the Far East. The Siberian Railway is not capable of carrying all the provisions needed for the campaign." Mr. Andersen thinks a Russian victory would benefit his company immensely, whereas defeat would mean stagnation for European commerce altogether, as China would consider a Russian defeat the occasion for reaction against European progress, and European capital would not be invested in the East for years to come.

BRITAIN'S INTERESTS.

London, February 8.—Every day that brings war nearer in the Far East directs attention to Britain's vital relations to the crisis. It is recognized that Russia is threatening a principle to which the country is thoroughly committed, and which is conceived to underlie British commercial well being and even political security in Asia. Earl Percy's statement in the House of Commons last night that Lord Lansdowne had made repeated representations to St. Petersburg on the subject of Russia's promised withdrawal from Manchuria indicates the embarrassment the Government would feel should Russia decide to annex the province by conquest.

Should war break out, and Japan prove unable to resist the enemy, many well-informed diplomatists believe Britain would command Russia to halt. The atmosphere in Downing street is charged with mystery and anxiety.

WHAT WILL EUROPEAN POWERS DO?

IN CASE OF WAR BRITAIN MAY BE FORCED TO HELP JAPAN

A GENERAL WAR POSSIBLE

France Would be Expected to Unite with Russia

London, February 8.—The Post says; If war breaks out between Russia and Japan, the situation in Europe will become delicate and interesting. Formally, Britain is an ally of Japan, and France of Russia, but while British interests would suffer tremendously if Japan were to be crushed, it is difficult to see what possible difference it makes to France whether Russia is rebuffed in Manchuria. The withdrawal of Russia would mean an "open door," from which France, with all the world, would profit.

Still if Britain intervened to help Japan Russia would undoubtedly call upon France—and then would come the test France might remember that Russia has not been over-eager to take up her quarrels in the past. In fact, it is just possible that the peace feeling which seemed to sweep over Russia a little while ago, may have arisen from some plain talk from its ally in which the Northern Colossus was given to understand that an alliance is not all "take" and no "give."

Another influence which might affect France would be the attitude of Germany. A word from the Kaiser; and France would be abundantly justified in saying that she must concentrate her forces at home for self-protection. Even is the Kaiser makes no sign, can France go to war in the East, with the entire Triple Alliance watching her exhaustion?

Now none of these things affect Britain. Germany could not keep her quiet; and, if she ventured to try it, the United States would almost infallibly range itself with the British-Japanese alliance The Britain would be fighting for positive and real interests; and not merely for the sake of her ally. This would undoubtedly mean a great difference in the attitude of the British people.

Then, again, if both Britain and France became involved in the East with Russia and Japan, what would be the position of Germany? Plainly all it must do is to "sit tight"; and, when the four powers have exhausted themselves take whatever it fancies. After a costly war in the East, who, for instance, would interfere if Germany occupied Vienna and The Hague—of course, with the consent of the German-Austrians and the German-Dutch? This would make Germany the arbiter of Europe.

Could France take this risk? Then the relations between France and Britain are now happily very close. It would require considerable pressure to drive either country into war with the other.' Stranger things have happened than that the pressure would only result in breaking the Franco-Russian alliance; and of bringing about a Franco-Italian-British understanding. Put the United States into this combination and there could be even no challenge of its command of the sea.

Thus it may come about that Russia will find herself isolated in the East—especially in the event of beating Japan, and thus threatening the trade of northern China. Of course, Germany might buy the valuable friendship of Russia by going over to her now; but that would almost certainly dislocate the entire European combination and bring about a new alignment. In any case if hostilities come, the European capitals will be, at least, as well worth watching as the Corean waters: *for there is where any really dangerous conflagration will start.*

THE T. V. CANAL BEING DISCUSSED

JOURNAL OF COMMERCE HAS SOMETHING TO SAY

CANAL MUST BE COMPLETED

The Western Country Repuires that the Work be Finished

The Journal of Commerce, Montreal, says that the appointment of the transportation commission by the Dominion Government has aroused in the vicinity of Peterborough, a revival of interest in the question of the Trent Valley Canal and its effect on the transportation problem, which is pretty generally admitted to be one of the most important claiming the attention of the legislators. The fact, says a Peterborough report, that Mr. Bertram has stated that the commission will hold a sitting at Peterborough and go over the proposed route of the canal for the purpose of obtaining information as to the possibilities of the canal, has had the effect of arousing public bodies to the necessity of bringing to the attention of the members of the commission the great national advantages of having the canal completed speedily.

The question formed the chief subject of discussion at a banquet recently given by the newly-elected Warden of the County of Peterborough, Mr. H. A. Peck, when his Worship, Mayor Roger, in replying to a toast, remarked that he believed the greatest question claiming the attention of Peterborough public bodies was that of the Trent Valley Canal. Dr. Jeffs, a prominent citizen, and one of the officials of the Peterborough Sugar Company, stated that he had been informed on good authority from Mr. Stuart, the Treasurer of the new cereal company, with which Hon. Senator Cox is prominently Associated, that this company had plans already prepared for the erection of an immense flour mill, the construction of which would be commenced as soon as assurances were given that the canal would be pushed to speedy completion. The company ship their products very largely to Great Britain, and the completion of the canal it is claimed, would greatly benefit them in shipping rates. The company has just completed the erection of a 5,000 horse power electric plant, of which they are now using 1,500 horse power, and if the canal were completed they would build manufactories which would require the entire quantity generated at the plant to operate.

The local benefit is shown by the fact that while at the present time the freight on coal from Oswego to Port Hope by water is 30 cents per ton, that to Peterborough, 30 miles farther, is $1.25 a ton, because of the rail haul.

Yesterday's Storm Causes Great Destruction.

Telegraph and Telephone Poles Blown Down--A Great Set Back to the Railroads

The prediction of the weather man Saturday morning, that, accompanied with the mild spell would come sleet and rain was all too true. Early that morning we had the snow and sleet, followed later by a drizzling rain which kept up almost continually until Sunday afternoon about five o'clock, when a high wind arose. As the rain fell it froze, forming the branches of the trees into a mass of icy net work. The wires connected with the telegraph and telephone poles together with electric light wires were burdened down with ice, causing a great weight on the poles on which they were strung, as was evidenced by the great havoc done throughout the country.

The wind blew with terrible velocity and caused great destruction of property, both in the town and country. Orchards were completely devasted in some parts, the limbs of the trees being broken and hurled to the ground.

The telephone and telegraph companies suffered great loss from poles being broken off and wires blown down. At the north end of Water street—from London to Smith streets—the wind laid low no less than 17 poles, so great was the strain caused by the wires waving to and fro. As the poles fell, they came in contact with the electric wires of the Peterborough Light and Power Company, breaking them down and doing other damage.

Manager Doan, of the Bell Telephone Company, soon had a gang of men at work, as did also the Peterborough Light and Power Company, clearing away the debris and disconnecting live wires, which for a time made traffic to the public dangerous, for had any person came in contact with one of them, it meant instant death. It is not known to what extent damage has been done, as many places are entirely cut off from communication.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.63 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.70 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $42.65 and $70.60 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet we expect it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group, is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district,

(Signed) CAPTAIN A. M. PAUL.

The PETERBOROUGH BROKERAGE CO , Fiscal Agts.

PETERBOROUGH, ONTARIO.

Equitable Gold Mining Co.

R. C. LANE, President. S. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 5x18 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Hule winze and the tunnel) of 2,250 feet.

In addition to the above there are four small shafts, with a combined depth of about 200 feet; 135 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 28th, 1903, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 265-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

Dry Placer Miner formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house of sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material,

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of this stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

CURES in 1 to 5 days. Guaranteed not to stricture. Prevents Contagion.

MEN AND WOMEN.
Use Big G for unnatural discharges, inflammations, irritations or ulcerations of mucous membranes. Painless, and not astringent or poisonous. Sold by Druggists, or sent in plain wrapper, by express, prepaid, for $1.00, or 3 bottles $2.75. Circular sent on request.

WILL WE RETURN BRITAIN'S FAVOR

SUGGESTED THAT EMPIRE BE REPRESENTED ON CANADA'S DEFENCE COMMITTEE

CRY 'ORDERS FROM LONDON'

Paper Asks Whether Sir Frederick will Remain on the Defence Committee

London, Feb. 7— Mr. Wellrodd, formerly of Canada, writing to the Graphic says, "If a Canadian Minister can sit as a member of a committee of the British Cabinet through that committee, a reciprocally defined committee must be placed in a position to give advice to the Canadian Government through their Ministers. To us such an arrangement appears entirely reasonable, but it is possible that any attempt to carry out such an idea would be met with the cry that the colonial Government was taking instructions from the Home Government."

Gratifying Progress.

The Birmingham Daily Post says: "It is gratifying, indeed, to observe that a closer union on grounds of Imperial defence now seems well within the range of practical politics."

The Liverpool Daily Post says: "Whether Sir Frederick Borden was formally authorized by the Canadian Government to take his seat on the Imperial Defence Committee, Premier Balfour does not say. Nor does he mention what matters were discussed, nor whether Sir Frederick will remain a member of the committee. Premier Balfour gives a casual invitation to the colonial Minister to take a seat on the defence Committee while Canadian militia affairs were being discussed. This can scarcely be the beginning of a movement toward Imperial unity such as the Liberals have in view."

The Manchester Courier says: "A casual visitor to London, in the person of the Canadian Minister for War, has been welcomed to the councils for Imperial defence. It is to be hoped that this example will spread."

BURNED TO DEATH

House Caught Fire While the Family was Asleep

Montreal, Feb. 6— Four sleeping inmates of a dwelling at 178 Cadieux street were suffocated early this morning, and three others were badly burned and injured, one of whom will probably die.

The dead are; Mr. Edward Crawford 40 years of age; his wife, Mrs. Edward Crawford, 40 years of age; Wm. Crawford, 15, her son; and James Hare, 23, son-in-law.

The injured are Mrs. Ethel Hare, 22 years, burned on hands and face, and arms cut; Jas. E. Hare, 8 months infant son of Mrs. Hare, badly burned, will die; Thos. Hare, 25 years of age, face and hands burned.

Three of the inmates, Mrs. Hare, with her infant, and Thos. Hare, jumped from the second storey of the burning building. The other occupant Edward Crawford, was carried out, after he was badly burned.

An Overheated Stove.

The fire evidently started from an over-heated kitchen stove in the lower flat, and spread to the sleeping apartments before the people in the house were awakened. The first to awaken was Thos. Hare, who rushde to a window in the front and jumped to the street. He was half-crazed and ran up the street until he was noticed by the police, who, in conjunction with the firemen, responded to the alarm. He was put in the patrol wagon and sent to the Royal Victoria Hospital. Mrs. Hare was also awakened by the smoke, and the mother, with her infant in her arms, jumped into a bank of snow on the street. Both were taken to the General Hospital. Mr. Crawford was rescued by the firemen, and sent to the General.

When the firemen reached the scene dense smoke poured out of the second-storey windows and flames burst from the lower flat. Hose was laid, the door was broken in, and the men, as soon as possible, entered. It took but a few minutes to put out the fire. When the firemen rushed upstairs they found Mr. Crawford half suffocated in the rear room.

On the floor in a front room, in their nightclothes, with faces disfigured, were Mrs. Crawford and her 16-year-old son Willie. Both were curled up, and had evidently been overcome by smoke while attempting to get out of their rooms. Seated on a trunk, with his head leaning against the wall, was Jas. Hare, 23 years old. He had his clothes on, and had apparently dressed before he was overcome by the smoke.

SCRATCH CREW AFLOAT ON RAFT

JOHN MORLEY'S DESCRIPTION OF BRITISH CABINET

RETALIATION NOT POSSIBLE

Presented with Freedom of Arbroath Preference Scheme Endorsed

London, Feb. 7— The developments of Jacques Lebaud's 'Empire of Sahara,' is about to take a new turn, M. Lebaudy has decided to draw the officers and non-commissioned officers for two battalions of Imperial Life Guards from Great Britain and the United States, and in pursuance of this idea he will submit to President Roosevelt an invitation to name any officers of his former Rough Riders whom he can personally recommend for commissions. The British officers will be drawn from the 17th English Lancers and the Royal Horse Artillery.

The battalion will be the Emperor's guard. Col. Geo. Gouraud, who was Governor-General of Sahara, and is organizing a military establishment for M. Lebaudy, said today; It is proposed besides the formation of a battalion of Life Guards to organize a Sahara constabulary, which will police the country somewhat along the lines of the Canadian North-West Mounted Police. This constabulary will be composed wholly of American negroes but whether under white or colored officers has not yet been decided. The management of the entire force will be in the hands of a retired British army officer, who has already been selected—a man with an unsurpassed war record.

"Extensive farm lands will be allotted on which ex-officers and the men of the constabulary can obtain homestead rights if they choose at the end of the period of enlistment.

"We purpose also to encourage the emigration of the American negroes to the new Empire, selecting only approved settlers who will be chosen by thoroughly reliable agents, scattered throughout the United States. Personally I believe this scheme will secure the support of the American negroes to an extent which no other emigration plan has ever yet attained."

A SERIOUS ACCIDENT AT A LUMBER CAMP

A MAN IN DIGBY TOWNSHIP WAS BADLY INJURED BY A SAW LOG

Lindsay Post—A shantyman, named Edward McFadden, whose home is in Digby township, was badly crushed by a rolling sawlog in a lumber camp on the border of Peterborough county. The unfortunate fellow was helping to load some heavy logs onto a sleigh when the end of one not solidly in place, slewed round, knocking him down and passed over his body from the waist to the head, crushing him badly, but not fatally.

The injured man was conveyed to Gooderham, a 30 mile ride—where Dr. Sutton gave him every attention. Finding that the patient manifested symptoms of having contracted pneumonia as a result of exposure on his long trip from camp, the Dr. decided to remove him to the Ross Hospital, and set out with him Wednesday afternoon. The trip over the I. B. & O. Railway to Irondale Junction was made on time, but owing to the blockade on the Haliburton line the doctor and his patient did not reach Lindsay till 1 o'clock Thursday morning, when a hack was secured and the injured man transferred to the Hospital, where he is doing well. Dr. Sutton is still in attendance, no train having left for the north since his arrival.

London, Feb. 6— The prospect of a great war breaking out in the Far East next week, which is acknowledged even in hitherto most pacific quarters, has been brought appreciably nearer by the developments of the last day or two. That a Russo-Japanese conflict will be followed by a Balkan outbreak, which in time is liable to develop into a widespread European conflagration, is also considered as extremely probable, and increases the depression pervading all political and commercial circles in England and on the Continent.

The news from St. Petersburg of the preparations of M. Kurino, the Japanese Minister, for departure, is not yet known in London; but official circles, the press, and the public, have already practically unanimously decided that nothing can avert war, and probably the termination of the long delay and suspense when the first gun is fired, will occasion a sense of relief.

RUSSIA ATTAACK CHINA?

Report That Czar Intends to Seize Pekin and Tien-Tsin.

New York, Feb. 6—A despatch to the Sun from Hong Kong says;

The Russian Minister has informed the Chinese Grand Councillors that in the event of war Russia may be compelled to seize Tien-Tsin and Pekin, and that if China favors Japan she should consider the situation thoroughly before declaring her intentions. In consequence of this the Chinese Ministers fear that Russia will attack China first

A RAVING MANIAC

New York, Feb. 6—A despatch to The Press, from Derby, Ct., says;—As the result of drinking a quart of patent catarrh medicine, Mrs. Mary Healy of this place, has been violently insane for four days. To get quick results she drank the medicine all at once. In two hours she was raving, screaming and tearing out handfuls of hair. When locked in her room by her boarding mistress she kicked out the windows and smashed the furniture. Doctors have worked three days without improving her condition. Doctors say her reason has been permanently destroyed.

Grand Trunk at World's Fair

The extensive and comprehensive exhibit which the Grand Trunk Railway System are arranging for the World's Fair, held at St. Louis during 1904, is now in course of preparation. The proposed pavilion which it is the intention of erecting is one combining beauty, elegance and artistic merit and the designs submitted to the Exposition authorities were greatly admired and accepted. The pavilion will be erected in the "Fish and Game" Building, facing on three aisles, will be of the Corinthian and Doric architecture, style, embellished with emblematic designs of fish and game, and it is claimed will be one of the handsomest structures at the Exposition. Canadian haunts will be the predominating feature of the display.

The mammoth palaces that form the main picture of this "World's Fair"—the Foreign and State buildings and the "Pike" (Midway)—are at the present time much further advanced before the opening date than the buildings of any other of the great expositions that have been held in the past; in fact, the installation of exhibit is now been proceeded with in many of the buildings.

One good feature of St. Louis is the Union Station; there being only this one, all trains from all points with the exception of excursion trains from a distance of one or two hundred miles of St. Louis will arrive and leave from the one depot, and as the street car lines pass the station visitors will have no trouble in reaching their hotels or boarding houses without difficulty and early after arrival.

People who have seen the grounds for the first time marvel at the magnitude of this colossal undertaking and do not hesitate in forming the opinion that it will be the greatest event from an instructive, educational and amusement point of view, that the world has ever seen.

Two hundred and fifty conventions have already signified their intention of visiting, and have completed arrangements for St. Louis during the "World's Fair."

THE TIMES BOOKSTORE
MARKET BLOCK,

BIG BARGIANS

Below is a few items of the many big bargains now on sale for the balance of this month.

Webster's Dictionary
Webster's Dictionary, indexed, containing 1500 illustrations and an appendix of 10,000 words. Sale price........ $1.90

PROSPECTUS

THE COLORADO AND CONNECTICUT GOLD MINING COMPANY

(Incorporated under the laws of South Dakota.)

Main Office: MERIDEN, CONNECTICUT.

Capital $400.000 80,000 Shares at $5.00 each, full paid and non assessable

OFFICERS

WILLIAM GARLICK, Wholesale and Retail Ice Dealer, Meriden, Conn., President
J. H. A. THOMPSON, Investment Securities, New York City, 1st Vice-President
GEORGE B. WILCOX, Retired Manufacturer, Meriden, Conn., 2nd Vice-President
B. F. BARNES, Manufacturer, Meriden, Conn., Treasurer
WILLIAM O. CORVER, Miner, Meriden, Conn., Superintendent
ARTHUR B. GARLICK, Meriden, Conn., Secretary

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE B. WILCOX, RICHARD F. DOSSEY,
WILLIAM GARLICK, ARTHUR B. GARLICK, B. F. BARNES.

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hindsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—*Private wagon road from main road up to mouth of tunnel, also up to shaft and houses.* Tunnel is 5x7 feet and in 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs.) is as follows: Copper, 16.05 per cent.; Gold 0.02 ozs.; Silver 92.40 ozs. Total value $92.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper, $6 42; Gold, $6 82; Silver, $254 31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatsoever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years. Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5,500,000 (now claimed to be worth $15,000,000). About six years have elapsed since he purchased it. The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado. New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN."

Mr. Edwin J. Hulbert, M. E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

B. F. BARNES, Fiscal Agent
Room 31, Wilcox Building, Meriden, Conn.

HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity.

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of Shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely certain to others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to

J. W. BUTLER, PRESIDENT,
713 Market St., San Francisco, Cal.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placers in the ages past.

The Pearl Gold Mining Co. of Idaho

owns seven groups of mines—thirty-seven mining claims and is now working in ore in three of its mines.

The Treasury Stock is offered at a price that will unquestionably make money for those who invest. The Stock is non-assessable—no debts—all clear titles—safe, experienced and conservative management.

BIG COTTON FIELDS FOR THE SOUDAN

To Which England Looks for Her Future Supply

Washington, Feb. 6—"The phenomenal rise in the price of cotton which has occurred in the last year," said Mint Director George E. Roberts today, "has aroused the cotton-spinning interests of England to a very lively realization of their dependence upon the United States for the raw material of their industry.

"The cotton-spinners of England have been watching the growing consumption of raw material by their American competitors until they can anticipate a time in the not distant future when this country's entire crop will be wanted by the mills at home. The sudden rise in price in 1903 emphasized and brought home these conditions and the danger to the British manufacturer and the bread winners dependent upon his mills. The significant growth of the new imperial sentiment among the British people has fostered the desire to produce within the Empire as much as possible the things The Empire consumes. There is now a widespread and profound belief among the British cotton spinners that the only salvation of their trade is British-grown cotton. By this it is not meant that British-grown cotton will, at least within anything like the near future, altogether take the place of American-grown cotton. The hope and expectation is that the British product will be supplemental to the supply drawn from the United States. It is argued that this supplemental British supply will not only meet the expected shortage in American cotton, but will prevent the cornering and manipulation of American cotton.

"The British Cotton-Growing Association with headquarters at Manchester, is raising a fund, to which $150,000 is already subscribed, for the purpose of conducting experimental farms in different regions where cotton culture promises well. The Government is in full sympathy with the movement and will give it all possible aid. The most important results are hoped for in Africa, by an increase of the Egyptian crop and the development of the industry in the Soudan. The wonderful system of water storage and irrigation recently established on the Nile under British auspices has greatly increased the acreage of cotton cultivation. James Boyle, United States Consul at Liverpool, in a recent report to the Department of Commerce and Labor notes the claim that there are millions of acres of cotton-growing land in the Soudan, and that when the projected railways are completed a very large area will at once be put under cultivation. The qualities which can be grown are similar to Egyptian, and even of a better fibre, it is claimed. He says that a fair quantity of cotton from the Soudan is expected at Liverpool and Manchester this season. The first consignment of Soudanese cotton recently arrived at Cairo from Khartoum, and was declared to be superior in mercerizing qualities and in strength to the best Egyptian."

A WAR LEGEND

Quarrel in the Dutch Ranks Reformed Church

London, Feb. 6—Among other disagreeable legacies of the recent war in the Transvaal was a serious schism in the ranks of the Dutch Reformed Church. Soon after the declaration of peace the Synod passed a resolution virtually excommunicating those burghers who surrendered before the war was over or served as National Scouts. For a long time these non-guerillas, as they were called, accepted the ban, but gradually began to make their strength felt in the community.

In October last the Church Council of the Ermelo district, in which both sections were strongly represented, passed resolutions to the effect that every member of the congregation should enjoy all the privileges of the Church; in other words, it refused to obey the decision of the Synod, and invited non-guerillas to attend the Church. Thereupon the extreme guerillas withdrew from the Church and challenged the Church Council to justify its decision. Recently a great meeting was held at Ermelo, which was attended by the Rev. Mr. Bosman, the moderator of the Reformed Church, who said that the only obstacle to peace was the resolution of the Council, which was an insult to the patriotic guerillas. The resolution was then rescinded. He argued that the cases of those who had merely surrendered and of the National Scouts were entirely different. With the former, he said, the Church had no quarrel, but the Scouts could only be received after public confession. This the Scouts resolutely refused to make, and then it was suggested that private confession would suffice.

In the end a number of committees were appointed, and it is still uncertain whether peace will be restored, or whether the non-guerillas will start a church of their own.

LEFT HIS WAD IN BED

Theatrical Manager Left His Money in Bed

Tweed, Feb. 6—The News says: "The 'Jerry from Kerry' Company, which played here last week, is certainly one theatrical organization not traveling in hard luck. Shortly after leaving here on Thursday morning last for Gananoque the manager suddenly realized that he had left his wad in bed, where he had placed it on retiring. He immediately wired the proprietor of the Huyck House, where he had registered in Tweed, to look for the money, but before the message was received the chambermaid at the hotel had found the roll and had handed it over to the proprietor. A message was immediately sent back to the owner of the money advising him that his roll had been found. The message, no doubt, relieved him of considerable worry. The money, which amounted to nearly three hundred dollars, was sent to Deseronto, where its owner recovered it.

BAR OUT FOREIGN SHIPS

London, Feb. 6—At a meeting Friday of the Chamber of shipping a motion was presented supporting the resolution adopted at the conference of Premiers in 1902 expressing the opinion that the attention of the Governments of the colonies and the kingdom should be called to the advisability of refusing privileges of coastwise trade, including trade between the Mother Country and the colonies and one colony and another, to countries in which corresponding trade is confined to ships of their own nationality, with a view to promoting Imperial trade in British vessels. The motion was adopted with only two dissentients.

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA —AND— BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.
Capitalized at $2,000,000.00. Par value $1.00. Full Paid and Non-Assessable
At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 500 feet in addition to other claims approximating a total acreage of 240 acres. This property has produced over $260,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $15 per ton for second class, all the past summer and the summer before, smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.
1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.
Selling at 75c a Share

Like its sister Company is to-day giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $150,000.

Tunnel B of the Black Queen Company is now going in at a rate of 150 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 150 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable galena ore, the point of intersection being 900 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, FISCAL AGENTS.
C. L. ARZENO, General Manager. 603-604 Exchange Bldg., Denver, Colorado
ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO,
SOAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL.
The Peterborough Brokerage Co., Local Agents.
WANTED—GOOD AGENTS IN EVERY CITY.

CATARRH

The Mother of Consumption

How this dread disease may be prevented and cured—the opinions of people who have been cured by

CATARRHOZONE

Catarrh is very often spoken of as the mother of consumption, because when neglected, it extends from its place of beginning to the bronchial tubes then deeper and deeper, till finally the disease becomes consumption of the lungs.

The safest and best remedy for any form of Catarrh is Catarrhozone. It is inhaled to all parts of the breathing organs, kills the disease, and drives it completely out of the system.

Mrs. Mary J. Whitney, of Clay Street, Topeka, Kansas, was cured of nasal catarrh, after twenty years' suffering by Catarrhozone. She says:—

"I owe to Catarrhozone an immense debt of gratitude. It cured me of Catarrh of the most disagreeable kind after doctors without number had pronounced my case incurable. My breath is pure and my respiration regular, and I do not cough any more since using Catarrhozone. It has cured me perfectly."

Another case of Chronic Catarrh that was cured quickly by Catarrhozone is that of Mr. G. C. Luce, of 1,700 Navasota Street, Austin, Texas. Mr. Luce says: "I tried for four years to get rid of Nasal Catarrh, used salt douches, atomizers, tablets, stomach medicines, etc., but they didn't do me much good.

"Then I tried Catarrhozone, and received relief in a few hours. It cured in a week, so that I never had a recurrence of my former trouble.

Miss Winer, who resides on May Street, in Hartford, Conn., was cured of throat trouble by Catarrhozone, and speaks of her recovery in the following words.—

"Repeated colds finally resulted in a Catarrhal condition from which I suffered more or less every spring and fall. Catarrhozone was the only remedy that relieved and cured me. I recommend it."

No treatment is so good for Catarrhal affections and Bronchitis as Catarrhozone. Its success is quite unequalled in the history of medicine. It will cure you quickly and surely, and is well worth a trial. Two months' treatment guaranteed to cure, price $1.00; small size 25c Druggists, or N. C. Polson & Co., Kingston, Ont. Buy it to-day.

PETERBOROUGH, FEBRUARY 9, 1904

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

An Enjoyable Evening

An at home under the auspices of Court Queen, No. 276, I.O.F., was held in the Foresters' Hall, Simcoe street last night, and was a most enjoyable affair.

A Railway Smash

A train coming this way from Port Hope left the rails a short distance from that town and several cars were wrecked. No lives were lost, however. The accident was caused by ice on the rails.

The Trent Canal

Mr. J. Alexr. Culverwell delivered a lecture before the Canadian Institute, Toronto on Saturday last on "The Trent Valle: Canal and the Development of Canadian Waterways." The lecture was illustrated by lantern views.

Bethany Tabernacle Notes

The members of the People's Mission disbanded last Sunday to reunite with Bethany Tabernacle.

Beginning this evening, Pastor Steuernagel, will resume his Bible Studies in the Life of Christ. The lesson for to-night will be found in John 1:19—2, 11. All interested are cordially invited.

Never Learn Club

On Wednesday evening the Never Learn Club will give what promises to be a most enjoyable leap year dance, in Foresters Hall Simcoe street. The young ladies of the club have undertaken the refreshments, and the Marloreana Harp Band Orchestra, of Toronto, will furnish the music. This dance, like the others, will be an informal one, and invitations issued for any Never Learn event will be honored.

The attendance at the

Peterboro' Business College

is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre of Canada.

Over 90% of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write for particulars regarding our correspondence course

WM. PRINGLE,
Principal.

CLEARING THE DEBRIS

Over 100 Telephone Subscribers Cut Off on Account of Storm

Sunday's storm played havoc with the telephone system, cutting off about 100 subscribers. These are being connected up as rapidly as possible, and in about three days the damage will be temporarily repaired.

The line on Water street north, which was so badly wrecked, is being temporarily repaired. The debris has been removed from the street, and the wires are being attached to what remains of the old poles. As soon as the subscribers are all connected again, the work of putting in new poles will begin.

VERY INTERESTING MEETING.

Held Last Night in St. Andrews Church by Christian Endeavour

A very interesting meeting took last night under the auspices of the local Societies of Christian Endeavors, Rev. Alex. Esler, pastor of Cook's church, Toronto, delivered a stirring address in which the objects and aims of the society were set forth. A very interesting programme of music was rendered.

There was a large attendance, considering the cold weather, of members of Young Mens' Guild, Epworth Leagues, and Endeavor Societies of the town.

staying qualities gave him a slight advantage and he crossed the line ahead of his opponent, winning the purse of $25. Time, 31 1-2 min.

A MATCHED RACE

Belland Wins a Five Mile Foot Race for Purse of $25

An exciting foot race took place yesterday between Dave Belland, of Peterborough and J. Burns of Ottawa, which resulted in a close victory for the former. The two ran from the Oriental Hotel to Downer's Corners and return a distance of five miles. Both were in fine condition, but Belland's superior

THE CASE DISMISSED

Magistrate Dumble Gives Judgment in Cereal Company's Case

At the Police Court yesterday Police Magistrate Dumble gave judgment in the case of the Crown against the American Cereal Company for an alleged breach of the Lord's Day Observance Act. The charge was dismissed, the Magistrate being unable in the face of the evidence submitted to make a conviction.

We are unable from lack of space to print the remarks of the Police Magistrate. From the evidence submitted, Mr. Dumble could do nothing else than dismiss the case.

TIMES FOUND IT

A Little Ad. Recovered a Good Sized Roll of Bank Bills

Every wide-awake citizen and business-man knows by experience in actual results the trade-bringing value of the Times Lost advertisements, the cost of which is merely nominal, always repay. Mr. Johnston, caretaker of the Murray street Separate school, lost $21 in bills, and immediately had a liner inserted in the Times. The money was returned by the finder, Mr. Samuel McCabe, who read the ad. in the Times. This is one of the many instances where Times advertisements pay, and illustrates what benefits accrue from small investments in printer's ink. The Times covers an exclusive territory reached by no other paper. Are you an advertiser?

MINISTERIAL

An Interesting Address Delivered by Rev. J. C. Davidson

The regular monthly meeting of the Ministerial Association was held yesterday morning with the following members present;—Revs. J. C. Davidson, J. G. Lewis, W. J. Jolliffe, J. Bascow, J. P. Wilson, Dr. Torrance, J. A. Wilson, J. G. Potter, A. H. Brace, Rev. J. G. Potter, A. H. Brace, Rev. J. P. Wilson, the President, was in the chair.

Sunday Feb. 21st, was named as a day of special sermons for young men.

The hospital visitation for February was arranged as follows—

Feb 8—Rev. A. H. Brace
Feb. 15—Rev. J. Bascow.
Feb. 22—Rev. J. G. Potter
Feb 29—J. A. Wilson.

Rev. J. C. Davidson delivered an interesting address on "The Mission of the Church," dividing his subject into three parts, 1—To glorify God. 2—To save and to sanctify men. 3.—To enlighten, purify and preserve the world.

INCIDENTS OF THE DAY

Stray Paragraphs Picked Up By Reporters on Their Rounds

—For valentines of every description come to Times Bookstore.

—Big bargains in crokinole boards and ping pong sets at Times Bookstore.

—Two negro minstrels struck town last evening and visited the various hotels furnishing "coon" songs and guitar solos. They leave for Lindsay today.

—If Moses saw fit to inscribe the ten commandments on stone to advertise to the world his code of morals, how can a business man then deny the importance of advertising to the world, the good things about his business?

—There was an open session of the Park street B.Y.P.U. last night, with a young people's social. A large muster of young people were present. Mr. Oldham entertained with his gramaphone, and an interesting programme was given.

—It is said that many citizens are ill, and it is suspected they have been reading the reports which appeared in our little contemporaries on the alleged hockey match between the printers of the two offices. After they get through their little scrap The Times bunch of expert hockey stick manipulators will be pleased to challenge the winners for money or marbles.

—Norwood Register—The big swamp elm tree on the farm of Mr. Patrick Fallon referred to in these columns some weeks ago, has been cut down and two pieces of this king of the woodland have been hauled to the railway station here for shipment, we are informed, to St. Louis, Mo., as part of the Canadian exhibit at the World's Fair to be held in that city from April 30th to Dec. 1st, 1904. The larger of the two pieces selected measures 12 feet in length by 5 feet 2 inches across the top end and 8 feet 3 inches from point to point at the widest part of the butt end. The tree measured about 60 feet from the ground to the first limbs. It took the greater part of two days to fell this giant and two good teams of horses were required to deliver the log at the railway station here.

NOT CORRECT

An Item That is Doing Considerable Harm

The following item, taken from the Lord's Day Advocate, is going the rounds of the country papers. It is not in accordance with the facts, and our contemporaries, who have printed the item, should see that justice is done the American Cereal Company, by stating the facts. The Company does NOT do unnecessary work, or never did. Only such work as is absolutely unavoidable is performed on Sunday. The following is the item referred to;—

"The American Cereal Company, of Peterborough, Ont., some months ago began doing on Sunday much unnecessary work. On being kindly remonstrated with, there was a temporary cessation which again has been followed by a more general outbreak, which is being persisted in in defiance of the Crown authorities, who are beginning proceedings at the instance of the Attorney-General. This concern represents American capital under American superintendence."

So far as American superintendence is concerned, Mr. Robert Stuart, the head of the company, is a Canadian, as also is Mr. Macdonald, the superintendent. Ninety per cent. of the employees are also Canadians.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mrs. W. F. Wright and son, Toronto are visiting friends in town.

—Mr. Fred. Lackie, who has been visiting his friend, Mr. C. J. Cavanagh, left for his Toronto home last evening.

—Mr. J. T. Anderson, Toronto, has accepted a position on The Times' staff as city editor.

—Mr. D. Dreeze's condition does not improve, and his recovery, we are sorry to say is considered doubtful.

—Mr. W. H. Hill is able to be at his office once more, after a severe attack of la grippe.

—Mr. A. M. Meredith, ruler in The Times bindery, left for Toronto last night being summoned on account of the death of his mother, who has been ill, for some time.

Anecdotal.

Baroness de B., one of the most popular of French hostesses, who, besides being a very pretty woman, is remarkably slight and graceful, was asked, a few days ago, why she invariably engaged such enormously stout servants. Her answer was characteristic: "To prevent them wearing my clothes when I am away from home."

An amusing story is told of Emperor William and Richard Strauss, the composer. One day recently, when at the opera, the Kaiser said that he liked the simple old operas better than the modern complicated ones, and, turning to Strauss, he asked him his opinion. Strauss took the liberty of disagreeing with his Majesty, who, turning in comic despair to those around him, said: "Now see what an adder I have been nurturing in my bosom!" Since then Strauss is called the "Imperial bosom adder."

The Dowager Czarina is a great favorite in Russia. Among other stories illustrating her character is this: She saw on her husband's table a document regarding a political prisoner. On the margin Alexander III. had written, "Pardon impossible; to be sent to Siberia." The Czarina took up the pen and, striking out the semi-colon after "impossible," put it before the word. Then the endorsement read: "Pardon; impossible to be sent to Siberia." The Czar let it stand.

Some years ago there was an agitation on the part of the undergraduates at one of the Cambridge colleges to effect a change in the color of the gowns (blue), which were not altogether to their liking. An appeal was made to the master, who listened attentively to the arguments of the deputation, and then replied: "Quite so, gentlemen quite so; but we must not be too hasty in these matters. Time is required; so we will change the gown by degrees." A capital play on words, as the bachelor's gown is always black.

Menotti Garibaldi, who died the other day, resembled his illustrious father in everything—in physiognomy, build and constitution. He had also the same moral attributes, the same simplicity frugality, modesty and love for the most humble poor. In his family he was all peace and work. Englishmen have reason to regret his loss, for during the Boer War he was one of the few Italians who did not insult and jeer at England. He nobly restrained Garibaldians from joining the Boers. "No Garibaldien," he said, at the time, "shall ever take up arms against England!" The funeral was very imposing.

Dr. Alfred Wallace, the octogenarian scientist, lived in his youth in the Moluccas. One of his neighbors in those remote islands was an old sailor, and of this aged man Dr. Wallace sometimes tells an old story. In a certain port the sailor had been once invited to a dance. He accepted the invitation, and all through the evening he bounded in a hearty and uncouth manner through dances of every kind. But he wore no gloves, and hence, the climate being tropical, his large, moist hands left stains on the white raiment of the women. One, a little vexed, thought she would take him to task for this. "Don't you think, dancing so much, you ought to wear gloves?" she said. "Oh, that's all right," he answered. "I'll wash my hands when I'm through."

He—So the engagement is broken off?

She—Yes. He told her he thought she should stop reading novels and read something more substantial, something that would improve her.

He—Well?

She—Well, the idea of a man intimating to his fiancee that she could be improved in any way!—Philadelphia Press.

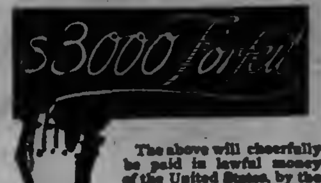
EVERYBODY READS THE TIMES.



The above will cheerfully be paid in lawful money of the United States, by the undersigned, proprietors of Dr. Pierce's Golden Medical Discovery, if they cannot show the original signature of the individual volunteering the testimonial below, and also of every testimonial among the thousands which they are constantly publishing attesting the superior curative properties of their several medicines, and thus proving the genuineness and reliability of all the multitude of testimonials volunteered by grateful people, in their behalf.

WORLD'S DISPENSARY MEDICAL ASSOCIATION, Proprietors, Buffalo, N. Y.

THE REASON.—There is no medicine equal to Dr. Pierce's Golden Medical Discovery, for purifying the blood. It carries off the poisons which contaminate the life fluid. It increases the activity of the blood-making glands and gives the body an increased supply of pure, body-building blood. It builds up the body with sound, healthy flesh instead of flabby fat, promotes the appetite, feeds the nerves, and so gives to weak, nervous people vitality and vigor.

"About a year ago I had a very bad cough and feared it would run into consumption," writes Hon. Geo. W. Lynch, of 27 Mason Street, Worcester, Mass. "When a severe attack of coughing would come on vomiting would set in. Matter accumulated in nose and my tonsils were irritated. After reading of the wonderful cures resulting from Dr. Pierce's Golden Medical Discovery began to use it, with some doubts as to the good it would do me, I am frank to say. But, after I had used one bottle I noticed quite a change for the better. Ordered five more bottles and before I had used them all the cure was complete. There is not now a trace of cough or cold in my system and my health is perfect."

To gain knowledge of your own body—in sickness and health—send for the People's Common Sense Medical Adviser. A book of 1008 pages. Send 31 cents in stamps for paper-covered, or, 50 stamps for cloth-bound copy. Address Dr. R. V. Pierce, 663 Main Street, Buffalo, N. Y.

RUSSIA WANTS POWERS TO INTERVENE.

London, Feb. 9—The Japanese Minister Baron Hayashi, said this afternoon:—

"Russia is making desperate efforts through the various embassies, to have the powers intervene. Russia now is willing to concede everything, but the offer comes too late."

Baron Hayashi added: "I learn on good authority that the reply Russia intended to send merely reiterated all the cardinal points to which Japan had consistently objected."

INTEGRITY OF CHINA MUST BE RECOGNIZED

Washington, Feb. 9—Secretary of State Hay, has addressed an identical note to a number of European powers to ascertain if they are willing to join in a note to Russia and Japan that during hostilities and thereafter the neutrality and integrity of China must be recognized. Details of the note are not obtainable in advance of the receipt of the replies.

CENTRAL CHARITY BOARD

Ald. H. Rush is Elected Chairman of the Board for 1904

A meeting of the Central Charity Board was held Monday evening, when there were present, Messrs. W. Yelland, acting chairman; Rev. Father McCall, W. Fowler, W. Kemp, J. Batten and F. W. Miller.

The minutes of the previous meeting were read and confirmed.

The election of officers resulted as follows:

Chairman—H. Rush.
Vice-Chairman—J. J. McBain.
Treasurer—W. Yelland.
Secretary—S. R. Armstrong.

It was moved and seconded that $25 be granted to the secretary for his services during the past year.—Carried.

Mr. Miller reported several new cases requiring assistance.

The Board adjourned until Monday February 22nd, at 7.45 o'clock.

SERIOUS DISADVANTAGE TO RUSSIA AT THE OUTSET

It's a Staggering Blow to Russia Is the Opinion of British Experts

St. Petersburg, Feb. 9—An official despatch received here says that Japanese torpedo boats have attacked the Russian squadron in the outer roads at Port Arthur, and that three Russian ships were damaged.

Admiral Alexieff's official report of the attack by the Japanese is as follows—

"I most respectfully inform your Majesty that at or about midnight of February 8-9, Japanese torpedo boats made a sudden attack, by means of mines upon the Russian squadron in the outer roads of the fortress of Port Arthur, in which the battleships Retvigan and Czarevitch and the cruiser Pallada were damaged. An inspection is being made to ascertain the character of the damage. Details are following for your Majesty."

Port Arthur, Feb. 9— Japanese torpedo boats attacked the Russian fleet here during the night and three of the Russian ships were badly damaged. The Japanese, who thus scored the first success of the war, escaped undamaged.

In consequence of the attack by the Japanese torpedo boats, martial law has been proclaimed here.

Berlin, Feb. 9—A special telegram from St. Petersburg says three Russian ships at Port Arthur were severely damaged last night by torpedoes discharged from Japanese torpedo boats while the latter were passing the harbor. Subsequently a large fleet of Japanese battleships and cruisers appeared before the port.

Berlin, Feb. 9—The comment at the Marine Department on the success of Japan's first blow at Port Arthur was that even the temporary disablement of three warships placed the Russians at a great disadvantage in the future operations. It was added that the torpedoing of the enemy's vessels lying under powerful land batteries must have been carried out daringly and skilfully. As Viceroy Alexieff did not mention any Japanese losses in his first despatch the common talk of the naval officers was that the Japanese have shown that they can handle their ships better than the Russians.

London, Feb. 9—The naval men in London regarded the result of Japan's first attack with torpedo boats on the Russian fleet off Port Arthur as being a staggering one. They pointed out that Viceroy Alexieff's reference to "mines" obviously meant "torpedoes," and said that if the Russian vessels had been struck by Whitehead torpedoes they probably have been sunk or are resting on the mud in Port Arthur, in any case, hopelessly out of action for a considerable time.

Paris, Feb. 9— The news of the result of the Japanese attack with torpedo boats on the Russian fleet off Port Arthur created consternation here. The advices received by officials of the foreign Office were similar to those of the St. Petersburg Official Gazette, showing that two Russian battleships and one cruiser were damaged, and also showing that four torpedo boats had made the attack.

An official of the Foreign Office said: "It is to be profoundly regretted that such a decisive step has been taken, as it terminates the efforts the powers might have made to avert actual warfare."

London, Feb. 9—A Japanese exporter has received information that Russian warships have captured the Japanese steamer Inaba Maru near Hong Kong. The steamer was bound from London to Yokohama with mails and merchandise.

Paris, Feb. 9, 1.55 p.m.—It was announced at the French Foreign Office this afternoon that the Russian cruiser Pallada was sunk in the torpedo attack made by the Japanese on the Russian fleet off Port Arthur. The injuries sustained by the Retvisan and Tsarovitch are not known.

It was reported on the same authority that the cable from Vladivostock had been cut.

JAPAN'S PLANS.

Night Torpedo Boat Attacks Are to Be Kept Up.

London, Feb. 9— The Japanese Minister, Baron Hayashi, says the Japanese fleet is not likely to blockade Port Arthur. His knowledge of the Japanese naval plans, as tentatively prepared, leads him and others here to believe that the Japanese fleet is now lying between Che-Fu and the Yalu River, screening the landing of troops, one army corps at Fusan and two at Pen-Yang, Korea.

Night torpedo attacks on the part of the Japanese fleet will, it is believed, be kept up as long as the Russian fleet maintains its necessary open position outside of Port Arthur. This will be done in the hope of breaking up the Russians' nerve.

The troops landing at Pen-Yang will be pushed toward the Manchurian frontier. Those at Fusan will proceed to Seoul. Unless Viceroy Alexieff assumes the aggressive no serious battle is expected until the disembarkation of the Japanese troops is completed.

RUSSIA FEELS BITTER.

At the Action of the Japs in Striking Hurriedly.

St. Petersburg, Feb. 9 — The news that Japan has duplicated her tactics at the opening of the Chino-Japanese war by a torpedo attack on the Russian ships off Port Arthur created intense excitement. The bare announcement arrived from Viceroy Alexieff at 9 o'clock this morning, and dispelled lingering hopes that war could be averted.

The Czar and his Ministers immediately accepted the gage and prepared to face the reality of war. His Majesty's manifesto declaring a state of war to exist is expected to be issued to-morrow.

Feverish activity reigned at all the Ministries, and war preparations were pushed in all directions.

The Russian Red Cross already has sent 2,000 beds to the Far East, and Sisters of Mercy are leaving. Crowds of volunteers besieged the general staff offices.

The naval reserves have been called out.

The action of the Japanese in attacking the Russian fleet without a declaration of war is denounced as an outrage by the Russians generally, and the result, instead of discouraging them, seems to have been to furnish the spark necessary to fire Russian patriotism. The country is aroused.

JAPANESE WANTED TO LEAVE PORT ARTHUR.

Alexieff Tried to Re-assure them and Promised Protection for Their Families.

Chefoo, Feb. 9 —The Japanese residents are leaving Port Arthur. On Monday a steamer took one hundred and proceeded to Dalny, thence to Japan. Others are going to China.

Admiral Alexieff tried to reassure them, and promised protection to their families.

Russian officers and foreign merchants are leaving here in fear that the Chinese will rise.

War correspondents will use despatch boats.

LATE WAR NEWS

TIMES SPECIAL—3. A.M.

ADDITIONAL NEWS OF DEFEAT OF RUSSIA'S FLEET

The Account of the Naval Engagement Between the Two Fleets in the Harbor

Chefoo, Feb. 10—3 a.m.—Str. Columbia has arrived at Port Arthur with additional news of the attack by the Japanese fleet upon the Russian fleet in the roads outside the harbor of Port Arthur.

The Columbia was in the roads and felt the first shock of the torpedo explosion at 11 o'clock Monday night.

The attack continued all night and at daylight Tuesday morning, two Russian battleships and one first-class Russian cruiser were seen to have been disabled and beached at the head of the harbor. The cruiser was badly listed. The Russians left one cruiser outside to watch for the Japanese ships.

This cruiser was fired upon by the Japanese, and the other Russian vessels took up their anchors and cruised around the Roads' Lead.

The Japanese fleet came up within 3 miles and the battle commenced.

The Japanese fired on the Russian ships with the result that they were struck by shells but only slightly damaged.

The Russian fire fell short.

The Columbia steamed away while the battle was in progress, but later saw the Russian fleet leave.

The two battleships disabled are the Totabo and the Czaritch.

The disabled armoured cruiser Boiarin, and the grounded battleship blocked the entrance to the harbor, preventing gunboats from getting out and battleships and cruisers from going in to get coal.

Besides this, Japan has the Russian gunboats Voraig and Koiatz caught at Chemulpo. They were bound for Vladivostock.

RUSSIAN LOSSES

Officers wounded	2
Men killed	9
Men wounded	41

On the shore battery one man was killed and three wounded.

JAPANESE LOSSES.

None reported.

GRAND CONCERT AT ALL SAINTS LAST NIGHT

The concert at All Saints' last evening under the auspices of the Ladies' Auxiliary, passed off successfully both in point of merit and the number in attendance. The first number on the programme was a piano duet by Miss Ida Mulholland and Miss Bulien, the organist of the choir, the former taking the leading part. For an encore they played "The Gypsy's Dance." The playing was rendered with a brilliancy that bespeaks a bright future for the young artistes. Mr. Joseph Legg, one of Peterborough's favorites, also received an encore in his vocal solo. The principal feature of the evening, however, was the vocal duet by Mr. and Mrs. Firth, of Toronto, in their rendition of "Life's Dream is Over;" his rich tenor voice blending harmoniously with her sweet contralto. She also sang for an encore a plantation lullaby entitled "Kentucky Babe," in a characteristic and charming manner. His solos were "By Your Side," and "Message of the Violet." Their songs were greeted with applause and encores. The church's orchestra did much to enhance the enjoyment of the evening. Mention should also be made of the accompanists—Miss Bulien and Miss Bell—who performed their parts artistically. Mr. Maughan, one of the Church Wardens, presided as chairman in a creditable manner. The last, but not least, part of the programme, was the winding up with a sumptuous oyster supper, which was duly appreciated.

Beautiful Pictures

Beside their intrinsic value, pictures have an important part in any scheme of interior decoration. In fact, a room that is lacking in pictures or contains them in injudicious arrangement, though [illegible] [illegible]. An instructive article on the selection and arrangement of pictures is contributed to the March Delineator by Alice M. Kellogg. Among many practical recommendations are the following, which householders will do well to keep in mind;

Dark corners of rooms may be perceptibly lightened by the introduction of pictures in vivid colors. Large pictures exact distance to appear to advantage. Small pictures distributed at intervals upon a wall lack the style that they give when grouped more closely together. Portraits of celebrated authors when placed near their works and pictures of composers when hung near musical instruments acquire additional interest. In regard to height a good general rule is to bring the centre of the picture within the eye range of a range of a person of ordinary height. A common mistake is to bring into juxtaposition pictures with dark and light mats.

Lumber Camps Closing Down

Lindsay Post:—The snow in some parts of the north country has attained a depth which renders it difficult to conduct lumbering operations at a profit, and if a thaw does not soon set in a number of firms will have to close down. Mr. John Carew has already been compelled to order the closing of one of his camps, situated near Haliburton and employing about 50 men. Part of the gang reached town Thursday morning at 1 o'clock, on the released Klondike train, and the others, with the surplus supplies, etc., are expected today if the regular train forces a passage. The cut in Mr. Carew's Cavendish township limits is also being seriously retarded by an excess of "the beautiful," the cut logs being buried out of sight and the men being obliged to work in snow that is waist deep. If more fails perfect in all other details, produces a before a thaw comes these camps will have to close down also.

$1,000 TO LEARN NAME

Illinois Farmer Rewards Man Who has the Secret of his Birth

Laporte, Ind., February 10.—One thousand dollars is the reward for learning his real name given by Henry Osborne, formerly known as Henry Cherry, a wealthy farmer of Ogden, Ill. Tiffany Bowlea, of Byron, O. T., was the lucky man who had the information. Forty years ago Mr. Osborne was taken from his mother, a poor widow, and adopted by a man named Cherry. Mrs. Osborne had requested of the adopted parents never to tell her son his name.

WILL FURNISH CUTICLE

Former Iowa Subject of Skin Grafting at Los Angeles

Los Angeles, Cal., February 10.—An extensive skin grafting operation is now in progress at the Emergency Hospital. January 26 C. M. Schinaler, formerly of Des Moines, Iowa, was horribly burned. The cuticle is entirely missing from an area of three and a half square feet of his body. Two hundred persons will furnish the cuticle needed for grafting. The Modern Woodmen of America have undertaken the work of supplying the men from whom the skin may be taken.

PREPARES FOR WAR ON UNION

Illinois Steel Co. Making Ready to House its Workers

Joliet, Ill., February 10.—The Illinois Steel Company has purchased 100 cots and bedding and has placed them in one of the structures inside the gates. A cooking outfit also has been installed and the company apparently is preparing to resist the demands of the union bricklayers. The reduction in the wages of the bricklayers from 50 cents per hour to 37 1-2 cents per hour has caused all the union men to quit at the mills and the committee that waited on the managers were unable to secure any concessions. The company, it is believed will bring in nonunion bricklayers from outside points.

HALF A MILLION LOSS.

TWO CANADIAN COMPANIES SUFFER FROM FIRE

Western Assurance and British American Largely Interested in the Conflagration at Baltimore—Mr. Kenny's Statement

Rather heavy losses will be suffered by two Canadian insurance companies as a result of the conflagration in Baltimore. Mr. J. J. Kenny, Vice-President and Managing Director of the Western Assurance Company, which held a large interest in the burned district, speaking to a press representative, he stated that his advices were to the effect that the total losses by the conflagration would be about $50,000,000, and this would be pretty fully covered by insurance. The two Canadian companies having risks there were the Western Assurance and the British America. The net loss to the former, Mr. Kenny estimated, would be $250,000, and the net loss to the British America $210,000. This estimate of losses was considered complete up to 6 o'clock last evening. The Western Assurance has been doing business in Baltimore since 1874, and heretofore Baltimore has proved a very profitable agency. Some of the most valuable buildings in the city were within the burned zone, including many of the best banking, insurance and trust companies offices.

—Mr. J. McLellan, representing a Toronto Gents' furnishing firm met with a painful accident while skating at Stirling recently. He suddenly tripped and fell, receiving a bad gash over the eye, and he is now under medical care at Belleville.

JAPAN'S LAST GREAT STRUGGLE AND TRIUMPH

How the Little Empire Conquered China Without a Single Set-Back

JAPANESE SWEPT THROUGH ALL BEFORE THEM

Fighting Began Before War's Declaration---Japanese Soldiers are the Best in the World

The last great war in which Japan was engaged was that with China in 1894-5. This also was over Korea. When the Koreans split into Chinese and Japanese factions and appealed to each power for aid, China sent troops to quell the riots. Japan protested that this was a violation of the treaty of 1876, and landed 5,000 men on the west coast on the pretext of escorting the Japanese Minister in safety from the country. The army, having seized strategical positions, the Mikado's ambassador, Mr. Otori, made a demand for five immediate reforms in Korean affairs. China demanded the withdrawal of the Japanese troops, invoked in vain the aid of Russia, but secured an appeal by the European representatives for mutual concessions. Then the Japanese seized the Korean King July 23, and compelled him to appoint Tai Wen Kun as regent.

* * *

FIGHTING BEFORE WAR'S DECLARATION

Hostilities began with a naval engagement in Prince Jerome Gulf on July 25 and a sea battle between cruisers, on the same day off Tontao Island. In each case the Japanese were victorious. The formal declaration of war was made August 1, and by the 26th of the same month Mr. Otori had concluded a treaty of alliance between Japan and the Korean Government. Then the "yellow war" began in good earnest on land. Its whole burden fell on Li Hung Chang, the Viceroy of China. His army was not one-quarter the strength of the Japanese. Deficient and antiquated in equipment, with poltroons for commanders, the land forces were on a par with the navy, crippled by the resignation of all the English engineers (in accordance with neutrality proclamations), and commanded by cowardly Mandarins.

* * *

JAPANESE SWEPT ALL BEFORE THEM.

Under Field Marshal Count Yamagata, the Japanese soon landed 10,000 troops at Fusan, 3,000 at Gensan, and 20,000 at Chemulpo. To oppose these some 20,000 Chinese troops were concentrated at Wiju, whence, with some reinforcements, they were marched one hundred miles southward to confront the victorious Japanese at Ping Yang. In this vicinity strategic movements and skirmishes occurred for some time, generally resulting in favor of the Japanese. The Japanese commanders were graduates of the first military schools of Germany, the soldiers armed with modern rifles, and the entire army drilled in European methods.

* * *

CHINESE SLAUGHTERED BY THOUSANDS.

Six weeks after the declaration of war came the first great land battle of the campaign. On September 16, the Japanese attacking the Chinese lines at Ping Yang in front, at the same moment that a second column came into action on the flanks and rear, routed their opponents with terrific slaughter. The Chinese loss was over 16,000 killed, as against the Japanese casualty list of thirty killed and 270 wounded. Four Chinese generals, many thousand rifles, immense military stores, and [illegible] of the [illegible] fell into the victors' hands. Disaster on sea followed the next day, and at the sea fight of the Yalu River the Chinese navy was almost entirely destroyed or captured.

* * *

THE CAMPAIGN IN MANCHURIA.

After the capture of Ping Yang and the whole of the Chinese invading force the Japanese marched to invade Manchuria. Victorious at Wiju, and carrying Hu-Shan by vigorous assault on October 25, the Japanese columns marched through Manchuria, and proceeded to invest Port Arthur. Here the demoralized remnants of the Chinese army made a desperate stand, until, panic stricken by repeated assaults, and deserted by their commanders, they fled in disorder, and Port Arthur fell on November 22 into the hands of the Japanese with eighty guns and immense stores. With the fall of Port Arthur, the reserves of Japan were called to the colors and a second army mobilized and landed on the Chinese coast near Kiau-Chow, in the Gulf of Liao.

* * *

STUBBORNLY CONTESTED BATTLE.

Marching through Manchuria in the direction of Niu-Chang, though retarded by the severe cold, the Japanese fought at Kung-Wa-Sai on December 19, the most stubbornly contested battle of the war. Four charges were necessary to carry on the war. Four charges were necessary to carry the Chinese works, and these cost the Japanese 450 men. The victors advanced to Chung-Su, and occupied a position of great strategic value, preparatory to a march on Pekin in the spring. On February 16 the naval station of Wei-Hai-Wei fell into the invaders hands, and China hurried a peace embassy to Tokio to beg for terms.

* * *

PEACE WHICH WAS NO PEACE.

By the Treaty of Shimonoseki, signed April 17, 1895, and ratified at Che-Foo May 8, the independence of Korea was proclaimed and declared, and the southern portion of the Chinese Province of Feng-Tien, being the part of Manchuria occupied in the war, was ceded to Japan with a war indemnity equal to $150,000,000 in Canadian money. Formosa was also ceded to Japan. At the request of Russia, and in consideration of an increase in the war indemnity, Port Arthur was evacuated by Japan only to fall into Russia's hands, and form a base for the Muscovite advance which seeks to deprive Japan of all she won in 1895. The recent aggression of Russia is fresh in the public mind, and need not be recounted here.

London, Feb. 9— I understand that several of Gerald Balfour's colleagues think his statement in the Commons last night went further in the free trade direction than they desired, and they may repudiate it in the course of the debate.

Mr. Chamberlain is so deeply affected by the sudden death of a staunch supporter, Powell Williams, M.P. for South Birmingham, that he declared he will take no further part in the C[illegible] [illegible]

Local Sports

The manager of the "Examiner" hockey team accedes to the request of the "Review" team for a second game, only on certain conditions, the first being that the victorious seven claim the championship of the season. The boys of the "Times" have apparently not been consulted in this matter, but they would like to arrange for a match with either of the above press teams, for the near future.

The Lindsay Post regrets that the P. A. A. hockey team is so diligent about paying its town a visit, but no doubt Secretary Menzies will soon arrange for a meeting.

The Y.M.C.A. hockey team has been challenged by the Forwards to play a match on the former's rink at as early a date as is convenient.

WEATHER NOTES

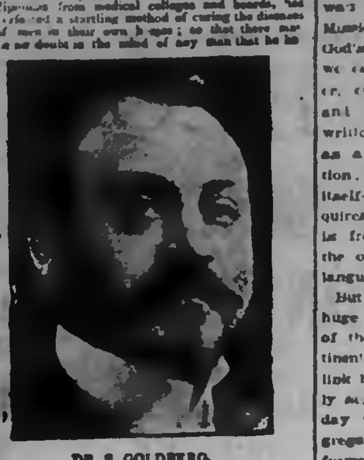
CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has



DR. S. GOLDBERG,
The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room [illegible] Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

The Morning Times paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at [illegible] per month, and to outside points at [illegible] per year strictly in advance.

PETERBOROUGH, FEBRUARY 10, 1904

UNIVERSAL BIBLE SUNDAY

The arrangements for the observance of Bible Sunday on March 6th—the last day of the British and Foreign Bible Society's century—are now practically complete; and in nothing is the universality of the Bible Society more emphasized than in the remarkable way it has been able to enlist the sympathies of all Protestant Churches in the organization of this world-wide Thanksgiving.

Considering the controversial trend of the times, it would have been sufficiently noteworthy to arouse comment had the united demonstration been limited to the various Christian Communions in our own land. But its unique feature is the drawing together of the Churches of other lands, no less than those of our own, in one great celebration, all minor differences of race, language and sect being submerged in the great bond of our common heritage—the Charter of Salvation as contained in the Word of God.

In England, their Majesties, King Edward VII. and Queen Alexandra will be present at Divine Service at St. Paul's Cathedral on Bible Sunday, when the Lord Mayor, the Sheriffs and the Corporation will attend in State. The sermon will be preached by the Archbishop of Canterbury.

Among the earliest to endorse the suggestion that March 6th should be observed as Bible Sunday were the Archbishops of Canterbury and York; while the Bishops have, with hardly an exception, written letters commending it to the clergy in their respective dioceses. Cordial resolutions in favor of the observance have also been received from every Nonconformist Assembly and Conference which met last year, including the Baptists, the Congregationalists, the Society of Friends, all denominations of Methodists, the Moravians, and the Presbyterians. In Scotland, both the Established Church and the United Free Church are co-operating in the celebration.

In the British Colonies the idea was greeted with universal approval. The Metropolitan of Rupert's Land and Primate of all Canada, the Archbishop of Sydney, the Archbishop of the West Indies, and the Archbishop of Cape Town, and nearly fifty Colonial and Missionary Bishops of the Anglican Communion, have written cordially endorsing the observance of Bible Sunday. The chief representatives of non-Episcopal Churches in the Colonies have responded with equal readiness, and the proposal has received the hearty sanction of the Synod of the Dutch Reformed Church in South Africa.

In the United States of America, both the chief Presbyterian Churches, the two Methodist Episcopal Churches, and the presiding Bishop of the Protestant Episcopal Church have cordially agreed to observe Bible Sunday in their various Churches throughout the States.

All the great Missionary Societies, without exception, have joined hands to observe this day of common Thanksgiving, many of them having generously arranged to forego their own sermons or meetings on March 6th, in favor of Bible Sunday. That the suggestion would meet with enthusiastic support in the Mission-field throughout the world was a foregone conclusion. Both to Missionary and to the Native Church, God's Book often stands for more than we can possibly realise. To the preacher, cut off from most that is helpful and invigorating in Christian life, the written Word takes on an added worth as a source of strength and inspiration, while to the converts, the Book itself—ever apart from its message—acquires a preciousness from the fact it is frequently the first, and sometimes the only volume produced in their own language.

But the most significant item in this huge program is the bringing into line of the Protestant Churches on the Continent of Europe, and establishing a link between those that may be most widely sundered on minor points. Bible Sunday will be kept by hundreds of congregations, representing Lutheran, Reformed and Waldensian Churches. The Archbishop of Upsala has written, in the name of the Bishops of Sweden, promising the co-operation of all their clergy. A meeting of the Danish Bishops in Copenhagen passed a unanimous resolution in the same terms; while similar resolutions have been passed by the Consistory of the Protestant State Church in Saxony, and the Conventus of both the Lutheran Church and the Calvinistic Church in Hungary. Thus, throughout the world, Thanksgiving will be made to Almighty God in all tongues and by all peoples on this memorable day.

It is obvious that such a festival as this could only be organized by an institution absolutely catholic in its aims, world-wide in its work, and unrestricted by any merely national interest. From the very outset the Bible Society has been able to unify Christians of all denominations in the God-appointed task of seeking to place the Gospel in the hands of the whole human race. And this Universal Thanksgiving exemplifies most forcibly one of the Society's ideals which was voiced by Lord Bexley, its second President, in the following words: "If we cannot reconcile all opinions, let us unite all hearts."

CONSUMPTION AND FRESH AIR

It begins to look as if consumption had had its day. Without waiting to note what effects X-rays or any of the new forms of light may have upon destroying it, it is evident that the most serious scourge of our northern latitude is always more or less under the control of physicians. In New England, where the registration has been fairly accurate, the decrease of the death rate from this disease has been 50 per cent. in the last half century, the rate of decrease being far more rapid in recent years. The reports from New York are to the same effect. Where blocks or houses were formerly infected with tuberculosis conditions are so changed that the city has been able to reduce its death rate from this disease nearly one-half in the last twenty years.

Strange to say, cold outside air, once thought to be so pernicious to consumptives, is now regarded as one of the best remedies. The treatment is heroic, but it works for an appetite, and this, coupled with nourishing food, is sure to make good blood, which is exactly what the patient wants. In fact, cold air seems to be a popular remedy just now for many ills. (Not far from Wesley College Chicago, is a hospital for crippled and otherwise deformed children. These children are living in a barn-like shack, and while protected from draughts they are allowed free exposure, especially at night, to plenty of pure, cold air. The experiment is novel, but so far the improvement in the anaemic children has been marked.

It may be that civilization will have to take a step or two backward in order to advance in the right direction; that some of the luxuries now enjoyed by the rich are not so desirable after all, and that health and the happiness which comes from health are to be bought more easily than most of us dream.

SCHOOL ROUTINE

An idea which seems to be in the crystallization process, is that our present Ontario system of school routine leaves a good deal to be desired. In Toronto the other day a meeting was held at the instance of the Hon. Richard Harcourt, Minister of Education, at which members of the Provincial Board of Health and others interested in education and sanitary matters were present. Several suggestions were made for the better prevention of outbreaks and of infectious diseases in schools, and for the general physical improvement of the pupils. Dr. Sheard, Toronto Medical Health Officer, advocated, among other things, shorter school hours, longer vacations, and, what we believe will meet with the approval of the scholars themselves and of a majority of their parents the abolition of home work. The acquisition of knowledge is important, but most thinking people will agree that of more primary importance still is the gaining and retention by a child of a sound body. By a scholar of quick mind the extra work can scarcely be required, while, as the doctor observes, the system of night work makes a dull child duller. Then, too, even though the time required for the evening home task be actually short, it is apt to weigh upon a scholar's spirits. Released from school in the afternoon, he should be able to realize that labor is over for that day, and it will then be resumed in the morning with all the greater zest.

Kidney Diseases

Every Year Thousands Suffer and Die from Kidney Disease, That Never Knew the Exact Nature of their ailment.

Among the Most Easily Noted Symptoms are Pain in the Back, Frequent Desire to Urinate, Constant Headache Sleeplessness, and Nervousness.

When these signals of danger are unheeded, and proper precaution is not taken to avert more serious results, the very worst form of kidney trouble will develop, namely, Bright's Disease, which is almost incurable.

To obtain quick relief and a sure cure you must at once commence to take Ferrozone. It is a treatment for kidney and bladder troubles of undoubted merit and is prescribed now by all doctors and physicians who are abreast of their profession. Hospitals, Sanitariums, and all public health institutions rely on Ferrozone in all derangements of the kidneys, and claim that it affects more cures of chronic cases than any other remedy.

The action of Ferrozone is very mild and efficient and can be depended upon to give satisfactory results in every case. It brings about a healthy condition of all the organs of the body, causes the kidneys to eliminate all poisonous products and wastes of the body. It purifies and enriches the blood, reconstructs wasted tissues, excites healthy appetite and promotes good digestion. By the regular use of Ferrozone nutrition is improved, and strength to ward off disease is established and maintained.

No remedy for the alleviation and cure of kidney disease can possibly equal or surpass Ferrozone. This fact is conceded by all those who have used it, and a trial will convince you of its merits. Don't be misled into accepting a cheap, unworthy substitute, but insist on having the genuine Ferrozone. It is the very best that money, brains, skill and scientific research can produce, and that is the sort of remedy you want. Price 50c per box, or three boxes for $1.25, at druggists, or N. C. Polson & Co.,

Advertise in the Times

Business success very seldom comes without an effort. It's something like cutting an end off a steel rail. One man holds the chisel, another man hits it with a sledge, and you can scarcely discern that the surface has even been marked. But they work right around the rail while you look on and think how slow and foolish they are. After they have gone clear around, they place the rail just right and strike it one or two blows with the sledge, when the end drops off almost as clean as if it had been sawed. The public is your steel rail. Your advertising is your chisel. The way you write your ads is your sledge. The frequency with which you make your ads new and bright is the particular spot you are marking. After a time you will make one telling stroke, and the business battle for you will be won. And all that remains is to continue doing the same thing over and over again, only more so.

Tacoma, Wash., February 10.—In a telegram from Chicago George W. Dickinson, formerly general manager of the Northern Pacific, states that six moneyed men of Chicago yesterday signed papers by which they agreed to advance the money for building the Alaska Central Railroad from Seward, on Resurrection Bay, to Atwood, on Tanana River, a distance of 418 miles. The money has been banked for building the first section to Lake Kenai this year. Dowdell & Co., of Chicago, have taken the contract to build the line. Orders have been placed for rails, locomotives and cars with which to commence construction. Resurrection Bay was chosen as the southern terminus because it is open to navigation the year around.

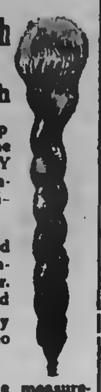
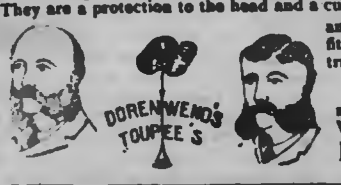
WILL BE AT
Oriental Hotel, on Thursday, February 18th



LADIES If you appreciate the added charm and the younger appearance lent to the face by having beautiful hair, do not fail to see the grand assortment of SWITCHES, BANGS, POMPADOURS, WAVY FRONTS and WIGS, which Prof. Dorenwend will have with him. Consultation entirely free, and demonstrations given regarding these beautiful conceptions in natural hair.

GENTLEMEN WHO ARE BALD—Even though you are bald or partially so you can regain your former appearance by wearing Dorenwend's Wigs and Toupees. They are made to match any shade of hair. They are a protection to the head and a cure for chronic cold in the head and catarrh. They are perfectly fitted to the head and bear no trace of artificiality.



Prof. Dorenwend will take measurements and demonstrate the merits of his Wigs.

Don't forget the day and date

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 15th from 5 cents to 10 cents per share. This company owns 5 claims, 600 x 1500 each. A 70 foot shaft on the Martha claim shows a vein of $30.52 ore 5 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $30.52 to $12,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay them $240 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address.

PULLING UP STAKES
IN PETERBOROUGH

No Matter When or Where You See a Bargain, There's a Better One For You At

GOUGH BROS.
GOOD-BYE SALE

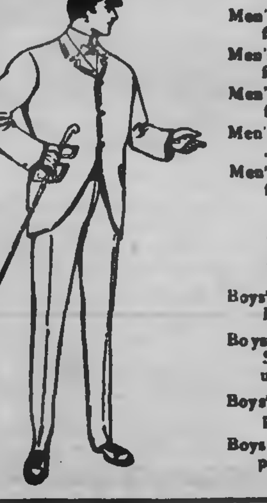
The second week adds to the intense interest of this sale. Its an occasion that warrants unbridled enthusiasm. Nothing can stop its progress.

Do you know how we're fixed? $68,000 worth of Suits, Overcoats, Furs, Boots, Shoes, Hats, Caps and Furnishings, must be slashed to pieces to bring down the stock. Are you thinking? Can't you see what this means? Can't you see that we must sell at a heavy loss in order to pull up stakes in time to let in the new firm.

WILL ANYBODY KINDLY RISE IN THE MEETING and say that Gough Bros. ever was or ever will be undersold. The fears of competitors and the frantic efforts of their bosses, cut no figure with us. No cast-iron "transformation" sale bulletin of reduced prices can side-track GOUGH'S GOOD-BYE SALE. We stand by the town and will issue new lists of cut prices every week that must beat the best markings of any other dealer by 25 per cent.

If anybody offers to sell Men's Overcoats and Suits worth $10 for $6.98, down goes Gough's prices to $5.98.
If anybody offers to sell Boys' Suits and Overcoats worth $6.00 for $4.48, down goes Gough's prices to $3.48.
If anybody offers to sell $3.00 Trousers for $2.48, down goes Gough's prices to $1.98. And so on all through the gamut.

Don't you see the logic in our slashing—we're pulling up stakes in Peterborough—necessity knows no law—the stock can't be moved or kept for another season.



MEN'S SUIT SLAUGHTER

Men's Black and Blue Worsted Serge Suits, Regular $10.00, for	$5 75
Men's Black and Blue Worsted Serge Suits, Regular $8.00, for	$4.50

Drs. KENNEDY & KERGAN

The Leading Specialists of America. 25 Years in Detroit. Bank Security.

Nine out of every ten men have been guilty of transgression against nature in their youth. Nature never excuses, no matter how young, thoughtless or ignorant he may be. The punishment and suffering corresponds with the crime. The only escape from its ruinous results is proper scientific treatment to counteract its effects. The DRAINS, either by nightly losses, or secretly through the urine, must be stopped—the NERVES must be built up and invigorated, the blood must be purified, the SEXUAL ORGANS must be vitalized and developed, the BRAIN must be nourished. Our New Method Treatment provides all these requirements. Under its influence the brain becomes active, the blood purified so that all pimples, blotches and ulcers disappear; the nerves become strong as steel, so that nervousness, bashfulness and despondency disappear; the eyes become bright, the face full and clear, energy returns to the body, and the moral, physical and sexual systems are invigorated; all drains cease—no more vital waste from the system. The various organs become natural and manly. We invite all the afflicted to call and consult us confidentially and free of charge. **Cures Guaranteed or no Pay. We treat and cure: Varicocele, Blood Diseases, Stricture, Gleet, Emissions, Urinary Drains, Spermatorrhoea, Unnatural Discharges, Kidney and Bladder Diseases.**

CONSULTATION FREE. BOOKS FREE.

If unable to call, write for a QUESTION BLANK for Home Treatment.

60 CENTS PER SHARE FOR 60 DAYS ONLY

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,

DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O.

The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)

Wholesale and Retail Dealers in General Merchandise,

KROHN BROS, Cincinnati, O. Prescott, Ariz., July 29th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Prest.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-30-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

ROBERT HARRISON

Manager.

An Election Tale

PHILIP MERTON was a young man entirely without private means or family influence, who was therefore dependent upon his own unaided efforts for making his way in the world. Fortunately for him, however, he was well endowed with brains, not overburdened with principles, had a plausible tongue, an engaging presence, and the gift of being able to make himself at home in any company.

He had been educated for the bar; but he had created some stir by a slashing article upon protection, written for the "Daily Courier," by request of the editor of that journal, and republished by him in the form of a political pamphlet. Not, mind you, that Merton possessed any special knowledge of the matter in hand, or any "settled convictions" in favor of any particular fiscal policy He didn't care a button whether the country remained faithful to her steady-going old mate, Manchester, or eloped with the dashing and audacious young Brummagem. He was prefectly agreeable to espouse either side—for a consideration. And when the editor of the "Daily Courier" offered him £50 for five columns of diatribe against free trade, he accepted the terms, and penned the diatribe with the utmost alacrity.

It was good, telling stuff that he wrote, too. There was, indeed, little technical knowledge in it, and not much logic. Facts and figures were conspicuous by their absence. But these were atoned for by much persuasive sophistry, by many false analyses and deceptive illustrations (which were, in point of fact obscurations), by a lively, trenchant style—now witty, now humorous, now delicately ironical, now venomously sarcastic—the whole presenting that form of indictment which most of all appeals to the popular mind.

The editor of the "Courier," you see, knew his man; and the man knew his public. Hard facts, dry statistics, close and accurate reasoning—these have small attractions for the average British reader of the halfpenny press. You must give him something picturesque, something dramatic, something that his imagination takes in without effort—something broken up into crisp paragraphs and distinguished by bold headlines. An ounce of cheap epigram is worth a pound of argument; one smart catchword has more effect than all the economic philosophy in the universe. As it was in the beginning, so it is now, and so it ever shall be. Was not King James whistled out of Ireland by "Lillibullero"? Did not a distinguished modern statesman live and die pre-eminent upon "Peace with honor"? . . .

However, I am drifting away from the fact in hand—the fact that Philip Merton's unscrupulous, smart, persuasive, shallow, and specious pamphlet made a great popular hit, and ran into a circulation of several hundred thousand.

It was while he was at the height of the ephemeral fame produced by this nine-day success, that he received a letter one morning from Lady Beatrice Hemingway, asking him to call upon her, if convenient, the following afternoon, at her father's, the Duke of Wallington's, house in Grosvenor square, as she wished to see him on important business.

Now, Merton, of course, knew her by name, as everybody knew the famous beauty, who, from the time of her debut, three years before, had been the most proposed-to girl in society. But otherwise he was entirely unacquainted with her, and his feelings, upon reading her letter, were divided between a sense of flattered complacency at the invitation and of some considerable wonder as to what could possibly be the important business upon which she wished to see him.

He at once wrote, in reply, saying that he would call upon her next day at four o'clock p.m., and to Wellington House at that hour he went.

He was shown into the library, where Lady Beatrice was alone. She advanced towards him, smiling pleasantly, and in the most friendly manner offered him her hand. Then, having seated herself, she indicated an adjacent chair, and proceeded to unfold the nature of the business which she had invited him to discuss with her.

"You were, no doubt, surprised by my letter, Mr. Merton," she said, "coming as it did from a perfect stranger. The fact is, however, that I have been reading your uncommonly clever pamphlet on 'Protection v. Free Trade,' and I wish to make a suggestion to you which may, I hope, be mutually advantageous. You may, perhaps, have heard that I am engaged to be married?"

"I have seen the announcement," answered Philip. "To Viscount Sywell—the Earl of Wellingborough's eldest son, is it not?"

And he thought, as he said it, looking at Lady Beatrice's beautiful face and graceful form, that the Viscount was an uncommonly lucky man.

"Yes," she answered, with perhaps the slightest accession of color to her cheek, but otherwise perfectly cool and composed. "And Lord Sywell, as I dare say you know, is standing, in the Conservative interest, for the Westleigh Division of Greenshire, at the forthcoming by-election in that constituency."

Philip nodded.

"It will be a close thing," he said. "The Radicals are running a very strong candidate."

"Quite so," she assented. "I have been down there lately canvassing. I can't say that I have found the condition of affairs at all satisfactory. You see, the truth is this, Mr. Merton. Lord Sywell cares nothing about politics, and knows less. He is standing merely out of deference to his father's wishes, and I think that, as far as his own personal feelings go, he would not be at all ill-pleased if he failed to get in. But Lord Wellingborough is entirely set upon it, and, well (to be quite candid), the Earl's temper, never angelic at any time, has been rendered extra vicious of recent years by chronic gout. So that if he is disappointed in this, the darling wish of his heart, there are sure to be ructions of an unpleasant character, which both Lord Sywell and I are, naturally, most anxious should be avoided. Of course," she went on, "if my future husband were independent, it would not matter. But considering that he has no income except what his father allows him, and considering also that the bulk of the family estates are not entailed, you will understand the paramount importance of his humoring the Earl. There is no breach of confidence in my telling you this. It is a matter of common knowledge. But I have dwelt upon the point, in order to make quite clear to you the position of affairs in which I desire your assistance."

"My assistance! Ah, then, you wish me to help Lord Sywell in his canvass?" enquired the flattered journalist.

"You have divined it. That is precisely what I do wish. But permit me to state the requirements of the case in a practical, business form. Lord Sywell is one of the best fellows alive. But his political knowledge is nil, and his oratorical powers not much greater. He needs an able, reliable, clever man—someone versed in the arts that appeal to the average British voter—to advise him, to coach him up in his speeches, to be always at his elbow during these three weeks that intervene between this and the election. Having read that eminently telling electioneering pamphlet of yours upon the question of the hour, I have formed the opinion that you are the very man for the purpose. And I have Lord Sywell's authority to offer you an engagement as—let us say—his private secretary for three weeks, at a remuneration of £400 and all expenses. If that amount is not satisfactory to you, please name your terms."

Now the money offered was so liberal, and the services required so entirely congenial, that Philip Merton at once made up his mind to accept. But he was too astute a man to cheapen himself by appearing to be over-eager, and he replied, with pretended hesitation:

"Does your ladyship want my answer now?"

"I do not wish to hurry you, if you would rather think about it," she replied. "But, as you can see, time is of importance. How soon can you let me have a definite reply?"

"To-morrow morning," said Philip.

"That will do—if I can be sure of it then."

"You may be quite sure of it. I will write by this evening's post."

He rose to take his departure. Lady Beatrice rose also, holding out her hand to him and smiling on him very sweetly. Perchance it was merely a business smile—having no other object than to stimulate him into accepting the engagement. (And if that was so, then Lord Sywell's prudence in employing his beautiful fiancee as an intermediary was unquestionable.) Or perhaps Lady Beatrice could not help smiling upon handsome, attractive men, such as Philip Merton conspicuously was. At any rate it was a smile calculated to put any man upon whom it was bestowed in good conceit with himself. And our young journalist left Wallington House looking very well pleased.

That same evening he wrote to Lady Beatrice, accepting the offer which she had made him on behalf of Lord Sywell; and next morning the Viscount himself called upon Merton at his chambers in Gray's Inn.

His lordship was a strongly built, athletic young man, with a good-tempered sunburnt face and a genial manner.

"My name's Sywell," said he, as he introduced himself. "Lady Beatrice has sent me on your letter. I say, I'm awfully glad you can come and put me in the way of blarneying Hodge. I'm an awful duffer at that sort of game, you know. Always say the wrong thing, if left to myself. Lady Beatrice ain't bad though. The way she hob-nobs with the mothers and dandles the babies is wonderful. But she don't know anything about fiscal policy. It's a spot beyond her. That's why we want you. I'm leaving for Wellingborough Towers by the three o'clock train this afternoon, from St. Pancras. Will it be convenient for you to accompany me?"

Philip Merton replied that it would be quite convenient, and he arranged to leave St. Pancras with Lord Sywell at the hour named.

On the journey his lordship was very chatty and confidential, making all sorts of naive confessions.

"You see, Mr. Merton," he said, in the course of his remarks, "it's not only my being such an infernal duffer. That don't matter so much in these confounded elections. At least, it can always be got over by picking some other johnny's brains, as I'm going to pick yours. But I'm handicapped in other ways. I've been and put my foot in it with Sir James Arkwright, who's one of the largest landowners and most influential men in the constituency. It wasn't my fault But the result's the same, and the old fool has turned sulky, and says he'll see himself in Tartarus before he'll lift a finger to get me into Parliament."

"That's unlucky, certainly. But how have you managed to offend him?" enquired Philip.

"Well, it was this way," answered the communicative Viscount. "Sir James has an only daughter, named Queenie Very nice girl, too; haven't a word to say against her. She and I have always been the best of friends. But somehow her papa (I suppose because the wish was father to the thought) got it into his head that our friendship was something more than it was. You see, his estates march with the governor's; and no doubt, as far as that goes, if Queenie and I had made a match of it, it would have been very suitable and convenient, and all that. As a matter of fact, however, I'd never thought of Queenie in that light, nor, I am sure, had she of me. But Sir James must needs go and imagine a good understanding between us, and when my engagement to Lady Beatrice was announced, he flew into such a fury as never was—said I'd played fast and loose with his daughter's affections, and generally behaved like a sweep and a blackguard. We met one day in the road, and he told me this. In fact, he used such insulting language that I couldn't stand it, and I talked back to him—rather straight. After five minutes' mutual blasphemies, we parted. We have several times met, but we have not spoken since. Then, as if that wasn't enough, Joe Chamberlain goes and springs this confounded fiscal policy upon us; and if I go for—what d'yo call 'em?—preferential tariffs, I shall have all the laborers against me; and if I go for free trade, I shall have all the squires, parsons and farmers against me; and if I sit on the hedge and go for neither, both sides will heckle me at my meetings, till life will be simply not worth living. So, altogether, Mr. Merton, I've come to the conclusion that this parliamentary candidate business isn't much catch."

Just as his lordship reached this point the train slowed down for the station at which they had to alight.

When they reached Wellingborough Towers, they found that Lady Beatrice had already arrived. She, the Earl, Lord Sywell and Philip Merton formed the entire party, which was not, nor was it intended to be, of a festive or social character. It was a gathering strictly for business — electioneering business. This formed the sole topic of conversation on the first night at dinner. The Earl was the chief speaker—like Socrates in the Platonic dialogues. Philip, while appearing to listen to his lordship, looked most of the time at Lady Beatrice. How lovely she was! How graceful! What a perfect dream of young womanhood! He was glad to feel that the labors of the election campaign were to be alleviated by the presence and companionship of so charming a damsel.

Next day work began in earnest. Lady Beatrice threw herself into it heart and soul. She was here, there, everywhere; now canvassing the voters, now visiting their wives and nursing their babies, now flying back to Wellingborough Towers, her pretty face full of importance, to communicate to the candidate, or his private secretary, some piece of intelligence, good or bad, that might demand a variation in the plan of campaign. Philip had many interviews with her—on election business. At least, it began that way; but alas! it did not end so. Mad love, suddenly conceived, has driven its victims to many mad deeds in its time—but surely to none madder than when it drove Lady Beatrice to cast everything to the winds, to play false to her betrothed, to deal him a crushing blow just in the very heat and stress of his electoral fight, and all for the sake of a young man in the position of Philip Merton. One morning, only a week before the election, the neighborhood woke up to the startling, the paralyzing, news that Lady Beatrice had run away with the private secretary of her affianced lover, the Tory candidate. So here was a pretty scandal in a respectable constituency!

Mr. Colnbrook, the Conservative agent, was at breakfast, discussing an egg, when the news reached him. He left the egg unfinished, and went fizzing off on his motor-bike to Wellingborough Towers. He found the Earl nearly black with fury, stamping, raving, cursing like one possessed.

"I knew it would come to this," stormed his lordship. "I always said what a damned idiotic thing it was to introduce one of those blackguardly Grub street scribblers into our family affairs Old as I am, I'll catch and horsewhip the scoundrel, if I have to follow him round the world to do it; and as for that woman—never mention her name in this house again, d'ye hear? She's as dead to me as if she'd eloped with a chimney sweep, and deader. Halloa, Colnbrook! You here! Come to offer me your damned condolences, I suppose. But I won't have 'em. Curse me, sir, I'm not going to be pitied, and my son's not going to be pitied, by the likes of you. Ah! Here he comes! Sywell, this impertinent jackanapes has had the impudence to ——"

"Nay, nay, my lord," expostulated the obsequious Mr. Colnbrook. "I did but come to ask Lord Sywell whether, under the circumstances, he feels equal to attending the Exworth meeting to-night."

"Equal to it?" roared the Earl. "Of course he feels equal to it. Do you suppose that a man with my blood in his veins could be such a mongrel as to feel unequal to fulfilling his public engagements merely because a jade in petticoats has——"

"Steady on, father!" interrupted Lord Sywell, whose face, though very pale was set and resolute. "Of course, I'm going through with this election; and all my meetings shall take place precisely as arranged. But I don't want to hear anything against Lady Beatrice, please. She is a woman; and her sex, if it cannot, unhappily, command our respect, at least demands our silence. Let everything go on as usual, if you please Mr. Colnbrook; and if you will call here this evening at 6.30, I will drive you over to Exworth."

That last week was a trying week, indeed, to Lord Sywell. But he went through it like a man, arousing thereby the warm admiration of his supporters and the sympathetic respect of his opponents. The indignation throughout the neighborhood against both Lady Beatrice and Philip Merton was intense and it was a good thing indeed for them that they had cleared out, since it would not have been safe for either of them to have shown their faces just then even in the most Radical parts of the constituency.

There are those who assert that the spirit of chivalry is dead. But methinks they are too sweeping in their assertion When anything happens to evoke it, it still makes itself apparent; and it certainly made itself apparent now in the attitude of the Greenshire people towards Lord Sywell, whose public courage and self-control in the face of great private trouble appealed strongly to their sturdy British minds. Sir James Arkwright himself, stubborn old dog though he was, was moved to bury the hatchet Meeting Lord Sywell one day in the market-place of Westleigh, he hesitated one moment, then strode up to the Viscount, and shook him warmly by the hand.

"Doing anything on Sunday night?" he said. "Come over and eat a bit of dinner with me and Queenie."

* * * * * * *

The Greenshire "Chronicle" of the following week contained, along with other matter, these two items of intelligence:

(i.) WESTLEIGH ELECTION RESULT.

Sywell (C.)	4,091
Pratt (L.)	3,299
Conservative majority ..	792

(ii.) AN APOLOGY.

We beg to express our deep regret for the statement, which we published in our last week's issue, viz., that Lady Beatrice Hemingway had eloped with Mr. Philip Merton.

We have since been satisfied by evidence submitted to us by Lady Beatrice's solicitors that such was not the case. Lady Beatrice left for her father's residence (Banstead Castle) in Northumberland, where she has since remained; while Mr. Merton went direct to London.

We understand that the marriage between her ladyship and Mr. Merton will not take place at present.

We beg, therefore, to tender our sincere apologies to both the lady and gentleman concerned, and also to the members of their respective families, for the annoyance which has been caused them by our unfounded report. We may, however, plead in extenuation, that the sudden rupture by Lady Beatrice of her engagement with Lord Sywell, and her avowed preference for Mr. Merton, taken in connection with their simultaneous flight, was such as naturally to mislead us, as it misled Lord Sywell himself and everyone else in the neighborhood.—Ed Greenshire "Chronicle."

At the same moment that the compositors in the office of the G. "C." were setting up these announcements a strictly private little gathering was being held at the Earl of Wellingborough's London house in Berkeley square. Present: The Earl, Lord Sywell, Lady Beatrice Hemingway and Philip Merton.

Said the Earl, looking as pleased and jubilant as the proverbial Punch:

"You were quite right, Mr. Merton. Everything was against us. Sywell would never have got in on his own merits as a candidate. It was the dramatic and pathetic elements so ingeniously introduced by you that did the trick for him. And now, if you will kindly step with me into my study, I shall have great pleasure in drawing you that little cheque.—"Truth."

AN EXCITING INCIDENT

Desperate Battle with Wolves in Manitoba

Winnipeg, February 9.—Alex. Morrissey, of Turtle River, near Dauphin, Man., had a thrilling experience with a pack of wolves while crossing Round lake, an arm of Lake Manitoba. A considerable distance from shore, he was surrounded and attacked by twelve or fifteen ferocious animals that he possesses no language capable of describing the battle. At the time Morrissey had with him two hounds and an axe and had it not been for these he says there is no doubt at all but that he would have been torn to pieces by the wolves.

The hounds fought hard and one of them was killed in the encounter. Morrissey claims to have done great execution with his axe and more than one wolf bit the dust, while others were badly wounded. The track in the snow from where the attack commenced to the shore is described by Mr. Morrissey as a trail of blood.

When the exhausted man reached land he sought the protection of a friendly tree and remained there till the wolves departed at dark.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.60 to $40 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.70 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $42.65 and $79.60 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet we expect we will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group, is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

The PETERBOROUGH BROKERAGE CO , Fiscal Agts.

PETERBOROUGH, ONTARIO.

Equitable Gold Mining Co.

R. C. LANE, President. W. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 8x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,150 feet.

In addition to the above there are four small shafts, with a combined depth of about 800 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,050 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 20th, 1902, and partial payments have since been made. The Company is entitled to $4.25 per ton as cost of mining and milling. One-half of all over and above this $4.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 265-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

THE PETERBOROUGH BROKERAGE CO.

FISCAL AGENTS

APPEARANCE

Is such an important feature on the table It makes a heap of difference to the pleasure of the meal whether you have a good or a poor looking Sugar on the table

St. Lawrence Extra Granulated Sugar

is the whitest and best looking Sugar to be had, and besides, it has the advantage of being the best quality and greatest strength.

Dry Placer Miner formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 200 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house or sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin; mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

CURES in 1 to 5 days. Guaranteed not to stricture. Prevents Contagion. Evans Chemical Co. CINCINNATI, O. U. S. A.

MEN AND WOMEN
Use Big G for unnatural discharges, inflammations, irritations or ulcerations of mucous membranes. Painless, and not astringent or poisonous. Sold by Druggists, or sent in plain wrapper, by express, prepaid, for $1.00, or 3 bottles $2.75. Circular sent on request.

RUSSIAN SHIPS ALREADY SEIZED BY JAPANESE

An Advance Detachment of Russian Troops Left Mukden for Korea.

London, Feb. 8— A special despatch from Berlin says that a strong fleet of Japanese warships, reported to be on its way to Chemulpo, has seized several Russian trading steamers.

The Muscovites Advancing.

An advance detachment of Russian cavalry is leaving Mukden for Korea. A telegram from Mukden announcing the departure of the cavalry, adds: "Russia's love of peace has been exhausted by Japan's demands. Troops therefore have been concentrated at the Yalu River.

The Russian troops are in the best spirits. The Japanese everywhere are hurrying homewards."

The Mukden despatch repeats the rumor that a Japanese squadron is off Wei-Hai-Wei, on the north coast of the Shang-Tunk Peninsula, with the object of intercepting the Russian ships coming from Europe.

Baltimore Swept by Fire; Damage $200,000,000

The Whole Business Section of the Maryland City Wiped Out

The City of Baltimore, Maryland, has suffered a severe disaster in the destruction of practically its whole business centre by fire. Every wholesale and retail house, bank, railway, and shipping office, newspaper and telegraph office, for a space of half a mile long, and six blocks wide, has been destroyed. Only one life has been so far reported lost. The monetary loss will exceed $200,000,000 and will probably equal, if it does not exceed, that of the great Chicago fire, in October, 1871, which was $200,000,000. Some of the Canadian insurance companies are interested, and will share the enormous loss, which will fall upon the underwriters.

Baltimore, Feb. 8— The monetary loss in the terrific conflagration which started on Sunday afternoon, will probably reach $300,000,000.

Only one life is known to have been lost, so far, that of Jacob Ilginfritz, of the Laurel Fire Company, of York, Pa., who was killed early this morning.

Acres of most valuable property in the wholesale, dry-goods, produce, lumber, shipping, railway and financial districts have been destroyed. Notwithstanding heroic effort on the part of the local fire department, reinforced by almost numberless firemen from Washington, Philadelphia, Wilmington, Newark, N.J., Newark, Del., Harrisburg and New York City, the fire at this hour is raging as furiously as it was an hour after it originated in the cellar of the John E. Hurst Company at Liberty and German streets. The origin of the fire is said to have been from spontaneous combustion, but no tangible evidence to this effect has thus far been secured.

Big Business District Swept.

The area of the fire district extends from Liberty street on the west, to Jones Falls on the east, a distance of about three-quarters of a mile, and from Fayette to Pratt streets, north and south, a distance of four city blocks.

Newspapers All Burned Out.

All the buildings of the Baltimore newspapers, including the offices of the Associated Press, were destroyed by midnight. All of the publishers arranged immediately to have their editions printed on the presses of Washington papers.

JAPAN RELUCTANT BUT HAD TO DRAW SWORD

Russian Gunboat at Nagasaki May be An Easy Capture--Fleeing to Safety

London, Feb. 8— The correspondent of The Times at Tokio says Baron de Rosen, having been instructed to prepare to leave Tokio, has transferred the care of Russian interests to the Austrian Minister, and exchanged farewell visits with Baron Komura.

Fleeing to Safety.

The Japanese residents have nearly all withdrawn from Vladivostock, Harbin and other places in Manchuria and also from the Yalu.

Would Be an Easy Capture.

The Russian gunboat Mandjur, which is in the dock at Nagasaki, will probably be unable to leave before hostilities begin.

Japan Reluctant.

The leading journals declare that Japan was most reluctant to draw the sword, but had no choice. They republish Russia's note of 1895, when Japan was made to evacuate Manchuria, declaring that the retention of the Liaotung peninsula by a foreign power would imperil the Chinese capital, render the independence of Corea illusory, and jeopardize the peace of the Orient. They invite a repetition of Trafalgar and Waterloo, since Japan fights as Russia fought, to crush a military despotism, and secure equal rights for all nations in eastern Asia.

RUSSIA & JAPAN'S NAVAL STRENGTH

FLEETS NEARLY EVEN SO FAR AS STRENGTH IS CONCERNED

JAPAN HAS THE ADVANTAGE

Her Navy Said to be Better Manned and More Up-to-Date

PROSPECTUS

THE COLORADO AND CONNECTICUT GOLD MINING COMPANY

(Incorporated under the laws of South Dakota.)

Main Office: MERIDEN, CONNECTICUT.

Capital $400.000. 80,000 Shares at $5.00 each, full paid and non-assessable

OFFICERS

WILLIAM GARLICK, Wholesale and Retail Ice Dealer, Meriden, Conn., President
JOHN A. THOMPSON, Investment Securities, New York City, 1st Vice-President.
GEORGE S. WILCOX, Retired Manufacturer, Meriden, Conn., 2nd Vice-President.
B. F. BARNES, Manufacturer, Meriden, Conn., Treasurer.
WILLIAM O. CORVES, Miner, Meriden, Conn., Superintendent.
ARTHUR S. GARLICK, Meriden, Conn., Secretary.

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE S. WILCOX, RICHARD F. DOBBIS, WILLIAM GARLICK, ARTHUR S. GARLICK, B. F. BARNES

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hindsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is 5x7 feet and is 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs) is as follows: Copper, 16.05 per cent.; Gold 0.02 ozs.; Silver 92.40 ozs. Total value $90.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper, $6 40; Gold, $6.82; Silver, $254 31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatsoever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years. Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5,500,000 (now claimed to be worth $15,000,000). About six years have elapsed since he purchased it. The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado. New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN."

Mr. Edwin J. Hulbert, M. E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

B. F. BARNES, Fiscal Agent
Room 714, Wilcox Building, Meriden, Conn.

HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State o California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity.

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely cer-others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to

J. W. BUTLER, PRESIDENT,
713 Market St., San Francisco, C l.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placer in the ages past.

The Pearl Gold Mining Co. of Idaho

owns seven groups of mines—thirty-seven mining claims and is now working in ore in three of its mines.

The Treasury Stock is offered at a price tha will unquestionably make money for those who invest. The Stock is non-assessable—no debts—all clear titles—safe, experienced and conservative management.

CONDEMNATION OF LAURIER'S POLICY

SIR CHARLES TUPPER TREATS BOUNDARY CASE IN LONDON TIMES

TREATY MAKING POWERS

Sir Charles Claims That Experienced Canadians Condemn the Idea

London, February 9.—Sir Charles Tupper's column and one-half letter which the London Times prints in leader type, is a complete eye opener to Englishmen.

The letter is similar to that the Montreal Star recently published and informs Englishmen, for the first time, that Sir Wilfrid Laurier's demand for full treaty-making powers is strongly opposed by experienced Canadian statesmen, and secondly that Sir Wilfrid Laurier has a chance to nullify the bad effect produced by packing the United States side of the Alaska tribunal by appointing three Canadian Commissioners, all equally reliable. Instead, he himself proposed Lord Alverstone.

Thirdly, that Lord Dundonald denies that there is any strategical value to the two Portland canal islands ceded to the United States, and fourthly, that Hon. Clifford Sifton and Sir Wilfrid Laurier both surrendered what was really the vital parts of Canada's case by admitting in the Parliament of 1898 that Dyea and Skagway were in undisputed possession of the United States. The last paragraph of Sir Charles Tupper's letter reads:

"In view of these facts what can be more puerile than the hue cry raised against the British Government by Sir Wilfrid Laurier in an endeavor to cover his own failure to discharge the duties incumbent upon him by the impracticable demand for Canada's right to make her own treaties."

INDUCED TO STEAL

Want Drives Young Woman to Crime in New York

New York, Feb. 6.—The Herald this morning says: Frail, and weakened by a long struggle against hunger, her body racked by serious ills, a young woman was a prisoner in Jefferson Market Police Court yesterday afternoon, charged with the theft of $15, and a pocketbook containing a diamond ring valued at about $60.

The policeman who arrested the young woman testified that he had been called into a tailoring shop on east 17th street where the young woman had been detained.

For one day only the young woman had been employed with fifty other girls in the tailoring shop. None of the other girls paid particular attention to the new comer, although they commented on her pale face. Nellie Cullen, one of the employes, returned from her luncheon at noon yesterday, and as she entered the cloak room she laid her chatelaine bag, containing her money and a diamond ring, on a table nearby. When she came out of the cloak room, the bag was gone. The Schneider girl was arrestedm and it was said the money was found hidden in her hair.

Hunger the Cause.

"I was very ill and very hungry," Miss Schneider said in court, her voice choking with sobs. "I have not been strong lately, having undergone two operations for appendicitis while in Bellevue hospital, and unable to obtain employment, I could get very little to eat. I do not know what possessed me, but when I saw how much money there was in the book, I took it. My home is in Montreal, where I have two brothers, but I have no father or mother."

The young woman was held for further examination today, and a probation officer was assigned to investigate her story.

JAPANESE AND RUSSIAN WORDS

Russia and Japanese Words and Their Meaning

In view of the imminence of war between Russia and Japan, the following glossary of native terms will be found of value in interpreting news despatches from the Far East:

TERMS IN MANCHURIA.

Fu—Tu the name of a city indicates capital of province, a city of the first class.

Chou— Indicates city of the second class.

Yi.—A small post town, as Ychang-Yi.

Kiang, Ho, Ychuan, Ychu.—All mean stream or river.

Hai.—Sea, sometimes lake.

Shan—Mountain.

Kuan.—Camp, strong, fortified place.

Shan-Hai-Kuan.—The fortified camp where the mountains and the sea meet aptly illustrates these three terms.

Ling.—Pass over a mountain.

Ycheng, Chen, Holo.—Town, large village.

In Corea the termination—

P'o or Pho—indicates that the place is a port or harbor on navigable waters, for instance—Yongampho, the harbor near the mouth of Yalu river, Masampho, the disputed naval base on the southern shore of the peninsula.

Do.—As termination indicates that the place is a province, and means therefore, "the district of," or that it is the capital city of such a province.

Han.—River.

At the beginning of geographical names the following prefixes may generally be translated:

Ya—Great, large; Siao—Small, little; Pei—north; Nan—South; Hei—Black; Huang—Yellow; Si—West; Tung—East; Shang—Upper; Hia—Lower.

Never Learn Club

On Wednesday evening the Never Learn Club will give what promises to be a most enjoyable leap year dance, in Foresters Hall Simcoe street. The young ladies of the club have undertaken the refreshments, and the Mariorana Harp Band Orchestra, of Toronto, will furnish the music. This dance, like the others, will be an informal one, and invitations issued for any Never Learn event will be honored.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00. Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 700 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore which cannot be exhausted in five years already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is to-day giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 195 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 600 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*

C. L. ARZENO, General Manager.
603-604 Exchange Bldg., Denver, Colorado
ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble
but a
Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of mady companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO,

SCAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL.

The Peterborough Brokerage Co., Local Agents.

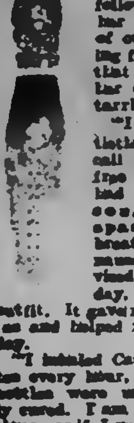
ASTHMA CURED

Mrs Farndel, Clementsport, N. S., suffered all her life from asthama, but was permanently cur by Catarrhozone after all other means failed.

Mrs. Farndel's recovery affords overwhelming proof of what Catarrhozone will do. Nothing except Catarrhozone was of the slightest benefit, but when given a fair trial it cured

Now perhaps you need something for your cold or bronchitis or Asthma! Why not try Catarrhozone! Thousands have been cured by inhaling it a few minutes now and again, and certainly it won't do you any harm to profit by their experience.



Mrs. Farndel gives the following statement of her case for the ... of others who are suffering from asthma and to ... that many will follow her example and use Catarrhozone.

"I am now in my eightieth year and cannot recall the time w... free from the Asthma. I had always a choking cough, feverishness, spasms, difficulty in breathing, headache and nausea. My druggist advised Catarrhozone one day, and I bought a large outfit. It gave me relief in five minutes and helped me very much in one day.

"I inhaled Catarrhozone ten minutes every hour, and by the time two bottles were used, I was completely cured. I am as free now from Asthma, as if I never had it. My perfect recovery is due entirely to Catarrhozone. I prize my Catarrhozone Inhaler next to life itself.

(Signed) MRS. T. FARNDEL."

This is proof positive that Catarrhozone is a sure and speedy cure for the worst kind of Asthma. It is guaranteed to give satisfactory results, and your money will be refunded if it fails. All you need is a trial of this grand preparation to be quite satisfied and convinced that it is the best. Your druggist recommends and sells it. Price $1.00, small ... & Co., Kingston, Ont.

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

Y. M. C. A. Social

The first of a series of Saturday evening socials, under the auspices of the Y.M.C.A will be held on Saturday evening next. A cordial invitation is extended to all young men, whether members of the Association or not.

St. Luke's Mothers

The second annual sale of aprons and fancy articles by the St. Luke's Mothers, will be held on Tuesday, Feb. 16th, in St. Luke's Schoolroom. All are cordially invited. Pancakes will be served.

R. T. of T.

The Royal Templars of Temperance held an open meeting in their lodge rooms last Monday night, when a large number of friends enjoyed an interesting programme. Refreshments were also served.

A Strenuous Candidate

Notwithstanding the depth of snow and cold weather, Mr. John Finlay, Liberal candidate for East Peterborough, (accompanied by the present member, Mr. Lang,) has been calling on many of the electors of Keene and vicinity and has been favorably received.

February 14th

St. Valentine's Day? Yes, the 14th is St. Valentine's Day, and the young people especially, cannot fail but be interested in the excellent display of comic and fancy valentines at The Times Bookstore. The finest assortment in town. Call around and enjoy a good hearty laugh.

This Boy Knew

The teacher was trying to get the class to obtain an understanding of the word "ability."

"Come Freddie," she said, "what is it that has made your father a great merchant?"

"Advertisin' in The Times," replied Freddie, as he passed up to the head of the class.

The attendance at the

Peterboro' Business College

is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre of Canada.

Over 90% of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write for particulars regarding our correspondence course

WM. PRINGLE,
Principal.

New Companies

The Ontario Gazette contains notice of incorporation of the British Canadian Colonization Company, Limited, with head office at Ottawa; the Grunwald Resort, Limited, to take Company, Limited, to acquire "white peat inventions." The business of Humsville, the International Peat Ritchie & Ramsay has been incorporated.

A Dark Night ... evening

On account of the trouble at the Light and Power Company's station on Monday night, there was no light supplied by them to their patrons. The result was that The Times was delayed a couple of hours. The absence of the electric effulgence was nothing compared with the Ethiopian darkness that was manifest in the hundreds of homes where this great family journal is read, and the telephone was kept hot answering the calls regarding the non-appearance of this g. f. j.

Death of Mrs Morrison

Sad we are to have to chronicle the death of Mrs. Alexander Morrison, of Bridgenorth, who passed away on Monday evening after a prolonged illness. Deceased was a daughter of Mr. Robert Moore, of Smith, and was married in 1866. She was 84 years of age, and leaves a family of eight children, their names being:—Robert, Montreal; William, Spokane, Wash; Alexander, Peterborough; Frederick, Bridgenorth; and Mary and Ethelbert, Bridgenorth. The funeral takes place today at 1 o'clock to Little Lake Cemetery.

Wedding Bells

St. Luke's church was the scene of a pretty wedding yesterday afternoon, when Miss Carrie, daughter of the late W. H. Bowman, was united in the holy bond of matrimony to Mr. Daniel Whitlow, formerly freight agent at the C.P.R. here. Rev. Mr. Holah conducted the ceremony and the young couple were unattended. Miss Bowman has lived here all her life, and is well and favorably known, and all her many friends join in sincere wishes for her future happiness. Mr. and Mrs. Whitlow left for Toronto this morning and on their return will reside here.

Employers to Dine

The members of the Employers' Association of Toronto will hold a business men's dinner on the evening of February 25, to which the members of the Manufacturers' Association will be invited. There will be two addresses, one from a speaker from the United States on some industrial subject, not arranged yet, and the other from one of the members of the association on the aims and work of the Employers' Association. Between 300 and 400 employers are expected to be present. Several employers have been invited from Peterborough.

Print Your Address

The Post Office Department urges all who use the mails to have written or printed on the upper left hand corner of the envelope, their names and post office addresses. Your box number and post office is sufficient, if preferred. It is not necessary to say return in ten days or any other number of days, the Postmasters have their regulations and do not require to be reminded of them. If the letter for any reason cannot be delivered it is promptly returned, and it saves the Post Office the trouble of sending the letter to the Dead department, and having it opened to find address of sender, should it happen to be given. Printed stationery can be supplied by this office.

THAT'S HONEST

Doctor Takes Away Coffee Because It Hurts

A prominent Southern physician with 51 years' experience speaks strongly of the troubles caused by coffee.

"For over three years I have been prescribing Postum to my patients and it has never failed to benefit and has cured some hundreds who were afflicted with indigestion and general nervous breakdown caused by the long use of either coffee, tea, tobacco, or whiskey, especially coffee.

"I have been a practicing physician 51 years and still practice every day. I can assure you that I have never found any agent that could equal your Postum in building up those who have injured themselves by the use of coffee.

"I was forced to the use of Postum by being a dyspeptic myself from coffee drinking. Having so many patients suffering from indigestion in all its forms —I looked for a remedy that would help in my practice and I found it in Postum. When made according to directions it is not only palatable but a luxury, and a certain cure in the majority of cases of indigestion and general nervous exhaustion.

"I have robbed myself of many patients by prescribing Postum, but I am satisfied for I have helped the ailing, especially the women who used to drink from three to five cups of coffee a day. I know the extensive use of coffee for a long time has sent millions to premature graves and I regard Postum as a panacea for all the troubles that coffee causes.

"Indeed I safely guarantee to greatly help or entirely cure all who have indigestion and other troubles caused by coffee. I give them Postum in place of coffee and if they follow directions I guarantee it will cure them or I will not charge them for my services." Name given by Postum Co., Battle Creek, Mich.

Strong endorsements such as this prove that there's a reason for Postum. It is a strong, pure food in liquid form, is not in any sense a medicine, but a delicious beverage that has replaced coffee on many of the best tables in America.

Look in each pkg. for the famous little book, "The Road to Wellville."

INCIDENTS OF THE DAY

Newsy Paragraphs Picked Up By Reporters on Their Rounds

—The meeting of the Board of Health has been postponed till next week.

—Mr John Hayden, of Cobourg, died suddenly on Monday.

—Everybody was good yesterday. There were no cases at the Police Court.

—Messrs. T. Cavanagh and Jacobs shipped a carload of fine horses to Montreal yesterday.

—Business amongst the storekeepers is practically nil on account of the cold and the bad roads.

—Mr. T. Hurley, our enterprising real estate broker, has concluded a big deal in Toronto real estate.

—On Monday evening next the Senior Girls Guild of All Saints church, will hold a social. A pleasant time is promised.

—An interesting address on the Alaskan Boundary award was delivered at the St. Paul's Young Men's Guild last evening.

—Mr. Wm. Primeau has opened up an up-to-date restaurant in connection with the Palace Cafe, George street, and extends a general invitation to call around and try his extra fine oyster stews.

—Our M. H. O., Dr. Bingham, informs us that the few cases of scarlet fever and diphtheria in town at present are exceptionally mild. La grippe is, of course, the principal cause of sickness at present.

—Mild weather is promised for this month, but thus far humanity has been unable to locate the source of the pledge. Perhaps under the circumstances it would be better for those who live in this climate to wait and see.

—A meeting of the "Old County Wanderers" Athletic Club, will be held at the Crown Hotel this evening at 8 o'clock for the purpose of arranging for next season's programme of sports. All interested in cricket and football are especially invited to attend.

—The laborers engaged in repairing the damage done to the wires on Water street yesterday, were treated by one of our local clergymen, to hot coffee. This display of kindness was much appreciated by the men.

—The icy condition of the sidewalk is creating considerable comment around town at present, and many are the remedies suggested. Perhaps one of the most practical is that suggested by Mr. "Billy" Rudkins, who thinks one of the fire teams attached to a set of spring tooth harrows and driven along our granolithic walks, would make things more comfortable for the poor pedestrians.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mr. J. R. Church, of Toronto, is registered at the Snowden House.

—Mr. John Giles, who is seriously ill, was somewhat better yesterday.

—Mrs. M. E. Hamilton was called to Cobourg yesterday on account of the death of her brother.

—Rev J. C. Davidson will lecture to the Divinity students at Toronto University today.

—Dr. Dredd returned from a professional visit to Campbellford yesterday afternoon.

—Mr John J. Ross, of Toronto, called on Peterborough friends yesterday. He is staying at the Snowden House.

—Mr. Harry Cavanagh, of the Cavanagh House, is recovering from his recent serious illness.

—William Garvey, of Otonabee, who has been under treatment at St. Joseph's Hospital, for pneumonia, is reported convalescent.

—Mr J. J. Stone, representing T. J. Fair & Co., Brantford, called on his town customers yesterday and left today for Campbellford.

—Mr. Wm. McLeish, of the Monetary Times, Toronto, paid a flying business trip to town yesterday, and left this morning for Montreal and Ottawa.

—Miss Edna J. Lemon, of Toronto, arrived in town yesterday afternoon and will visit her uncle, Mr J. Lang, for the next two weeks.

—Monday's Toronto News—Miss Dennistoun, of Peterborough, will be the guest of honor at a tea to-morrow afternoon given by Mrs. Herbert Molson, of Montreal.

—The many friends of Mr. David Breese will be pleased to learn that his condition is considerably improved, and that he will now recover.

—The many friends of Mr. Geo. Fitzgerald, the well known carriage manufacturer, will be pleased to learn that he is slowly recovering from a severe attack of la grippe.

—Mr and Mrs. C. B. Rourley returned home yesterday from Bobcaygeon, via Fenelon Falls and Lindsay, where they had been attending their son's wedding, which took place on Wednesday last. They were snowbound for several days at the Falls.

—Mr. Martin Simon, representing H. Simon & Sons, of Montreal, visited his Peterborough customers yesterday and left this morning for Belleville. Martin looks happy these days, and is quite enthusiastic on the marriage question.

—Mr R. F. James, contractor, of Oshawa, arrived in town yesterday.

—Arrivals at Snowden House—J. M. Watson, Morrisburg; J. B. Wilson, Toronto; Jno. Kearney, Montreal; A. Fitzpatrick, Toronto.

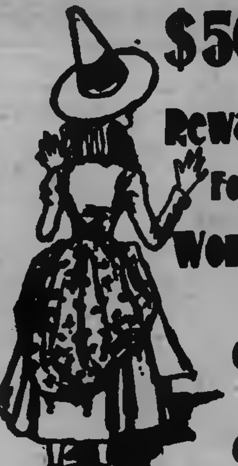
Advertising in the Times brings good results



Backed up by over a third of a century of remarkable and uniform cures, a record such as no other remedy for the diseases and weaknesses peculiar to women ever attained, the proprietors of Dr. Pierce's Favorite Prescription now feel fully warranted in offering to pay $500 in legal money of the United States, for any case of Leucorrhea, Female Weakness, Prolapsus, or Falling of Womb which they cannot cure. All they ask is a fair and reasonable trial of their means of cure.

"I used four bottles of your 'Favorite Prescription' and one of 'Golden Medical Discovery,'" writes Mrs. Elmer D. Shearer, of Mounthope, Lancaster Co., Pa., "and can say that I am cured of that dreaded disease, uterine trouble. Am in better health than ever before. Everyone who knows me is surprised to see me look so well. In June I was so poor in health that at times I could not walk. To-day I am cured. I tell everybody that Dr. Pierce's medicines cured me."

FREE. Dr. Pierce's Common Sense Medical Adviser is sent free on receipt of stamps to pay customs and mailing only. Send 31 one-cent stamps for the cloth-bound volume. Address World's Dispensary Medical Association, Proprietors, Buffalo, N. Y.

JAPS CAPTURE SEVEN BATTLESHIPS

LATEST DESPATCH NEWS FROM THE SEAT OF WAR

[illegible]rancisco, Feb. 11—A cablegram to the Associated Press from Nagasaki states that the Russian cruiser Zarlag, which was reported to have been sunk yesterday at Chemulpo by the Japanese fleet, was captured, and has arrived at Sasabou. The despatch also states that in addition to the Russian vessels damaged in the torpedo attack at Port Arthur seven other vessels were captured. It is also reported at Nagasaki, that General Kuropatkin, the Russian War Minister, has arrived at Harbin, to take command of the Russian land forces.

ROUT THE JAPS

Vladivostock, Feb. 10—Private telegrams received here report the complete rout of the Japanese by the Russians on the Yalu River. These advices also claim that Chemulpo, Korea, has been occupied by Russian soldiers and marines.

Released By the Japanese

The Three Russian Ships Seized by Japan Have Been Let Go

London, Feb. 10— In a despatch from Shanghai, dated Feb. 9, a correspondent of the Daily Telegraph says the Japanese have released three Russian steamers the Mukden, the Amur and the Schulka.

One Russian warship, an obsolete sloop named the Mandjur, the correspondent continues, is here, and Captain Crown who commands her, is evidently retained as an intelligence officer. He is assisting the Russian military agent, General Dessino.

The Russians expect that Japan will be too punctilious to commence naval hostilities until the alien crews have been discharged from the Japanese cruisers Nisshin and Kasuga.

Honolulu, February 10 — Numerous cables have been received by Japanese residents in Honolulu from their Government advising them that the reserves had been called out, and instructing them to come home at once. It is believed that there is a large number of reserves among the 60,000 Japanese in Hawaii, and that war will almost deplete the island of Japanese laborers. The present transportation facilities to Japan will be adequate to carry the large number of Japanese that will go from here.

RUSSIA AS A NAVAL POWER

HER SHIPS POORLY MANNED BY COUNTRY LADS

The Japs will Put the Russian Navy Out of Business When They Clash

London, February 11.—An officer admitted to the writer when visiting on board a Russian battleship recently that a large proportion of the men are not sailors but agricultural laborers drawn from inland districts by the conscriptive system. They enter as young men, —not, to be noted, as boys—and serve from five to seven years, and are then passed into the reserve for a further period of eight to ten years. From the fact that these men come from the inland provinces it follows that they have not the love of the sea in their veins and from the fact that Russia is not an industrial nation it also follows that few of these men have any mechanical knowledge. Consequently the navy is manned with the roughest material, men who have to learn everything and unlearn a great deal.

It is said that the standard of gunnery is good, but as no records of any kind are published and the ships in Europe are in full commission for only about half the year and most of the ships in the far east have been commissioned comparatively recently, such assurances must be received with reservations. No doubt the men possess a high standard of courage and iron nerves, but these qualities in modern naval war cannot take the place of continuous war training, winter and summer, which is the program of the British and American and German fleets.

Russia has the ships, she is building more of them, and she has a personnel of 65,064, including many well-trained officers of good attainments, but what the fleet really represents in naval power is a problem which only war can solve. It may be that it will be found, as seems probable, that while the Russian authorities have been able to add to the size of the fleet with marvelous rapidity they have been unable to supply trained men. In these days, especially where the aid of foreign yards is involved, it is possible to obtain ships at short notice, but trained officers and men cannot be so quickly supplied.

Under the circumstances in which the Russian fleet has been created there is consequently good cause to wonder whether it will prove in action as formidable as it appears on paper.

FIGHTING FORCE OF JAPAN.

Compared with the huge military strength of Russia, that of Japan is little more than a pygmy one. Yet it reaches the fairly substantial total of about 450,000 from all sources, together with 1,200 guns and 90,000 horses.

The fighting force always available for duty is divided into 156 battalions of infantry fifty-one squadrons of cavalry, forty batteries of field and fortress artillery, together with a proportionate complement of engineer, supply and transport detachments. For armament the field artillery have the Arisaka quick-firing pattern, and the infantry on the permanent establishment carry the Midji magazine rifle. Japanese cavalry are served out with swords and carbines, but no lances. The Minister of War is General Masatake Terauchi.

The use and recommendation of

Cleveland's
Baking Powder

by practically all the leading Teachers of Cookery, who *must* produce the finest cookery, means something.

RUSSIANS HEAR OF VICTORY THE REPORT UNCONFIRMED

St. Petersburg, Feb. 10, 5.30 p.m.—Some of the newspapers here print extras claiming a Russian victory at Port Arthur. Three Japanese warships and four torpedo boats are reported to have been seriously crippled. One report says the Japanese battleship Shikishima was sunk. The people are demonstrating, but there is no official confirmation of the report, and the announcement is discredited.

London, Feb. 10, 2 p.m.—Official despatches from Tokio received by Baron Hayashi, say the Japanese admiral, on arriving at Chemulpo, Korea, sent in word to the two Russian cruisers, giving them a time limit in which to leave. Shortly afterwards the Russians came out and attacked a Japanese torpedo boat which replied with a torpedo ineffectively. A general exchange of shots then followed. After a hot fire the Russians returned to Chemulpo and sunk at the entrance to the harbor. It is not yet known whether their sinking was due to the Japanese fire or to the Russians' own action, but it is believed to be due to the former. The crews of both the Russian vessels sought refuge in a French warship at Chemulpo.

There were no casualties among the Japanese and their vessels sustained no damage.

JAPS CAPTURE 2,000 RUSSIAN TROOPS OFF KOREAN COAST

London, Feb. 10—A special despatch from Tokio, dated today, says it is reported that three transports of the Russian volunteer fleet, conveying about 2,000 troops, have been captured by the Japanese off the Korean coast.

London, Feb. 10—Russia fired the first shot of the war. This was done by her gunboat, the Korietz, at Chemulpo, Monday evening, several hours before Japan attacked Port Arthur.

OTHER CATASTROPHES PREDICTED FOR RUSSIA.

First Events of War Show That the Czar's Country is Not Ready.

Rome, Feb. 10.—The Patria publishes comment on the first engagement in the Far East, supposedly from the pen of Admiral Bettolo, who has twice filled the post of Minister of Marine.

The writer says: "The result of this first attack is exceptionally grave and shows that the Russian commander was not prepared. It points also to a possibility of future catastrophes. The Japanese showed notable perspicuity and foresight, and the fact that the Russians were surprised at night proves that they were not vigilant. If the Russian ships had been surrounded by metallic nets as is prescribed in warfare; if they had employed searchlights, and especially if their torpedo boat destroyers had been active, this surprise could not have brought such disastrous consequences. The Japanese have proved their water scout service to be excellent, as, in the darkness of night, they knew exactly where to strike. As the Russians have no dockyard facilities in the Far East to repair the damages inflicted on their ships, it follows that the three vessels struck by torpedoes are useless for service in the present war."

RUSSIA POWERLESS TO STOP THE JAPANESE FROM LANDING TROOPS AND LOCATING GUNS

Japan Wants Chance at the Russian Fleet--According to Official Advices Received Only Four Battalions of Japanese Troops Have Up to The Present Been Landed at Khemulpo, Korea

Berlin, Feb. 10—The naval men here were doing little less at the Admiralty today than talking about the Japanese-Russian engagements and the deductions to be drawn therefrom. One conviction was that Japan has acquired such a superiority that her command of the sea practically results. The unwillingness of the Russian fleet at Port Arthur to leave the protection of the shore batteries enables Japan, in the opinion of the naval experts here, to conduct her landing operations unmolested. It is believed Port Arthur will be invested on the land side as quickly as possible. One of the Japanese objects in engaging the forts, it was further pointed out, was doubtless to draw the Russian fire and locate the guns on shore. That the Japanese ships withdrew was not regarded as indicating losses.

A contrast is also made between the condition of Japanese and Russian ships. All the former were docked within six weeks, and every bit of internal apparatus was in perfect order and tuned up for action, while some of the Russian vessels, it was stated, had not been docked for a year.

London, Feb. 10—"We were slow in negotiating, so we are making up for lost time by quickness in action," said Baron Hayashi this morning. "The engagements at Port Arthur and Chemulpo were merely in accordance with plans long matured. As soon as our forces are landed in Korea, I look for an important fleet action at Port Arthur. The Russian vessels are not likely to give up the advantage they gained by being under cover of their land batteries. By going to the Chinese side, however, the Japanese fleet, by high angle fire, can drop in shells, which would make it very uncomfortable for the Russian ships lying moored close to one another. Thereby it is hoped to drive out Viceroy Alexieff's forces. Probably, like Admiral Cervera, he may anticipate date, and come into the open of his own accord. The present events merely go to show the utter uselessness of Port Arthur from a strategic viewpoint."

According to the official advices received by Baron Hayashi, only four battalions of Japanese troops have up to the present been landed at Chemulpo, Korea.

New York, Feb. 10—All the members of the reserves have been commanded to remain at their present abodes, so that they can be found easily when it is decided to call them out, says a despatch to The Times from a Russian correspondent, who adds that one company of every regiment of guard troops in the districts of St. Petersburg and Moscow is to be sent to the Far East.

Cabling from Moscow a Times correspondent says: "Russia's military men do not conceal their satisfaction at the success of Russia's few months' delay. They declare their country today is ready for contingencies which would have been awkward a few months ago. They appear to be satisfied that Japan never can succeed in forcing Russia's land position, even though she comes out uppermost in the naval campaign."

JAPAN PREPARED FOR A LONG WAR

Financial Condition Especially Favorable for Meeting Big Outlay

SEA FORCE ABOUT EQUAL

The Destruction of Three of Russia's Ships Gives Japan a Great Advantage

London, February 11.—Despatches from the east confirm the report of the battle in front of Port Arthur, and the destruction of three Russian ships of war by the Japanese. This will leave the latter not only stronger in actual fighting strength, but also in prestige and ardour.

Tokio, February 11.—Comparisons of financial and naval strength are now being closely scanned, as if possessed the command of the sea, with sufficient monetary resources, Japan could easily place on the Asiatic continent an army which Russia would be perplexed to crush. It has been repeatedly alleged in ill-informed circles that the present state of Japan's finances handicaps her heavily for fighting purposes. Precisely the same estimate found general credence at the outset of the war in 1894. But in truth Japan's position today is incomparably better than it was then. She has in the vaults of the Central Bank specie aggregating 113,000,000 yen (£11,300,000), an altogether unprecedented amount. There also remains to the bank a legal margin of 35,000,000 of note-issuing power, which will probably be expanded to at least 50,000,000 when the invariable year's-end drain is succeeded by the spring deposits. Out of the proceeds of the 50,000,000 yen worth of bonds sold abroad last year a great part lies in hard money in London. Next fiscal year's budget shows a revenue of 225,225,000 yen, against an expenditure of 183,657,000 a surplus of over 41,-600,000 being thus available.

The treasury has also in hand the three capital funds—the naval maintenance fund (20,000,000) the education fund (10,000,000) and the famine relief fund (14,000,000)—one-half of this total of 50,-000,000 being in specie. Finally, the market rate of interest, which ranged from 10 3-4 to 12 1-4 last year, is now quoted at 6 1-4, and the banks throughout the country are embarrassed with funds for which they cannot find any profitable use. Japan's actual outlays during her war with China in 1894-95 were 105,-[illegible] yen on account of the army and [illegible] yen on account of the navy in which figures there were included large sums for the purchase of transports, men-of-war and ammunition, none of which expenses would now have to be incurred. As for the hard money side of the account, the aggregate outlays did not reach 12,000,000 yen. It may be said, therefore, that the financial situation is now notably favorable for Japan.

SEA FORCES NEARLY EQUAL.

Concerning the command of the sea, latest statement from authoritative Japanese sources shows the strength of the two squadrons as follows, premising that the Russian totals include vessels now on route for the far east: Of battle-ships Japan has six, with a displacement of 110,322 tons, but this superiority on Russia's side is somewhat redressed by the greater size, higher speed and heavier armament of the Japanese ships.

Of armored cruisers Japan has six, with a displacement of 68,758 tons, against five Russian, with a displacement of 49,016 tons.

Of protected cruisers capable of developing a speed of twenty knots and upward Japan has six, with a displacement of 25,104 tons, against eight Russian, with a displacement of 46,553 tons. In this list, then, which comprises first-class fighting material, Japan's ships number eighteen, of a total tonnage of 170,182, against twenty-two Russian, with a total tonnage of 204,201.

In second-class fighting material Japan has twelve cruisers of a speed of sixteen knots and upward, with a displacement of 37,730 tons, against one Russian, with a displacement of 3,275 tons, and Japan has twenty-three gunboats and coast-defense ships, aggregating 28,391 tons, as against twelve Russian aggregating 12,983 tons. Thus, in second-class material Japan has thirty-five ships, representing 66,150 tons, against thirteen Russian, totaling 16,273 tons.

Of torpedo destroyers Japan has nineteen, displacing 6,027 tons, against thirty-two Russian, displacing 9,600 tons and of torpedo-boats Japan has eighty-five, against Russia's fourteen. On the whole, then, the fighting forces of the two powers seem tolerably equal, while Japan has a great advantage in the proximity of her base and in the possession of ample docking facilities, the latter a point where Russia is notably inferior.

RUSSIA'S ENORMOUS ARMY.

Though it is not possible to suppose that the Russians will put half or even a third of their effective war strength into the field and though it has been announced that no troops will be withdrawn from the Austrian or Bessarabian frontiers, it may be interesting to state what the actual war strength of the Russian army is. It should be remembered that every year 890,000 young men are liable to conscription, of whom 320,000 are employed, the remainder passing into the reserve. The total war strength of the active army is twenty-four army corps, with fifty-one infantry, and twenty-three cavalry divisions, one rifle division, two rifle brigades. The reserve consists of twenty divisions of the first and fifteen divisions of the second class, 150 Cossack squadrons and seventeen horse artillery batteries of six fifteen-pounders each. The active army consists of 1,000 battalions of infantry, 720 squadrons of cavalry, 3,712 guns, 161 engineer companies, 39,000 officers and 1,286,700 men. The reserves, including local and fortress troops, bring the strength to 2,070 battalions, 1,000 squadrons, 6,500 guns, 75,000 officers and 4,600,000 men. These figures are in round numbers.

BRITAIN'S NEUTRALITY.

London, Feb. 10. — It was announced in the House of Commons that a proclamation of British neutrality will be drawn up at a special Cabinet meeting tomorrow.

EVERYBODY READS THE TIMES.

BRITAIN WILL CONQUER THIBET

ADD SIX MILLIONS TO EMPIRE'S POPULATION

HER OBJECT NAW CLEAR

Russia Not Now in a Position to Resist British Action

London, February 11.—The Post, in discussing the Thibetan expedition, says:

How to check Russia's advance upon India has been one of the perplexing problems of Lord Curzon's administration ever since his appointment as viceroy. The threatened war between Russia and Japan has given him the opportunity long sought to offer effective opposition by invading Thibet and opening that land of mystery to commerce under British domination.

The only buffers between the Russian Empire on the north and India on the south are East Turkestan and Thibet and the Russian Government has looked upon both with covetous eye. The insidious influence of Russian diplomacy penetrated as far as Lhassa, the Thibetan capital, and a favorable impression was made on the Dalai lama, the chief ruler, otherwise known as "his sublimity," by Mongol Buddhist priests, acting as Russian envoys, who gained entrance to the forbidden city with camel loads of presents.

Fearing the ultimate success of Russian diplomacy, a British military force was despatched from India into Thibet under the pretense of surveying the boundary line which is in the Himalaya mountains. The lamas and opposing force of Thibetans encountered by the "surveying party" were assured that the expedition had no designs upon Thibet and no intention of marching upon Lhassa, the forbidden city. As Thibet is under the the suzerainty of China, the Dalai lama appealed to the Chinese government. Inasmuch as the "boxer" uprising had clearly demonstrated China's inability to protect her own empire from foreign aggression, obviously she was too weak to protect the Thibetan boundary and the Dalai lama was advised not to resist.

In the meantime the British column, under Colonel Younghusband at last reports had penetrated the Himalayas 100 miles beyond Darjiling, constructing telegraph connection with Calcutta, and was progressing in a direct line toward the Thibetan capital.

The acuteness of the situation between Russia and Japan has relieved Great Britain of any further necessity

Continued on Page .

LATE WAR NEWS

Special—3.30 a.m.

Russian War Minister Arrives At Harbin.

St. Petersburg, Feb. 11.—The statement that United States Secretary Hay has issued a note to the powers asking them to join in insisting upon the recognition of the integrity of China and Corea during and after hostilities, created much comment in diplomatic circles here, where any action taken with the view of localizing the theatre of war is welcomed. At the Foreign Office, where there is some disposition to distrust the purpose of the United States, an authoritative expression in regard to the note was not obtainable.

London, Feb. 11—A despatch to Reuters' Telegram Co., from St. Petersburg, says that M. Kurino, the retiring Japanese Minister to Russia, and his staff, has left there for Berlin. There was a large crowd of people at the station, when the party boarded the train. Police and gendarmes kept a space clear for the travellers, and there was no hostile demonstration. Continuing, the correspondent says—"An imperial ukase has been issued authorizing Viceroy Alexieff to mobilize a reserve force within his Viceroyalty."

Washington, Feb. 11—President Roosevelt has decided to issue a proclamation of neutrality. It will probably make its appearance today.

Is This a French Grab?

Report That They Have Occupied Shan Ha Kwaiu Not Credited

Paris, Feb. 10— The Foreign Office discredits the reports from Tien-Tsin yesterday of the French occupation of Shan Hai Kwan—on the Gulf of Liao Tung—The officials say the negotiations on this subject occurred six months ago, without definite results, and that the reported arrival of French troops there arose from the shifting of the small garrison detachments. The officials add there certainly can be no significance in the French occupying the forts vacated by the Russians.

The British commander at Tien-Tsin, Brigadier-General Ventris, and his chief of staff proceeded to Shan Hai Kwan yesterday.

EUROPE SURPRISED.

London, Feb. 10— Japan's daring coup in opening war on the strong Russian position at Port Arthur has astounded Europe. Not only is it indicative of the tremendous energy with which Japan will force the campaign, but it is regarded as an aim at decisive blow as far as naval operations are concerned. Naval experts here are of the opinion that the disablement of three of the best ships of the Russian fleet is sufficiently important to assure Japanese victory upon the sea.

All acquainted with the personnel of the Japanese army and navy agree that the war will be a constant series of dare-devil exploits, even riskier in character than the bold dash at Port Arthur. The best officers of the navy have been begging for torpedo boat service, in which they could undertake enterprises involving almost certain death. The real difficulty will be to restrain the men from flinging away their lives unnecessarily.

The European public is already gaining the impression that the war will be short, sharp and decisive. There is even an impression that Russia, if driven from the seas, might be induced to make peace. This view, however, is considered to be far too optimistic.

The midnight attack of the Japanese upon the Russian fleet has filled the Russian capital with dismay. The news was read silently, with full recognition of its purport, but there was no noisy demonstration. Indeed, the attitude of the public in its self-restraint recalled that displayed in London during the dark days of the Boer War. Later, when it became known that a solemn service of intercession to beg the Divine blessing upon the enterprise to which the nation is committed was to be said at the Church of the Winter Palace, crowds began to gather, but nowhere was there seen any manifestation of fervor. Such a manifestation would not be compatible with the Russian character.

London, Feb. 10— Baron Hayashi, the Japanese Minister here, has received official confirmation from Tokio of the destruction at Chemulpo of the Russian first-class cruiser Varing and the third-class cruiser Korietz.

London, Feb. 10—A despatch to the Central News from Port Arthur says the Japanese fleet returned there Tuesday afternoon and again bombarded the Russian fleet and forts, but that it soon withdrew.

The losses to the Russians, the despatch says, were small. During the firing a Japanese cruiser grounded.

Perhaps the most absurd story told in connection with the Japanese-Russian situation is that if war comes and Great Britain is drawn in by force of her Japanese alliance then Germany will occupy Copenhagen and close the Baltic. Germany has already made clear her purpose to keep out of it, and to try and close the Baltic would be plunging into it headlong. Besides, she would have to take Denmark in with her in order to use Danish territory.

Moreover, the Kaiser knows his history pretty well and he has not overlooked Nelson in 1801 and Cathcart in 1807. Great Britain is as preponderant at sea now as then, and nobody knows it better than William II. He is not going to risk his navy in the Czar's quarrel.

Russia to Blame for War

Chinese Territory Encroached Upon by Czar--Under Many Pretences

London, Feb. 11—The war impending in the Far East is based on Japan's attempt to induce Russia to fulfill its pledges to evacuate Manchuria.

It was in 1896 that China was first led to grant certain railway-making facilities to Russia in Manchuria. She was said to have then resolved, in recognition of Russia's friendly attitude toward her at the time that she was at war with Japan, to grant to Russia the right to build and control certain railways passing east and west through Manchuria. Russia also acquired the right in case of war, of using Port Arthur as a base of military operations. Russia, moreover, on the plea that the needful control of the railway could not otherwise be assured, was to be permitted to some extent, to employ her military forces in that region.

March 27, 1898, Russia was granted by China a twenty-five years lease of Port Arthur and the adjacent Bay of Talien-Wan. Russia likewise acquired the right of building railways to the same points. Russia promised that both ports should be open to foreign trade and to the ships of all friendly nations. How lightly this promise weighed on the Russians has since been manifested. The convention of April 8, 1902, between Russia and China, however, provided for the evacuation of Manchuria by Russia under certain conditions, beginning with the province of Mukden—i.e., Shink-King or Southern Manchuria. The Kirin province—central Manchuria—was to be evacuated Oct. 8, 1902, and the Hei-Lung Chiang province—northern Manchuria—April 8, 1903. The promise was not kept, but April 18, 1903, Russia presented a series of demands on China, which were to be complied with prior to the evacuation, already ten days late. These demands covered exclusively political and commercial rights for Russia throughout Manchuria. China refused. The United States, which had been directly promised by Russia that the open-door principle should be maintained in Manchuria, was at the time asking China, and so was Japan, that certain places in Manchuria should be open to foreign trade. Russia held out for a time, but consented in July, 1903.

The treaties referred to were signed between China and Japan and the United States respectively in October, 1903 and were ratified, in spite of Russia's vigorous protests, January, 1904.

The Russian Minister at Pekin further engaged, Sept. 1903, that Mukden province should be evacuated Oct. 8, but the engagement was accompanied by conditions impossible of acceptance, and after a pretense of the removal of troops had been made the force was reinstalled and the city of Mukden itself, sacred to the Chinese as the birthplace of the present Manchu dynasty, was ostentatiously reoccupied. Such is the history of Russia's dealings with respect to Manchuria. Since last autumn there have been frequent exchanges of negotiations between Japan and Russia, and Japan, feeling that Russia has made no effort to meet its terms, will now force the issue by war.

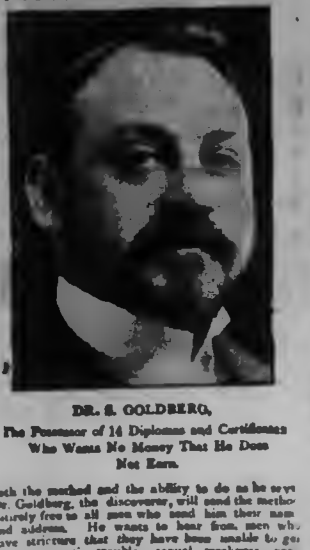
CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has



DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

[The] paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at [illegible] per month, and to outside points at $3 per year strictly in advance.

EXPERTS AND THE WAR

Men with whom war is a profession naturally look upon the approach of hostilities in the East with different eyes to the common citizen, or—literally—"citizen of commerce." While they will deplore, like the rest of us, the loss of life, they will also expect to see some practical experiments in the art of modern fighting which cannot fail to be of great value to them. This is a case in which a pound of burnt gun-powder may be worth a ton of theory.

Undoubtedly the first and probably the most important object-lesson which such a war would afford would be a naval battle between two well-equipped and well-managed modern fleets. Already we have had a sample of this in the partial destruction of three Russian ships. This the naval experts of the world have never seen. Japan smashed an absurdly helpless Chinese fleet, and Dewey circled around out of practicable range and pounded to pieces an obsolete Spanish squadron; but neither of these performances were naval warfare. They were little better for real instruction than the every-day manoeuvring of an up-to-date fleet, including a little target practice.

But both the Russian and Japanese fleets are supposed to be in first class order, and, if they meet, we shall see a battle in which both parties fight. This will show us for the first time what a modern steel-clad ship, with modern guns, can do when under a hail of steel from another vessel. The effect of gun-fire upon the intricate equipment of such a fighting machine—half electricity and half mathematics—will be awaited with a feeling more approaching anxiety than interest in many quarters. Britain, for example, has put her trust pretty fully in the modern navy, and she will be superlatively eager to see how it stands the test of real war.

Then we may see more of the work of torpedoes and torpedo boats than we have ever had an opportunity of studying. The progress of the war would be impossible to forecast, of course; but unless the triumph of one of the parties were immediate and crushing, there would be much naval skirmishing and scouting, and the value of swarms of lighter craft would be made clearer. This is a point that France will watch with deep concern, for she has devoted herself very largely to the building of these "hornets" of the sea.

Land operations are always instructive and much easier to study than those at sea. A foreign expert on a battle-ship stands considerable chance of never coming to shore again with his impressions. But land operations have been fairly common even under modern conditions. The Boer war taught Europe much, and the Greco-Turkish war was not without its educational value. Still if Russian and Japanese armies meet each other on the Mainland, their movements will be followed by the military representatives of the powers with the keenest interest; for they will be two modern forces fighting in the territory comparatively foreign to them both. The home knowledge of the Boer will be lacking; and it is not likely that the almost miraculous skill in using cover and fighting from concealment and finally dispersing with the recklessness of a rout without its disastrous disorganizations, will be possessed by either antagonist. That is, the conditions of a Russo-Japanese land struggle would more nearly resemble a great European war than any we have seen since the Franco-Prussian conflict, and the power of the rifle has immensely increased since then.

Another feature which will be closely watched will be the two commissariats. Russia will be at a tremendous disadvantage with her base so far distant, and her connection with it so slender. Japan will be better placed to feed her army, but she must keep command of the sea and must find the food. That a bad commissariat can cripple a fine force, France learned in 1870, and France and England together before Sebastopol. Altogether there will be much for the professional soldier and naval fighter to study; and new departures in naval construction and military tactics may date from the coming war.

NO SUBSTITUTE FOR HOME RULE

Home rule in Ireland remains the one exclusive goal toward which the policy of the Irish party in parliament is directed. This John Redmond has reiterated with emphasis in the House of Commons. Every concession the Irish have received, such as, for instance, the land bill of last year, will be used, he declared, merely as an aid in the great struggle to secure home rule. The Irish, he went on to say, would rather govern themselves badly than be governed well by another nation.

His speech was equivalent to a notification to the Balfour government that if it desired the support of the Irish votes during the coming session it must do something more to help on the attainment of the Irish ideal.

Mr. Redmond and his followers know the advantage they have this year, and evidently purpose to use it. They come so near to holding the balance of power that if they watch for their chance they can doubtless overthrow the ministry at their pleasure. Apparently it is indifferent to them which side they take on the fiscal question or any other great question of English policy. They will vote on these questions solely with a view of securing the most advantageous terms for Ireland.

It is easy to see how unfortunate it is for England that a condition of this kind should continue to exist. Just so long as the Irish members continue to sit in parliament so long it will be impossible for any imperial issue to be decided solely on its merits. "Playing politics" will perforce interfere with general legislation in as great a degree as it does, from other reasons, in our own Canada.

THE KAISER AND THE EASTERN SITUATION

Perhaps the most absurd story told in connection with the Japanese-Russian situation is that if war comes and Great Britain is drawn in by force of her Japanese alliance then Germany will occupy Copenhagen and close the Baltic. Germany has already made clear her purpose to keep out of it, and to try and close the Baltic would be plunging into it headlong. Besides, she would have to take Denmark in with her in order to use Danish territory.

Moreover, the Kaiser knows his history pretty well and he has not overlooked Nelson in 1801 and Cathcart in 1807. Great Britain is as preponderant at sea now as then, and nobody knows it better than William II. He is not going to risk his navy in the Czar's quarrel.

DOURO.

The funeral of the late Mrs. Stephen Murphy, of Indian River, took place on Saturday afternoon at 2 o'clock from the family residence to the Roman Catholic cemetery, Douro. The deceased was the only daughter of Mr. and Mrs. John O'Brien, of Douro, and leaves four surviving brothers, whose names are, Samuel, Otonabee; Frederic, Francis and William, Douro. She was only aged 28 years, and her death seems very premature. The deceased had been ailing for six months and leaves no family. The pall bearers were her four brothers and her two uncles, Michael and Alexander O'Brien.

$100 REWARD $100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address,

F. J. CHENEY & Co., Toledo, O.

Sold by Druggists, 75c.

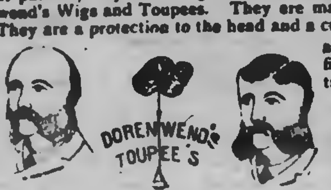
GENTLEMEN WHO ARE BALD—Even though you are bald or partially so you can regain your former appearance by wearing Dorenwend's Wigs and Toupees. They are made to match any shade of hair. They are a protection to the head and a cure for chronic cold in the head and catarrh. They are perfectly fitted to the head and bear no trace of artificiality.



Prof. Dorenwend will take measurements and demonstrate the merits of his Wigs.

Don't forget the day and date

Bad Complexion

Has Its Cause in Impure or Impoverished Blood

To have a soft, smooth skin, free from eruptions and unsightly blemishes, the blood must be maintained in a healthy condition.

Face powders, lotions and other toilet preparations may for a short time cover up a multitude of wrongs in the blood, but they cannot remove those red, disfiguring pimples that are the bane of so many young ladies' lives.

Why not use Ferrozone? It is an unfailing cure for the worst kind of skin disease, the most effective of all blood purifiers, and cures bad complexion by removing its cause.

Ferrozone invigorates and purifies enfeebled blood. Makes it strong, rich and red. Ferrozone puts power into the blood to nourish the body and all its organs. It is a regulator of acknowledged merit, and is quite unrivalled as a remedy for Female disorders.

Mrs. Shanly, of Pittsburg, Ont., says: "For five years my face was disfigured by raw, bleeding eruptions that resisted all treatment.

"Three Kingston doctors did their best for me and when they acknowledged themselves beaten, I tried Ferrozone. The first box helped me quite a little, and by the time I had used six boxes I was cured. Ferrozone is a fine remedy for womanly disorders of all kinds and I can highly recommend it." (Signed), Mary Shanly.

Growing girls, women, men, in fact everybody can derive untold benefit from Ferrozone. It is a tonic for the blood, brain and nerves and worth its price ten times over to everyone who uses it.

Three weeks' treatment contained in a box of sixty-three chocolate coated tablets, cost 50c., or three boxes for $1.25. Sold by all Druggists, and N. C. Polson & Co., Kingston, Ont.

Moody's Vote of Thanks.

Possibly the most novel response ever made to a request to return a vote of thanks to a chairman was made by Mr. Moody during his first visit to England.

He had attended a meeting at which the Earl of Shaftesbury was chairman. The duty of proposing a vote of thanks was assigned to him, and the announcement made.

"Our American cousin, the Rev. Mr. Moody, of Chicago, will now move a vote of thanks to the noble earl who has presided on this occasion."

The whole thing was quite out of Mr. Moody's line. English formalities might or might not have come gracefully from his lips had he attempted them, but he did not. With an utter disregard of conventionality he burst upon the audience with the bold announcement:

"The speaker has made two mistakes. To begin with, I'm not the Rev. Mr. Moody at all. I'm plain Dwight L. Moody, a Sunday school worker. And then I'm not your American cousin; by the grace of God, I'm your brother, interested with you in our Father's work for His children.

"And now about this vote of thanks to the 'noble earl for being our chairman this evening.' I don't see why we should thank him any more than he should thank us. When at one time they offered to thank our Mr. Lincoln for presiding over a meeting in Illinois he stopped it. He said he'd tried to do his duty, and they'd tried to do theirs. He thought it was about an even thing all around."

That opening fairly took the breath away from Mr. Moody's hearers. Such a talk could not be gauged by any known standard. Mr. Moody carried his English audience with him from that beginning to his latest labors.

Why Willie Walks With a Tired Feeling.

"Hoo, hoo, hoo," rang through the house at 2 a. m.

"Great Governor! What is that?" and the head of the house sat up in bed and blinked at an electric light shining through the window.

"John, stay right where you are; I'll not let you go down stairs to be killed. Did you ever hear such a noise?"

"Mama, what is it?" came in an agitated whisper from the next room, and then the daughter rushed wildly into the parental bedchamber.

"Keep cool, now. Don't go into no highstrikes. I'm going down to see what that is," and he dug up an old muzzle-loading pistol he had carried in the civil war and that had been loaded since 1873. "I'll show 'em. Every man's house is his own cast—"

"Hoo, hoo, hoo."

The father dropped the gun and it blew a whole corner off the bureau. The daughter dived under the bed and the mother yelled "Murder!" at the top of her lungs.

"Shut up!" ordered the veteran, as he reached for his artillery. "Stay right where you are. I'll fight my way to the telephone and get the police. If they get to shooting down there don't show a light. I know the house and they don't."

"Hoo, hoo hoo," just as the old gentleman reached the top of the stairs. He went down like a cartwheel and shot a hole in the ceiling as big as the bottom of a tub.

"Did you hear my owl?" shouted Willie, as he dashed from the third story. "Got him in the country yesterday and hung him in the dining room when I got home last night. Hain't he a dandy?"

Poor Willie! He walks like a boy with inflammatory rheumatism, and the last he saw of his owl it was flying over the barn toward Redfield.—Detroit Free Press.

The Policeman's Crossing.

"What sort of vehicle gives me the most trouble?" said the policeman who acts as convoy to the shopping women at a crowded corner on Sixth avenue. "First, delivery wagons from the big stores, for they are always rushed along, and next the private carriages, drawn by prancing horses, with the coachman a-dreaming how fine he is and how fine the people are he has inside. But from horse car to truck all give trouble enough. Yet I have not had a person hurt in the two years I have had the crossing.

"My first rule is that it is always safer to cross behind a vehicle than before the horses' heads, so you don't see me doing the bridle grabbing act very often. Another thing I believe is that one-half the women, although they rush past in such a businesslike way, are only out to kill time, and with no real thought of buying anything. So I don't mind holding a group of 'em back to let a wagon or a car pass, for they might as well waste five minutes here as in turning over goods at a shop counter.

"Fine days my work is always the easiest, for every one moves quickly then, and shoppers, drivers, and even the horses are good-natured. Rainy, foggy days are the worst, for the dirtier the walking the more women there are out, for some reason that I can't understand. Then they all carry umbrellas to push into my face and into each other's faces, and between opening and closing cabs for women at the car steps and keeping the wet and rain-blinded horses from walking on 'em, I have my hands full. And I'm regarded as a sort of walking directory, besides. I have to know the exact location of every store, big or little, theatres, ferries, railroad stations, and countless other things. Sometimes I think that when a shopping woman isn't shopping she is thinking up questions to ask the policemen. But women are too cute to say a word unless safe on the sidewalks which is one reason why it is easy to pilot them over the crossing."

Beulah—Did you have a good time at the beach?

Belle—No! It was awfully stupid. Only a few men there?

Yes; I was engaged to the same man the whole summer.—Yonkers Statesman.

Mr. Kidder—Ah, how-der-do, Doctor! If you have a few minutes to spare, I wish you would come over to my house and chloroform my youngest boy.

Dr. Price—What is the matter with the lad?

Mr. Kidder—Oh, his mother wants to comb his hair.—Harper's Bazar.

"Yes," said the dentist, "to insure painless extraction you'll have to take gas, and that's fifty cents extra."

"Oh!" said the farmer, "I guess the old way'll be best; never mind no gas."

"You're a brave man."

"Oh! It ain't me that's got the tooth; It's my wife."—Philadelphia Ledger.

Carrie—I'm sure you misjudge Mr. Sweetser, papa. He is a man of great ambitions. You should hear him tell of the things he is going to do.

Carrie's Papa—And I suppose I'm one of 'em, but I reckon he'll find it harder to accomplish than he fancies it is.—Boston Transcript.

PULLING UP STAKES
IN PETERBOROUGH

No Matter When or Where You See a Bargain, There's a Better One For You At

GOUGH BROS.
GOOD-BYE SALE

The second week adds to the intense interest of this sale. Its an occasion that warrants unbridled enthusiasm. Nothing can stop its progress.

Do you know how we're fixed? $68,000 worth of Suits, Overcoats, Furs, Boots, Shoes, Hats, Caps and Furnishings, must be slashed to pieces to bring down the stock. Are you thinking? Can't you see what this means? Can't you see that we must sell at a heavy loss in order to pull up stakes in time to let in the new firm.

WILL ANYBODY KINDLY RISE IN THE MEETING and say that Gough Bros. ever was or ever will be undersold. The fears of competitors and the frantic efforts of their bosses, cut no figure with us. No cast-iron "transformation" sale bulletin of reduced prices can side-track GOUGH'S GOOD-BYE SALE. We stand by the town and will issue new lists of cut prices every week that must beat the best markings of any other dealer by 25 per cent.

If anybody offers to sell Men's Overcoats and Suits worth $10 for $6.98, down goes Gough's prices to $5.98.

If anybody offers to sell Boys' Suits and Overcoats worth $6.00 for $4.48, down goes Gough's prices to $3.48.

If anybody offers to sell $3.00 Trousers for $2.48, down goes Gough's prices to $1 98. And so on all through the gamut.

Don't you see the logic in our slashing—we're pulling up stakes in Peterborough—necessity knows no law,—the stock can't be moved or kept for another season.

HE BANNIE MINE

ONE OF THE BEST AND SAFEST INVESTMENTS EVER OFFERED THE CANADIAN PUBLIC.

he Bannie Gold Mining & Milling Company

Offers 20,000 shares of its treasury stock at

0 CENTS PER SHARE FOR 60 DAYS ONLY

The money obtained from this sale is to be us.d for development and equipment purposes

tters fromprominent people regarding the Bannie Mine

OHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am in- ed that the Bannie mine is among the very best prospective proper- in this country, and well worthy of investment.

Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear property well and favorably spoken of by parties who have been on ground and whose opinion should carry considerable weight; and the that the miners who work in said mines are, according to reliable in- mation, investing in Bannie stock, would indicate that the property pos- a good deal of merit. Yours very truly,
R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise.
OHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. e Bannie mine is considered by all mining men here to be one of the prospects for a big mine in this part of th ecountry. The officers are men of standing and good, conservative business men. The miners work- in the mine are taking one-half their wages in stock, which speaks for elf. We consider stock a good investment. Respectfully,
D. LEVY & CO., (Inc.) by N. Levy, Pres.

OHN BROS, Cincinnati, O. Prescott, Ariz, 7-28-03

Gents—Replying to your wire of today, we have heard a great many good, good, reports of the Bannie mine, and have never heard a man say against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. e believe that this company is mining on a strictly business basis and a good investment. Yours truly,
SAM'L HILL HARDWARE CO., Ray Hill, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * * The nature of the ore is a heavy iron, and copper sulphide, which carries very good gold, silver and copper . The ore bodies, as far as they have been explored, are quite large well defined, which indicates permanence. My information is principal- from practical miners who have been working in the property, therefore consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising in this section. Yours very respectfully,
ED. BLOCK.

Address all communications to Robert Kidd, Fiscal Agent, Peterborough, to W. J. WILSEY, Prescott, Arizona.

THE JAPANESE TORPEDO BOAT DAMAGE THREE RUSSIAN WARSHIPS

Three of Her Warships, Two Battleships and A Cruiser, Were Put Out of Business By Japanese Near Port Arthur

SERIOUS DISADVANTAGE TO RUSSIA AT THE OUTSET

It's a Staggering Blow to Russia is the Opinion of British Experts

St. Petersburg, Feb 9—An official despatch received here says that Japanese torpedo boats have attacked the Russian squadron in the outer roads at Port Arthur, and that three Russian ships were damaged.

Admiral Alexieff's official report of the attack by the Japanese is as follows—

"I most respectfully inform your Majesty that at or about midnight of February 8-9, Japanese torpedo boats made a sudden attack, by means of mines upon the Russian squadron in the outer roads of the fortress of Port Arthur, in which the battleships Retvizan and Czarevitch and the cruiser Pallada were damaged. An inspection is being made to ascertain the character of the damage. Details are following for your Majesty."

Port Arthur, Feb. 9— Japanese torpedo boats attacked the Russian fleet here during the night and three of the Russian ships were badly damaged. The Japanese, who thus scored the first success of the war, escaped undamaged.

In consequence of the attack by the Japanese torpedo boats, martial law has been proclaimed here.

Berlin, Feb. 9—A special telegram from St. Petersburg says three Russian ships at Port Arthur were severely damaged last night by torpedoes discharged from Japanese torpedo boats while the latter were passing the harbor. Subsequently a large fleet of Japanese battleships and cruisers appeared before the port.

Berlin, Feb. 9—The comment at the Marine Department on the success of Japan's first blow at Port Arthur was that even the temporary disablement of three warships placed the Russians at a great disadvantage in the future operations. It was added that the torpedoing of the enemy's vessels lying under powerful land batteries must have been carried out daringly and skilfully. As Viceroy Alexieff did not mention any Japanese losses in his first despatch the common talk of the naval officers was that the Japanese have shown that they can handle their ships better than the Russians.

London, Feb. 9—The naval men in London regarded the result of Japan's first attack with torpedo boats on the Russian fleet off Port Arthur as being a staggering one. They pointed out that Viceroy Alexieff's reference to "mines" obviously meant "torpedoes," and said that if the Russian vessels had been struck by Whitehead torpedoes they probably have been sunk or are resting on the mud in Port Arthur, in any case, hopelessly out of action for a considerable time.

Paris, Feb. 9— The news of the result of the Japanese attack with torpedo boats on the Russian fleet off Port Arthur created consternation here. The advices received by officials of the foreign Office were similar to those of the St. Petersburg Official Gazette, showing that two Russian battleships and one cruiser were damaged, and also showing that four torpedo boats had made the attack.

An official of the Foreign Office said: "It is to be profoundly regretted that such a decisive step has been taken, as it terminates the efforts the powers might have made to avert actual warfare."

London, Feb. 9—A Japanese exporter has received information that Russian warships have captured the Japanese steamer Inaba Maru near Hong Kong. The steamer was bound from London to Yokohama with mails and merchandise.

Paris, Feb. 9, 4.55 p.m.—It was announced at the French Foreign Office this afternoon that the Russian cruiser Pallada was sunk in the torpedo attack made by the Japanese on the Russian fleet off Port Arthur. The injuries sustained by the Retvizan and Tsarevitch are not known.

It was reported on the same authority that the cable from Vladivostock had been cut.

JAPAN'S PLANS.

Night Torpedo Boat Attacks Are to Be Kept Up.

London, Feb. 9— The Japanese Minister, Baron Hayashi, says the Japanese fleet is not likely to blockade Port Arthur. His knowledge of the Japanese naval plans, as tentatively prepared, leads him and others here to believe that the Japanese fleet is now lying between Che-Fu and the Yalu River, screening the landing of troops, one army corps at Fusan and two at Pen-Yang, Korea.

Night torpedo attacks on the part of the Japanese fleet will, it is believed, be kept up so long as the Russian fleet maintains its necessary open position outside of Port Arthur. This will be done in the hope of breaking up the Russians' nerve.

The troops landing at Pen-Yang will be pushed toward the Manchurian frontier. Those at Fusan will proceed to 5 o'clock this morning, and dispelled lingering hopes that war could be averted.

At the Action of the Japs in Striking Hurriedly.

St. Petersburg, Feb. 9 — The news that Japan has duplicated her tactics at the opening of the Chino-Japanese war by a torpedo attack on the Russian ships off Port Arthur created intense excitement. The bare announcement arrived from Viceroy Alexieff at Seoul. Unless Viceroy Alexieff assumes the aggressive no serious battle is expected until the disembarkation of the Japanese troops is completed.

RUSSIA FEELS BITTER.

The Czar and his Ministers immediately accepted the gage and prepared to face the reality of war. His Majesty's manifesto declaring a state of war to exist is expected to be issued to-morrow.

Feverish activity reigned at all the Ministries, and war preparations were pushed in all directions.

The Russian Red Cross already has sent 2,000 beds to the Far East, and Sisters of Mercy are leaving. Crowds of volunteers besieged the general staff offices.

The naval reserves have been called out.

The action of the Japanese in attacking the Russian fleet without a declaration of war is denounced as an outrage by the Russians generally, and the result, instead of discouraging them, seems to have been to furnish the spark necessary to fire Russian patriotism. The country is aroused.

JAPANESE WANTED TO LEAVE PORT ARTHUR.

Alexieff Tried to Re-assure them and Promised Protection for Their Families.

Chefoo, Feb. 9 —The Japanese residents are leaving Port Arthur. On Monday a steamer took one hundred and proceeded to Dalny, thence to Japan. Others are going to China.

Admiral Alexieff tried to reassure them and promised protection to their families.

Russian officers and foreign merchants are leaving here in fear that the Chinese will rise.

War correspondents will use despatch boats.

Poultry For England.

The Department of Agriculture has received the following communications from British dealers who desire to purchase Canadian poultry. One of the dealers is at present in Canada negotiating for the shipment of poultry. He writes the department as follows :—"I am in Canada soliciting consignments of poultry to England. My name has been before your department for several years as a large importer of poultry. You have sent me consignments of chickens. I should be glad if you would name the Canadian poultry shippers and mention my name if possible, so that they may commence to ship early in December. Yours truly (Signed) James Blackburn."

For four years the Department of Agriculture has exported chickens fatted at the illustration stations to Mr. Blackburn. His address is Wholesale Fish Market, Manchester, England. The dealings have been perfectly satisfactory, and the prices obtained for the chickens have been profitable. Mr. Blackburn stated that he would like to handle 3,000 cases of chickens per week. The department has also received a letter from Mr. William Rothwell, Manchester. Mr. Rothwell says: "There seems to be a very good prospect for all kinds of poultry this Christmas. If you can give or have any consignments sent me, you can rest assured of the utmost value being obtained. Cash and sales sent immediately goods are disposed of. The probable prices are as follows: large cock turkeys, plucked, 14 to 18 pounds, 9d to 10d per pound; plucked turkeys, 12 to 13 pounds, 8 1-2d to 9d per pound; plucked turkeys, 9 to 11 pounds, 7 1-2d to 8d per pound; plucked chickens, 8d per pound; plucked ducks, 7d per pound; turkeys in feather, 6 1-2d to 7d per pound. I trust that I may have consignments from Canada."

Mr. Hare, chief of the Dominion Poultry Division, stated that these approximate prices should offer substantial inducements to Canadian exporting firms to ship poultry to Great Britain. The poultry should be forwarded in a steamship equipped with cold-storage. Even on small consignments the freight charges will not be over one cent per pound.

British Object to Mixed Lots.

Writing to the fruit division, Ottawa, Mr. A. W. Grindley, inspector of the Department of Agriculture in Great Britain, quotes as follows from a letter received from a firm of fruit importers: "If your department, through a circular, could induce shippers to use some common sense in sending apples, you would do them much good financially. For instance, yesterday the Tunisian was cleared up, the bulk having been disposed of earlier in the week, and in the catalogues there were over 1,250 lines under 10 barrels each (we should guess averaging two and three barrels), of different varieties. We do not know of any trade where so much money is being wilfully thrown away."

Regarding this point, Mr. Grindley refers to one lot of apples catalogued on October 23, in which there were 30 varieties in a lot of 41 barrels, and says that no buyer will pay top prices for these mixed lots, and that the shipper loses heavily every time. The establishment of co-operative packing and shipping houses, advocated by Mr. MacKinnon, is pronounced by Mr Grindley a splendid idea, and one that, if carried out, would, to a large extent, do away with the small lots of mixed varieties of which importers complain.

The Playful Czar.

London "Truth."

I do not know whether—as stated by a medical journal—Peter the Great first made Spa a fashionable resort. But what I do know is that when his Czarish Majesty—as he was then termed—frequented a watering-place in order to benefit his health, his habits were peculiar. When he visited Marienbad or Carlsbad (I think it was Carlsbad), his doctor recommended him to take three glasses of water on rising. The next day, on calling upon him, he found Peter with three water barrels before him. He had got through the first and was attacking the second, but he complained that he was already feeling somewhat uncomfortable. The doctor assured him that he had recommended three glasses and not three barrels. In order to avoid such mistakes in future, Peter took up a pistol and shot him through the head.

"Pa, what's an auto-da-fe?" "Ask your uncle Billy; he knows more about the French machines than I do."

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 15th from 5 cents to 10 cents per share. This company owns 6 claims, 600 x 1500 each. A 70 foot shaft on the Martha claim shows a vein of $30.22 ore 3 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 160 feet in shows a rich body of ore. Ore assays from $30.22 to $10,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay them $240 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address,

W. D. WALRATH,
NOTTINGHAM BUILDING, - SYRACUSE, N.Y.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.64 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $13.50. This being a general sample taken from the dump. The other two assays are $42.60 and $79.00 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet further it will encounter the intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

The PETERBOROUGH BROKERAGE CO, Fiscal Agts.
PETERBOROUGH, ONTARIO.

Equitable Gold Mining Co.

R. C. LANE, President. F. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 3,250 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $8.25 per ton as cost of mining and milling. One-half of all over and above this $8.25 per ton goes to the former owners till they receive the total sum of $185,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 265-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

FRED'K DALTON PARKER, LAWYER,	LOS ANGELES, CAL
GEORGE T. ORDWAY, COMMISSION BROKER,	CHICAGO, ILL.
EGBERT CHAMBERLAIN, Dry Placer Miner formerly of California.	NEW YORK

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. W invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine—Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house of sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-3c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

JAPAN'S LAST GREAT STRUGGLE AND TRIUMPH

How the Little Empire Conquered China Without a Single Set-Back

JAPANESE SWEPT THROUGH ALL BEFORE THEM

Fighting Began Before War's Declaration—Japanese Soldiers are the Best in the World

The last great war in which Japan was engaged was that with China in 1894-5. This also was over Korea. When the Koreans split into Chinese and Japanese factions and appealed to each power for aid, China sent troops to quell the riots. Japan protested that this was a violation of the treaty of 1876, and landed 5,000 men on the west coast on the pretext of escorting the Japanese Minister in safety from the country. The army, having seized strategical positions, the Mikado's ambassador, Mr. Otori, made a demand for five immediate reforms in Korean affairs. China demanded the withdrawal of the Japanese troops, invoked in vain the aid of Russia, but secured an appeal by the European representatives for mutual concessions. Then the Japanese seized the Korean King July 23, and compelled him to appoint Tai Wen Kun as regent.

* * *

FIGHTING BEFORE WAR'S DECLARATION.

Hostilities began with a naval engagement in Prince Jerome Gulf on July 25 and a sea battle between cruisers, on the same day off Tomao Island. In each case the Japanese were victorious. The formal declaration of war was made August 1, and by the 26th of the same month Mr. Otori had concluded a treaty of alliance between Japan and the Korean Government. Then the "yellow war" began in good earnest on land. Its whole burden fell on Li Hung Chang, the Viceroy of China. His army was not one-quarter the strength of the Japanese. Deficient and antiquated in equipment, with poltroons for commanders, the land forces were on a par with the navy, crippled by the resignation of all the English engineers (in accordance with neutrality proclamations), and commanded by cowardly Mandarins.

* * *

JAPANESE SWEPT ALL BEFORE THEM.

Under Field Marshal Count Yamagata, the Japanese soon landed 10,000 troops at Fusan, 3,000 at Gensan, and 20,000 at Chemulpo. To oppose these some 30,000 Chinese troops were concentrated at Wiju, whence, with some reinforcements, they were marched one hundred miles southward to confront the victorious Japanese at Ping Yang. In this vicinity strategic movements and skirmishes occurred for some time, generally resulting in favor of the Japanese. The Japanese commanders were graduates of the first military schools of Germany, the soldiers armed with modern rifles, and the entire army drilled in European methods.

* * *

CHINESE SLAUGHTERED BY THOUSANDS.

Six weeks after the declaration of war came the first great land battle of the campaign. On September 16, the Japanese attacking the Chinese lines at Ping Yang in front, at the same moment that a second column came into action on the flanks and rear, routed their opponents with terrific slaughter. The Chinese loss was over 16,000 killed, as against the Japanese casualty list of thirty killed and 270 wounded. Four Chinese generals, many thousand rifles, immense military stores, and $3,000,000 fell into the victors hands. Disaster on sea followed the next day, and at the sea fight of the Yalu River the Chinese navy was almost entirely destroyed or captured.

* * *

THE CAMPAIGN IN MANCHURIA.

After the capture of Ping Yang and the whole of the Chinese invading force the Japanese marched to invade Manchuria. Victorious at Wiju, and carrying Hu-Shan by vigorous assault on October 26, the Japanese columns marched through Manchuria, and proceeded to invest Port Arthur. Here the demoralized remnants of the Chinese army made a desperate stand, until, panic stricken by repeated assaults, and deserted by their commanders, they fled in disorder, and Port Arthur fell on November 22 into the hands of the Japanese, with eighty guns and immense stores. With the fall of Port Arthur, the reserves of Japan were called to the colors, and a second army mobilized and landed on the Chinese coast near Kiau-Chow, in the Gulf of Liao.

* * *

STUBBORNLY CONTESTED BATTLE.

Marching through Manchuria in the direction of Niu-Chang, though retarded by the severe cold, the Japanese fought at Kung-Wa-Sai on December 19, the most stubbornly contested battle of the war. Four charges were necessary to carry on the war. Four charges were necessary to carry the Chinese works, and these cost the Japanese [illegible] men. The victors advanced to Chung-Su, and occupied a position of great strategic value, preparatory to a march on Pekin in the spring. On February 16 the naval station of Wei-Hai-Wei fell into the invaders hands, and China hurried a peace embassy to Tokio to beg for terms.

* * *

PEACE WHICH WAS NO PEACE.

By the Treaty of Shimonoseki, signed April 17, 1895, and ratified at Che-Foo May 8, the independence of Korea was proclaimed and declared, and the southern portion of the Chinese Province of Feng-Tien, being the part of Manchuria occupied in the war, was ceded to Japan with a war indemnity equal to $153,000,000 in Canadian money. Formosa was also ceded to Japan. At the request of Russia, and in consideration of an increase in the war indemnity, Port Arthur was evacuated by Japan only to fall into Russia's hands, and form a base for the Muscovite advance which seeks to deprive Japan of all she won in 1895. The recent aggression of Russia is fresh in the public mind, and need not be recounted here.

London, Feb. 9—I understand that several of Gerald Balfours colleagues think his statement in the Commons last night went further in the free trade direction than they desired, and they may repudiate it in the course of the debate.

Mr Chamberlain is so deeply affected by the sudden death of a staunch supporter, Powell Williams, M.P. for South Birmingham, that he declared he will take no further part in the discussion of the address.

ADDITIONAL NEWS OF DEFEAT OF RUSSIA'S FLEET

The Account of the Naval Engagement Between the Two Fleets in the Harbor

Chefoo, Feb. 10—3 a.m.—Str. Columbia has arrived at Port Arthur with additional news of the attack by the Japanese fleet upon the Russian fleet in the roads outside the harbor of Port Arthur.

The Columbia was in the roads and felt the first shock of the torpedo explosion at 11 o'clock Monday night.

The attack continued all night and at daylight Tuesday morning, two Russian battleships and one first-class Russian cruiser were seen to have been disabled and beached at the head of the harbor. The cruiser was badly listed. The Russians left one cruiser outside to watch for the Japanese ships.

This cruiser was fired upon by the Japanese, and the other Russian vessels took up their anchors and cruised around the Roads' Lead.

The Japanese fleet came up within 3 miles and the battle commenced.

The Japanese fired on the Russian ships with the result that they were struck by shells but only slightly damaged.

The Russian fire fell short.

The Columbia steamed away while the battle was in progress, but later saw the Russian fleet leave.

The two battleships disabled are the Totabo and the Czaritch.

The disabled armoured cruiser Bolarn, and the grounded battleship blocked the entrance to the harbor, preventing gunboats from getting out and battleships and cruisers from going in to get coal.

Besides this, Japan has the Russian gunboats Voraig and Kolatz caught at Chemulpo. They were bound for Vladivostock.

RUSSIAN LOSSES

Officers wounded	3
Men killed	9
Men wounded	11

On the shore-battery one man was killed and three wounded.

JAPANESE LOSSES.

None reported.

$1,000 TO LEARN NAME

Illinois Farmer Rewards Man Who has the Secret of his Birth

Laporte, Ind., February 10.—One thousand dollars is the reward for learning his real name given by Henry Osborne, formerly knon as Henry Cherry, a wealthy farmer of Ogden, Ill. Tiffany Bowen, of Byron, O. T., was the lucky man who had the information. Forty years ago Mr. Osborne was taken from his mother, a poor widow, and adopted by a man named Cherry. Mrs. Osborne had requested of the adopted parents never to tell her son his name.

WILL FURNISH CUTICLE

Former Iowa Subject of Skin Grafting at Los Angeles

Los Angeles, Cal., February 10.—An extensive skin grafting operation is now in progress at the Emergency Hospital. January 25 C. M. Schlasier, formerly of Des Moines, Iowa, was horribly burned. The cuticle is entirely missing from an area of three and a half square feet of his body. Two hundred persons will furnish the cuticle needed for grafting. The Modern Woodmen of America have undertaken the work of supplying the men from whom the skin may be taken.

THE COLORADO AND CONNECTICUT GOLD MINING COMPANY

(Incorporated under the laws of South Dakota.)

Main Office: MERIDEN, CONNECTICUT.

Capital $400.000 80,000 Shares at $5.00 each, full paid and non-assessable

OFFICERS

WILLIAM GARLICK, Wholesale and Retail Ice Dealer, Meriden, Conn., President
JAMES A THOMPSON, Investment Securities, New York City, 1st Vice-President
GEORGE S WILCOX, Retired Manufacturer, Meriden, Conn., 2nd Vice-President.
B F BARNES, Manufacturer, Meriden, Conn., Treasurer.
WILLIAM G. CORVES, Miner, Meriden, Conn., Superintendent
ARTHUR S. GARLICK, Meriden, Conn., Secretary

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE S. WILCOX, RICHARD F. DORSEY,
WILLIAM GARLICK, ARTHUR S. GARLICK, B. F. BARNES

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hindsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—*Private wagon road from main road up to mouth of tunnel, and up to shaft and houses.* Tunnel is 5x7 feet and in 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from *mouth of tunnel, and all three are in a space of less than four feet.* Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs) is as follows: Copper, 16.05 per cent.; Gold 0.02 ozs.: Silver 92.40 ozs. Total value $93.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper. $6 40; Gold, $6 82; Silver, $254 31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatsoever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5,500,000 (now claimed to be worth $15,000,000). About six years have elapsed since he purchased it The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN."

Mr. Edwin J, Hulbert, M E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

B. F. BARNES, Fiscal Agent
Room 74, Wilcox Building. Meriden, Conn.

HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State of California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely certain to others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

TRANSPORTING AN ARMY OVERLAND

ENORMOUS DIFFICULTIES TO BE OVERCOME

VIVID LOCAL COMPARISON

The Great Difficulties in the Way of Russia in the War Now On

Persons acquainted with war conditions find it hard to realize the transportation demands made by campaigning. A Russian infantry brigade consists of about 8,000 men, with camp followers, or nearly as many souls as are in one of the small cities of Ontario. The severe weather of the last few weeks has so disturbed our railway system that several of these cities are running short of fuel and other necessaries. Yet our railways work under fixed conditions. Suppose these conditions were anything but fixed. Suppose the entire population of Peterborough were at an hour's notice to migrate westward to Lindsay, and that the railways were expected at an hour's notice to supply the people of the enlarged town with fuel, food, clothing and a thousand other necessaries. Suppose, again that after the orders had been given a change was made and the Peterborough people instead, were to go eastward to Belleville, and word should come that extra supplies should be sent to that town. The idea of peripatetic towns seems grotesque, yet army corps, divisions and brigades move over the face of the country in all sorts of incalculable directions. Usually they leave the railways, and must be reached by wagons. Yet the commissariat department must follow them. The army may rise at midnight and stealthily march twenty miles at right angles to the direction it has been expected to take; at the end of the march tons of food, extra ammunition, hospital requirements and other necessaries must be in attendance. On the railway, too, the volume of traffic ebbs and flows, and cannot be calculated. On one day the need is all for food, then may come a fierce demand for ammunition, then extra horses and mules will be the need of the moment. All the while enemies are watching for chances to blow up bridges or wreck embankments. It is easy to wonder why armies do not move more rapidly. Perhaps a little consideration of the facts of the situation would dispel the wonder.

PREPARES FOR WAR ON UNION

Illinois Steel Co. Making Ready to House Its Workers

Joliet, Ill., February 10.—The Illinois Steel Company has purchased 100 cots and bedding and has placed them in one of the structures inside the gates. A cooking outfit also has been installed and the company apparently is preparing to resist the demands of the union bricklayers. The reduction in the wages of the bricklayers from 60 cents per hour to 37 1-2 cents per hour has caused all the union men to quit at the mills and the committee that waited on the managers were unable to secure any concessions. The company, it is believed will bring in nonunion bricklayers from outside points.

HALF A MILLION LOSS.

TWO CANADIAN COMPANIES SUFFER FROM FIRE

Western Assurance and British American Largely Interested in the Conflagration at Baltimore—Mr. Kenny's Statement

Rather heavy losses will be suffered by two Canadian insurance companies as a result of the conflagration in Baltimore. Mr. J. J. Kenny, Vice-President and Managing Director of the Western Assurance Company, which held a large interest in the burned district, speaking to a press representative, he stated that his advices were to the effect that the total losses by the conflagration would be about [illegible], and this would be pretty fully covered by insurance. The two Canadian companies having risks there were the Western Assurance and the British America. The net loss to the former, Mr. Kenny estimated, would be [illegible], and the net loss to the British America [illegible]. This estimate of losses was considered complete up to 6 o'clock last evening. The Western Assurance has been doing business in Baltimore since 1871, and heretofore Baltimore has proved a very profitable agency. Some of the most valuable buildings in the city were within the burned zone, including many of the best banking, insurance and trust companies offices.

AN EXCITING INCIDENT

Desperate Battle with Wolves in Manitoba

Winnipeg, February 9.—Alex. Morrisey, of Turtle River, near Dauphin, Man., had a thrilling experience with a pack of wolves while crossing Round lake, an arm of Lake Manitoba. A considerable distance from shore, he was surrounded and attacked by twelve or fifteen ferocious animals that he possesses no language capable of describing the battle. At the time Morrisey had with him two hounds and an axe and had it not been for them he says there is no doubt at all but that he would have been torn to pieces by the wolves.

The hounds fought hard and one of them was killed in the encounter. Morrisey claims to have done great execution with his axe and more than one wolf bit the dust, while others were badly wounded. The track in the snow from where the attack commenced to the shore is described by Mr. Morrisey as a trail of blood.

When the exhausted man reached land he sought the protection of a friendly tree and remained there till the wolves departed at dark.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00. Par value $1 00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over [illegible] feet in addition to other claims approximating a total acreage of [illegible] acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby *permitting shipments during the entire year.*

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer
for a limited time
only a
SPECIAL BLOCK
OF 50,000
SHARES OF
THE TREASURY
STOCK
of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate
to your heart's content,
and quickly, then let us
hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1 00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company in t day giving the best value for the money of any share offered.

This Company owns and controls over [illegible] acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 1[illegible] feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1[illegible] feet from Apex, and open sufficient stoping ground to make an output of [illegible] tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being [illegible] feet beneath the surface. We have [illegible] feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*

C. L. ARZENO, General Manager.
603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. *The promoters have shown their confidence in it by using* their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO,

SCAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL.

The Peterborough Brokerage Co., Local Agents.

WANTED—GOOD AGENTS IN EVERY CITY.

Are You Deaf?

Humdreds of perfect recoveries from impaired hearing and deafness are reported as a result of the use of Catarrhozone

The result of actual experience proves that ninety cases in every hundred can be cured, and stay cured, of impaired hearing by the regular use of Catarrhozone.

Among the many prominent business men whose hearing has been restored by Catarrhozone, might be mentioned Mr. Geo. W. Warner, of 353 Wellesley street, Toronto, and Mr. William Jones contractor, of Halifax, N. S Both these gentlemen have testified to the merits of Catarrhozone as a suitable cure for deafness, and their statements prove beyond all question that Catarrhozone cures impaired hearing and even total deafness.

The efficiency of Catarrhozone is placed beyond dispute by its long list of successful cures, and on the highest authority we can recommend it to our readers. It is a very simple remedy to use, and never causes confusion or gets out of order.

Catarrhozone inhaler is beautifully polished and made of hard rubber. It is suitable to carry in the vest pocket and can be used in the church, theatre street car, at any time, in any place. The complete outfit costs but $1.00 and lasts two months. Trial size 25c. Sold by druggists or sent to any address if price is forwarded to N. C. Polson & Co., Kingston, Ont.

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

Woollen Mills Closed

Yesterday morning the Auburn Woollen Mills were temporarily shut down for lack of water.

Oyster Supper

Court 437, C.O.F., of Selwyn, held an oyster supper at their lodge rooms last evening. An interesting programme of recitations and songs was appreciated by a large audience.

Yesterday's Police Court

At yesterday's Police Court Allen McDonald was discharged after spending a week in jail for vagrancy. Dan Shannon had to pay $2.75 for being disorderly last Friday night.

He Will Recover

Guiseppe DePaolo, the Italian who was stabbed by his brother last week, is still in a critical condition at St. Joseph's Hospital, but it is believed that he will recover. He is resting fairly well and his wounds are healing.

A Pleasing Entertainment

The social given in St. John's Sunday school room on Thursday night was a most enjoyable affair. Mr. W. H. Cluxton, President of the Guild, made an efficient chairman. A delightful programme was presented, followed by a social hour, pleasantly spent.

Minto Hospital Fund

Further contributions to the Lady Minto Hospital Fund have been received as follows:

F. F. Matthews	$6 00
D. Hughes-Charles	5 00

Receipted bill from R. H. Leary for livery, night of concert.

Invited to Remain

At a meeting of the Quarterly Official Board of the Charlotte street Methodist church held Tuesday night, a unanimous invitation was extended to the pastor, Rev. W. J. Jolliffe, to remain a third year as pastor of the church. It is said that Mr. Jolliffe will probably accept the invitation.

Y.W.C.A.

The annual association meeting will be held this evening at eight o'clock. Reports for the year 1903 from all departments will be read and vocal music will be furnished for the occasion by Misses Effie Best and Winnie Anderson. This meeting is open to all friends of the Association and it is hoped that a large number will be present to hear the reports which show the condition of the work in as accurate a form as possible.

The attendance at the

Peterboro' Business College

is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre of Canada.

Over 9/10 of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write for particulars regarding our correspondence course

WM. PRINGLE,
Principal.

New Regulation

The License Department of Ontario has inaugurated a new regulation which will compel hotelkeepers to supply meals at all hours. This action is the result of the alleged refusal of the proprietors of two hotels in western towns to furnish a meal to belated travellers.

Cheese Factories Inspected

It will be interesting to cheese men and patrons of factories to learn that the Hon. John Dryden, Minister of Agriculture, has stated that the work of inspecting cheese factories, and the premises of patrons, which was begun in some sections as an experiment during the past year, will be immediately extended and made, if possible, to cover the whole province.

Their Final Dance

Last night the final dance of the season was given under the auspices of the Never Learn Club. The unique feature of the function was that it was a Leap year affair, the gentlemen adorning the walls while the fair sex did the honors An orchestra from Toronto furnished music. A delightful evening was spent all enjoying themselves immensely.

$10 GRAND EXCURSION TO WASHINGTON AND RETURN—$10.

On February 26th the Lehigh Valley R.R. will run a special ten day excursion from Suspension Bridge to Washington and return for $10. Tickets good ten days. Stop over allowed at Philadelphia on return trip. Tickets good on all express trains, including "Black Diamond Express." For tickets, Guide to Washington, and further particulars, call on or address Robt. S. Lewis, Canadian Passenger Agent, 33 Yonge street, Toronto, Ont.

Politeness That Paid

A prominent local clergyman went to the Grand Trunk station a few days ago to meet a friend. Upon entering the waiting room and looking around he saw an elegantly dressed woman, who apparently was about to board an outgoing train. She was carrying a multitude of parcels and besides had a child that with great difficulty she was trying to help along. The clergyman offered his assistance, which she accepted, afterward thanking him graciously for his kindness. The train moved out of sight, and he went back to the waiting room thinking of the endless opportunities one has for doing good. Then he discovered that he was carrying the lady's handsome silk umbrella with pearl and gold trimmings. When he showed the umbrella to his wife and told her how he got it, she laughed and said, "politeness pays, my dear."

POWER SHUT OFF

Owing to Lack of Water in the Otonabee River

Power was shut off by the Peterborough Light and Power Company yesterday morning, and during most of the afternoon, causing The Times to be a couple of hours late.

The intense cold has frozen the river almost solid, leaving insufficient water to turn the wheels of the electric generators at the various power houses. We ask the indulgence of our readers under the circumstances.

OBITUARY

Death of Michael Ryan on Tuesday Evening

We regret to chronicle the death of Mr. Michael Ryan, at his residence, 180 Dalhousie street, at the advanced age of 90 years. The late Mr. Ryan had resided in Peterborough for the past seventeen years and was a native of Limerick, Ireland. Two sons and four daughters are left to mourn his loss. The sons are John, of town, Jas., of Westwood, and the daughters are Mary, of town; Catherine, a Sister at Port Arthur; Elizabeth, also a sister at Lindsay and Mrs. Lynch, of Westwood.

The funeral will take place tomorrow morning at nine o'clock to St. Peter's Cathedral.

—A number of the officials of the Mark street church were delightfully entertained on Tuesday night by Rev. Mr. Lewis, the esteemed pastor of the church and Mrs. Lewis. During the evening a number of vocal and instrumental selections were rendered by the Misses Chasty A most enjoyable evening was spent.

WELL TOLD

Doctor Explains Feeding Without Medicine

"It is a well substantiated fact," says a Maine physician "that a very large per cent of the ailments of humanity are due to errors in diet causing indigestion and the myriad afflictions following in its train. It was Dr. Abernethy I believe who said, 'One-fourth of what we eat keeps us, the other three-fourths we keep at our peril.'

"Loss of flesh from whatever immediate cause is due primarily to nutritional disturbances involving defective assimilation. With these prefatory remarks I wish to relate briefly a case of mine, (not the only one by any means), in which Grape-Nuts was the connecting link between disease and health.

"It was a case of chronic gastritis where the patient had seen the rounds of much stereotyped treatment and where there was much depression caused by long persistence of distress at the stomach—pain, gas and burning soon after eating.

"Though I had been regulating the diet considerably while giving medicine it occurred to me that I would try regulating it without medicine and in looking about among the foods I soon found Grape-Nuts was the best adapted to my purpose. Starting in with Grape-Nuts alone I allowed my patient to take it first with hot water and a very little sugar at intervals of three hours. After a few days I instructed the patient to use it with warm milk. (It should have been served with cream on the start.)

"Improvement was marked from the first. The eructations of gas were at once greatly diminished and the terrible burning and distress were lessened in proportion while the spirits brightened. At the end of two weeks my patient had so far improved that she was allowed some chicken broth which digested perfectly. It has been over two months and she has gradually increased her diet in variety until it now includes all that is needed to avoid monotony and maintain relish.

"Grape-Nuts however still holds a prominent place on her table as it will continue to do for she realizes that it is a sheet anchor." Name of the physician given by Postum Co. Battle Creek, Mich.

Look in each pkg. for the famous little book, "The Road to Wellville."

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—"Major" Sim. junior at the Albany Club rooms, is recovering from a severe cold.

—Mrs. D. Fraser and Miss Edna B. Waters of Norwood, are visiting in town.

—Miss P. Kirkland, London, is visiting her sister, Mrs. Robt. Bradburn, Union street.

—Capt. Wilbur Harris, Gore's Landing, was in town yesterday and gave The Times a call.

—The many friends of Mr. A. R. Kidd were pleased to see him out again after a serious illness.

—Mr. Frank Bell, the efficient clerk of the Division Court, is again attending to business after a severe attack of la grippe.

—Mr. D. W. Dumble was in Cobourg yesterday attending the obsequies of the late John Hayden, of that town.

—Mr. T. Davis, of Emily, is recovering from his recent illness and is now convalescent at Nicholls Hospital.

—Miss M. Lillian Moore has passed her intermediate vocal examination at the Conservatory of Music, Toronto, with honors.

—Miss Alice Tivey has returned from a pleasant visit in Lindsay, where she was a guest of Hon. Senator and Mrs. McHugh.

—Mr. W. J. Pearson, who is staying at the White House, shipped a carload of fine horses to Montreal last evening.

—Mr. M. A. Smith, representing J. J. Taylor and Sons of Toronto, visited town yesterday and left for Tweed last evening.

—Mr. S. R. Armstrong, our popular town clerk, has recovered from his recent indisposition, and was at his desk again yesterday.

—Miss Frankie Johnston has not only been successful in passing her examinations at the Toronto Conservatory of Music, which she tried on Tuesday last, Feb. 2, but also obtained first-class honors The young lady attributes much of her success to the thorough teaching of the Misses Hurleys, of town.

INCIDENTS OF THE DAY

Newsy Paragraphs Picked Up By Reporters on Their Rounds

—The Fire, Water and Light Committee met last night.

—Pontypool Oddfellows will visit the local lodges this evening.

—The telephone communication with Nicholls Hospital is still cut off.

—The Lakefield railway has been cleared and trains are now running on time.

—Business was quite slack at the market yesterday. A considerable quantity of hay was offered for sale, but the prices were much the same as usual.

MIDY

WILL CONQUER THIBET.

Continued from page 1.

for pretending that the British column in Thibet is there for the purpose of making a boundary survey. King Edward threw off the mask the other day in his speech at the opening of parliament, and announced that the objective point of the expedition was the forbidden capital city of the Thibetans. The military expedition, however, is referred to as a "political mission which has entered Thibetan territory to secure a due observance of conventions." This indefinite explanation will not veil the real purpose of the expedition from anyone familiar with the history of Britain.

There is practically no chance of mistake in prophesying that Great Britain is in Thibet to stay and that her sway will be as enduring as Russia's domination of Manchuria. Without aid from China the Thibetans cannot hope to oppose successfully the march of the British upon their capital. Although they have frequently been portrayed as a savage and warlike people, the great majority of Thibet's 6,000,000 inhabitants are a mild-mannered, intensely religious people, devoted to the practice of esoteric Buddhism, unskilled in warfare and possessing neither modern arms or methods of defence.

Russia is not in a position at the present time to oppose her greatest rival in Asia by making a countermove into Thibet from the north. On the contrary the Russian government tacitly acquiesces in the British invasion of Thibet and consoles itself with the semi-official announcement that it will extend its sphere of influence over East Turkestan.

The Russian imbroglio with Japan is England's greatest opportunity and she is making the most of it, while China, once regarded as impregnable and invincible, sits helpless and sees her great empire systematically dismembered.

DOURO.

The funeral of the late Mrs. Stephen Murphy, of Indian River, took place on Saturday afternoon at 2 o'clock from the family residence to the Roman Catholic cemetery, Douro. The deceased was the only daughter of Mr. and Mrs. John O'Brien, of Douro, and leaves four sorrowing brothers, whose names are, Samuel, Oronabee; Frederic, Francis and William, Douro. She was only aged 28 years, and her death seems very premature. The deceased had been ailing for six months and leaves no family. The pall bearers were her four brothers and her two uncles, Michael and Alexander O'Brien.

WEATHER NOTES

[illegible] Still cold.

Narrow Chests.

The old theory that consumption was inherited is utterly discredited by modern medical science. The germs of consumption must be received from without. These germs are every where. They are constantly being received and cast out by the healthy system. It is the narrow chested whose inheritance is weakness who fall a prey to consumption because they are too weak of lung to resist and throw off disease.

Doctor Pierce's Golden Medical Discovery makes weak lungs strong. It cures obstinate deep-seated coughs, bleeding lungs, weakness, emaciation and other conditions which if neglected or unskilfully treated find a fatal termination in consumption.

$3,000 FORFEIT will be paid by the World's Dispensary Medical Association, Proprietors, Buffalo, N. Y., if they cannot show the original signature of the individual volunteering the testimonial below, and also of the writers of every testimonial among the thousands which they are constantly publishing, thus proving their genuineness.

"In the spring of 1900 I was taken with hemorrhage of the lungs, and became very weak and short of breath, lost flesh and had no appetite," writes Mr. E. L. Robinett, of Xernes, Tenn. "I was persuaded to try Dr. Pierce's Golden Medical Discovery. The first few bottles seemed to do me but little good. Thought I would soon be a victim of that dreaded disease, consumption. Had almost given up in despair when my friends persuaded me to give your 'Golden Medical Discovery' a fair trial. I commenced its use. I weigh 160 pounds now, and when I commenced I only weighed 140 pounds. If any one doubts this statement I will be pleased to answer any inquiry."

Accept no substitute for "Golden Medical Discovery." Nothing is "just as good." Dr. Pierce's Pleasant Pellets cleanse the clogged system from impurities.

JAPAN'S LOSSES

e following despatches as to the disablement of six of Japan's ships and the killing of 50 men and the wounding of 150 were received by The Times from London, early this morning—

eport Five Japanese Ships as Damaged

Special—12.40 a.m.

don, Feb. 12—The St. Petersburg correspondent of Reuter's Telegram Co. cabled that the naval headquarters staff there announces that in the fight at Port Arthur, 6 Japanese ships were slightly damaged and 50 Japanese were killed and 150 wounded.

The Report Denied.

Special---1.30 a.m.

don, Feb. 11—It was said at the Foreign Office here this evening that the assertion of the Novoe Vremya, of St. Petersburg, that the Japanese fleet in its attack on Port Arthur used Wei Hai Wei as a base for its attack on Port Arthur, is absolutely untrue.

don Feb. 12—It has been reported that, owing to the severity of the weather, land operations may have to be suspended, but several Japanese officials have contradicted this. The Japanese have reason to suspect that Russia is hurrying an army south towards Seoul. Preparations are being made for such a contingency, and Japan expects to occupy Seoul with a large army within two days.

e despatches state that the Russian fleet was taken by surprise, and that the Japanese made their attack under cover of darkness. Sensational accounts of the burning of Port Arthur, and the destruction of the Russian fleet are discredited at the London Russian embassy and the Japanese Legation.

later despatch speaks of Japan's capture of seven Russian ships, at Port Arthur in addition to the three that were damaged. This report has, however, not been confirmed.

Russians are evidencing the greatest enthusiasm in proffering their services as volunteers, and it is quite clear that the majority little expected that Japan would show her teeth so soon.

ree or four small cruisers are headed toward the Indian Ocean to intercept the Russian fleet with coal munitions. As Japan is short of fuel, she is evidently contemplating the capture of the approaching convoy.

THE ENGLISHMEN MEET

Country Wanderers' Club Elect Officers

out twenty-five young Englishmen ested in football and cricket met e Crown Hotel, on Wednesday ev- and selected officers for the en- season. It was decided to place teams in the district league, and mmittee composed of the following appointed—Chairman, Mr. Allen; E. A. Tomlinson; Asst. Sec., R. Treas. R. H. Jackson; Trainer, Mr. ey; Managing Committee, Messrs. y, McPherson, Strange, Hawkins McPhum.

. Hally, however, later withdrew the Committee, but promised the all the assistance he could find to give.

deputation of members will call on leading citizens in regard to pa- and patronesses.

e committee will meet every Wed- ay evening and all communications ld be addressed to the Secretary, Tomlinson.

A MEETING OF THE 57TH

ers Held Annual Meeting Wednesday Evening

e officers of the 57th Regiment held r annual meeting in the mess-rooms Wednesday night, at which Lieuten- Colonel Miller presided. The ex- nt financial condition of the regi- t brought forth much favorable com- t.

e annual report presented by Ma- Dennistoun showed a balance on t of $842.19, after all the liabilities been paid. This will be distributed n the regiment parades. The total ipts amounted to $2025.00, while the nditures were $1781.80.

e various committee reports were ly satisfactory and the following constitute the standing committees the ensuing year—

egimental Committee—Major Dennis- n, Major Stevenson, and Major Hayes. ess Committee—Surgeon-Major Halli- y, Major Hayes, and Captain Bud- d.

ual Committee—Captains Walker, g and Claxton.

VERYBODY READS THE TIMES.

A PRETTY WEDDING

Miss Gertrude May McMillan and Mr Ernest Belleghem, Married

On Wednesday evening, at the residence of the bride's parents, 101 Water street, a very pretty wedding was celebrated when Miss Gertrude May, daughter of the late John McMillan, was married to Mr. Ernest Belleghem. Miss Ida Small acted as bridesmaid, while the groom was assisted by Mr. Alf. McMillan brother of the bride.

The bride was very tastefully attired in a pretty suit of blue silk, and wore the regulation bridal veil. She carried a beautiful boquet of white carnations and smilax, and the bridesmaid looked most attractive in her dainty silk attire. The table and house decorations were very pretty, and many costly and beautiful presents were received, one being a handsome organ from the bride's mother. Rev. J. P. Wilson, B.A. officiated.

MOUNT PLEASANT.

—The storm Sunday morning of the 7th inst., did not prevent the pastor of the Methodist church from filling his appointment, while many who lived convenient to the church failed to put in an appearance and missed some practical lessons from the words.—"And Enoch walked with God, and he was not, for God took him."

—The pastor of the Presbyterian church spoke as directed by the Epworth League.

—Mr. Samuel Casey, who has been engaged for many years by the managers of the cheese and butter factory, has decided upon leaving for a western town. We regret parting with him. Our best wishes for his future welfare go with him and his family.

—There are a great many in this section who are ill from colds and other causes.

—A stray horse with a cutter was found a few days ago in the swamp where choppers had been at work cutting cord wood.

—Our mail driver finds great difficulty in travelling his route. Pathmasters seem to forget their duty to open up passing places where the snow is very deep, so as to enable teams to pass without injury to each other. Reeves should impress on pathmasters their duty to assist the travelling public in this extreme cold weather.

Another Report Says That Japanese Were Driven Off and Two of Her Ships Badly Damaged

JAPS FAIL IN TRYING TO LAND NEAR PORT ARTHUR

Several Attempts Made in Different Bays--Russia Again Gets a Yarn About Loss of Japanese Warships on the Yellow Sea

London Feb. 11—A despatch to Reuter's Telegram Company from Tokio, date 7.10 p.m. yesterday, says an unofficial report is current there that the Russian fleet was destroyed, four battleships and three cruisers being sunk, and that two Japanese warships were damaged in an engagement yesterday afternoon off Port Arthur, the Japanese getting between the Russians and the entrance of the harbor before the fight commenced.

Paris, Feb. 11—The Journal des Debats, in a special despatch from St. Petersburg announces that a bombardment of Port Arthur occurred the day before yesterday, and again yesterday and says that the Japanese fleet withdrew after having suffered severe losses. Today, it is added, all is quiet off Port Arthur."

St. Petersburg, Feb. 11—The rigid censorship still prevents the newspapers this afternoon from receiving news from either Russian or foreign sources. No news has been received since Viceroy Alexieff's despatches, and the public consequently is still completely in the dark. All manner of rumors are afloat. The Government, however, has taken measures to counteract their publication, forbidding the sale of the offender, the St. Petersburg Gazette. The Government expressed great displeasure at the publication of the report of a Russian victory, and the raising of false hopes among the population.

Nevertheless, the rumors circulated verbally are greedily swallowed. According to one report here, the Russian armored cruiser, Gromoboi, sallied out of Vladivostock, destroyed twenty Japanese transports off Southern Korea, and was herself sunk by Japanese cruisers.

Another story claimed that four of the Vladivostock warships, under Admiral Stackelberg had sunk four Japanese transports.

The most circumstantial story current in St. Petersburg is a report of the sinking of the Russian cruiser Varieg, off Chemulpo.

Still another is to the effect that the recent Japanese attacks on Port Arthur was a feint to protect the passage of transports bound to Shan-Hai-Kwan to land Japanese troops there and effect a junction with the forces of Yuan Shi Kai, the Chinese commander in China, and then attack the Russians in the rear.

At the Russian navigation companies having vessels in Far Eastern waters are anxious about their fate. The volunteer fleet is particularly concerned regarding the Ekaterinoslav, tea-laden for Singapore, February 1, and the Voronej, which left Shanghai tea-laden for Singapore, February 1. No news of either vessel has been heard. The tone of the press comment today is less bitter against Japan, which is perhaps significant.

Japs Were Repulsed.

Paris, Feb. 11—The Temps says it has received confirmation from official sources of the report from Port Arthur that the Japanese attempted to make a landing at the Bay of Port Arthur and were immediately repulsed.

Rejoicing at Tokio.

London, Feb. 11—A despatch to the St. James Gazette from Tokio, under today's date says;—There are great rejoicings here at the success of the Japanese navy. The public buildings, residences, and business houses are decorated with flags. Bunting is in evidence everywhere. Tokio wears the aspect of a city of conquerors.

"A number of Russian bluejackets who swam ashore after the Japanese attack on the Varaig and the Koreitz have been made prisoners.

"Reports from Chemulpo say that both the Variag and Koreitz hoisted the white flag at the last moment.

Expect Attack by Japs.

London, Feb. 11—The St. James Gazette correspondent at Cheefoo cables that in anticipation of the return of the Japanese fleet, the Russians at Port Arthur are adopting extra defensive measures. Workmen and troops are taking down high brick buildings, which it was feared would fall and cause loss of life in the event of a Japanese bombardment.

London, Feb. 11—A special despatch from Port Arthur says the Japanese fleet attempted Wednesday to land men in several bays in the neighborhood of Port Arthur, under the protection of the guns of the cruisers. It is asserted, however, that all the attempts were unsuccessful.

What Japan Expects.

Tokio, Feb. 10—Advices of a general naval engagement are hourly expected.

Russian Railway Blocked.

London Feb. 11—A special despatch from Tien-Tsin confirms the report that the Manchuria railroad has been blocked by the blowing up of some bridges on the line, and that thirty Russians were killed in the explosion.

War Announced.

Tokio Feb. 11.—The existence of a state of war with Russia was formally announced today by imperial proclamation.

Two Steamers Taken.

London Feb. 11—A special despatch from Tein-Tsin says that the Russian steamers, Nonni and Mukden, belonging to the Chinese Eastern Railway Company, have been captured by the Japanese.

Mail Steamer Destroyed.

London, Feb. 11—Lloyd's agent at Shanghai, cabling under date of yesterday, says it is reported and generally believed that a Japanese warship has destroyed the Russian mail steamer, Mongolia, bound from Shanghai for Dalny. The cablegram adds that the three Russian warships damaged by torpedoes at Port Arthur sank.

Japan Elated.

Tokio Feb. 11—The destruction of the Russian cruisers Variag and the gunboat Koreitz at Chemulpo on Tuesday is officially confirmed, but details are lacking. It is not known who first opened fire, but the exchange lasted 35 minutes. The Japanese did not lose a man and their ships were not injured. The Russian crews, it is reported, surrendered to the Japanese at Chemulpo. Japan is elated by its success in the engagement.

Her Chances Slim.

Shanghai Feb. 11—The Russian gunboat Mandjur is still here. It is understood that two Japanese warships are awaiting her at the mouth of the Yang-Tse-Kiang.

More Men For Russia.

St. Petersburg, Feb. 11—Orders have been issued for the formation of a third Siberian army corps and a trans-Baikal division of Cossacks. These will be incorporated in the Manchurian army.

GERMANS PLEASED WITH THE WAR

AND ARE GREATLY DELIGHTED WITH JAPAN'S SUCCESS

JAPAN'S ATTACK CORRECT

The Little Empire a Fighting Nation with Brains

Berlin, February 12.—Japan's naval successes are hailed with joy by the German people. Angry criticism is everywhere heard of the Government's conduct in deceiving the public as to the likelihood of war. The peace assurances of the Foreign Office were not discontinued until the battle of Port Arthur was reported. The nation at large sees a strong semblance in these tactics to those of Russia itself. The people no longer feel any doubt that Germany deliberately played the Czar's game. Fears are expressed lest the Fatherland may be even secretly pledged to an attitude that may strain its neutrality to the breaking point. In their present state of temper the Germans would be surprised at nothing. The inspired newspapers are showing bitter indignation against the Government."

New York, February 12.—Park Benjamin, an authority on the science of war, says: "The attack on the Russian fleet at Port Arthur was strictly under the rules of the game of war. It was the one proper thing to do under the circumstances, but displays on the part of the Russians a degree of carelessness that I am at a loss to explain. Where were the Russian searchlights that the torpedo boats of the enemy could crawl in and do such damage. What was the matter with the mines with which the harbour of Port Arthur is fitted. Port Arthur is one of the most strongly fortified places in the world. Russia spent millions in its defence, yet the enemy could crawl into it and with carefully prepared plans destroy three of the most useful vessels of the fleet. It would have been impossible to have picked out three more important ships of the entire fleet, two of them the finest battleships in the Russian navy and the third one, one of the swiftest of the commerce destroyers."

EVERYBODY READS THE TIMES.

JAPAN WILL CRUSH RUSSIA'S NAVAL FORCE AND DESCEND ON PORT ARTHUR

RUSSIANS HAVE ALREADY LOST ELEVEN LARGE BATTLESHIPS

London, February 12.—A summary of the losses sustained by Russia in the first 24 hours of the war with Japan show that eleven Russian warships were placed out of action in one way or another, and that the Japanese did not lose a ship.

The losses were as follows;

1—Battleship Retvizan, torpedoed and beached at Port Arthur.

2—Battleship Cesarevitch, torpedoed and beached at Port Arthur.

3—Battleship Poltava (hole below water line) at Port Arthur.

4—Armoured cruiser Boyadin disabled by Japanese fire at Port Arthur.

5—Cruiser Pollada, torpedoed at Port Arthur and beached.

6—Cruiser Novik, hole below water line at Port Arthur.

7—Cruiser Askold, hole below water line at Port Arthur.

8—Cruiser Diana, hole below water line at Port Arthur.

9—First class armoured cruiser Variag, destroyed at Chemulpo, Corea.

10—Torpedo gun vessel Korietz, destroyed at Chemulpo, Corea.

11—Gunboat Mandju, said to have been seized by the Japanese at Nagasaki, Japan.

LATE WAR NEWS

Special—3.15 a.m.

Greater Number of the Russian Warships at Port Arthur Are Completely Disabled

Berlin, Feb. 12—A despatch to the Vossiche Zeitung, says a greater number of the Russian warships at Port Arthur have already been disabled and that several Japanese warships have been sent home for repairs.

The Russian Commander.

St. Petersburg, Feb. 11—It is officially announced that Admiral Alexieff has been apppointed to the supreme command of the Russian land and sea forces in the Far East.

The Japs in Seoul.

London, Feb. 11—The correspondent of the Times at Tokio says, There are persistent rumors at Tokio that Japanese troops have entered Seoul.

London, Feb. 11—The correspondent of the Times at Seoul says; Nine Japanese vessels arrived at Chemulpo this afternoon, bringing about 2,500 soldiers.

Japan Seizes Masampho.

London Feb. 11—Japan seized Masampho Sunday and despatched a heavy force there. Japan will fortify the port and establish a naval and military base there. Masampho is an exceedingly important point, as it controls the Corean channel, and is an excellent base for future operations.

THE BATTLE DESCRIBED BY BRITISH WITNESS

Tuesday's Fight at Port Arthur as Seen by a Britisher

Che Foo, February 12.—The steamer Columbia has arrived from Port Arthur with additional news of the attack by the Japanese fleet upon the Russian fleet in the roads outside of the harbor of Port Arthur. The Columbia was in the roads at the time, and felt the first shock of a torpedo explosion at 11 o'clock Monday night. The attack continued all night, and at daylight Tuesday two Russian battleships and one first class Russian cruiser were seen to have been disabled and beached at the entrance of the harbor. The cruiser was badly listed.

Yesterday morning the Russian forts opened fire on the Japanese fleet, which was about three miles distant. The Japanese vessels returned the fire, hitting several of the Russian ships, but doing little damage. The Russian cruisers then went out and the Japanese vessels disappeared. They were seen later going in the direction of Dalny, apparently undamaged.

Although the officers of the Columbia say there were 17 in the attacking party only 16 were seen later in the day near Foo Chow.

STORY OF AN EYE-WITNESS.

A member of the crew of the Columbia tells this story of the naval battle at Port Arthur;

"The Columbia was lying in the roadstead, surrounded by fourteen Russian battleships and cruisers. At 11.30 o'clock Monday night a severe shock was felt on board the Columbia. The Russians immediately commenced to operate their searchlights and opened fire towards the sea. The firing lasted only a short time. At 1 o'clock more shocks were felt and the Russians again commenced firing.

"The Japanese did not return the fire. At 2 o'clock two Russian battleships were hit and were beached across the entrance of the harbor. They were soon followed by a Russian cruiser, which also was beached. None of the vessels were damaged above the water line. More shocks from torpedoes were felt during the early morning and then all was quiet.

"At 10 o'clock Tuesday morning Boyarin lay outside, but within range of the forts.

The Columbia had a narrow escape from injury during the battle. While going out of the roads at Port Arthur the Russian cruiser Novik got between the Columbia and the Japanese fleet. Shells which passed over the Novik struck the Columbia. Her flag was cut into shreds, and one shell fell on her deck. The faces of those who were on deck were blackened with powder smoke. A naval officer who was recently at Port Arthur says the Russians were not prepared for the attack, and had an insufficient amount of steam up. A boat patrolled the Straits of Pechili continuously, but apparently the Japanese torpedo boats were not noticed until after the first torpedo was fired. The Russians fired, but the Japanese did not return the fire, and backed off.

An hour later the discharge of torpedoes was repeated, after which the torpedo boats withdrew some distance.

At ten o'clock Tuesday morning the Japanese four cruisers circled within view of the whole Russian fleet, but they were not engaged. The Russians returned toward the harbor, after an hour. The Japanese came within three miles. A battle then began between the Russian forts and fourteen ships and the sixteen Japanese vessels. A few of the Japanese shells were effective, but as far as seen the Russian shells fell short.

The Japanese fleet was steaming toward Dalny when last seen.

The Columbia left just as Tuesday morning's contest began, and was unable to learn the result. It is probable that the Japanese fleet was convoying twenty-six troopships from Sasebo to some point in Corea.

The Japanese are reported to be in possession of the southern portion of the peninsula.

KEENE.

—Miss Lilian Bell is visiting friends in Hastings.

—Mr John Findlay, Liberal candidate for East Peterborough, canvassed Keene and vicinity during the past week, and met with gratifying success. He was accompanied by Mr. J. Lang, the present member.

—The Foresters held a very enjoyable dance and oyster supper on Friday evening last.

—The game between Keene and the T.A.S. in Norwood did not come off on Monday evening on account of the dangerous condition of the rink from the weight of snow and ice on the roof.

—We were shut off from communication with the outside world on Monday and Tuesday, after Sunday's storm.

—The last carnival will be held on Friday night, Feb. 19th.

—The Hockey Club will hold their annual ball on Friday, the 12th.

TO RAISE $25,000

Seattle, Wash., Feb. 10—The Japanese Association has decided to raise $25,000 to help Japan prosecute the war with Russia.

WEATHER NOTES

Friday—Continued cold.

Wants City for Land Base--Will Meet Enemy Then on More Equal Terms

RUSSIA HURRYING IN ARMY NEAR SEOUL

Japanese Troops Do Not Mind Severe Winter Weather And will Not Delay Landing Forces

London, Feb. 11—It was suggested today to a high Japanese official that having driven Russia from the seas, it would be necessary to delay serious land operations in Manchuria for several weeks until the weather moderates.

"No," was the reply. "We kept up an active campaign throughout the winter during the Chinese-Japanese war. Our troops do not mind severe weather."

The Japanese have reason to believe that Russia is hurrying an army south from the River Yalu, towards Seoul. Japan expects to occupy Seoul with a large force within two days, and to be fully prepared to meet the Russians before they reach that neighborhood. Moreover, now that she has command of the seas, Japan may be expected to land troops near the mouth of the Yalu River, and to land upon the rear of the Russian invaders in Korea. Important engagements are expected in Korea within a week.

Japan's Plans.

The plan is to utterly destroy the Russian fleet now off Port Arthur. With this done the Japanese squadron will simply wait and pick off the new arrivals as fast as they come within the fighting zone. Three or four smaller cruisers, whose names have not been mentioned as of Port Arthur, are headed toward the Indian Ocean to intercept the Russian convoy with coal munitions. Four hundred thousand tons of coal are now en route from Wales to Port Arthur. Coal is a contraband of war, and as Japan is probably short of such fuel, she is undoubtedly planning to capture the approaching convoy.

As soon as the Japanese fleet has wiped out naval barriers an army of 200,000 men will be transported to Dalny. This force of seasoned campaigners, most of them having seen service in the Chinese war, is now waiting the word at Nagasaki, and adjacent stations, and can move at any moment. It will only require some fourteen hours to move the entire military force across to Manchuria and land them preparatory to a descent upon Port Arthur on the land side. The city is but poorly defended on the north and east, and while the squadron is bombarding from the sea approach, the army will have no greatly difficulty in invading the town from the north.

With Port Arthur as a base of land operations, the Japanese army will be in position to spread over the entire Liao-Tung Peninsula, and meet the Cossacks and Russian infantry on equal terms. It will also be possible to provision and coal the Japanese vessels from Port Arthur, instead of returning to Nagasaki for munitions.

The Powers' Plans.

One version of the negotiations now going on between the powers says that the proposal to limit the area of war operations is that they should be confined to Corea, and the territory in Manchuria which is leased by the Russians. There is official authority for the statement that Japan would refuse to accept the latter restriction.

Local Sports

The local T.A.S. hockey team will probably play off their tie game with Keene, on Monday evening next, at the Charlotte street rink.

Tomorrow evening Picton and Napanee will play off their tie at Belleville. Chauncey Elliott will referee.

Brockville is now champion of Group No. 1, Intermediate O.H.A. They play at Belleville tonight.

The local hockey management have been endeavoring to arrange exhibition games with the Marlboros, St. Georges and Barrie, the three senior O.H.A. teams in the western district but so far have been unsuccessful owing to league games and other exhibition games already arranged conflicting with the dates desired for a game here. It is altogether likely, however, that one of the above teams will be here next week.

The Pig Iron Tigers are looking for a game with the Barrie Bodiaga.

The Review's criticism of the Examiner's hockey team has evidently aroused the latter, and last evening's paper contained a lengthy explanation of affairs as they stand between the two teams. The public will no doubt be greatly interested in a second match.

—The Times' employees are making arrangements to organize, and they expect to sound the bugle ere long. Perhaps it can be arranged to play the winners in case of the two evening dailies coming together again.

Three games were played at the curling rink Wednesday evening, and the result was as follows—

Skip Bogue defeated Skip Tooley by 15 to 11.

Skip Brown defeated Skip Frost by 20 to 14.

Skip Miller, Lindsay, lost to Skip Knapman by 7 to 8.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room [illegible], Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

[illegible] paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month, and to outside points at $3 per year strictly in advance

FATHER GALVIN HONORED

Pleasing Event at St. Martin's Church Ennismore

On Sunday last at the conclusion of mass at St. Martin's church, Ennismore, Rev. Father Galvin, of St. Peter's cathedral staff, was presented with an address and a purse of gold. The address was read by Mr. John F. Collins, Township Clerk, while the presentation was made by Mr. Ed Corkery, Reeve. As most of our readers know, Father Galvin is a native of Ennismore, where he is very popular. The following is the address;

To Rev. P. J. Galvin;

Reverend and Dear Father,—We, the members of your natal Parish of St. Martin's, Ennismore, feel that we would be remiss in the discharge of our duties were we to allow this, the occasion of your ordination, to pass by without testifying in some small measure, our deep appreciation of your many sterling qualities, both as boy and man, and our gratitude to God at your elevation to the holy priesthood.

We are always [illegible]ed when one of our own members is deemed worthy of promotion from the ordinary to the higher ranks of life, for, in that promotion we recognize the just reward of tireless labour, steadfast perseverance, and more than ordinary ability. But, in your case, dear Father, we can frankly assure you it is no mere pleasure but the joy and delight of our hearts. In your elevation to the priesthood you have reached that goal so long and ardently desired, and to which your daily life, for many years gave evident proof of God's vocation. We today are proud of the honours that have been conferred upon you for they reflect credit, not alone upon yourself and family, but on the community at large. We have followed eagerly your career through Ottawa University and the Grand Seminary at Montreal, and the success you achieved in both these institutions is, to our minds, a sufficient guarantee of the good work you will accomplish in the holy ministry.

As a token then of our regards and as a slight proof of our appreciation of your genuine piety and nobleness of heart we ask you to accept the accompanying gift, asking in return that you will not be unmindful of your many Ennismore friends at the holy sacrifice of the altar.

In conclusion, we pray that God may bless and protect you; that your labours may be productive of abundant fruit, and that your reward may be a happy eternity. Signed on behalf of the congregation.

William Crough, Martin Doran, Samuel Killen, Edward Corkery, William Sullivan, Daniel Kennedy, Robert O'Donoghue, John Scollard, Jas. Guiry, Patrick Crough, William J. Cavanagh, Eugene Murphy.

The reverend gentleman was taken entirely by surprise, and was entirely overcome by emotion. In well chosen words which came from the heart, he thanked the people for their handsome present, which he accepted with tenderest feelings of gratitude.

EVERYBODY READS THE TIMES.

SMITH TOWNSHIP COUNCIL

Regular Monthly Meeting of the Township Council

The Council of the Township of Smith, met in the Town Hall, Bridgenorth, on February 1st, pursuant to adjournment all the members present, the Reeve in the chair.

The minutes of the last meeting were read and confirmed.

Moved by Mr. Scott, seconded by Mr. Graham, that Thomas LePlante be appointed clerk pro tem., in the absence of the clerk through illness.—Carried.

Moved by Mr. Scott, seconded by Mr. Harvey, that the treasurer be authorized to secure six copies of the Municipal World for the use of this Council.—Carried.

Moved by Mr. Harvey, seconded by Mr. Graham, that the request of Mr. Bickell regarding the end of the Buckhorn road for pasture, be laid over until next meeting.—Carried.

Moved by Mr. Scott, seconded by Mr. Graham, that the Council recommend that the Overseers of Road Divisions take the declaration of office according to law before receiving their respective road lists; also that the poundkeepers take the declaration of office.—Carried.

Moved by Mr. Bell, seconded by Mr. Harvey, that it is the firm belief of this Council that we urge upon the Government the necessity of encouraging the importation of farm laborers to Ontario, believing that it is one step towards educating very suitable settlers for the Great North-West, thereby developing our farm lands, the same to be the only way to have other lines of industries developed, agriculture being what Canada is most suitable for and in the advancement of it all other branches must follow.—Carried.

Moved by Mr. Graham, seconded by Mr. Scott, that a list of the pound keepers and fence viewers be printed in the Examiner and Review.—Carried.

Moved by Mr. Graham, seconded by Mr. Harvey, that Mr. Scott and Mr. Bell be a committee to view the bridge on the 8th concession line at Mr. Fowler's gate, and if necessary to secure timber and have the same rebuilt this season.—Carried.

Moved by Mr. Graham, seconded by Mr. Scott, that this Council acquiesce in the matter of annexing certain parts or portions of the Township of Smith to the Town of Peterborough when the boundary is defined to the satisfaction of the clerk, according to law.—Carried.

Moved by Mr. Bell, seconded by Mr. Harvey, that the following accounts be paid; Dr. Morgan, medical attendance, $4.50, Peterborough Hardware Co., $1.85.

The Council then adjourned to meet at the call of the Reeve.

BODILY WEAKNESS

A DISTRACTING CONDITION THAT IS PERMANENTLY CURED BY FERROZONE. A PLEASANT REMEDY IN TABLET FORM TO BE TAKEN AFTER EACH MEAL.

All fagged out ideas come as slow as molasses in January. You think of things just a minute or so too late. Snap is gone and the bouyancy and strength that makes life a pleasure, that's gone too.

The doctor would say that you are run down, and you don't eat or digest enough. Your stomach requires some aid, and probably your digestion needs a bracer. The blood should have phosphorus and iron to strengthen and purify it.

Now Ferrozone is a wonderful blood maker and nerve stimulant. It is really a food for the blood, nerves and vital energies and will improve your run down condition in a very short time.

Ferrozone will make you strong and capable of doing a heavy day's work without fatigue. It is a marvellous remedy and does marvellous things as the following testimonial proves.

"After my baby was born I was left in a weak, sickly condition, totally unfit for a mother's household duties. I was excitable and nervous, and trifling things bothered me very much. I somehow would not gain strength, although I took malt extracts and tonics all the time. A lady friend recommended Ferrozone which I used with splendid results. The first box helped quite a little, and when I had taken six boxes my former health, ruddy cheeks and good spirits, were fully restored."

You can't spend 50c. to a better advantage than on a box of Ferrozone and the sooner you get Ferrozone the sooner you will get well. Don't accept a substitute, but insist on your druggist supplying the genuine Ferrozone which sells for 50c. a box, or three boxes for $1.25. By mail from N. C. Polson & Co., Kingston. Ont

OBITUARY

—On Thursday, Feb. 4, occurred the death of Mrs. Murphy, wife of Stephen Murphy, blacksmith, of Indian River, in the [illegible] year of her age. The deceased was a resident of Indian River for about five years, and was sick about a year, consequently her death was not unexpected. The funeral took place to Douro cemetery on Saturday afternoon at half past two o'clock, and the large cortege of friends that followed her remains to the grave showed the high esteem in which she was held. The floral tributes at the grave were many and beautiful. She was the only daughter of John O'Brien, of Douro. The pall bearers were Messrs. Wm., Frank, Sam, Fred, Michael and Alex. O'Brien, the four former being brothers of the deceased. The sorrowing husband and friends have the sympathy of the community in their sad bereavement.

COLLIERY CLOSED

Halifax, N.S., Feb. 9—The Dominion Coal Company has closed down the International colliery at Bridgeport. The banking of coal has been completed there, and the company was unable owing to the depression of trade, to dispose of a further output. Three hundred men are out of employment.

WIRELESS TELEGRAPHY

London, Feb. 10—The first commercial wireless telegraph service between England and the Continent has been established by Marconi. An Amsterdam newspaper has arranged to have its messages transmitted by the Marconi system.

WAR BENEFITS HUMAN RACE

FRENCH SAVANTS QUESTION THE ADVANTAGES OF PEACE

They Think the World Would Soon be Over crowded but for Strife

Paris February 11.—"Is the preservation of peace necessary to the welfare of humanity?"

This question is being widely discussed at the moment. The war parties in Russia and Japan would have been highly encouraged had they attended an interesting debate on the subject at the Hotel des Societes savantes.

Some of the speakers seemed to be of the opinion that were there no war, pestilence, vice and misery the boulevards and the rest of the earth would be so crowded that people would be walking on each others' heads.

Charles Richet, an eminent doctor of the Academy of Medicine, sustained the affirmative side. Dr. Richet said that during the nineteenth century 15,000,000 men were killed in the wars. Besides, an incalculable amount of money was spent or left unearned. The twentieth century must pass before Europe will have recovered from the drain on her vitality and resources.

Maurice Sprouck, member of the Chamber of Deputies, declared it was hurtful to the human race to preach or practice peace. His chief argument was that peace enervates both the individual and the nation, while from the clash of arms emerges a sturdy people which has elbow room.

The shades of Malthus must have smiled approval when benevolent speakers insisted that war is most efficacious in checking the growth of population.

FROM THE GOSPELS

By their fruits ye shall know them.

Be ye therefore wise as serpents and as harmless as doves.

The tree is known by its fruit.

Sufficient unto the day is the evil thereof.

Neither cast ye your pearls before swine.

Love your enemies, bless them that curse you, do good to them that hate you, and pray for them that despitefully use you and persecute you.

Ye cannot serve God and Mammon.

Where your treasure is there will your heart be also.

Judge not.

Whatsoever ye would that men should do to you do ye even so to them.

Many varieties of colored marbles are found on the mountains surrounding Carrara, in Italy. Two varieties of blue, dove-colored marble, known as "Bardiglio" and "Pavonzaro," are well known in the United States, the latter especially being largely used and commanding a high price.

The Salvation Army in Chicago will try something new. Its members will produce plays. Major Winchell, of Peoria, says: "I have written 'Jonah and the Whale' in six acts." Here is a chance for realism and the play, faithfully produced, ought to delight the young.

UP IN THE GRAND OLD MOUNTAINS

Freed from the daily struggle, freed from the cares of earth.
Far from the noise-rent city, teeming with pain and mirth.
Freed from the bonds of labor, hidden from sham and fraud,
Hearing the songs of wild birds, living close up to God!
O what a sense of freedom, O what release from pain,
O what a heavenly calmness soothing the care-worn brain.
Out where the trout are leaping, out where the wild deer play,
Up in the grand old mountains dreaming the hours away.

Lie in the breast of Nature, held in her mighty arms,
Drinking her wondrous beauties, revelling in her charms,
Feeling the mountain breezes, soft as a feathery kiss
Fresh from the lips of Nature, thrilling the soul with bliss!
Flowers of tender beauty gazing with timid eyes
Into the pine tree's shadow, where the intruder lies—
Never is heaven nearer than here on a sunlit day,
Up in the grand old mountains dreaming the hours away.

Dashes the crystal brooklet down through its narrow bed,
Eager to meet in battle the boulder giants ahead,
Fearlessly smites the monsters, pounds at their breasts all bare,
Flinging its misty banners high in the balmy air!
Down through the gorge it dances, babbling a gay refrain
Till hid in the breast of the river that flows through the spreading plain,
Leaving behind the laggard, nor cares if he choose to stay
Hid in the breast of the mountains dreaming the hours away.

This is the dream of leisure, this is the cream of rest,
Far from all care and trouble, hid in old Nature's breast,
Coaxing the red health-roses back to the toil-paled face,
Feeding the brain prostrated and wrecked in the wealth-mad race,
This is the Elysian haven to which we with gladness flee
When worn and sore from the beating of the billows of labor's sea,
Tasting the sweets of idling, drinking the breath of May,
Up in the grand old mountains dreaming the hours away.

—James Burton Adams.

As the women run things nowadays, nobody but an Emperor can go in good society without having to be a hypocrite.

A woman's club is a place where a woman can go and learn all about baby food, garbage and Rubinstein at the same time.

Whenever you hear a woman tell another she is sorry she read a certain book, you can make up your mind the other woman is going to read it.

Many a hero to the world at large sees a "no-account" every time he looks in the glass.

The man who talks business at home is in danger of getting well-meant but risky advice.

No man can stand on top because he is put there.

Jealousy is the flattery of love. Husband and wife should never cease to be jealous of each other.

In man's eyes disappointment in love is but a pretence for seeking amusements without love.

PULLING UP STAKES

IN PETERBOROUGH

No Matter When or Where You See a Bargain, There's a Better One For You At

GOUGH BROS.

GOOD-BYE SALE

The second week adds to the intense interest of this sale. Its an occasion that warrants unbridled enthusiasm. Nothing can stop its progress.

Do you know how we're fixed? $68,000 worth of Suits, Overcoats, Furs, Boots, Shoes, Hats, Caps and Furnishings, must be slashed to pieces to bring down the stock. Are you thinking? Can't you see what this means? Can't you see that we must sell at a heavy loss in order to pull up stakes in time to let in the new firm.

WILL ANYBODY KINDLY RISE IN THE MEETING and say that Gough Bros. ever was or ever will be undersold. The fears of competitors and the frantic efforts of their bosses, cut no figure with us. No cast-iron "transformation" sale bulletin of reduced prices can side-track GOUGH'S GOOD-BYE SALE. We stand by the town and will issue new lists of cut prices every week that must beat the best markings of any other dealer by 25 per cent.

If anybody offers to sell Men's Overcoats and Suits worth $10 for $6.98, down goes Gough's prices to $5.98.

If anybody offers to sell Boys' Suits and Overcoats worth $6.00 for $4.48, down goes Gough's prices to $3.48.

If anybody offers to sell $3.00 Trousers for $2.48, down goes Gough's prices to $1 98. And so on all through the gamut.

Don't you see the logic in our slashing—we're pulling up stakes in Peterborough—necessity knows no law,—the stock can't be moved or kept for another season.

SINFUL HABITS IN YOUTH

MAKE NERVOUS, WEAK, DISEASED MEN.

THE RESULT of ignorance and folly in youth, overexertion of mind and body induced by lust and exposure are constantly wrecking the lives and future happiness of thousands of promising young men. Some fade and wither at an early age, at the blossom of manhood, while others are forced to drag out a weary, fruitless and melancholy existence. Others reach matrimony but find no solace or comfort there. The victims are found in all stations of life—the farm, the office, the workshop, the pulpit, the trades and the professions. Nervous Debility and Seminal Weakness are guaranteed cured by our New Method Treatment or No Pay. You run no risk. 25 years in Detroit. Bank security.

CURED WHEN ALL ELSE FAILED. No names used without written consent.

"I am 33 years of age and married. When young I led a gay life. Early indiscretions and later excesses made trouble for me. I became weak and nervous. My kidneys became affected and I feared Bright's Disease. Married Life was unsatisfactory and my home unhappy. I tried everything—all failed till I took treatment from Drs. Kennedy & Kergan. Their New Method built me up mentally, physically and sexually. I feel and act like a man in every respect. They treated me six years ago. They are honest, skilful and responsible financially, so why patronize Quacks and Fakirs when you can be cured by reliable doctors."—W. A. Belton.

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,

DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)

Wholesale and Retail Dealers in General Merchandise,

KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-28-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

RUSSIANS HEAR OF VICTORY THE REPORT UNCONFIRMED

St. Petersburg, Feb. 10, 5.30 p.m.—Some of the newspapers here print extras claiming a Russian victory at Port Arthur. Three Japanese warships and four torpedo boats are reported to have been seriously crippled. One report says the Japanese battleship Shikishima was sunk. The people are demonstrating, but there is no official confirmation of the report, and the announcement is discredited.

London, Feb. 10, 2 p.m.—Official despatches from Tokio received by Baron Hayashi, say the Japanese admiral, on arriving at Chemulpo, Korea, sent in word to the two Russian cruisers, giving them a time limit in which to leave. Shortly afterwards the Russians came out and attacked a Japanese torpedo boat which replied with a torpedo ineffectively. A general exchange of shots then followed. After a hot fire the Russians returned to Chemulpo and sank at the entrance to the harbor. It is not yet known whether their sinking was due to the Japanese fire or to the Russians' own action, but it is believed to be due to the former. The crews of both the Russian vessels sought refuge in a French warship at Chemulpo.

There were no casualties among the Japanese and their vessels sustained no damage.

JAPS CAPTURE 2,000 RUSSIAN TROOPS OFF KOREAN COAST

London, Feb. 10—A special despatch from Tokio dated today, says it is reported that three transports of the Russian volunteer fleet, conveying about 2,000 troops, have been captured by the Japanese of the Korean coast.

London, Feb. 10—Russia fired the first shot of the war. This was done by her gunboat, the Korietz, at Chemulpo, Monday evening, several hours before Japan attacked Port Arthur.

OTHER CATASTROPHES PREDICTED FOR RUSSIA.

First Events of War Show That the Czar's Country is Not Ready.

Rome, Feb. 10.—The Patria publishes comment on the first engagement in the Far East, supposedly from the pen of Admiral Bettelo, who has twice filled the post of Minister of Marine.

The writer says: "The result of this first attack is exceptionally grave and shows that the Russian commander was not prepared. It points also to a possibility of future catastrophes. The Japanese showed notable perspicuity and foresight, and the fact that the Russians were surprised at night proves that they were not viligant. If the Russian ships had been surrounded by metallic nets as is prescribed in warfare; if they had employed searchlights and especially if their torpedo boat destroyers had been active, this surprise could not have brought such disastrous consequences. The Japanese have proved their water scout service to be excellent, as, in the darkness of night, they knew exactly where to strike. As the Russians have no dockyard facilities in the Far East to repair the damages inflicted on their ships it follows that the three vessels struck by torpedoes are useless for service in the present war."

Released By the Japanese

The Three Russian Ships Seized by Japan Have Been Let Go

London, Feb. 10— In a despatch from Shanghai, dated Feb. 9, a correspondent of the Daily Telegraph says the Japanese have released three Russian steamers the Mukden, the Amur and the Schulka.

One Russian warship, an obsolete sloop named the Mandjur, the correspondent continues, is here, and Captain Crown who commands her, is evidently retained as an intelligence officer. He is assisting the Russian military agent, General Dessino.

The Russians expect that Japan will be too punctilious to commence naval hostilities until the alien crews have been discharged from the Japanese cruisers Nisshin and Kasuga.

Honolulu, February 10 — Numerous cables have been received by Japanese residents in Honolulu from their Government advising them that the reserves had been called out, and instructing them to come home at once. It is believed that there is a large number of reserves among the 60,000 Japanese in Hawaii, and that war will almost deplete the island of Japanese laborers. The present transportation facilities to Japan will be adequate to carry the large number of Japanese that will go from here.

PORT ARTHUR EXPECTS TO SEE MORE FIGHTING

London, Feb. 10—"We were slow in negotiating, so we are making up for lost time by quickness in action," said Baron Hayashi this morning. "The engagements at Port Arthur and Chemulpo were merely in accordance with plans long matured, so soon as our forces are landed in Korea, I look for an important fleet action at Port Arthur. The Russian vessels are not likely to give up the advantage they gained by being under cover of their land batteries. By going to the Chinese side, however, the Japanese fleet, by high angle fire, can drop in shells, which would make it very uncomfortable for the Russian ships lying moored close to one another. Thereby it is hoped to drive out Viceroy Alexieff's forces. Probably, like Admiral Covera, he may anticipate date, and come into the open of his own accord. The present events merely go to show the utter uselessness of Port Arthur from a strategic viewpoint."

According to the official advices received by Baron Hayashi, only four battalions of Japanese troops have up to the present been landed at Chemulpo, Korea.

New York, Feb. 10—All the members of the reserves have been commanded to remain at their present abodes, so that they can be found easily when it is decided to call them out, says a despatch to The Times from a Russian correspondent, who adds that one company of every regiment of guard troops in the districts of St. Petersburg and Moscow is to be sent to the Far East.

Cabling from Moscow a Times correspondent says: "Russia's military men do not conceal their satisfaction at the success of Russia's few months' delay. They declare their country today is ready for contingencies which would have been awkward a few months ago. They appear to be satisfied that Japan never can succeed in forcing Russia's land position, even though she comes out uppermost in the naval campaign."

JAPAN PREPARED FOR A LONG WAR

Financial Condition Especially Favorable for Meeting Big Outlay

SEA FORCE ABOUT EQUAL

The Destruction of Three of Russia's Ships Gives Japan a Great Advantage

London, February 11.—Despatches from the east confirm the report of the battle in front of Port Arthur, and the destruction of three Russian ships of war by the Japanese. This will leave the latter not only stronger in actual fighting strength, but also in prestige and ardour.

Tokio February 11.—Comparisons of finances and naval strength are now being closely scanned. It it possessed the command of the sea, with sufficient monetary resources, Japan could easily place on the Asiatic continent an army which Russia would be perplexed to crush. It has been repeatedly alleged in ill-informed circles that the present state of Japan's finances handicaps her heavily for fighting purposes. Precisely the same estimate found general credence at the outset of the war in 1894, but in truth Japan's position today is incomparably better than it was then. She has in the vaults of the Central Bank specie aggregating 113,000,000 yen (111,000,000), an altogether unprecedented amount. There also remains to the bank a legal margin of 25,000,000 of note-issuing power, which will probably be expanded to at least 50,000,000 when the inevitable year's-end drain is succeeded by the spring deposits. Out of the proceeds of the 50,000,000 yen worth of [illegible] great part lies in hard money at London. Next [illegible] year's budget shows a revenue of [illegible] yen, against an expenditure of [illegible], a surplus of over [illegible] being thus available.

The treasury has also in hand the three capital funds—the naval maintenance fund (30,000,000) the education fund (10,000,000) and the famine relief fund (10,000,000)—one-half of this total of 50,000,000 being in specie. Finally, the market rate of interest, which ranged from 10 3-4 to 12 1-4 last year, is now quoted at 8 1-4, and the banks throughout the country are embarrassed with funds for which they cannot find any profitable use. Japan's actual outlays during her war with China in 1894-95 were 165,000,000 yen on account of the army and 35,000,000 yen on account of the navy in which figures there were included large sums for the purchase of transports, men-of-war and ammunition, none of which expenses would now have to be incurred. As for the hard money side of the account, the aggregate outlays did not reach 12,000,000 yen. It may be said, therefore, that the financial situation is now notably favorable for Japan.

SEA FORCES NEARLY EQUAL.

Concerning the command of the sea, latest statement from authoritative Japanese sources shows the strength of the two squadrons as follows, premising that the Russian totals include vessels now on route for the far east: Of battle-ships Japan has six, with a displacement of 110,232 tons, but this superiority on Russia's side is somewhat redressed by the greater size, higher speed and heavier armament of the Japanese ships.

Of armored cruisers Japan has six, with a displacement of 55,752 tons, against five Russian, with a displacement of 45,016 tons.

Of protected cruisers capable of developing a speed of twenty knots and upward Japan has six, with a displacement of 25,106 tons, against eight Russian, with a displacement of 46,553 tons. In this list, then, which comprises first-class fighting material, Japan's ships number eighteen, of a total tonnage of 170,182, against twenty-two Russian, with a total tonnage of 204,801.

In second-class fighting material Japan has twelve cruisers of a speed of sixteen knots and upward, with a displacement of 37,729 tons, against one Russian, with a displacement of 2,285 tons, and Japan has twenty-three gunboats and coast-defense ships, aggregating 28,391 tons, as against twelve Russian aggregating 12,288 tons. Thus, in second-class material Japan has thirty-five ships, representing 66,120 tons, against thirteen Russian, totaling 14,573 tons.

LIPTON'S TEAS

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 15th from 5 cents to 10 cents per share. This company owns 6 claims, 600 x 1500 each. A 70 foot shaft on the Martha claim shows a vein of $30.32 ore 5 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $30.32 to $15,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay them $240 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address.

W. D. WALRATH.

NOTTINGHAM BUILDING, - SYRACUSE, N.Y.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.68 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $3.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon those two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $62.68 and $79.06 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet further it would be possible to meet a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group, is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mines for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

The PETERBOROUGH BROKERAGE CO., Fiscal Agts.

PETERBOROUGH, ONTARIO.

Equitable Gold Mining Co.

R. C. LANE, President. H. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 1,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, uprises, etc.

All told, there is 4,850 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 20th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 265-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

Dry Placer Miner formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house or sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

LATE WAR NEWS

Special—3.30 a.m.

Russian War Minister Arrives At Harbin.

St. Petersburg, Feb. 11—The statement that United States Secretary Hay has issued a note to the powers asking them to join in insisting upon the recognition of the integrity of China and Corea during and after hostilities, created much comment in diplomatic circles here, where any action taken with the view of localizing the theatre of war is welcomed. At the Foreign Office, where there is some disposition to distrust the purpose of the United States, an authorative expression in regard to the note was not obtainable.

London, Feb. 11—A despatch to Reuters Telegram Co., from St. Petersburg, says that M. Kurino, the retiring Japanese Minister to Russia, and his staff, has left there for Berlin. There was a large crowd of people at the station, when the party boarded the train. Police and gendarmes kept a space clear for the travellers, and there was no hostile demonstration. Continuing, the correspondent says—"An Imperial ukase has been issued authorizing Viceroy Alexieff to mobolize a reserve force within his Viceroyalty."

Washington, Feb. 11—President Roosevelt has decided to issue a proclamation of neutrality. It will probably make its appearance today.

Is This a French Grab?

Report That They Have Occupied Shan Ha Kwain Not Credited

Paris, Feb. 10— The Foreign Office discredits the reports from Tien-Tsin yesterday of the French occupation of Shan Hai Kwan—on the Gulf of Liao Tung—The officials say the negotiations on this subject occurred six months ago without definite results, and that the reported arrival of French troops there arose from the shifting of the small garrison detachments. The officials add there certainly can be no significance in the French occupying the forts vacated by the Russians.

The British commander at Tien-Tsin, Brigadier-General Ventris, and his chief of staff proceeded to Shan Hai Kwan yesterday.

EUROPE SURPRISED.

London, Feb. 10— Japan's daring coup in opening war on the strong Russian position at Port Arthur has astounded Europe. Not only is it indicative of the tremendous energy with which Japan will force the campaign, but it is regarded as an aim at decisive blow as far as naval operations are concerned. Naval experts here are of the opinion that the disablement of three of the best ships of the Russian fleet is sufficiently important to assure Japanese victory upon the sea.

All acquainted with the personnel of the Japanese army and navy agree that the war will be a constant series of dare-devil exploits, even riskier in character than the bold dash at Port Arthur The best officers of the navy have been begging for torpedo boat service, in which they could undertake enterprises involving almost certain death. The real difficulty will be to restrain the men from flinging away their lives unnecessarily.

The European public is already gaining the impression that the war will be short, sharp and decisive. There is even an impression that Russia, if driven from the seas, might be induced to make peace. This view, however, is considered to be far too optimistic

The midnight attack of the Japanese upon the Russian fleet has filled the Russian capital with dismay. The news was read silently, with full recognition of its purport, but there was no noisy demonstration. Indeed, the attitude of the public in its self-restraint recalled that displayed in London during the dark days of the Boer War. Later, when it became known that a solemn service of intercession to beg the Divine blessing upon the enterprise to which the nation is committed was to be held at the Church of the Winter Palace, crowds began to gather, but nowhere was there seen any manifestation of fervor. Such a manifestation would not be compatible with the Russian character.

London, Feb. 10— Baron Hayashi, the Japanese Minister here, has received official confirmation from Tokio of the destruction at Chemulpo of the Russian first-class cruiser Variag and the third-class cruiser Korietz.

London, Feb. 10—A despatch to the Central News from Port Arthur says the Japanese fleet returned there Tuesday afternoon and again bombarded the Russian fleet and forts, but that it soon withdrew.

The losses to the Russians, the despatch says, were small. During the firing a Japanese cruiser grounded.

Perhaps the most absurd story told in connection with the Japanese-Russian situation is that if war comes and Great Britain is drawn in by force of her Japanese alliance then Germany will occupy Copenhagen and close the Baltic. Germany has already made clear her purpose to keep out of it, and to try and close the Baltic would be plunging into it headlong Besides, she would have to take Denmark in with her in order to use Danish territory.

Moreover, the Kaiser knows his history pretty well and he has not overlooked Nelson in 1801 and Cathcart in 1807. Great Britain is as preponderant at sea now as then, and nobody knows it better than William II. He is not going to risk his navy in the Czar's quarrel

Russia to Blame for War

Chinese Territory Encroached Upon by Czar--Under Many Pretences

London, Feb. 11—The war impending in the Far East is based on Japan's attempt to induce Russia to fulfill its pledges to evacuate Manchuria.

It was in 1896 that China was first led to grant certain railway-making facilities to Russia in Manchuria. She was said to have then resolved, in recognition of Russia's friendly attitude toward her at the time that she was at war with Japan, to grant to Russia the right to build and control certain railways passing east and west through Manchuria. Russia also acquired the right in case of war, of using Port Arthur as a base of military operations. Russia, moreover, on the plea that the needful control of the railway could not otherwise be assured, was to be permitted to some extent, to employ her military forces in that region.

March 27, 1898, Russia was granted by China a twenty-five years lease of Port Arthur and the adjacent Bay of Talien-Wan. Russia likewise acquired the right of building railways to the same points. Russia promised that both ports should be open to foreign trade and to the ships of all friendly nations. How lightly this promise weighed on the Russians has since been manifested. The convention of April 8, 1902, between Russia and China, however, provided for the evacuation of Manchuria by Russia under certain conditions, beginning with the province of Mukden—i.e., Shink-King or Southern Manchuria. The Kirin province—central Manchuria—was to be evacuated Oct. 8, 1902, and the Hei-Lung Chuang province—northern Manchuria—April 8, 1903. The promise was not kept, but April 18, 1903, Russia presented a series of demands on China, which were to be complied with prior to the evacuation, already ten days late. These demands covered exclusively political and commercial rights for Russia throughout Manchuria. China refused. The United States, which had been directly promised by Russia that the open-door principle should be maintained in Manchuria, was at the time asking China, and so was Japan, that certain places in Manchuria should be open to foreign trade. Russia held out for a time, but consented in July, 1903.

The treaties referred to were signed between China and Japan and the United States respectively in October, 1903 and were ratified, in spite of Russia's vigorous protests, January, 1904.

The Russian Minister at Pekin further engaged, Sept. 1903, that Mukden province should be evacuated Oct. 8, but the engagement was accompanied by conditions impossible of acceptance, and after a pretense of the removal of troops had been made the force was reinstalled and the city of Mukden itself, sacred to the Chinese as the birthplace of the present Manchu dynasty, was ostentatiously reoccupied. Such is the history of Russia's dealings with respect to Manchuria. Since last autumn there have been frequent exchanges of negotiations between Japan and Russia, and Japan, feeling that Russia has made no effort to meet its terms, will now force the issue by war.

EVERYBODY READS THE TIMES.

ROUT THE JAPS

Vladivostock, Feb. 10—Private telegrams received here report the complete rout of the Japanese by the Russians on the Yalu River. These advices also claim that Chemulpo, Korea, has been occupied by Russian soldiers and marines.

THE COLORADO AND CONNECTICUT GOLD MINING COMPANY

(Incorporated under the laws of South Dakota.)

Main Office: MERIDEN, CONNECTICUT.

Capital $400 000   80,000 Shares at $5.00 each, full paid and non-assessable

OFFICERS

WILLIAM GARLICK, Wholesale and Retail Ice Dealer, Meriden, Conn., President
JOHN A THOMPSON, Investment Securities, New York City, 1st Vice-President
GEORGE S WILCOX, Retired Manufacturer, Meriden, Conn., 2nd Vice-President
B F BARNES, Manufacturer, Meriden, Conn., Treasurer
WILLIAM O. CORVES, Miner, Meriden, Conn., Superintendent
ARTHUR S GARLICK, Meriden, Conn., Secretary

BOARD OF DIRECTORS

JOHN A THOMPSON, GEORGE S. WILCOX, RICHARD F. DORSEY,
WILLIAM GARLICK, ARTHUR S. GARLICK, B F BARNES

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hindsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is 557 feet and in 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs) is as follows: Copper, 16.05 per cent.; Gold 0.02 ozs.; Silver 92 40 ozs. Total value $93.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper. $6 40; Gold, $6.82; Silver, $254 31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatsoever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years. Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5,500,000 (now claimed to be worth $15,000,000). About six years have elapsed since he purchased it. The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado. New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN."

Mr. Edwin J, Hulbert, M E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

B. F. BARNES, Fiscal Agent
Room 14, Wilcox Building, Meriden, Conn.

HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State o. California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity.

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely certain others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to

J. W. BUTLER, PRESIDENT,
713 Market St., San Francisco, C l.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placer in the ages past.

The Pearl Gold Mining Co. of Idaho

owns seven groups of mines—thirty-seven mining claims and is now working in ore in three of its mines.

The Treasury Stock is offered at a price tha will unquestionably make money for those who invest. The Stock is non-assessable—no debts—all clear titles—safe, experienced and conservative management.

BRITAIN WILL CONQUER THIBET

ADD SIX MILLIONS TO EMPIRE'S POPULATION

HER OBJECT NAW CLEAR

Russia Not Now in a Position to Resist British Action

London, February 11.—The Post, in discussing the Thibetan expedition, says;

How to check Russia's advance upon India has been one of the perplexing problems of Lord Curzon's administration ever since his appointment as viceroy. The threatened war between Russia and Japan has given him the opportunity long sought to offer effective opposition by invading Thibet and opening that land of mystery to commerce under British domination.

The only outlets between the Russian empire on the north and India on the [illegible] were causal seeds of friction.

Realizing the ultimate success of Russian diplomacy, a British military force was despatched from India and entered under the pretense of surveying the boundary into which [illegible] in the Himalaya mountains. The lamas and opposing force of Thibetans encountered by the "surveying party" were assured that the expedition had no designs upon Thibet and no intention of marching upon Lhassa, the forbidden city. As Thibet is under the the suzerainty of China, the Dalai lama appealed to the Chinese government. Inasmuch as the "boxer" uprising had clearly demonstrated China's inability to protect her own empire from foreign aggression, obviously she was too weak to protect the Thibetan boundary and the Dalai lama was advised not to resist.

In the meantime the British column, under Colonel Younghusband at last reports had penetrated the Himalayas 160 miles beyond Darjiling, constructing telegraph connection with Calcutta, and was progressing in a direct line toward the Thibetan capital.

The acuteness of the situation between Russia and Japan has relieved Great Britain of any further necessity for pretending that the British column in Thibet is there for the purpose of making a boundary survey. King Edward threw off the mask the other day in his speech at the opening of parliament, and announced that the objective point of the expedition was the forbidden capital city of the Thibetans. The military expedition, however, is referred to as a "political mission which has entered Thibetan territory to secure a due observance of conventions." This diplomatic explanation will not veil the real purpose of the expedition from anyone familiar with the history of Britain.

There is practically no chance of mistake in prophesying that Great Britain is in Thibet to stay and that her sway will be as enduring as Russia's domination of Manchuria. Without aid from China the Thibetans cannot hope to oppose successfully the march of the Britons upon their capital. Although they have frequently been portrayed as a savage and warlike people, the great majority of Thibet's 6,000,000 inhabitants are a mild-mannered, intensely religious people, devoted to the practice of esoteric Buddhism, unskilled in warfare and possessing neither modern arms or methods of defence.

Russia is not in a position at the present time to oppose her greatest rival in Asia by making a countermove into Thibet from the north. On the contrary the Russian government tacitly acquiesces in the British invasion of Thibet and consoles itself with the semi-official announcement that it will extend its sphere of influence over East Turkestan.

The Russian imbroglio with Japan is England's greatest opportunity and she is making the most of it, while China, once regarded as impregnable and invincible, sits helpless and sees her great empire systematically dismembered.

THE BALTIMORE FIRE

The Sufferers from the Recent Conflagration Need No Outside Help.

Baltimore, Feb. 11.—Amid ruins still hot the amazing [illegible] has begun its reconstruction. The governor, the mayor and various municipal officials met and threshed out the problems brought forward by the conflagration. From this conference came a decision that Baltimore for the present needs no outside help. Every available structure to-night bears crudely lettered signs announcing that within are the temporary offices of a firm. The names on some of these signs are those that rank high in the financial and commercial circles of the world.

After a meeting of the representatives of the insurance companies, it was decided that they estimate the loss at one hundred and twenty-five million dollars, with insurance aggregating ninety millions.

Five of the fire insurance companies having home offices here estimated their losses, as the result of the Baltimore fire at [illegible], divided as follows:— Aetna, [illegible]; Hartford, [illegible]; National, $500,000; Orient, 175,000; Phoenix, $250,000.

This afternoon it was discovered that practically all of the vaults and strong rooms of the financial concerns whose buildings were destroyed, are unhurt. From one trust company's safe alone treasures to the amount of more than [illegible] were recovered.

A surprise was the discovery that two financial concerns, whose homes were directly in the path of the flames, were practically unharmed. These were the Mercantile Trust Company and Brown Bros.' Bank. The escape of these buildings is attributed to their lack of height. They do not exceed four storeys, and as they were surrounded by lofty structures, the flames swept over them.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA —AND— BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00. Par value $1 00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 800 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $15 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore which cannot be exhausted in five years already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,600 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer
for a limited time
only a
SPECIAL BLOCK
OF 50,000
SHARES OF
THE TREASURY
STOCK
of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate
to your heart's content,
and quickly, then let us
hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1 00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is to-day giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 196 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 600 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*

C. L. ARZENO, General Manager.   603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

BRONCHITIS

Catarrhozone cures Bronchitis of three years' standing after four Doctors Failed

A Remarkable Case

"I feel it my duty," writes Mrs. Boyd, of Lauardville, N.B., "to let you know that I have been cured of Bronchitis of three months standing by Catarrhozone.

"With the least change in temperature or exposure to inclement weather, I was attacked with bronchial discomfort, wheezing in the chest, hoarseness, sore throat, partial loss of voice and stuffiness of the head. I consulted four doctors and was treated by them all without any benefit.

"Catarrhozone was strongly recommended to me by several persons whom it had benefited, and was induced to give it a good trial."

"It quickly relieved my difficult breathing, so I got the complete outfit, hard rubber inhaler, etc., and I began systematically the Catarrhozone treatment.

"In a few days the huskiness and hoarseness disappeared, and my voice became stronger. The running of the nose, and 'stuffiness of the head,' feverishness, difficult breathing, were all done away with before I had been using Catarrhozone very long

"About six weeks' treatment was sufficient to do more for me than four doctors failed to do in three years' time. It cured me and I don't believe there is another such a remedy on earth. Its action is speedy, pleasant and permanent."

Catarrhozone is a new, scientific treatment, and is guaranteed to cure Bronchitis, Asthma, Catarrh, Cold, etc. or money refunded. It contains nothing injurious and can be used by the infant as well as by the adult.

It is both a local and a constitutional remedy. The Inhaler supplies abundance of medicated air, which spreads through all the air passages, killing germ life, and healing sore spots as it goes.

The impurities in the blood are driven off by Ferrozone tablets which strengthen and build up the system to such a healthy condition that disease simply can't exist

Catarrhozone is recommended by doctors and druggists for all respiratory diseases. It relieves quickly and cures permanently. Complete outfit costs $1.00; trial size 25c. At Druggists or N. C. Polson & Co., Kingston.

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

$30,000 for Schools

A demand for $30,000 has been made on the Town Council by the Board of Education. This is the estimated cost of the schools for the current year.

"A Trip to Klondyke"

Today is Social Day for boys at the Y.M.C.A. and a lecture on the Klondyke will be delivered at 4.15 p.m. Lantern views will also be presented.

Coal by Express

There is a coal famine in Millbrook at present, owing to the blockade on the railways. One citizen had a ton sent him by express a day or two ago.

Improvements at T.A.S

A new set of stage fittings has been placed in the T.A.S. lecture hall, which adds much to the comfort and appearance of the room. The artistic work was done by our local painter, Mr. Fred. Cook

A Coming Treat

The Ladies Aid Society and Choir of the Charlotte street Methodist church propose to hold a bazaar and native tea on Thursday April 7th, in the lecture room of the church. This will be followed in the evening by a concert.

Reason For Being Late

Many complaints are being made regarding the late hour at which The Times has been delivered during the past few mornings. We may say that the trouble is caused by the fact that no power is available, the water in the river being dammed back by ice. A few days more relief will come, we hope.

—Tomorrow evening a social for men will be held in the Y.M.C.A. parlors.

The attendance at the

Peterboro' Business College

is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre of Canada.

Over 80% of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write for particulars regarding our correspondence course

WM. PRINGLE,
Principal.

Peterborough Turf Club

The adjourned annual meeting of the Peterborough Turf Club will be held in the rooms over the Palace Hotel on Monday, 22nd instant, when the election of officers for the ensuing year will take place.

A New Feature

A large bulletin board has been placed in front of The Times office and complete and interesting reports will appear daily. Special arrangements have been made enabling us to publish the latest war reports. If our boy does not call on you drop in and obtain a sample of the morning edition.

Auction Sale

Mr. John Raper, of 211 King street, disposed of his stock of household goods by public auction yesterday afternoon. Mr John Haggart conducted the sale and very good prices were obtained. Mr. Raper intends to reside in town but is giving up housekeeping owing to the death of his wife.

I.O.O.F. Social Evening

A number of visiting brethren from Pontypool attended the meeting of the local I.O.O.F., held last evening. Several degrees were conferred and a short interesting programme, consisting of literary and musical numbers was rendered, after which light refreshments were served.

Obituary

The death of William Douglas of Springville took place yesterday, at the ripe old age of seventy-six. He was well and favorably known throughout the country. Death was due to paralysis. The deceased was unmarried. Interment will take place at Fraserville on Saturday afternoon at 2 o'clock.

Hibernians Celebrate

The first At Home of the Ancient Order of Hibernians was held in [illegible] hall Hunter street, last night, and a most enjoyable time was spent by all present. About 80 persons were present and euchre formed the chief attraction there being 26 tables in use during the evening. Music was furnished by the T.A.S string band. Miss Whaley won the ladies' prize, which consisted of a gold plated spoon, while Mr. J. Hickey captured the honors among the gentlemen, his prize being a pair of gold plated cuff links. Among those present were Revs. Father Galvin, Father McCall, and Father O'Brien, the chaplain of the Order.

Railway Notes

—The Coldwater Planet says there are 500 loaded G.T.R. cars between that village and Midland awaiting shipment, and the company has refused to take any more wood or lumber at present.

—A local railway man says that at the rate the locomotives on this division are being put out of business there will not be enough left soon to draw the passenger trains. Over 30 engines were disabled in one week recently on this division

—It is a common opinion among railway men that the worst is yet to come of the snow blockade. They point out that while there have been heavy snowfalls this winter, there has not been much wind. This they expect in the next month or two, and consequent snow blockades.

Haliburton Line Still Blocked

Lindsay Post—For the past four days the people of Haliburton village have been completely cut out from civilization on account of the interrupted train service caused by the blockade of snow. There hasn't been any train from Haliburton since last Friday. The line is cleared to Kinmount, but north of that point it is badly blocked. The Haliburton train only went as far as Kinmount yesterday remaining there over night, and returned to Lindsay on its usual time this morning. The Coboconk line, after being blocked for several days, was opened early this afternoon, Conductor J. Greaves and crew left that village for Lindsay at 3.30 o'clock.

—The Canadian General Electric Co. Employes Mutual Benefit Association will hold its semi-annual meeting this evening in the T.A.S. Hall.

—About thirty young people enjoyed a snow tramp under the auspices of the C.D.A. Club on Wednesday evening.

Y.W.C.A. MEETING

Annual Meeting Held Last Night—New Board Elected

The annual meeting of the Y.W.C.A. was held last evening in the Association's comfortable rooms on George st. A large number of members and their friends were present, and the reports of the various committees were read and adopted. The Association is in a most prosperous condition, and much good has been done through the painstaking efforts of the young women connected with the institution. Special praise might be given to the courteous general secretary, Miss Lough, to whose earnest work much of this success is due.

THE "ENDLESS CHAIN"

The Coffee Drinker Knows What It Is

The person who uses drugs (such as coffee) looks forward only to more and more of the stimulant.

"I was little better than an invalid for many years, suffered terribly from indigestion, was also troubled with chronic bladder complaint and could not stand more than two hours at one time. I could not do my housework.

"I was always drinking coffee—almost lived on it—and the more I drank the more feeble I felt, sometimes I would collapse suddenly and fall in a helpless heap and would be weak for hours after. I was very emaciated and part of the time wished that I could die, I was so miserable.

"Since the lucky day I began to drink Postum Food Coffee in place of coffee, wonders have taken place for I have gained in flesh and strength, can do my own work, have given up wishing I could die, my bladder trouble is better and I feel a different woman altogether. Coffee you know is a peculiar slave driver. It first flatters one, then it slowly poisons the organs and then demands that the slave keep it up or suffer. It is suffer either way unless one goes on to Postum Food Coffee. Then the change is easy and the spell broken.

"My daughter was weak and thin and giving away every day from coffee drinking. She thought she could not give it up so I gave her some Postum and told her to give it a good trial. She gave up coffee entirely and has steadily gained in strength and health and is in better health ever since." Name given by Postum Co., Battle Creek, Mich.

All stimulants shorten life. Cut out coffee 10 days and use Postum Food Coffee and learn the truth about coffee. There's a reason.

Look in each pkg. for the famous little book, "The Road to Wellville."

WEDDING BELLS

A Pretty Wedding at Otonabee Wednesday Evening

The residence of Mr. Mark Graystock, Otonabee, was the scene of a pretty wedding on Wednesday evening, when his daughter, Miss Rosilia Margaret, was united to Mr. Robert Wilson, also of Otonabee. About fifty guests were present and the ceremony was performed by Rev. J. L. Hulah, of St. Luke's. The bride's attire was a gown of crepe de chene, with veil and boquet of bridal roses.

Miss Elizabeth Graystock, attended her sister and the bride was given away by her brother. Mr. J. A. Wilson, brother of the groom, acted as best man. The house decorations were very pretty and the wedding breakfast most dainty. Mr and Mrs. Wilson will reside in Otonabee.

INCIDENTS OF THE DAY

Newsy Paragraphs Picked Up By Reporters on Their Rounds

—The Police Court had a blank sheet again yesterday morning.

—The Peterborough Musical Quintette will play at Havelock today.

—The wounded Italian at St. Joseph's Hospital was much better again yesterday afternoon.

—The Royal Templars of Temperance held a successful social on Tuesday evening.

—New poles are being erected on Water street to replace those damaged by the recent storm.

—In future the I.O.O.F. will meet on the first Monday in each month, instead of every Monday evening as at present.

—It is very close to the 14th! A few more beautiful valentines left at The Times Bookstore. Hurry up if you want one.

—About 30 young people of Bailieboro enjoyed a sleigh-drive to Peterborough yesterday afternoon, and called in to see the fine display of Valentines on the counters of The Times Bookstore.

—Workmen are busily engaged in the repairs to the Hunter street buildings recently damaged by fire. The great quantity of ice is a serious drawback, but they expect to soon have them ready for business again.

When grumbling at the weather because your ear or nose gets nipped in the course of a hurried walk down town do you ever give a thought to the country school teacher and her small brood of scholars as they wade through a mile or two of drifts to spend six hours in what is too often a draughty, poorly heated building. In the country at this season the pursuit of knowledge is attended with difficulties and even dangers that scarcely enter into the comprehension of most citizens.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mr J. D. Kelly, of Toronto Junction, is in town on business.

—Mr Jas. Hickey, has recovered from an attack of la grippe.

—Charles Orford, a bell-boy at the National, is rather seriously ill, and is being attended by Dr. Brady.

—Mr. Malcolm McIntyre's many friends will regret to learn that he is seriously ill at his home in the Fifth Ward.

—Miss Helen Davies will sing at the concert in aid of the Deep Sea Mission on Monday night.

Mr. Herbert Snowden returned from the Northwest yesterday, and will visit his father for the next few weeks.

—Arrivals at the Snowdon House—E. Gibbs, St. Catharines; A. James, Toronto; Wm. Campbell and wife, Keene; M. Eastwood, Hall's Bridge.

—On April 1st Messrs. Tully, Morril and Meredith will take charge of the business now being conducted by Messrs. Gough Bros., George st.

—Arrivals at the National—J. Golden, Toronto; A. W. Scriver, Hastings; F. Page, Campbellford; G. L. Hodges, Toronto.

—Miss Steep, of Toronto, has been appointed to fill the vacancy on the staff of the Barnardo Home, occasioned by the departure of Miss Harris on a three months visit to England.

—The Officers Club of the 57th tendered Instructor-Sergeant Legg a complimentary banquet at H. Long's Palm Parlors last night. Instructor Legg has been here for the past four weeks, and will leave shortly for Toronto.

—Mrs. Hon. J. R. Stratton returned to town yesterday from a visit to Toronto. Previous to her departure from the city she held a most successful reception in the Speaker's Chambers, Parliament Buildings.

—Arrivals at the Oriental—H. W. D. Armstrong, J. H. Smitheran, T. Stewart, F. Langmuir, Lindsay; F. G. Smith, Buffalo; John Aldous, Fenelon Falls; E. J. Morrison, Rochester; F. J. Perego, Montreal; J. G. Morris, New York; P. H. Phipps, Toronto; D. P. Green, Buffalo; K. W. Rawson, Toronto; R. J. Kinghlyfide, Hamilton.

WIRELESS TELEGRAPHY

London, Feb. 10—The first commercial wireless telegraph service between England and the Continent has been established by Marconi. An Amsterdam newspaper has arranged to have its messages transmitted by the Marconi system.

EVERYBODY READS THE TIMES.

DISCOURAGED

The expression occurs so many times in letters from sick women to Dr. Pierce; "I was completely discouraged." And there is always good reason for the discouragement. Years of suffering. Doctor after doctor tried in vain. Medicines doing no lasting good.

It is no wonder that the woman feels discouraged.

Thousands of these weak and sick women have found health and courage regained as the result of the use of Doctor Pierce's Favorite Prescription. It establishes regularity, dries unhealthy drains, heals inflammation and ulceration, and cures female weakness. It makes weak women strong and sick women well.

"In the year 1899 I was taken sick," writes Mrs. Edna Crowder, of Ripley, Lauderdale Co., Tenn. "My limbs ached, had severe pains in back and lower part of bowels, with difficulty in urination, and smarting and burning pain after. I tried many kinds of medicine and four of the best doctors in the country, until I gave up all hope of recovery. In January, 1901, I wrote to Dr. R. V. Pierce, of Buffalo, N. Y., and received from him a letter, telling me to try his medicines. I took eleven bottles, six of 'Favorite Prescription,' five of 'Golden Medical Discovery,' one vial of 'Pellets,' and used one box of 'Lotion Tablets' and one of 'Healing Suppositories,' and am now able to work at anything I want to. Thanks to you for your valuable medicine and kind advice."

Weak and sick women are invited to consult Dr. R. V. Pierce, by letter, *free*. All correspondence is held as strictly private and sacredly confidential. Address Dr. R. V. Pierce, Buffalo, N. Y.

CLIMAX OF A COURT SCANDAL

AUSTRIAN PRINCESS IS SAID TO HAVE COMMITTED SUICIDE

SHE KILLED AN ACTRESS

And Brooding Over Family Troubles Princess Elizabeth Takes Her Own Life

New York, February 13. -- Princess Elizabeth of Windisch-Graetz Joseph, who was reported on December 6th to have shot the actress Louise Ziegler, whom the Princess discovered in the apartments of her husband, Prince Otto, has committed suicide, according to a persistent rumor here, says a special cable from Vienna to the World.

The castle at Prague is named as the place where the Princess turned her hand against herself.

The Princess, it is said, was suffering from a form of insanity which manifested itself in fits of jealousy. When suffering thus she sought to kill those whom she suspected of causing her despair. Her jealous fury alternated with periods of acute melancholy, during which she is reported to have attempted her life several times. Denials inspired by the Austrian Court were issued immediately following the announcement of the shooting of Louise Ziegler.

OUR NORTHERN WATERS

O BE TRANSFERRED TO THE DOMINION GOVERNMENT

Proposal to that Effect to be Accepted by Ontario Government

There is every prospect that the desired object of placing the streams and lakes of the watershed of the Otonabee under one jurisdiction, that of the Dominion Government, will before long be an accomplished fact.

The Commissioner of Public Works of the Province of Ontario has received from the Dominion Department of Railways and Canals a letter embracing a proposition having in view the acquisition by the Department of Railways and Canals of the several dams, owned by the Ontario Government, on the headwaters of the Trent Canal, at present controlled by the Ontario Department of Public Works.

The letter further states that it is desired to utilize those dams in connection with a scheme for "an extensive reservoir system to ensure sufficient water supply at all seasons for navigation purposes in the canal by storing and controlling the freshet waters, such a system being essential to the best efficiency, to secure which, a considerable expenditure has been made by the Dominion."

The Department of Railways and Canals, on the transfer of it, "free of cost" of the dams with all acquired lands or rights in lands flooded by such dams, undertakes to maintain these dams in their present state of efficiency, so long as they are required for floating logs down the various creeks to the main lakes below, and guarantees to [illegible] all rights in respect to these waters they now possess, and further [illegible] the leases of existing water [illegible] the continuance of such rights as they now hold.

The letter concludes with a desire for an early decision, so that an early transfer of the dams to the Dominion may be effected, so that all necessary preparations may be made for the coming spring.

The Ontario Government will consent to the transfer of the dams to the Dominion, providing the above conditions guaranteeing the rights of those interested in the waters, or works associated with them, are carried out.

The success of your cake depends upon the baking powder.

Cheap baking powder makes poor cake and a poorer cook.

The wise housewife uses a pure cream of tartar baking powder like Cleveland's. The result, — good, wholesome, digestible cake every time.

CLEARING UP THE BURNED DISTRICT

THOUSANDS OF WORKMEN ARE THUS EMPLOYED IN BALTIMORE

UNDER EXPERT DIRECTION

The Task of Bringing Order Out of Chaos has Been Inaugurated and is Proceeding

Baltimore, Md., February 13. — Three thousand laborers, with hundreds of carts and trucks, were set at work clearing up the debris in the burned district today.

Several hundred railroad workmen under the supervision of contracting engineers of the Penna. and B. and O. Railways began to remove the iron pillars and girders left standing around the ruins, which are dangerous.

Thus the enormous task of bringing order out of chaos in this devasted city has been formally inaugurated. The whole city has been aroused to the necessity of pushing forward the resurrection of the revived district. The magnitude of this work may be realized when it is estimated that the mere cleaning away of the debris will cost about $3,000,000.

A number of individual merchants and bakers announced today that they have already made definite arrangements with architects and builders for the erection of new structures, evidencing the indominable spirit of push and enterprise now abroad in this city.

Already fully a thousand firms have found quarters in other parts of the city, and others are still seeking places where to put only a desk. In numerous instances business houses outside the fire area have given up portions of their buildings to other unfortunate firms.

APPENDICITIS CONTAGIOUS

Disease is Due to Germ in Opinion of Dr. C. S. Sheldon

Madison, Wis., February 13.—Dr. C. S. Sheldon one of the leading physicians of the city, has made the astounding declaration that appendicitis is contagious. He says that the disease is of microbic origin and that the only rational explanation of it is that it is the result of a germ that can be transferred. The prevalence of the disease, he believes, substantiates his theory. He says there is an epidemic of appendicitis in this country.

Dr. Sheldon is a graduate of Yale and has been a practicing physician for the last forty years. He has been secretary of the Central Wisconsin Medical Association for many years.

Canadian Neutrality.

Ottawa, Ont., Feb. 11— There will be a proclamation of Canadian neutrality in the struggle between Japan and Russia. Notice to that effect will be published at once, and the proclamation itself will follow.

—The C.P.R. has adopted acetylene as the standard light for its cars. The system which has been selected is similar to the Pintsch system, but instead of using gas, acetylene gas is used, which is stored at a pressure of 10 atmospheres in tanks under the cars.

THE "ENDLESS CHAIN."

The Coffee Drinker Knows What It Is

A young man who earned a fine position tells how food helped him;

"In January 1902 I was engaged as a bookkeeper, for a large publishing house in New York city where the work was trying and hours so long I gradually broke down under the strain.

"My brain seemed thick and I lost the good health that I once claimed. I was compelled to resign my position, feeling that a good rest was needed.

"After three weeks' recreation I accepted a position as assistant cashier with one of the largest manufacturing concerns in the United States, feeling that the work would not be so hard mentally, and that the change would be for the best.

"It took just two days to convince me I had undertaken a task beyond the power of my overworked and underfed brain, and I decided to again resign, disgusted with myself and the world in general. That day I met a friend whose counsel I asked before taking the step. After I had related my troubles to him he said 'Eat Grape-Nuts my boy.'

"I looked on his remark as a joke at the time but by the time I reached home I had thought it over and determined to give Grape-Nuts food a trial, and the next day I found it on my table. The food seemed to give me new life from the start and gradually a great power for work became evident. It increased from day to day, my brain became active and my capacity for mental work unlimited. My duties at the office that at first seemed beyond my capability are now accomplished with precision, accuracy and pleasure.

"Last month I was promoted to the position of cashier amid the congratulations of my friends. I attribute my success to those wonderful little grains of food—Grape-Nuts, and to all I repeat a motto that is worthy of thought 'Eat Grape-Nuts my boy.'" Name given by Postum Company, Battle Creek, Mich.

There's a reason, give Grape-Nuts 10 days trial.

Look in each pkg. for the famous little book, "The Road to Wellville."

RUSSIAN ARMY SCATTERED

Russian Army will be Forced to Spread Out

St. Petersburg, February 13. — Despatches from Vladivostock received by the Ministry of War, state that the Japanese purpose disembarking troops in the extreme north-east of Corea. It is recognized that the object of this move is to compel Russia to spread its army over a broad front and thereby reduce its capacity for aggressive operations south of the Yalu.

Nicholas and his advisers are organizing a patriotic movement covering practically the whole of the European provinces of the Empire. They purpose unifying national sentiment by means of public speeches and newspaper articles. This movement is taken to indicate that the Government appreciates the gravity of the situation and intends to do its utmost to lay deep and broad the foundation for the coming struggle. Commercial magnates complain bitterly and even openly of the manner in which the far eastern problem has been handled but declare that the future of the Empire's imperial greatness is at stake and that, therefore, every Russian must nerve himself to make whatever sacrifices the crisis may demand.

MILITARY TRAINING CAMP

Will Accept Ontario's Offer for Strip of Land

Toronto, February 13.—The Globe's Ottawa special says; It is considered quite likely that the offer of the Ontario Government of a piece of land five by ten miles in the vicinity of Sharbot Lake a site for the proposed military training camp, will be accepted. The property is a plateau with a sandy soil, there being very few settlers in the locality. It is but four miles from the main line of the C.P.R., and easily accessible from the east and west, so that the cost of transporting men, horses and supplies to the camp would be comparatively light.

MOVEMENT OF RUSSIAN TROOPS

Copenhagen, February 13.—In a private letter from Siberia, the Danish Siberian Company, a large butter firm in this city, is informed that three trains with Russian troops pass daily. Each train conveys 300 men and horses. Each car carried eight horses or forty men. The strength of the line does not admit of heavier trains.

London Feb. 13—A late despatch says Russia's loss may be even greater than was reported yesterday, but details are not given. The Japs are still playing havoc around Port Arthur. Several more prominent buildings have been destroyed.

London, Feb. 13—An unconfirmed report gives the Russians another slight victory in North Corea. As so many similar reports have been pure speculation, this also might be untrue.

London, Feb. 13—The Manchurian railroad has been further blockaded, and another contingent of Russians blown up.

London Feb. 13—The Japanese army is reported to have landed troops at several points in Corea. A slight battle is said to have been fought in the northern part, but particulars have not been received.

London, Feb. 13—Japanese are reported to be strengthening a line of defence near Yalu, in order to keep back the Russians from Corea.

New York, Feb. 13—The Russians are reported to have attempted a raid on Corea but this is extremely doubtful, as a later despatch contradicts this. Even if it be true, it is quite certain that it did not result in much harm being done.

Berlin, Feb. 13—The foreigners have nearly all left Port Arthur, and preparations are reported as being made to attack with a land as well as a naval force.

New York, Feb. 12—The Herald has the following special from Cheefoo, dated Thursday,—

"Out of four Japanese torpedo boats which made the first attack on Monday night at Port Arthur, three were sunk with great loss of life. The fourth was a 29-knot boat, and escaped.

"The Japanese torpedo boats effected an entrance to the outer harbor by using the Russian signal flashlights; consequently the Russians did not fire on them.

HOW THE RUSSIANS WERE SURPRISED.

The following account of the first surprise is given by Russian naval officers;—

"The cruiser Pallada was on the outside edge of the Russian fleet, and on duty that night. The chief artillery officer noticed four torpedo boats approaching with full lights and in all respects like Russian torpedo boats.

"The officer informed his captain that the approaching boats were Japanese.

"The captain denied this, and said they were built in Port Arthur. The artillery officer insisted they were Japanese, and the captain became angry, saying; 'I am in command of this ship, sir.'

"Despite this, the artillery officer gave orders to prepare for action. Immediately after the Japanese launched a torpedo, but the Pallada was able to retaliate instantly, and the other Russian ships cleared for action.

RENEWED REPORTS OF ATTEMPTS TO LAND.

"It is now reported that the Japanese attempted a landing near Bedzero Pot-Tse-Wo, eighty miles north of Port Arthur, but were repulsed with heavy loss. They again tried to affect a landing at To-Lein Wan, under the shelter of the fleet, but owing to strong fort firing they were unable to succeed.

"It is said that one Japanese shipp has been torpedoed.

"British merchant ships in Port Arthur have repeatedly applied for permission to leave port, but this has been refused.

"The Tsarevitch was towed into harbor at Port Arthur at 3 o'clock on Tuesday afternoon. It is said that only her outer bottom was penetrated by the torpedo, that the Russians are now busy repairing her and that she can be repaired in two or three days.

"The Pallada is still outside only beached. She must be seriously injured, but she is now being repaired also. She is the only one of the torpedoed vessels now outside.

A HOSPITAL SHIP HIT BY A SHELL.

"A shell struck a hospital ship outside the basin during the bombardment. The captain's cabin and the chart-room were blown off, but there was no loss of life as the ship was only recently purchased, and was unmanned.

"Foreigners in Port Arthur were notified at 7 o'clock on Monday night that they had 24 hours in which to clear out but British steamers have been forbidden to leave. One German steamer arrived at Chefoo today, the first to get here from Port Arthur since the Columbia.

"On Wednesday, the Japanese tried to land at Pigeon Bay, near Port Arthur. Thirty-six Japanese vessels were then there. It is not known if the attempt succeeded.

WILL NOT ACCEPT

The Boers will not how Income in Cuba

Havana, February 13.—The Government had hoped to arrange to locate a number of Boer families upon Cuban lands in the interior districts; but, the credentials of the alleged representative of the South African Dutch that have been in Bermuda since the close of the Transvaal war proved unsatisfactory and negotiations were broken off, through the initiative of the Palace authorities, shortly after his arrival in Havana from Mexico. This individual, who styled himself "General Lombar de la Rey," it was discovered, could not speak a word of the Boer-Dutch dialect—as the Government here quickly sized him up as an imposter and ordered him out of the country. Now an effort is being made to direct the thousands of the Italians that are annually leaving the Old World for America, to the new Republic of Cuba; and, under the recent treaty negotiated between this Government and that of Rome, the Italian authorities are to favor Cuba as a port of destination for those emigrating to the New World.

JAP'S LIFE IN DANGER

Topeka, Kan., February 13.—Five hundred Russians at a settlement near Sweet Water have imprisoned Dr. Mikawa Kalins, a Japanese physician, in his office. They declare they will hold him until the adjustment of the trouble in the Orient. Officers have been notified and will go to the rescue of the doctor.

CEREAL CO'S. DISASTROUS FIRE.

UPPER STOREY OF THE COMPANY'S MILL BADLY GUTTED BY FLAMES

LOSS ESTIMATED AT $100000

Fire Started in Department Where the Dust Collectors are Located—Work will be Resumed as Soon as Possible.

The sound of the fire bell, about 7 o'clock yesterday morning, alarmed our citizens, and the news soon spread that the American Cereal Co's immense building was on fire. The recent blaze on Hunter street was fresh in the memory of all, and soon a large crowd had congregated around the large building. Mr G. W. Mulligan first discovered the fire and the alarm was quickly given. Before the arrival of the town brigade the factory's excellent water system was brought into play on the flames and no doubt this promptness saved the valuable structure. Then after the firemen arrived on the scene there was considerable delay before sufficient force could be obtained to reach the burning portion of the building.

CAUSE OF FIRE.

The Times in an interview with Mr. Chas Frost, who has operated the mill separator, which separates the dust from the grain kernal, obtained the information that the fire originated in the fifth story, the second from the top. He claims that some spark from the rapidly revolving machinery, must have ignited the dry chaff from the kiln, with the result that it immediately went off like gunpowder. Before he could stop the machinery the place was aflame, and rapidly ascended to the top flat.

FIGHTING THE FIRE.

The Cereal Company's building is about 120 feet by 110 feet by 210 feet, and the great height was a considerable drawback to the firemen. A long line of hose was attached to the hydrant on the west side, and carried to the roof by way of the grain elevator. The mill pump with a pressure of 130 pounds was also brought into play, and the different dams along the river were all freed to prevent any shortage of water.

GRADUALLY CHECKED.

For about two hours nothing but immense clouds of smoke, emerging from the upper windows could be seen. But about 9.30 livid flames shot upwards and at this crisis it was thought that the entire building was doomed. A slight change of the wind confined the flames to the western side of the building, and the firemen and their assistants worked with renewed energy. Finally steady streams were brought to bear on the top of the buildings and the fire was gradually checked, till in another hour it was quite evident that the lower portion would be saved. The damage, owing to the great deluge of water in the lower flats will be considerable, but the company claims that operations will be resumed very soon.

A HEAVY LOSS.

The loss is reported as being in the neighborhood of one hundred thousand dollars but is wholly covered by insurance.

JAPAN REJOICING

All Japan is Now Rejoicing Over Naval Victories

Tokio, February 13. — Japan is en fete. Today is the anniversary of the founding of the Empire and promulgation of the constitution. The reports of the Japanese naval successes have set the nation ablaze with excitement. At last night the streets of the capital and other cities were filled with processions of students with lanterns. Everywhere was heard the note of triumph. Today the streets are scenes of animated rejoicing. In the midst of it all is the movement of troops and the general air of a nation that has found itself and is determined and prepared to maintain its position to the death.

NEGROES BURNED

Mob Wreaks Awful Vengeance on a Colored Man and Wife

Doddsville, Miss., February 13.—Luther Holbert and his wife, negroes, were burned at the stake here today by a mob of 1,000 persons, for the killing of James Eastland, a prominent white planter, and John Carr, a negro, on Wednesday, at the Eastland plantation, two miles from this city.

The burning is the crowning act of a tragedy that has cost eight lives, has engaged 200 men and two packs of bloodhounds in a four days' chase across four counties and has stirred this section of Mississippi almost to frenzy.

EVERYBODY READS THE TIMES.

BRITISH STEAMER, FUPING, FIRED UPON BY THE RUSSIAN MEN OF WAR.

London Feb. 13

Four Members of the Crew Badly Wounded--On Arrival at Port A Protest Was Filed With the British Commissioner

3.15 a.m---Special To The Times:

The American Consul has reported to United States Minister Conger, that the Russian authorities have refused to allow the American steamer Climedes to leave Port Arthur.

The Climides sailed from Port Arthur on the 2nd of February with a cargo of flour.

"We Can't Stand for This."

A despatch says the British steamer Fuping, when leaving Port Arthur, where the recent naval conflicts have taken place, was fired upon by The Russian battleships in the harbor

FOUR MEMBERS OF THE CREW WERE WOUNDED.

The Russians afterwards apologized for firing on the British vessel.

The Fuping, upon its arrival at Wei-Hai-Wei filed a protest with the British Commissioners.

London Feb. 13—Baron Hayashi, the Japanese Minister here, has received a despatch from Tokio announcing that on February 11, two Japanese merchant steamers, the Nakanoviamaru and Zenshemaru on their way from Saakata to Otaru, on the Island of Hokkaido was surrounded and shelled by Russian warships.

The warships are presumed to be those of the Vladivostock fleet.

The shelling took place off the coast of Heuinadiokumhari.

The Nakanoviamaru was sunk, but the Zenshomaru escaped and has arrived safely at Fukayama, Island of Hokkaido.

St. Petersburg, Feb. 13, 6 a.m.—A report has been received from Viceroy Alexieff saying that the Russian torpedo boat transport Yeniseih has been blown up as the result of accidentally striking a mine in the harbor of Port Arthur.

THE CAPTAIN OF THE YENISEIK AND 9: MEN WERE LOST.

Paris, Feb. 13—A Chefoo despatch says confirmation has been received there of a report that the forces of Japan have met north of Seoul, and are engaged in a fierce battle.

"Thousands of persons are leaving Port Arthur daily by train, so that there is not even standing room in cars.

"The Russian rouble has gone down 24 per cent. at Chefoo, among the Chinese merchants."

Local Sports

Joe Corbett has been challenged by A. Lorne to run a five mile foot race to Downer's Corners and return. No word has been received, but it is quite likely that Corbett will accept.

Two rinks of Peterborough curlers visited Keene Thursday and played a friendly game with the following result.

Keene	Peterborough.
S. Mathers	G. Stevenson
J. Read	D. Hall
J. R. McIntyre	R. Kerr
M. Kenneally, 10	G. H. Giroux, 26
W. G. Read	R. Hicks
T. J. Wallace	R. Foote
Wm. Campbell	F. T. Matthews
R. J. McCammus, 19	W. G. Ferguson, 15

Majority for Peterborough, 12 shots.

Keene is quite enthusiastic about their game with the T.A.S. on Monday. They are down to hard practice and an interesting tussle is expected.

The Stove League, according to the Examiner would like to play a picked team from the Press League. They "hadn't orter."

Best's "Happy Thoughts" battled with the "Favorites" for the championship of the "Stove" League Thursday night, but the game resulted in a tie, two all. The latter, if anything, had the advantage, but the "Happies" got down to solid work and prevented a win.

The Business College recently spoke of the "Behind The Times" hockey team. Perhaps this was a weak attempt at humor but The Times boys fail to see the application of the term. A properly worded challenge from the "Business" men might receive a reply.

The Young Nationals hereby accept the challenge of the Aberdeens, to play at the earliest convenient date.

LACROSSE.

Hastings [illegible]—Some of our boys are already talking lacrosse and it is rumored that Keene, Warkworth, Campbellford and Havelock intend playing the [illegible] game next summer.

Financial Statement

The following Financial Statement was presented at the annual meeting of the Y.W.C.A. on Thursday night;—

Miss E. Morrow, treasurer, presented the general statement of receipts and expenditures of the Y.W.C.A. for the year ending December 31st, 1903;

Receipts.

Balance on hand Dec. 31, 1902 ...$		[illegible]
Subscription fees ...	[illegible]	44
Employment bureau ...	9	40
Income from boarding house ...	[illegible]	[illegible]
Sundries ...	13	[illegible]
	$27[illegible]	86

Expenditures.

Light & Power Co ...	21	[illegible]
Water rates ...	9	60
Fire ...	41	70
Expenses re boarding house ...	21[illegible]	19
Telephone ...	23	[illegible]
Accounts re printing etc ...	1[illegible]	23
Salaries and wages ...	[illegible]	45
Balance on hand ...	48	[illegible]
	[illegible]	[illegible]

The various annual reports showed great progress during the past year, and the prospects for a still more successful showing next year are of the brightest.

—It is stated on good authority that the outlook for cheese values is bright and promises to continue. The price keeps up, and the stock on hand is low. This will be encouraging news to dairymen who had some doubts as to the early markets.

WEATHER NOTES

Saturday — [illegible] winds; little higher temperature; light snow before night.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says, Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply Dr. S. Goldberg, 208 Woodward Ave., Room , Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month, and to outside points at $3 per year strictly in advance.

PETERBOROUGH, FEBRUARY 12, 1904

MAY THE WAR BE SHORT

The best thing that the world can wish for now is a speedy termination of the war. Every day it lasts, dangerous sparks are let loose which may fall into the powder magazine of the great powers. It is said that it was the people of Japan who forced the Government to take the initiative. This is a significant fact. It is the people everywhere who will be the element of danger.

A dynamic war in the East is—for Europe—an impossibility. Nor are the so-called "governing classes" likely to go into war there for anything new at stake. But the temper of the people is not so easily measured. Both the British and the French Governments are "popular Governments," and a strong popular movement, either in the Republic or the United Kingdom, might compel the Ministers to plunge into the chaos. If Russia is wounded but not killed, the pressure will be on France, while if Japan is brought to her knees, the pressure will be on Westminster.

It becomes the duty of all journals to keep cool heads. No one can seriously want this war to spread. Once it breaks its bounds, no man can tell where it will stop. Drag in one European power, and you have upset the balance of the little Continent; and they may all fall into the abyss in their efforts to restore it. Active sympathies will exist. Nothing can prevent so human a development in the face of the greatest of human dramas. But the mighty responsibility of keeping the world's peace should weigh upon every man with a voice or a pen.

A decisive victory which should place one of the combatants at a hopeless disadvantage, ought to offer an opportunity to the powers to play the part of "referee" and step in for the purpose of awarding the "decision." The powers named the reward of victory after the Russo-Turkish war and after the Japo-Chinese war; and they will in all likelihood do the same thing here. This being so there is surely no reason why they should not intervene a trifle earlier and name the victor as soon as it becomes apparent who he will ultimately be. This will save thousands of lives in the two countries, and lessen the risk of a general war.

EVERYBODY READS THE TIMES.

THE ANGLO-JAPANESE ALLIANCE

It need occasion no surprise if the treaty of alliance between Great Britain and Japan proves to be an important factor in the situation in the East before peace is re-established on a sound basis. The compact is that the two peoples shall stand together to maintain the integrity of China and Corea. If any power joins in the fray against Japan, Great Britain is bound to come to the help of the Jap.

If Russia overcomes the military and naval forces of Japan and reaches a position which enables her to dictate terms of peace, the most Russia can expect to receive out of the struggle is an indemnity. She cannot seize any portion of China, nor touch Corea, nor exact concessions of lands in Japan herself without a conflict with England, unless England turns her back on her ally and proves a quitter of the rankest kind.

It is probably this feature of the situation that so much affects British consols in the market as the assurance of war becomes more marked. There are mighty passions held in check by the British and Russian governments heretofore, but threatening to break loose against each other at each crisis in affairs of the Old World. Hardly any Government in England could last a day that was suspected of leaning toward the part of the craven in the present emergency, by deserting Japan when fighting for the very principle lying at the bottom of the treaty with that Government.

BRAIN POWER

HOW IT MAY BE STRENGTHENED AND INCREASED

The brain is a great nerve battery that presides over all the powers and impulses of the human body.

Very frequently as a result of poor blood, it becomes enfeebled, and a general weakness of the entire system follows.

No remedy possesses the marvelous brain strengthening power that Ferrozone has demonstrated in thousands of cases.

It contains an abundance of phosphates and iron which are essential in the formation of red, vitalizing blood, and in this way supplies the brain with extra power to perform its numerous and important duties.

Ferrozone is the best preparation for brain workers, and those inclined to a sedentary life. It improves the appetite, insures good digestion, regulates the bowels, and helps the stomach to do its work.

Lawyers, ministers, and those whose occupation entails much thinking and brain labor, will find Ferrozone of immense value, because of its power to stimulate mental activity. Students who take Ferrozone regularly, find it not only clears the brain and makes it more receptive, but makes them strong in body as well as mind.

A medical student of Toronto University, who has proved the good qualities of Ferrozone says: "On my study table there is always a place for Ferrozone. I find by keeping my digestion in perfect order, and maintaining a splendid appetite, it enables me to accomplish a great deal of hard work. I consider Ferrozone at the same time food for the brain, the blood and the nerves and can highly recommend it."

Very few are so strong and healthy that a course of Ferrozone would not benefit. It is good for the young and old alike, and is prepared in convenient tablet form, price per box 50cts., sold by all druggists and N. C. Polson & Co., Kingston, Ont.

A Warning to Emigrants.

London, Feb. 11—Professor Long, writing to the Manchester Guardian, denies discrediting the prospects held out to farmers on the virgin lands of Canada. But Prof. Long does discredit the suggestion that a 320 acre wheat farm in the North-West will yield a minimum net profit of $500. He never met a farmer in the North-West who dare make such an affirmation. He declares the suggestion is most tempting, and therefore most dangerous for young men who are tempted to emigrate, believing in the almost certain prospect before them.

APPLICATION TO PARLIAMENT

Notice is hereby given that an application will be made on behalf of the Town of Peterborough to the Legislative Assembly of the Province of Ontario at the next session thereof for an act for the following purposes:

1. That the said Town of Peterborough may be incorporated as a City, with all the rights, powers and privileges of cities under The Consolidated Municipal Act 1903.

2. To declare that it has been and shall be lawful for the Commissioners of the Peterborough Town Trust, with the approval of the Municipal Council, to invest a portion of the sinking fund received by them in the purchase of the buildings and other permanent improvements erected and made by tenants under lease from the Commissioners on any land vested in the Commissioners.

3. To provide for the vesting of the real estate and sinking fund which belonged to the Corporation of the former Village of Ashburnham in, and the management of the same by, the Commissioners of the Peterborough Town Trust.

4. To amend section 3 of 2, Edward VII., chapter 60, so as to authorize the Council without the assent of the electors to borrow sums not exceeding $16,000 in any year for the purpose of making extensions, repairs, improvements and alterations in the waterworks, and to pass by-laws for that purpose.

5. To ratify and confirm By-Law number 1051 of the Corporation of the Town of Peterborough, entitled, "A By-Law to aid the Colonial Weaving Company" being a By-Law to fix the assessment of the said Company at $4,000 for a period of ten years from the first day of January, 1904, upon the conditions in said By-Law mentioned.

6. To ratify and confirm By-Law number 1056 of the said Corporation, being a "By-Law to authorize the purchase of certain real property required for the use of the Corporation of the Town of Peterborough and to borrow the sum of $10,000 to pay for same and to authorize the sale of any part of said land not required for Municipal purposes."

7. To authorize the Council, without the consent of the electors, to borrow money for the purpose of erecting an Isolation Hospital or Hospitals, and to pass By-laws for that purpose.

8. To confirm the purchase by The Little Lake Cemetery Company of part of Lot number Forty-six and Lots numbers Forty-seven and Fifty-seven on Registered Plan No. 59 for the Town of Peterborough.

9. To make alterations in the number, term of office, manner of appointment and duties of the Town Trust Commissioners.

10. To provide for the reduction of the number of members of the Board of Education.

11. To provide for the election of Aldermen for a term of two years and for one half of the members of the Council retiring each year.

12. To provide for the appointment by the Council of a Court of Revision consisting of three members, none of whom shall be a member of the Council.

13. To ratify and confirm By-Laws passed by the Council of the late Village of Ashburnham exempting the property of The Dickson Company, of Peterborough, situated on Burnham's Point, and the property of The Canadian Ultimator Company, Limited, situated on the south side of Elizabeth Street, from taxes, except school taxes, for a period of ten years, upon the conditions in said By-Law mentioned.

Dated at Peterborough this sixth day of January, 1904.

R. H. D. HALL,
Solicitor for the said Town.

The Union Life Assurance Company

The Second Annual Meeting of the Company was held at the Head Office, Monday, February 8th 1904

The Report for 1903, submitted by the Directors, showed the year's business to have been most successful in every respect.

The New Business Issued was $5,557,287 60, being over Two Million Dollars greater than that issued by any other Company of like age; and One Million Dollars more than any other Canadian company in Canada in 1902. (1903 figures for other companies not yet available.)

The Net Amount of Insurance in Force is $3,9[illegible]4,978.69, being, with one exception, larger than the amount in force in any other Canadian Company in its second year.

The New Policies Issued were 33,665, showing over one hundred persons to have been newly insured in the Company every business day during the year.

The Claims Paid were 176, being at the rate of 1 every second day during the year.

The Total Income for the year, including premiums, interest and all other receipts, was $172,713.05.

The Paid-up Capital is $100,000.00, and the surplus $192,425.42, indicating a most unusual security to the policy-holders for a company in business less than two years.

General Financial Statement to December 31st, 1903

Millichamp, M.B., Medical Director, Toronto; Lieut.-Col. G. E. Allen Jones and A. E. Vallerand, Quebec. For the Maritime Provinces: Messrs. John F. Stairs, J. J. Stewart, Alfred Putnam, E. G. Smith, James E. DeWolf, Dr. M. A. Curry, Halifax; Harvey Graham, New Glasgow, N.S. Mr. George Clay, Chartered Accountant, was re-appointed Auditor.

PULLING UP STAKES

IN PETERBOROUGH

No Matter When or Where You See a Bargain, There's a Better One For You At

GOUGH BROS.

GOOD-BYE SALE

The second week adds to the intense interest of this sale. Its an occasion that warrants unbridled enthusiasm. Nothing can stop its progress.

Do you know how we're fixed? $68,000 worth of Suits, Overcoats, Furs, Boots, Shoes, Hats, Caps and Furnishings, must be slashed to pieces to bring down the stock. Are you thinking? Can't you see what this means? Can't you see that we must sell at a heavy loss in order to pull up stakes in time to let in the new firm.

WILL ANYBODY KINDLY RISE IN THE MEETING and say that Gough Bros. ever was or ever will be undersold. The fears of competitors and the frantic efforts of their bosses, cut no figure with us. No cast-iron "transformation" sale bulletin of reduced prices can side-track GOUGH'S GOOD-BYE SALE. We stand by the town and will issue new lists of cut prices every week that must beat the best markings of any other dealer by 25 per cent.

If anybody offers to sell Men's Overcoats and Suits worth $10 for $6.98, down goes Gough's prices to $5.98.

If anybody offers to sell Boys' Suits and Overcoats worth $6.00 for $4.48, down goes Gough's prices to $3.48.

If anybody offers to sell $3.00 Trousers for $2.48, down goes Gough's prices to $1 98. And so on all through the gamut.

Don't you see the logic in our slashing—we're pulling up stakes in Peterborough—necessity knows no law,—the stock can't be moved or kept for another season.

THE BANNIE MINE

ONE OF THE BEST AND SAFEST INVESTMENTS EVER OFFERED THE CANADIAN PUBLIC. . . .

The Bannie Gold Mining & Milling Company

Offers 20,000 shares of its treasury stock at

60 CENTS PER SHARE FOR 60 DAYS ONLY

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.
Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,
R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,
D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-22-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,
SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,
ED. BLOCK.

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 15th from 5 cents to 10 cents per share. This company owns 6 claims, 600 x 1500 each. A 90 foot shaft on the Martha claim shows a vein of $30.22 ore 5 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $30.22 to $13,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay them $240 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address,

W. D. WALRATH,
NOTTINGHAM BUILDING, - SYRACUSE, N.Y.

ON THE MOVE

RUSSIA HURRYING IN ARMY NEAR SEOUL

Japanese Troops Do Not Mind Severe Winter Weather And will Not Delay Landing Forces

London, Feb. 11—It was suggested today to a high Japanese official that having driven Russia from the seas, it would be necessary to delay serious land operations in Manchuria for several weeks until the weather moderates.

"No," was the reply. "We kept up an active campaign throughout the winter during the Chinese-Japanese war. Our troops do not mind severe weather."

The Japanese have reason to believe that Russia is hurrying an army south from the River Yalu, towards Seoul. Japan expects to occupy Seoul with a large force within two days, and to be fully prepared to meet the Russians before they reach that neighborhood. Moreover, now that she has command of the seas, Japan may be expected to land troops near the mouth of the Yalu River, and to land upon the rear of the Russian invaders in Korea. Important engagements are expected in Korea within a week.

Japan's Plans.

The plan is to quietly destroy the Russian fleet now off Port Arthur, with this done the Japanese squadron will simply wait and pick off the new arrivals as fast as they come within the fighting zone. Three or four smaller cruisers, whose names have not been mentioned as of Port Arthur, are headed toward the Indian Ocean to intercept the Russian convoy with coal munitions. Four hundred thousand tons of coal are now en route from Wales to Port Arthur. Coal is a contraband of war, and as Japan is probably short of such fuel, she is undoubtedly planning to capture the approaching convoy.

As soon as the Japanese fleet has wiped out naval barriers an army of 200,000 men will be transported to Dalny. This force of seasoned campaigners most of them having seen service in the Chinese war, is now waiting the word at Nagasaki, and adjacent stations, and can move at any moment. It will only require some fourteen hours to move the entire military force across to Manchuria and land them preparatory to a descent upon Port Arthur on the land side. The city is but poorly defended on the north and east, and while the squadron is bombarding from the sea approach, the army will have no greatly difficulty in invading the town from the north.

With Port Arthur as a base of land operations, the Japanese army will be in position to spread over the entire Liao-Tung Peninsula, and meet the Cossacks and Russian infantry on equal terms. It will also be possible to provision and coal the Japanese vessels from Port Arthur, instead of returning to Nagasaki for munitions.

The Powers' Plans.

One version of the negotiations now going on between the powers says that the proposal to limit the area of war operations is that they should be confined to Corea, and the territory in Manchuria which is leased by the Russians. There is official authority for the statement that Japan would refuse to accept the latter restriction.

GERMANS PLEASED WITH THE WAR

AND ARE GREATLY DELIGHTED WITH JAPAN'S SUCCESS

JAPAN'S ATTACK CORRECT

The Little Empire a Fighting Nation with Brains

Berlin, February 12.—Japan's naval successes are hailed with joy by the German people. Angry criticism is everywhere heard of the Government's conduct in deceiving the public as to the likelihood of war. The peace assurances of the Foreign Office were not discontinued until the battle of Port Arthur was reported. The nation at large sees a strong semblance in these tactics to those of Russia itself. The people no longer feel any doubt that Germany deliberately played the Czar's game. Fears are expressed lest the Fatherland may be even secretly pledged to an attitude that may strain its neutrality to the breaking point. In their present state of temper the Germans would be surprised at nothing. The inspired newspapers are showing bitter indignation against the Government.

New York, February 12.—Park Benjamin, an authority on the science of war, says: "The attack on the Russian fleet at Port Arthur was strictly under the rules of the game of war. It was the one proper thing to do under the circumstances, but displays on the part of the Russians a degree of carelessness that I am at a loss to explain. Where were the Russian searchlights that the torpedo boats of the enemy could crawl in and do such damage. What was the matter with the mines with which the harbour of Port Arthur is filled. Port Arthur is one of the most strongly fortified places in the world. Russia spent millions in its defence, yet the enemy could crawl into it and with carefully prepared plans destroy three of the most useful vessels of the fleet. It would have been impossible to have picked out three more important ships of the entire fleet, two of them the finest battleships in the Russian navy and the third one, one of the swiftest of the commerce destroyers."

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.68 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.96 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.56. This being a general sample taken from the dump. The other two assays are $62.68 and $79.00 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet more it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group, is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

The PETERBOROUGH BROKERAGE CO, Fiscal Agts.
PETERBOROUGH, ONTARIO.

Equitabl Gold Mining Co.

R. C. LANE, President. F. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 3,250 feet.

In addition to the above there are four small shafts, with a combined depth of about 800 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 265-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

Dry Placer Miner formerly of California.

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. W invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary beach of sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material.

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

THE BATTLE DESCRIBED BY BRITISH WITNESS

Tuesday's Fight at Port Arthur as Seen by a Britisher

Che Foo, February 12.—The steamer Columbia has arrived from Port Arthur with additional news of the attack by the Japanese fleet upon the Russian fleet in the roads outside of the harbor of Port Arthur. The Columbia was in the roads at the time, and felt the first shock of a torpedo explosion at 11 o'clock Monday night. The attack continued all night, and at daylight Tuesday two Russian battleships and one first class Russian cruiser were seen to have been disabled and beached at the entrance of the harbor. The cruiser was badly listed.

Yesterday morning the Russian forts opened fire on the Japanese fleet, which was about three miles distant. The Japanese vessels returned the fire, hitting several of the Russian ships, but doing little damage. The Russian cruisers then went out and the Japanese vessels disappeared. They were seen later going in the direction of Dalny, apparently undamaged.

Although the officers of the Columbia say there were 17 in the attacking party, only 16 were seen later in the day, near Foo Chow.

STORY OF AN EYE-WITNESS.

A number of the crew of the Columbia tells this story of the naval battle at Port Arthur;

"The Columbia was lying in the roadstead, surrounded by fourteen Russian battleships and cruisers. At 11.30 o'clock Monday night a severe shock was felt on board the Columbia. The Russians immediately commenced to operate their searchlights and opened fire towards the sea. The firing lasted only a short time. At 1 o'clock more shocks were felt and the Russians again commenced firing.

"The Japanese did not return the fire. At 2 o'clock two Russian battleships went in and were beached across the entrance of the harbor. They were soon followed by a Russian cruiser, which also was beached. None of the vessels were damaged above the water line. More shocks from torpedoes were felt during the early morning and then all was quiet.

"At 10 o'clock Tuesday morning Boyarin is outside, but within range of the forts.

The Columbia had a narrow escape from injury during the battle. While going out of the roads at Port Arthur the Russian cruiser Novik got between the Columbia and the Japanese fleet. Shells which passed over the Novik struck the Columbia. Her flag was cut into shreds, and one shell fell on her deck. The faces of those who were on deck were blackened with powder smoke. A naval officer who was recently at Port Arthur says the Russians were not prepared for the attack, and had an insufficient amount of steam up. A boat patrolled the Straits of Pechili continuously, but apparently the Japanese torpedo boats were not noticed until after the first torpedo was fired. The Russians fired, but the Japanese did not return the fire, and backed off.

An hour later the discharge of torpedoes was repeated, after which the torpedo boats withdrew some distance.

At ten o'clock Tuesday morning the Japanese fast cruisers circled within view of the whole Russian fleet, but they were not engaged. The Russians returned toward the harbor, after an hour. The Japanese came within three miles. A battle then began between the Russian forts and fourteen ships and the sixteen Japanese vessels. A few of the Japanese shells were effective, but as far as seen the Russian shells fell short.

The Japanese fleet was steaming toward Dalny when last seen.

The Columbia left just as Tuesday morning's contest began, and was unable to learn the result. It is probable that the Japanese fleet was convoying twenty-six troopships from Sasebo to some point in Corea.

The Japanese are reported to be in possession of the southern portion of the peninsula.

REJOICING AT TOKIO.

Grand Illuminations in Honor of Recent Victories

Tokio, Feb. 11— The destruction of the Russian cruisers Variag and the gunboat Koreitz at Chemulpo on Tuesday is officially confirmed, but details are lacking. It is not known who first opened fire, but the exchange lasted 35 minutes. The Japanese did not lose a man and their ships were not injured. The Russian crews, it is reported, surrendered to the Japanese at Chemulpo. Japan is elated by its success in the engagement.

St. Petersburg, Feb. 11.—The rigid censorship still prevents the newspapers this afternoon from receiving news from either Russian or foreign sources. No news has been received since Viceroy Alexieff's despatches, and the public consequently is still completely in the dark. All manner of rumors are afloat. The Government, however, has taken measures to counteract their publication, forbidding the sale of the offender, the St. Petersburg Gazette. The Government expressed great displeasure at the publication of the report of a Russian victory, and the raising of false hopes among the population.

Nevertheless, the rumors circulated variously are greedily swallowed. According to one report here, the Russian armored cruiser, Gromoboi, sallied out of Vladivostock, destroyed twenty Japanese transports off Southern Korea, and was herself sunk by Japanese cruisers.

Another story claimed that four of the Vladivostock warships, under Admiral Stackelberg had sunk four Japanese transports.

The most circumstantial story current in St. Petersburg is a report of the sinking of the Russian cruiser Variag, off Chemulpo.

Still another is to the effect that the recent Japanese attacks on Port Arthur was a feint to protect the passage of transports bound to Shan-Hai-Kwan to land Japanese troops there and effect a junction with the forces of Yuan Shi Kai, the Chinese commander in China, and then attack the Russians in the rear.

All the Russian navigation companies having vessels in Far Eastern waters are anxious about their fate. The volunteer fleet is particularly concerned regarding the Ekaterinoslav, tea-laden for Singapore, February 1, and the Voronej, which left Shanghai, tea-laden for Singapore, February 1. No news of either vessel has been learned. The tone of the press comment today is less bitter against Japan, which is perhaps significant.

Japs Were Repulsed.

Paris, Feb. 11—The Temps says it has received confirmation from official sources of the report from Port Arthur that the Japanese attempted to make a landing at the Bay of Port Arthur and were immediately repulsed.

Rejoicing at Tokio.

London, Feb. 11.—A despatch to the St. James Gazette from Tokio, under today's date says;— There are great rejoicing here at the success of the Japanese navy. The public buildings, residences, and business houses are decorated with flags. Bunting is to be seen everywhere. Tokio wears the aspect of a city of conquerers.

"A number of Russian bluejackets who swam ashore after the Japanese attack on the Varaig and the Koreitz have been made prisoners.

"Reports from Chemulpo say that both the Variag and Koreitz hoisted the white flag at the last moment.

Expect Attack by Japs.

London, Feb. 11— The St. James Gazette correspondent at Cheefoo cables that in anticipation of the return of the Japanese fleet, the Russians at Port Arthur are adopting extra defensive measures. Workmen are troops are taking down high brick buildings, which it was feared would fall and cause loss of life in the event of a Japanese bombardment.

Women Are Like Flowers.

Poets have been fond of likening woman to a flower. Her fairness is flowerlike. Her sweetness suggests the flower fragrance. Her very fragility finds its type again in the frail flower, which languishes when neglected, and is so easily destroyed. It is a pretty simile and almost as perfect as pretty.

All women love flowers, and every woman who grows them knows that their health depends on daily care. Not alone are water and sunshine necessary to the health of the plant. Their leaves and roots must be guarded from the parasites which soon destroy the flower's beauty and undermine its life.

If a woman would care for herself as she does for her plants she would preserve her beauty and retain her strength far beyond the period when the average woman looks old and feels older than she looks.

THE GREAT SECRET

of woman's preservation of her beauty lies in the intelligent care of the womanly health. So close is the relation between the health of the delicate womanly organs and the health of the whole body, that whenever the feminine functions are deranged or disturbed the consequences are felt by every nerve in the body. Severe headache, backache, pain in the side, and bearing-down pains are borne with by so many thousands of women that one who is in sound health is a rare exception. Most women would give anything to *know how* to be cured. The way is very plain. Follow the path made by more than a half a million women who have been perfectly cured of womanly ills and weakness.

"I believe I owe my life to Dr. Pierce's Favorite Prescription and 'Pleasant Pellets,'" says Mrs. Maria G. Hayes, writing from Brookland, D.C. "Six years ago, after the birth of one of my children, I was left in a weak, run-down condition. My health seemed utterly gone. I suffered from nervousness, female weakness and rheumatism, and I suffered everything one could suffer from these complaints. Life was a burden. I doctored with three different physicians and got no relief. I tried several patent medicines, all with the same result. I began to get worse, and to add to the complications I suffered terribly from constipation. I chanced to see one of your advertisements and concluded to try the above remedies. I commenced to take Dr. Pierce's Favorite Prescription and 'Pleasant Pellets' and began to improve right away, and continued improving and gaining in strength. I cannot express the relief it was so great. Seven months later my little daughter was born without much trouble. I feel that I would never have been able to endure my confinement had it not been for the help I received from Dr. Pierce's medicines. My baby was a fine, healthy child, and the only one I have ever been able to nurse. She is now two years old and I have never had to take any medicine since, so I feel that your medicine has made a lasting cure with me. I owe so much to *friends*, it would be impossible for me to express by word or pen how thankful I am to God and Dr. Pierce."

NOTHING IS SURER

Than the effect of Dr. Pierce's Favorite Prescription. It makes weak women strong, sick women well. It regulates the periods, stops disagreeable drains, heals inflammation and ulceration, and cures female weakness. It prepares the wife for motherhood, gives her vigor and physical strength, so that the birth hour is practically painless. It is the best of tonics because it contains no alcohol, neither opium, cocaine, nor any other narcotic. For working women in the home, store or schoolroom it is an invaluable medicine. It quiets the nerves, increases the appetite, and causes restful and refreshing sleep. Nursing mothers will find no tonic so beneficial to mother and child as Dr. Pierce's Favorite Prescription.

WHAT SHALL I DO?

That question is often on a woman's lips, for of her it is expected that she shall be ready to do something in any emergency in the home. When that question refers to health, sickness or disease, the answer will be found in Dr. Pierce's Common Sense Medical Adviser. This great work contains 1008 large pages, and is sent free on receipt of stamps to pay expense of customs and mailing only. Send 21 one-cent stamps for the book bound in paper or 31 stamps for the volume in cloth binding. Address Dr. R. V. Pierce, Buffalo, N. Y.

THE COLORADO AND CONNECTICUT GOLD MINING COMPANY

(Incorporated under the laws of South Dakota)

Main Office: MERIDEN, CONNECTICUT.

Capital $400.000 80,000 Shares at $5.00 each, full paid and non-assessable

OFFICERS

WILLIAM GARLICK, Wholesale and Retail Ice Dealer, Meriden, Conn., President.
JOHN A. THOMPSON, Investment Securities, New York City, 1st Vice-President.
GEORGE S. WILCOX, Retired Manufacturer, Meriden, Conn., 2nd Vice-President.
B. F. BARNES, Manufacturer, Meriden, Conn., Treasurer.
WILLIAM C. CORVES, Miner, Meriden, Conn., Superintendent.
ARTHUR S. GARLICK, Meriden, Conn., Secretary.

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE S. WILCOX, RICHARD F. DORSEY,
WILLIAM GARLICK, ARTHUR S. GARLICK, B. F. BARNES

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hindsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is 527 feet and is 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs) is as follows: Copper, 16.05 per cent.; Gold 6.02 ozs.; Silver 92.49 ozs. Total value $92.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper, $6 40; Gold, $6.82; Silver, $254 31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatsoever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years. Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5,500,000 (now claimed to be worth $15,000,000). About six years have elapsed since he purchased it. The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado. New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN."

Mr. Edwin J. Hulbert, M. E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

B. F. BARNES, Fiscal Agent
Room 714, Wilcox Building, Meriden, Conn.

HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

ncorporated Under the Laws of the State o California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and success experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a rare opportunity.

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely certain to others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to

J. W. BUTLER, PRESIDENT,
713 Market St., San Francisco, C l.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placers in the ages past.

The Pearl Gold Mining Co. of Idaho

owns seven groups of mines—thirty-seven mining claims and is now working in ore in three of its mines.

The Treasury Stock is offered at a price that will unquestionably make money for those who invest. The Stock is non-assessable—no debts—all clear titles—safe, experienced and conservative management.

POLITICAL TOPICS IN LONDON TOWN

THE BALFOUR MINISTRY NOT READY TO FACE CHAMBERLAIN

MAY NOW AVOID ELECTIONS

And, Later When Tariff Commission Has Reported Feel the Pulse of the Electors

London, February 11.—A group of French-Canadians here are endeavouring to interest English capitalists in a railway project from Quebec direct to Lake Huron.

The proposal is to place altogether bonds amounting to fifty million dollars. Seeing, however, that it is the apparent intention to sidetrack Montreal, it is understood the project has not been favourably received, save in quarters from which the promoters cannot hope for much.

Mr. Gerald Balfour's speech in the Commons last night provoked much stir among the anti-Chamberlainites, who herald the speech as an indication that the Balfour Ministry is frightened by the bye-elections and has decided to throw over all association with the Chamberlain campaign.

Mr. Gerald Balfour certainly did indicate that the Ministry, as a Ministry, was not prepared to adopt Mr. Chamberlain's preferential or general protection policy, as the issue to be decided at the next elections, but individual members of the Ministry remain warmly sympathetic and the Westminster Gazette is probably near the mark tonight when it suggests that the seeming Ministerial retreat is purely strategical, and is one of the most skillful and masterful of Mr. Balfour's manoeuvres the object of which is to keep the Government in being and avoid election until the Tariff Commission puts the public in possession of definite information as to the feasibility of Mr. Chamberlain's proposals.

Mr. Chamberlain, in the meanwhile, is taking a holiday in order to more thoroughly recruit his health and then return to anew and more formidable campaign.

PROTEST AGAINST CHINESE

GOLD TO BE MINED, NOT BY MEN, BUT ANIMALS IN HUMAN FORM

Australia and New Zealand, After Bitter Experience with Yellow Peril, Cried Shame.

London, Feb. 11— Queen's Hall was crowded last night at a mass meeting convened by a Parliamentary committee representing both sides of the House to protest against the importation of indentured Chinese into the Transvaal against the will of the people of the colony.

Sir William Vernon Harcourt, in a letter read at the meeting, said the great self-governing colonies of Australia and New Zealand, which had had a bitter experience of the yellow peril, with one voice cried shame. The proposal had lowered the British name in the estimation of the world. The gold mines were to be manned, not by men, but by animals in human form, who would be treated like lepers and compelled to cry unclean. The Cape would never federate with a Chinese-stricken Province. It would throw back the moral sense of the nation a whole century since the emancipation of the slaves.

Earl Carrington said that when he was Governor of New South Wales, the Chinese coolies were shut out. If the Home Government had objected, the colony would have been lost.

Mr. Sydney C. Buxton, M.P., said Britain would not have poured out her blood and treasure if she had known that South Africa was to be handed over to John Chinaman.

Mr. MacNamara, M.P., said if the ordinance passed every British soldier would tear his South African medal from his breast and throw it in the gutter.

Resolutions were passed denouncing the scheme as a grave and moral evil, and declaring that a proper solution of the labor shortage was the employment of British workmen at a reduced cost of living.

RUSSIA BLAMES GREAT BRITAIN

Says that She Can Claim Damages because Japan was Allowed to use Wei-Hai-Wei.

St. Petersburg, Feb. 11 – Reporting the charge that the Japanese attack on Port Arthur was made from Wei-hai-Wei (on the north coast of the Shan Tung Peninsula) the Novoe Vremya today bitterly assails Great Britain. "In allowing Japan to use the harbor as a basis of operations," says the Novoe Vremya, "Great Britain violated the fundamental principles of neutrality. Wei-hai-Wei must be regarded henceforth as part of Japanese territory, and Great Britain has forfeited the right to participate in any deliberations over the eventful fate of the harbor."

The Novoe Vremya further holds that the case is analogous to that of the Alabama, and says that Russia is entitled to demand compensation from Great Britain for the losses she has suffered.

WANTS TO FIGHT

Many Americans are Anxious to Fight for Japan

New York, February 12.—A scene of unusual activity was presented yesterday at the Consulate of Japan in this city. Mysterious telegrams came and went. In the main office was an unbroken line of men anxious to enlist in the service of the Mikado. In a comfortably furnished private office sat Sadaauchi Uchida undisturbed and smiling as though war was the remotest thing from his mind. The faces of the members of the Consul General's staff reflected the radiant satisfaction with the state of affairs. Uchida expressed himself as sanguine that Japan be victorious.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00, Par value $1 00. Full Paid and non-Assessable

At 75 Cents per share

This company now owns the well-known Augusta mine and its extension for over 700 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore which cannot be exhausted in five years already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1 00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is to-day giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 150 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable galena ore, the point of intersection being 600 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*

C. L. ARZENO, General Manager. 603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble
but a
Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

IT CURES

Actual size.

Colds

Coughs

Catarrh

Asthma

Bronchitis

Pneumonia

Consumption

CATARRHOZONE INHALER is the greatest invention of the century for the cure of diseases of the respiratory organs. It is sure to cure because it cannot fail to reach the germs in the air passages that give rise to the diseased conditions.

The antiseptic vapor of Catarrhozone is inhaled at the mouth, and after permeating the air cells and passages of all the respiratory organs, is exhaled slowly through the nostrils. It goes everywhere the air we breathe goes, and is certain to reach the seat of the disease no matter how remote.

AN ORDINARY COLD lasts about one day if Catarrhozone is inhaled five minutes every hour.

CATARRH and BRONCHITIS are relieved at once and cured for all time, by the persistent use of Catarrhozone.

CATARRHOZONE OUTFIT consists of a beautifully polished hard rubber inhaler and sufficient liquid for recharging to last two months. Costs $1, or trial size 25c. Sold by Druggists and N. C. POLSON & CO., Kingston, Ont.

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

Police Court

The ownership of a vicious dog brought trouble to a citizen yesterday. He received a word of advice and was dismissed.

The Italian Pasqleone de Paolo, who stabbed his brother last week, was remanded till next week.

Boy's Day

Yesterday was Boys' Day at the Y.M.C.A. and during the afternoon the rink was dotted with junior hockeyists and skaters. At 4.15 an interesting lecture descriptive of Klondyke life was delivered to which the boys listened with great interest.

Change of Business

Mr. Jas. Bell has purchased the Hunter street business of Mr. Hawley. Mr. Bell is well and favorably known in town and his genial treatment of his customers will no doubt greatly increase his trade. His present stock of choice groceries will be considerably increased.

Roof in Bad Condition

The Norwood Register reports that the rink may be closed owing to the unsafe condition of the roof. Several of the rods have broken. The bents are settling gradually, and unless the roof is supported firmly it will surely collapse. As the rink has not been overly profitable there is small likelihood of its being repaired.

The attendance at the

Peterboro' Business College

is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre of Canada.

Over 50 of their graduates are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write for particulars regarding our correspondence course

WM. PRINGLE.

[illegible] Principal.

Mark Street Church

The third Quarterly Meeting of the Official Board of Mark Street Church will be held this (Saturday) afternoon at 1.30 o'clock in the Sunday school room. The pastor will occupy his pulpit on Sunday morning, his subject being "Our Guide Book." In the evening Rev. J. P. Wilson B.A., of George street, will preach.

Sergeant Legg Leaves

Sergt. Instructor Legg, who has been in town for the past few weeks, instructing the officers' class of the 57th, leaves for Hamilton this morning. During the Sergt's short stay here he has acquired many friends, and his departure is attended with the sincerest wishes for his future success.

Who Can Tell?

One of our young townsmen is in a perplexed mood these days. The other evening he received a very pretty and unique but quite suggestive valentine. Up to date he has come to no conclusion as to the identity of the sender, but he claims he "saw that very same valentine at The Times Bookstore." Of course, we cannot satisfy his curiosity, but we have a fine assortment still left. Call in today. Don't wait till evening. They may all be gone.

The Farmers Friend

A clever swindler has turned up around Port Hope, according to reports from the Times of that town. The "modus operandi" of this remarkable genius is to approach a farmer claiming himself a representative of Mr. John Guardhouse, the Highfield cattle breeder. He agrees on the purchase of a number of the poor farmer's animals, then feels for his pocket-book, when, lo! he has forgotten it. Of course the sympathizing farmer lends him a ten to return for his own roll. No reports of his coming back have as yet reached the farmer.

$10—GRAND EXCURSION TO WASHINGTON AND RETURN—$10.

On February 26th the Lehigh Valley R.R. will run a special ten day excursion from Suspension Bridge to Washington and return for $10. Tickets good ten days. Stop over allowed at Philadelphia on return trip. Tickets good on all express trains, including "Black Diamond Express." For tickets, Guide to Washington, and further particulars, call on or address Robt. S. Lewis, Canadian Passenger Agent, 33 Yonge street, Toronto, Ont.

Almost an Accident

The pedestrian is in constant danger of being struck by ice falling from the eaves of buildings, and in some cases from the wires overhead. Several narrow escapes have been reported, one yesterday morning being perhaps a closer call than any. While two young ladies were walking hurriedly around the corner of George and Hunter, a great mass of ice hanging from the roof or wires above, suddenly became loosened, and, in falling, almost struck one of the ladies. This matter should be looked into by our town fathers before some accident has occurred. In a great many cases a little work on the part of the owner of the building, would remedy this evil.

MR. SNOWDEN PROTESTS

Says That His Opponent Was Unduly Influenced

A very exciting curling match was played on the rink yesterday afternoon between a picked rink of seasoned curlers skipped by Mr. Wm. Croft and a bunch of roarin' experts skipped by Mr. Wm Snowden. As might be expected the match was for blood, and was hotly contested from start to finish. Mr Snowden led until the last end, when his majority of four was turned into a minority of two, thus giving his opponent the match and the straw hats for the members of the winning rink.

Mr. Snowden says that he desires to protest the match, as he believes undue influence was at work on Mr. Croft's behalf. To The Times he suggests that the matter be referred to arbitration, and he would suggest that two honest citizens and a town councillor as a board to be chosen by Mr. Croft.

LAKEFIELD CARNIVAL, TUESDAY, FEBRUARY 16

Tickets on sale at Ormond & Walsh's Drug Store.

A SUCCESSFUL YEAR

Union Life Assurance Company Presents Annual Report

The second annual meeting of the prosperous Union Life Assurance company was held at the head office, Toronto, on Monday, Feb. 8th, and is presented to our readers in detail, in another column. The year has been a most successful one, the new business issued being nearly six millions. This means much when it is considered that it represents an excess of over two millions greater than that issued by any other company of like age. Further when compared with the report of 1902 it is one million dollars more than that issued by any other Canadian company. The net amount of business in force is with one exception, greater than the amount in force in any other Canadian Company in its second year. The new policies issued showed over one hundred persons to have been insured in the company every business day during the year. The large paid-up capital and the substantial surplus indicate a most unusual security to the policy-holders, and no doubt the coming year's reports will be even greater than this. The management is to be congratulated on such an excellent record.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mr. R. P. Davidson, of Lakefield, is visiting Toronto friends.

—Miss Webster, of Peterborough, spent a few days this week with Mrs. Jos Vansickle, of town.—Havelock Standard.

—Mr John Smith, of Ward Five, has returned from a business trip to the Ottawa Valley.

—Mr Jinkinson, the popular Lakefield jeweller, has the prizes for Tuesday evening's carnival in his window.

—Mr Bolton S. Armstrong, Cincinnati, Ohio, is spending a few days in town, the guest of his mother, London street.

—Arrivals at the National—D. McEachren and J. Goldsor, Toronto; Mr. and Mrs W. J. Robins, Indian Head; J. W. Graham, Toronto.

—Tweed News—Miss Bissard, of Peterborough is in town visiting her brother, Mr. Chas. Bissard, of the Ontario Bank. While in town she is the guest of Miss Jennie Rayburn.

—Mr. R. A. Peck, of Peterborough, is a member of the Empire Power Company, of Owen Sound, recently chartered for the purpose of dealing in electricity for light, heat and power. The company has a capital of $500,000.

—Miss Clara Halpin is the guest of Mrs Howard, of Hastings.

—Mrs. J. Craig, of Ward Five, is being visited by her sister and neice, Mr. and Mrs Duncan, of Manitoba.

—Guests at the Snowden—T. A. Wilson Niagara Falls, W. V. LaBelle, Montreal, P. C. Hagarty, Toronto, J. Delver, Kingston; J. L. Bronedon, Toronto.

—Mr. Lorne Robbins, Lossgard, and Mr. Wilbert Northcott, Pontypool, who came down to attend the Oddfellows at home on Thursday evening, spent yesterday in town.

—At the Oriental—W. G. Shepherd, Montreal; G. E. Burrows, Toronto; H. H. Lang, Ottawa, Robt. Brownlee, Toronto; S. E. Waffle, Montreal; R. C. Burlingham, Wellington; W. A. Gray, M Bradshaw, and G. E. Gennee, Toronto.

—Mr Jack MacPherson, of the Bank of Montreal, Peterborough, who has been transferred to Amherst, N.B., spent a few days at the end of the week with his parents, Col. and Mrs. Pennington MacPherson. —Ottawa Citizen.

INCIDENTS OF THE DAY

Newsy Paragraphs Picked Up By Reporters on Their Rounds

—A 'Want Ad' in the Morning Times will bring you a position. Try it.

—The Peterborough Quintette supplied the music for the Young Bachelors At Home,' held at Havelock last night.

—A meeting of the Anniversary Committee of Court Peterborough No. 210 C.O.F. was held last evening.

—The Public School of Hastings is closed at present, the wood supply having run out.

—The third quarterly meeting of the official board of Mark street church will be held in the Sunday school room this afternoon at 1.30.

—On Monday evening Mr. H. R. H. Kenner, of the Collegiate Institute staff will deliver a lecture on "Here and there in Sunny Italy," under the auspices of George Street League.

—Boys! Be prepared: Judging from the number of pretty valentines sold at the Times Bookstore this week, you will receive a few surprises Monday morning. You still have a chance. There are a few pretty one's left.

—Mr. Wm. White, the genial caretaker of Brock street rink informs us that business at this popular rink is unusually brisk this season. It is almost impossible to meet the great demand for hockey practice.

—Mr. Frank Christopher who met with a painful accident at the Cereal Company's dam on Wednesday morning is somewhat better, under the care of Dr. Greer. It will be some time however before he is able to leave his home.

—The Gospel meeting in connection with the local Y.W.C.A. will be held at the usual time—4.15—to-morrow afternoon. The Secretary, Miss Lough, will have charge, and the subject of her remarks will be "Fruit-bearing."

—Mrs G. Laing and Rev. A. H. Brace conducted the lesson at the meeting of the Primary and Junior Union, held at the Y.M.C.A.'s board room last evening. Quite a large audience was present and the lesson was most interesting.

—The "oldest inhabitant" is outdone. He cannot recall to mind such a winter as this. Even the man who lived to see a thousand Januarys and never saw one without a thaw is startled. Since the middle of last November we have had winter—and such a winter—much snow, extreme cold and fierce storms.

—In the Examiner's report of the Y.W.C.A.'s meeting, we notice the Gen. Secretary's report speaks of us as the Great Family Journal. Of course we claim the distinction of furnishing an up to date family paper, but the Secretary wishes it understood that her report read "The Morning Times." The Examiner's young man made the miss.

—Mr. J. W. Leonard, who recently resigned his position as Assistant General Manager of C.P.R. lines west of Fort William, at Winnipeg, says that he intends taking a rest for a time, and denies the report that he has obtained an appointment either in Australia or with Hill in the U.S.

—Cobourg Post—The plans for the new armoury are receiving the attention of leading contractors all over the country, and during the past week a large number have visited town for the purpose of looking over them. Prominent builders from Hamilton, Toronto, Peterborough, Kingston, Belleville and other places were among the number. From a conversation with some of the gentlemen we should judge that the competition will be keen. All speak high of the plans and say that when completed Cobourg will have one of the most convenient and attractive armouries in the country. Besides the outside contractors we understand our local builders will also put in tenders for the work and we sincerely trust the contract will be awarded to some of them.

JUST IN TIME.

A motorman in Chicago ran his car onto the approach of an open bridge but stopped it with the fender actually overhanging the gulf below. He wouldn't want to repeat the experiment because the chances are that he'd never again have the same good fortune.

Once in a while some one who has traveled to the very edge of the danger line of stomach disease stops just in time to save his health. But the majority of people go across the line, and slight symptoms of indigestion grow to disease of the stomach, involving the other organs of digestion and nutrition.

Indigestion and other forms of stomach "trouble" are perfectly and permanently cured by the use of Dr. Pierce's Golden Medical Discovery. It strengthens the whole body by enabling the perfect digestion and assimilation of food.

$3,000 FORFEIT will be paid by the World's Dispensary Medical Association, Proprietors, Buffalo, N. Y., if they cannot show the original signature of the individual volunteering the testimonial below, and also of the writers of every testimonial among the thousands which they are constantly publishing, thus proving their genuineness.

"I have been suffering for about eight years," writes Mrs. H. Pierce, of Millsprings, Ky. "Have had several doctors to treat me—some for female weakness and others for stomach trouble, but received no relief. When I wrote you for advice I was hardly able to work, and you advised me what to do. I took nine bottles, five of 'Golden Medical Discovery,' four of 'Favorite Prescription,' also two vials of the 'Pellets.' Dr. Pierce's medicines will do all that you claim for them. Believe I would have been in my grave if I had not taken them."

Dr. Pierce's Medical Adviser is sent free on receipt of stamps to pay expense of customs and mailing only. Send 21 one-cent stamps for the book in paper covers, or 31 stamps for the cloth-bound volume. Address Dr. R. V. Pierce, Buffalo, N. Y.

CAUGHT BY THE GRIP.

RELEASED BY PE-RU-NA.

MRS FRED WEINBERGER
HON JAMES R GUILL
JUDGE HORATIO J GOSS

"The world of medicine recognizes Grip as epidemic catarrh."—Medical Talk.

LA GRIPPE is epidemic catarrh. It spares no class or nationality. The cultured and the ignorant, the aristocrat and the pauper, the masses and the classes are alike subject to la grippe. None are exempt—all are liable.

Have you the grip? Or, rather, has the grip got you? Grip is well named. The original French term, la grippe, has been shortened by the busy American to read "grip." Without intending to do so a new word has been coined that exactly describes the case. As if some hideous giant with awful Gaze had clutched us in its fatal clasp. Men, women, children, whole towns and cities are caught in the baneful grip of a terrible monster.

The following letters speak for themselves as to the efficacy of Peruna in cases of la grippe or its after effects.

After Effects of La Grippe Eradicated by Pe-ru-na.

Mrs. Fred Weinberger, Westerlo, Albany County, N. Y., writes:

"Several years ago I had an attack of la grippe which left my nerves in a prostrated condition. Then I had another attack of la grippe which left me worse. I had tried three good physicians but all in vain. I gave Peruna a trial. In a short time I was feeling better and now I am as well as anyone."—Mrs. Fred Weinberger.

Hon. James R. Guill of Omaha.

Hon. James R. Guill is one of the oldest and most esteemed men of Omaha, Neb. He has done much to make it what it is, serving on public boards a number of times. He endorses Peruna in the following words:

"I am 68 years old, am hale and hearty, and Peruna has helped me attain it. Two years ago I had la grippe—my life was despaired of. Peruna saved me."—J. R. Guill.

A Relative of Abraham Lincoln.

Mr. Silas S. Lincoln, who resides at 913 I. Street, N. W., Washington, D. C., has the honor of being third cousin to Abraham Lincoln. He writes:

"I had la grippe five times before using your medicine. Four years ago I began the use of Peruna, since which time I have not been troubled with that disease. I can now do as much work at my desk as I ever could in my life. I have gained more than ten pounds in weight."—S. S. Lincoln.

Pe-ru-na Not Only Cured La Grippe but Benefited the Whole System.

Miss Alice M. Dressler, 1313 N. Bryant Ave., Minneapolis, Minn., writes:

"Last spring I suffered from la grippe and was partially cured but the bad after effects remained through the summer and somehow I did not get strong as I was before. One of my college friends who was visiting me asked me to try Peruna and I did so and found it all and more than I had expected. It not only cured me of the catarrh but restored me to perfect health, built up the entire system and brought a happy feeling of buoyancy which I had not known for years."—Alice M. Dressler.

An Actress' Testimonial.

Miss Jean Cowgill, Griswold Opera House, Troy, N. Y., is the leading lady with the Aubrey Stock Co. She writes the following:

"During the past winter of 1901, I suffered for several weeks from a severe attack of grippe, which left a serious catarrhal condition of the throat and head.

"Some one suggested Peruna. As a last resort, after wasting much time and money on physicians, I tried the remedy faithfully, and in a few weeks was as well as ever."—Jean Cowgill.

A Southern Judge Cured.

Judge Horatio J. Goss, Hartwell, Ga., writes:

"Some five or six years ago I had a very severe spell of grippe, which left me with systemic catarrh. A friend advised me to try your Peruna which I did, and was immediately benefited and cured. The third bottle completed the cure."—H. J. Goss.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, O.

SERIOUS ATTACK ON JAPAN'S SHORE

Heap of Trouble for Mikado's Ships If Admiral Virenius Arrives on the Scene--It is Quite on the Board That Japan Will Land Troops and Take Dalny Before Attacking Port Arthur--Gigantic Land Operations

GRAVE CONDITIONS OF UNREST EXISTS AT CANTON.

Boxer Outbreak is Feared When War Gets Hard at It--China Stands Pat.

Washington, Feb. 14.—A cablegram has been received at the Japanese Legation from Tokio, stating that, upon a request made through the British consul at Chemplpo, 34 of the Russians wounded in the recent naval engagements were put in Japanese Nurses' Hospital at Chemulpo, and are being treated by Japanese doctors.

Paris, Feb. 14.—The Russian Financial Agent here categorically denies the report that Russia is seeking to place another loan in Paris or elsewhere, and says the financial resources of Russia are such that she has no need to have recourse to a loan.

Paris, Feb. 14.—The semi-official Teemps says the Cabinets of London, Paris and Berlin are in accord upon Secretary's note. In the response which the three powers will make to the United States, it will be suggested that the text of the American document be clarified and simplified.

London, Feb. 14.—A despatch to The Standard from Brussels says that Prince Louis Napoleon, who is visiting his mother at Geneva, has been appointed to the chief command of the cavalry in Manchuria.

New York, Feb. 14.—A despatch to The Herald from Washington says; the information received by the German government that an outbreak in China might be expected as soon as the present war began is partly confirmed by official advices received here, which are receiving careful consideration, because their vital effect on the present movement to assure the neutrality of China.

The State Department learns that there is a grave condition of unrest in Canton and the region adjacent thereto. Arms have been constantly imported. The Chinese are reported to be often officered by foreign officers, especially Japanese.

There has been an American warship generally a monitor, there for many months. Conditions in the northern provinces, which were devastated by the Boxer outbreak, are not so bad, because of the severe lesson which the Chinese troops were given by the allies in 1900.

Germany has taken active steps to protect her interests in the interior by building gunboats similar to those used by the British.

Mr. Conger, at Pekin, constantly receives advices from missionaries in remote provinces and they constantly express apprehension of an outbreak.

CHINA STANDS PAT.

Tokio, Feb. 14.—The Chinese government yesterday proclaimed the neutrality of China during the war between Russia and China.

CHINA'S NEUTRALITY.

Washington, Feb. 13.—Sir Chen Tung Liang Cheng, the Chinese minister here, called at the State Department today and formally notified Secretary Hay that the Emperor of China had issued a proclamation of neutrality. The minister's cablegram contained the further information that in issuing the proclamation the Emperor had the strongest terms enjoined upon the viceroys and the governors of the provinces to adopt every precaution for the protection of foreign life and property in their respective territories. The minister feels that there is now no danger to be apprehended of attacks upon foreigners in China, in view of the strong language of the proclamation and its speedy distribution

St. Petersburg. Feb. 14.—A naval expert says that if the Hakodate story is true, Admiral Stackelberg and his squadron will be able to come south by the eastern coast of Japan and cause enormous havoc along the shore and to the shipping, and ultimately effect a juncture with Admiral Wirenius' squadron, on its way to the Far East from Europe.

SAW ONE SHIP SINK.

St. Petersburg, Feb. 13.—Viceroy Alexieff's silence about the Vladivostock squadron is explained as follows; For strategical reasons, the viceroy, as commander-in-chief, is empowered to dispose of the ships and men without consulting headquarters. The enumeration of the Russian ships engaged at Port Arthur was purposely omitted in the official reports as it would have given a valuable clue to the enemy. A private telegram has been received from a resident of Port Arthur, in which the sender claims he saw one Japanese warship sink. The fact that no mention of this was made in the viceroy's dispatches does not disprove the story, because the viceroy is careful not to announce anything outside of personally established facts. It is pointed out on high authority that the Japanese are not likely to admit such a loss and it is recalled that during the Chinese war they were most secretive about the casualties.

—Lindsay Post; The Haliburton line was opened out this morning, after a blockade lasting one week. The men in charge of the snowplow had a hard time of it in the drifts, some of which were of immense depth. The afternoon train went out today at the usual hour, and its arrival will be hailed with delight by the imprisoned inhabitants of the little village at the end of the line.

CALLED HOME TO WAR

Tokio Government Cables Its Citizens in Hawaiian Islands

Honolulu, February 15. — Numerous cables were received today by Japanese residents in Honolulu from their Government advising them that the reserves had been called out and instructing them to come home at once.

It is believed that there are a large number of reserves among the 60,000 Japanese in Honolulu, and that the war will probably deprive them of laborers. The present transportation facilities to Japan will be inadequate to carry the large number of Japanese that will go from here.

JAPAN WILL TRIUMPH

A Pekin View of Russian Prospects in the War

Pekin, February 15.—Official military men and diplomatists here are of opinion that the Russian position is almost hopeless. They say that the tides of diplomacy and war are steadily flowing against her and that she may decide more easily than any one can foresee to seek a pacific issue out of her trouble.

Japan appears to be mistress of the sea in every critical quarter and is landing troops in Corea without let or hindrance. These forces are being promptly followed by large quatities of war material, provisions and medical stores. There is, no doubt, that the Japanese will be able to land a force in Manchuria the moment they decide that it is strategically prudent to begin land operations against Port Arthur.

EMPEROR IS BLAMED

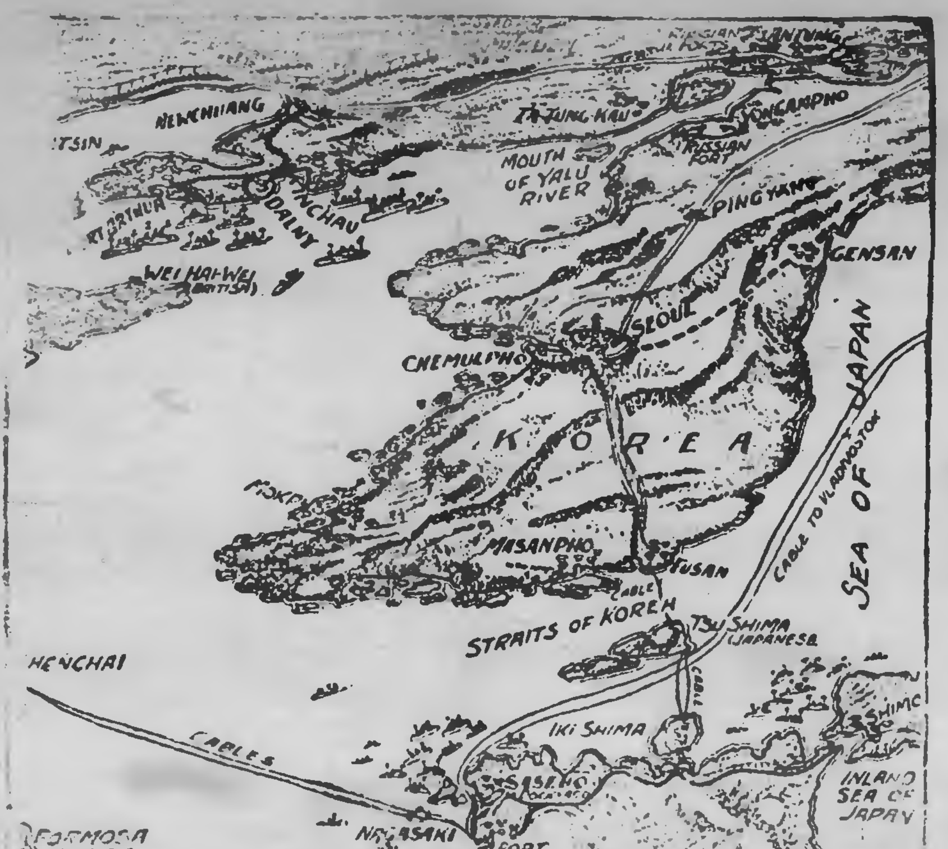
Throwing Blame for Reverses on Czar Nicholas

Berlin, February 15.—No less a personage than the Czar himself is held responsible in the highest Russian circles for the lack of preparation on the part of the Russian forces which enabled the Japanese to begin the war with a series of brilliant victories. On the authority of a Muscovite statesman, in Berlin, the divulging of whose name would cause a sensation, a press correspondent is able to state that Nicholas is the scapegoat of Russian reverses. The statesman in question was not expressing himself for publication, and his remarks bear a sincerity not common in the utterances of Russian diplmoats. "Practically," said the diplomat, "the Czar's war manifesto is an act of self-accusation. He cried 'peace, peace,' when everyone else knew there could be no peace. Only the roar of the Japanese torpedoes, at Port Arthur the loss of magnificent ships, and the murder of brave sailors awakened him from his delusion that war was unavoidable. He stubbornly tied the hands of his naval and military leaders, who viewed the crisis dispassionately, knowing a crash was inevitable, and begged in vain for authority to act. Alexieff may be made the official scapegoat for the events that have plunged the Russian arms into unnecessary disgrace, but the blame actually belongs to more exalted quarters.

$10—GRAND EXCURSION TO WASHINGTON AND RETURN—$10.

On February 26th the Lehigh Valley R.R. will run a special ten day excursion from Suspension Bridge to Washington and return for $10. Tickets good ten days. Stop over allowed at Philadelphia on return trip. Tickets good on all express trains, including "Black Diamond Express." For tickets, Guide to Washington, and further particulars, call on or address Robt. S. Lewis, Canadian Passenger Agent, 33 Yonge street, Toronto, Ont.

—Lent commences on February 17th. This is a trifle earlier than last year, and Easter Sunday will fall on April 3rd, which is nine days earlier than Easter of last year. Palm Sunday will fall on March 27th, and Good Friday on April 1st.



The above map gives an excellent view of the war operations. It shows the Korean peninsula, and a portion of Manchuria (top right hand portion) where most of the fighting will take place. In the upper left hand corner will be seen Port Arthur, the great Russian naval base, where the Japanese fleet made so bold an attack Monday night and Tuesday morning. Directly below, on the Korean coast, will be found Chemulpo, where the Russian cruisers Variag and Korieta were sunk by the Japanese.

The Russians who were on the northern bank of the Yalu river are reported to be marching in force into Korea. The Japanese began to disembark at Chemulpo, and will march nothward. In the course of a few days, therefore, a big land battle may be expected.

The immediate seizure of Masampho by the Japanese may be expected. This town, from a strategic point of view, is more important than Yongampho, a mere village at the mouth of the Yalu river, or than Chemulpo, the port of the capital, and is, in fact, the most important place in Korea. It is a small town of about four hundred houses, at the foot of a high range of hills, and within a few miles of Fusan, one of the best and biggest ports. But the town itself is of no consequence It is its position and its fine harbor that render its possession or neutrality a matter of vital concern to Japan and little less so for Russia. Masampho, which is capable of being made into a first class naval base, absolutely commands the approaches from Japan to Korea, and lies be-tween the two great Russian stations of Vladivostock and Port Arthur. With it in the hands of Japan com-muineation between Port Arthur and Vladivostock might be cut. In the hands of Russia it might be usedas a formidable base against Japan, whose nearest port, Shimonoseki, is only about two hundred milesdistant.

1,800 JAPANESE SOLDIERS KILLED; PERSUMABLY BY SINKING OF VESSEL

It is Reported That Fierce Battles are Now in Progress Both at Port Arthur and Seoul--12,000 Japanese Had a Hand to Hand Fight With Russians and Were Drive n Back

Che Foo, Feb. 14.—It is reported that 12,000 Japanese troops were landed at Dobe last Wednesday morning, and that they were met by the Russians who engaged them in a hand to hand fight, and the Japanese were driven back. It is al-or eported that Japanese troops have been landed 40 miles west; It is rumored that 1800 Japanese soldiers have been killed, presumably by the sinking of a transport. Disturbances are repoted in Seoul.

Che Foo, Feb. 14.—There are 400 Japanese still in Port Arthur it is said, and there is some uneasiness concerning their safety.

St. Petersburg, Feb 15.—A telegram from Kakawisk announces that Lienevitch has been appointed to the supreme command of the Russian army in Manchuria.

SATURDAY'S MARKET

Business Very Brisk on the City Market Square

An unusually large crowd of visitors attended Saturday's market, and the quantity of produce was greater than would be expected, considering the inclement weather and unhealthy condition of the roads. More fowl than usual was offered for sale. Chickens went for 80 and 90 cents per pair; turkeys, $1.25 to as high as $2.00, and geese, $1.25 to $1.50. Eggs are still high, going at 28 and 30 cents a dozen, and butter sold for from 21 to 23 cents perp ound.

Six Norwegian Vessels Captured

Nagasaki, Feb. 15.—Sir Norwegian steamers, chartered by a Russian naval contractor, have been captured. The vessels are; Lena, Activentis, Sevistad, Argo and Hermies. They carried coal cargoes. The Hermies arrived here today under convoy of a cruiser. Refugees who have arrived here assert that they were thrown into prison and their money and clothing taken.

Che Foo, Feb. 14.—A steamer arriving here frmo Port Arthur reports that heavy firing occurred in the Straits of Pechili at midnight.

For the Deep Sea Fishermen of Labrador

A concert and entertainment will be held in St. John's school house this evening; the proceeds to be presented to the Deep Sea Fishermen of Labrador. Among those assisting are Misses Davies, Gumpricht and Moore. and Mr. J. Lawrence. Admission, 25 cents.

THREE PEOPLE BURNED TO A CRISP

Montreal, February 13.—In a fire in Bloomfield Bros. building, Notre Dame street, this afternoon, two girls and a man were burnt to death. Several others are in hospital seriously injured by the fire. None of the dead are identified yet. The building was occupied with law offices.

Slaughter of Deer Up North

A lumberman just returned from a camp near Haliburton, says the Lindsay Post, says that deer are being slaughtered in large numbers by hunters and settlers, who locate them in their "yards" in the thick swamps and find little or no difficulty in annihilating the entire number owing to the depth of snow outside the sheltering trees. Our informant left the camp he had occasion to travel some miles on snowshoes to inspect some standing timber, and starting early he came across a thicket where 25 deer had spent the night. Several hours later he heard many shots fired less than a mile distant, and as he expressed it, "No doubt every deer was plugged." In all probability, Game Warden Smith, of Belleville, could secure some interesting information if he decided to take a tripnorth disguised as a lumberman or woodranger.

—The animal creation in towns have had a double share of suffering from the weather conditions of late. Their work has been twice as arduous, exposed to cold and driving snow, as in average times, and their food supplies have been growing scarcer each day. The roads being generally blocked with snow, no hay or oats could be brought forward, giving an upward tendency in price of the stocks on hand, with a corresponding tendency to shorten the allowance in the uncertainty of better times.

Berlin, February 15.—Reports are current in German military quatters that Russia has declared a protectorate over Thibet. Count Taube, Swedish Minister at Berlin, is conferring with the Foreign Office with reference to Swedish fears of complications between Russia and Britain. On account of this anticipation King Oscar abandoned his trip to Riviera. Sweden expects the British would seize the island of Gotland, after a show of Swedish resistance. Thereupon Russia would be likely to declare that Sweden had violated its neutrality.

German naval experts regard Japan as having already proved its superiority over Russia at sea. Count von Reventlow said to a press correspondent today; "The final issue must be decided on land. Henceforth the main object of the Russian fleet should be to prevent the transportation of Japanese troops. That the Russians permitted themselves to be attacked at Port Arthur shows that their strategy is second rate, and their watch service inefficient. In other words, they are fatally unready for action. If the Japanese continue to disable the Russian battleships their command of the situation will be absolute, enabling them to land troops at will.

At the Admiralty here the officials are awaiting hourly tidings of a decisive engagement off the east coast of Corea between the Japanese and Russia's Vladivostock squadron, which is reported to have sailed to attempt a conjunction with the Port Arthur squadron.

HAS RUSSIA DECLARED SUZERAINTY OVER THIBET?

If So Trouble Has Only Begun For the Great Northern Bear

London, February 15.—In April, 1902, an anonymous writer, who professed to have "had exceptional facilities for studying the case on the spot," contributed to the United Service Magazine, a British military periodical, a description of Port Arthur, which explains some of the recent happenings.

"The harbor," he wrote, "lies near the south-west corner of the Liao Tung Peninsula, a strip of alnd jutting in a south-westerly direction from the Manchurian coast, between the Yellow Sea and the Gulf of Pechili, shaped roughly in a parallelogram oft birty miles in length by ten in breadth, and connected at its north-east angle with the mainland by a very narrow isthmus.

"The harbor itself is of insignificant proportions, little more, indeed, than a crack in the coast-line expanding inland into a shallow, salt-water lagoon, said to be rapidly silting up from the attrition and deposit of the surrounding hills.

"The space in which there is sufficient natural depth for large or even modern-sized ships is so restricted that there is only room for two or three at the most, and a fleet lying inside has therefore to be packed close in the artificial dockyard basin on the east side of the fairway leading from the entrance.

"The entrance is very narrow, and has, in consequence, the advantage of being easily defended by mines. It is flanked on both sides by commanding heights, crowned with forts, and dominating the direct approach from the southward, the hills on the east side also completely screening the basin and dockyard from any long-range indirect attack from that quarter.

"The basin is of moderate dimensions, only some twenty-five acres in extent, with insufficient depth at present for the largest vessels, although this will be doubtlessly remedies.

"When that has been done the entire capacity of the harbor, including both the natural and artificial deep-water spaces, might possibly be set down at a dozen heavy-draught ships if very closely berthed. There is one dry-dock opening off the basin.

"The workshops, factories, and storehouses stand close round the basin and the whole plant and establishment, together with any squadron lying inside, unavoidably present a singularly compact massed target to long-range high-angle fire. Herein, it may be said at once, exists the very weak point of the place as a shelter and base for a fleet, the the object for which it was primarily, if not solely acquired. It can never have much value as a commercial seaport for want of space."

It is evident from this that the Russians had a reason for lying in the exposed outer harbor.

A VERY DANGEROUS POSITION.

The writer then points out the great weakness of the place.

"As pointed out, to use the place at all the vessels must lie huddled together in a very small space, and this space happens to be quite within high angle long range from several points on the neighboring coast, where attacking ships could anchor with impunity, quite invisible from the vessels inside and every fortress gun, as things now stand.

"A glance at the range table of modern heavy breechloaders will show with what remarkable accuracy they can place shells up to even the longest ranges, and with what pulvering angle of descent the latter can be made to finish their flight.

"The case before us would afford exceptional facilities for executing this particular form of attack at an ideal target, a harbor crowded with ships and surrounded by inflammable buildings.

"The only preliminary necessity for the attacking fleet would be a smooth sea. Anchored then securely head and stern, at previously selected points, and knowing the range and bearing of their objective with the minutest exactitude they could open fire in perfect confidence that every shell was taking effect from the very commencement.

"Half a dozen battleships can bring between them twenty-four twelve-inch guns into action, using their main armaments alone. Each gun can be fired at the rate of about one round a minute, or, allowing for specially careful adjustment and laying, any one round in two.

"The ships inside would, therefore, find themselves exposed to a plunging fire at the rate of about twelve 700-pound shells a minute, of which practically every one was striking and exploding on some point or another of the combined target, and to which they could make no sort of adequate reply. No fleet could stand that sort of usage for long. An hour would in all probability suffice to reduce it to flames and wreck."

PREDICTS SHORT WAR

Shipbuilder Cramp Thinks Struggle will be Sharp, However

Philadelphia, Pa., February 15.—The early reports which later proved incorrect, that the Japanese had disabled the Retvizan, one of the most formidable of the Czar's fighting machines caused a stir here. The battle ship was turned out from the Cramps' shipyard as late as 1902. Charles H. Cramp, who made the contract with the Russian Government for the construction of the Retvizan, was inclined today to suspend judgment regarding the engagement at Port Arthur until full reports had been received. He was not disposed to believe that the Russian officers had been caught napping or that Japan's success can be taken as indicating in any way the outcome of a decisive engagement between fleets of the hostile nations. A short, sharp decisive struggle is looked for by Mr. Cramp, now that Japan and Russia have come to the actual trial of war. The result of the conflict on the sea he holds to be entirely problematical and dependent upon the unknown factor of present minute efficiency rather than on the bulk of navies. On land he believes Russia would overpower her antagonist.

"Only the actual test of battle," Mr. Cramp said, "will develop the relative fighting abilities of the Russian and Japanese fleets. We see very much nowadays in the way of comparative tables showing the numerical strength of the two nations' navies. These mean nothing at all. The experience of the Spanish war should show how misleading such comparisons may be."

Local Sports

The match between Keene and the T.A.S. tonight bids fair to be most exciting. The game will be played on the Charlotte street rink, and will be the first played there this season.

The Examiner advertises the Times boys as having the "Championship fever." Entertaining this idea, they must, of course, consider the disease contagious.

The Nationals, a local hockey team, defeated an aggregation from Port Hope on Saturday morning by a score of 2 to 1. The teams lined up as follows;

Port Hope—Goal, Waters; point, Watts; cover point, Digby; forwards, Wheeler, Maguire, Pinkham, Campbell

Nationals—Goal, L. Giroux; point, Coughlin; cover point, Conroy; forwards, O Giroux, Nicholl, Hefferman, Fitzgerald.

Goal umpires—W. Nice, Port Hope, and W. Cahill Peterborough.

Referee—F. S Matheson, Port Hope.

The first series of Curling matches for the Kendry Cup will be played tomorrow evening, commencing at 8 o'clock sharp.

The local Rugby Club will hold their annual social evening at McCallum's restaurant, next Thursday evening. The officers and members will sit down to one of Billy's popular spread.

The Reliance hockey team would like to play the Junior Colts. Address Manager Wm. McCormick.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,
The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

[illegible] paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month, and to outside points at $3 per year strictly in advance

PETERBOROUGH, FEBRUARY 15, 1904

THE OFFICIAL STATEMENTS OF JAPAN AND RUSSIA

The official statement given to the world by Japan and Russia as the war begins make two facts perfectly plain.

The first from the very first beginning of negotiations last summer Japan insisted on the maintenance of China's sovereignty in Manchuria as absolutely essential to Japan's own safety and security as an independent nation.

The second is that Russia has as persistently ignored Japan's right to discuss Manchuria at all, and has sought to confine the whole discussion to Corea.

These things being so, it is clear that for months war has been inevitable. Japan has known that she would elect to fight now rather than try to maintain herself as a nation under the continual menace of Russia in Manchuria. Russia has known that she for her part would fight rather than disgorge her half-digested province.

We get much light on the respective attitudes of the two powers from the following sentences from their statements;

Japan says; "The Japanese Government utterly failed to see why Russia, who professed no intention of absorbing Manchuria, should be disinclined to insert in the convention a clause in complete harmony with her own repeatedly declared principle respecting the sovereignty and territorial integrity of China."

Russia says; "Such demands on the part of Japan naturally were inadmissable, the question of Russia's position in Manchuria concerning in the first place China, but also all the powers having commercial interests in China.

It appears that in the later stages of the negotiation, Russia actually did offer Japan a slight concession as to Manchuria, but that she hedged it about with conditions which Japan could not accept.

She required Japan to recognize Manchuria and its littoral as outside the Japanese sphere, and she also required Japan to agree to a neutral zone in Korea and to refrain from strategic use of any part of that country. In return she said she would recognize Japan's treaty rights in Manchuria, "exclusive of the establishment of settlements," but she did not consent to recognize Chinese sovereignty in Manchuria. This was in the note of January 6.

What the last Russian note, which Japan never received, contained is not stated, but it is clear from Russia's own language that it did not agree to recognize in treaty form the Chinese sovereignty.

The worst offenses that Russia charges against Japan are that she was impertinent in discussing Manchuria at all, and that she was very rude in suspending diplomatic negotiations. What Japan charges against Russia is that she refused to keep her old pledges to leave Manchuria to China; that she has taken aggressive measures toward Korea, and that by her actions she has threatened Japan's national existence.

Japan has been calm, moderate and swift in her negotiations. Russia has been aggressive, overbearing and needlessly dilatory. Nevertheless, is doubtless much more surprised than Japan that war has actually resulted. Japan played with her cards in her hands. Russia bluffed most atrociously and grossly underestimated the nerve of the Japanese.

Despite everything, it is probable that peace could have been maintained, at least for the present, if Russia's promises had possessed any credit at all among nations, and if she had shown herself in the slightest degree consiliatory in fact as well as in profession.

THE LATEST WAR IN A PEACE-PROFESSING WORLD

When Japan severed her diplomatic relations with Russia the general inference was that war could hardly be avoided, and that there can be no question as to the effect which this inference should have upon the civilized world. If the professions of great nations and their citizens are not a wreched mockery the dominant feelings caused by the near prospect of hostilities should be one of deep regret.

That government friendly to both the principals are in a mood to share this feeling is proved by the efforts that were made towards mediation and it would seem that the horrors of war must tend ultimately to strengthen the peace sentiment. But in the meantime the excitement of the conflict will stir the passions of the outlookers, and many complications will result. Various national interests will assert themselves, national sympathies and antipathies will be aroused, attempts will be made to place the blame on one side or the other. These attempts, in fact, are already being made, and opinion is divided as to whether the Japanese did not act rashly in refusing to await the Russian reply to their last note. The question, however, is not one to be determined by technical refinements, and they have the obvious defense of great provocation. Broadly speaking, they are insisting on the fulfilment of promises that have been made to all the world. If they are aggressive they are repelling aggression, and if the Russians had been content with justice and fair dealing there would have been no resort to arms.

Such discussions simply bring us back to the necessity for making the peace sentiment more effective through a constant agitation that shall put every nation under the restraint of a public opinion co-extensive with the world itself. And that there has been a great growth in this direction is evident enough. The need of apology and explanation is felt as it never was before when nations take to arms. Governments were never so sensitive as they are now to the reproach which the carnage and destruction of war casts upon them.

THE DEADLY TORPEDO

The first lesson of the war was the high effectiveness of the torpedo. It is a little unfortunate—so far as educational value goes—that the Russian defence was so bad, for we do not know now what might be done to prevent the attack of those submarine wasps. But certainly it has been shown that a poorly prepared fleet is at the mercy of a lively swarm of torpedo boats, or swift cruisers equipped with torpedo tubes.

Had the Japanese attack been confined to gun-fire, it could never have accomplished anything approaching the damage wrought by torpedoing. It is doubtful, indeed, if the Japanese fleet would have ventured to assail the Russian squadron under the guns of Port Arthur if it must have depended on the work of its batteries alone. It takes time to get the range of a ship; and that time would have brought the Russian gunners into action. Japanese superiority has now been sufficiently established to give the Japanese captains the necessary confidence to try even this; but, if the action must have begun with cannon, it is altogether that the attacking fleet would have endeavored to entice the Russians from under the protection of their fortresses for the crucial first engagement.

RUSSIAN LEGATION SECRETARY AT PEKIN SAYS JAPS WILL FIGHT HARD

No Aid Will be Given Mikado by England or Any Other Nation

Chicago February 13.—A. Boitchenko, first secretary of the Russian Legation in Pekin yesterday on his way to Russia to tell the Czar about conditions in the far east, and did not hesitate to say that war with Japan would be one of the hardest in modern history. He is at the Auditorium.

"The Japs will fight," he began. "They will fight like madmen, for they realize that it is a life and death struggle. I traveled through Japan before I left for Russia, spending two weeks there, sailing from Yokohama January 13. The people were then preparing for war. They saw it was coming and they were apparently glad of it. The people of Japan are patriotic. They believe that a war undertaken by their Mikado will be successful, for they have great faith in him and would follow him blindly.

THINK CAUSE IS JUST.

"In the first place they believe that they are fighting a just fight. Even though they be my enemy I must say this of them, both the Japanese are cautious and believe that my country is taking that which does not belong to it.

"There is still another cause for this anxiety of the Japs to fight. They believe that the alliance with Great Britain meant something. People in circles not well informed are certain that in case of a conflict that the British nation will let them have any amount of money that they will require. Even in the higher circles there is a belief that England will come to the relief of the Mikado. But they believe that Japan must first convince England that Japan is not fighting a losing fight. They are convinced that if they win a battle or two that England will offer aid. That is one reason why Japan will fight so hard at first."

"And your opinion?"

JAPANESE TO FIGHT ALONE.

"Is that the people of Japan are mistaken. England will not interfere; neither will any other nation."

"And China?"

"What assistance can China furnish? In the first place, there are mighty few good soldiers in China. Yuan Shi-Kai, viceroy of Chili, the province in which Pekin is situated, commands 10,000 troops. They are well drilled; in fact, they were drilled by a master from Germany. But what are 10,000 troops? And then China has no money. You Americans would say that China would offer its moral support, but that does not count for a great deal. I believe that China's greatest support will be the robbers and brigands in Manchuria. They will do their best to wreck the Siberian railroad and the telegraph wires. No, I believe that Japan must fight her own fight."

"And the sinews of war?"

FINANCES OF THE WAR.

"Will come from the people of Japan. There are many rich merchants in that country. They will beggar themselves to win. They realize that it is war to the death and they will give their all to see the yellow man victorious in the east."

Mr. Boitchenko will pay his respects to Baron Schlippenbach, the Russian consul in Chicago, this morning, and then will continue on his way to Russia.

—The life of a railway mail clerk is full of danger, and one almost always sees the name of one or more of them in the list of dead or injured after every big wreck. Last year in the United States 11 were killed, 66 made cripples for life and 36 more or less injured while on duty.

JAPAN'S NEW MOVE

Japanese Land Force on East Coast of Corea

Tokio, February 13.—Japan has landed a large body of mixed troops at Wonsan a Japanese Colony half-way up the east coast of Corea. This force will co-operate with that already established at Pingyang on the opposite side of the peninsula. These two forces constitute Japan's second line of defence against the Russian troops seeking to envelope Corea from the north. The first line of defence is composed of troops dispatched to occupy positions which constrain Corea from the south bank of the Yalu River. Whether this army will reach its destination in time to intercept the invaders, remains to be seen.

Japan's military strategy even thus early is based on the assumption that its command of the sea on both sides of Corea is reasonably secure. Troop-laden transports are constantly leaving Japanese harbors bound for the north. The mobilization of the army has been effected without a hitch. The transportation of soldiers and supplies by rail from the interior to the coasts is proceeding with clock-like precision and the appearance and behaviour of all arms of the service are ideal. The only signs of excitement are found among the women and children and the railway station inland where crowds assemble to exchange farewells. The officers maintain the strictest discipline and the rank and file look every inch the fighting men they are expected to prove. The eye encounters nothing in all this moving picture except the most impressive proofs that the nation is in deadly earnest.

A Woman's Friend

It's Because Ferrozone Brings Good Health That it Brings Good Looks and is Counted an Invaluable Friend by Millions of Women on this Account

Many women look old and lose their beauty, not through age, but through disease, ill health and suffering.

If you don't feel your best, of course you won't look your best and as long as your blood remains impure, your nerves unsteady, don't expect to feel tip-top.

If you have no appetite, poor digestion, are bilious and constipated, your skin will be sallow and pimply with an unnatural pallor about the cheeks.

Women without number who have suffered the mortifications of this run down condition, have made themselves healthy and well by taking Ferrozone. It is a wonderful remedy for the blood and nerves, and brings good looks because it brings good health.

Take Ferrozone for your beauty. It is a wonderful restorative, and strengthener for weak women, purifies and enriches the blood, and sends it circulating to all parts of the body. Then it builds up muscle and tissue puts on fat and makes the action of the heart regular and strong.

Nothing can possibly do you so much lasting good as Ferrozone. It will enable you to go through life with pleasure and assurance, free from sickness and worry. We are quite sure you need Ferrozone, and know it will do you immeasurable good.

Three weeks treatment costs 50c, or three times that much for $1.25. At all druggists, or N. C. Polson & Co., Kingston, Ont.

—The animal creation in towns have had a double share of suffering from the weather conditions of late. PULLING UP STAKES
IN PETERBOROUGH

No Matter When or Where You See a Bargain, There's a Better One For You At

GOUGH BROS.
GOOD-BYE SALE

The second week adds to the intense interest of this sale. Its an occasion that warrants unbridled enthusiasm. Nothing can stop its progress.

Do you know how we're fixed? $68,000 worth of Suits, Overcoats, Furs, Boots, Shoes, Hats, Caps and Furnishings, must be slashed to pieces to bring down the stock. Are you thinking? Can't you see what this means? Can't you see that we must sell at a heavy loss in order to pull up stakes in time to let in the new firm.

WILL ANYBODY KINDLY RISE IN THE MEETING and say that Gough Bros. ever was or ever will be undersold. The fears of competitors and the frantic efforts of their bosses, cut no figure with us. No cast-iron "transformation" sale bulletin of reduced prices can side-track GOUGH'S GOOD-BYE SALE. We stand by the town and will issue new lists of cut prices every week that must beat the best markings of any other dealer by 25 per cent.

If anybody offers to sell Men's Overcoats and Suits worth $10 for $6.98, down goes Gough's prices to $5.98.

If anybody offers to sell Boys' Suits and Overcoats worth $6.00 for $4.48, down goes Gough's prices to $3.48.

If anybody offers to sell $3.00 Trousers for $2.48, down goes Gough's prices to $1.98. And so on all through the gamut.

Don't you see the logic in our slashing—we're pulling up stakes in Peterborough—necessity knows no law—the stock can't be moved or kept for another season.

MEN'S SUIT SLAUGHTER

NERVOUS DEBILITY
CURED.

If you have transgressed against the laws of nature, you must suffer. Self abuse, later excesses and private diseases have wrecked thousands of promising lives. Treat with scientific physicians and be cured. Avoid quacks. E. A. Sidney, of Toledo, says: "At the age of 14, I learned a bad habit and at 19 contracted a serious disease. I treated with a dozen doctors, who all promised to cure me. They got my money and I still had the disease. I had given up hope when a friend advised me to consult Drs. K. & K., who had cured him. Without any confidence I called on them, and Dr. Kennedy agreed to cure me or no pay. After taking the New Method Treatment for six weeks I felt like a new man. The drains ceased, wormy veins disappeared, nerves grew stronger, hair stopped falling out, urine became clear and my sexual organs vitalized. I was entirely cured by Dr. Kennedy and recommend him from the bottom of my heart."

We Treat and Cure Syphilis, Gleet, Varicocele, Emissions, Stricture, Unnatural Discharges, Seminal Weakness, Kidney and Bladder Diseases.

THE BANNIE MINE

ONE OF THE BEST AND SAFEST INVESTMENTS EVER OFFERED THE CANADIAN PUBLIC. . . .

The Bannie Gold Mining & Milling Company

Offers 20,000 shares of its treasury stock at

60 CENTS PER SHARE FOR 60 DAYS ONLY

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully.

DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,

KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-28-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

MO. BLOCK.

CLEARING UP THE BURNED DISTRICT

THOUSANDS OF WORKMEN ARE THUS EMPLOYED IN BALTIMORE

UNDER EXPERT DIRECTION

The Task of Bringing Order Out of Chaos has Been Inaugurated and is Proceeding

Baltimore, Md., February 13. — Three thousand laborers, with hundreds of carts and trucks, were set at work clearing up the debris in the burned district today.

Several hundred railroad workmen under the supervision of contracting engineers of the Penna and B. and O. Railways began to remove the iron pillars and girders left standing around the ruins, which are dangerous.

Thus the enormous task of bringing order out of chaos in this devasted city has been formally inaugurated. The whole city has been aroused to the necessity of pushing forward the resurrection of the revived district. The magnitude of this work may be realized when it is estimated that the mere cleaning away of the debris will cost about $2,000,000.

A number of individual merchants and bakers announced today that they have already made definite arrangements with architects and builders for the erection of new structures, evidencing the indominable spirit of push and enterprise now abroad in this city.

Already fully a thousand firms have found quarters in other parts of the city, and others are still seeking places where to put only a desk. In numerous instances business houses outside the fire area have given up portions of their buildings to other unfortunate firms.

RUSSIAN ARMY SCATTERED

Russian Army will be Forced to Spread Out

St. Petersburg, February 13. — Despatches from Vladivostock received by the Ministry of War, state that the Japanese purpose disembarking troops in the extreme north-east of Corea. It is recognized that the object of this move is to compel Russia to spread its army over a broad front and thereby reduce its capacity for aggressive operations south of the Yalu.

Nicholas and his advisers are organizing a patriotic movement covering practically the whole of the European provinces of the Empire. They purpose unifying national sentiment by means of public speeches and newspaper articles. This movement is taken to indicate that the Government appreciates the gravity of the situation and intends to do its utmost to lay deep and broad the foundation for the coming struggles. Commercial magnates complain bitterly and even openly of the manner in which the far eastern problem has been handled but declare that the future of the Empire's imperial greatness is at stake and that, therefore, every Russian must nerve himself to make whatever sacrifices the crisis may demand.

EVERYBODY-READS THE TIMES.

APPENDICITIS CONTAGIOUS

Disease is Due to Germ in Opinion of Dr C. S. Sheldon

Madison, Wis., February 13.—Dr. C. S. Sheldon one of the leading physicians of the city, has made the astounding declaration that appendicitis is contagious. He says that the disease is of microbic origin and that the only rational explanation of it is that it is the result of a germ that can be transferred. The prevalence of the disease, he believes, substantiates his theory. He says there is an epidemic of appendicitis in this country.

Dr. Sheldon is a graduate of Yale and has been a practicing physician for the last forty years. He has been secretary of the Central Wisconsin Medical Association for many years.

MILITARY TRAINING CAMP

Will Accept Ontario's Offer for Strip of Land

Toronto, February 13.—The Globe's Ottawa special says; It is considered quite likely that the offer of the Ontario Government of a piece of land five by ten miles in the vicinity of Sharbot Lake as a site for the proposed military training camp, will be accepted. The property is a plateau with a sandy soil, there being very few settlers in the locality. It is but four miles from the main line of the C.P.R., and easily accessible from the east and west, so that the cost of transporting men, horses and supplies to the camp would be comparatively light.

CLIMAX OF A COURT SCANDAL

AUSTRIAN PRINCESS IS SAID TO HAVE COMMITTED SUICIDE

SHE KILLED AN ACTRESS

And Brooding Over Family Troubles Princess Elizabeth Takes Her Own Life

New York, February 13. — Princess Elizabeth of Windisch-Graetz Joseph, who was reported on December 6th to have shot the actress Louise Ziegler, whom the Princess discovered in the apartments of her husband, Prince Otto, has committed suicide, according to a persistent rumor here, says a special cable from Vienna to the World.

The castle at Prague is named as the place where the Princess turned her hand against herself.

The Princess, it is said, was suffering from a form of insanity which manifested itself in fits of jealousy.

When suffering thus she sought to kill those whom she suspected of causing her despair. Her jealous fury alternated with periods of acute melancholy, during which she is reported to have attempted her life several times.

Denials inspired by the Austrian Court were issued immediately following the announcement of the shooting of Louise Ziegler.

Canadian Neutrality.

Ottawa, Ont., Feb. 11— There will be a proclamation of Canadian neutrality in the struggle between Japan and Russia. Notice to that effect will be published at once, and the proclamation itself will follow.

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 15th from 5 cents to 10 cents per share. This company owns 6 claims, 600 x 1500 each. A 90 foot shaft on the Martha claim shows a vein of $30.32 ore 5 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $30.32 to $15,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay them $240 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address,

W. D. WALRATH,
NOTTINGHAM BUILDING, - SYRACUSE, N.Y.

CEREAL CO'S. DISASTROUS FIRE.

UPPER STOREY OF THE COMPANY'S MILL BADLY GUTTED BY FLAMES

LOSS ESTIMATED AT $100000

Fire Started in Department Where the Dust Collectors are Located—Work will be Resumed as Soon as Possible.

The sound of the fire bell, about 7 o'clock yesterday morning, alarmed our citizens, and the news soon spread that the American Cereal Co's immense building was on fire. The recent blaze on Hunter street was fresh in the memory of all, and soon a large crowd had congregated around the large building. Mr. G. W. Mulligan first discovered the fire and the alarm was quickly given. Before the arrival of the town brigade the factory's excellent water system was brought into play on the flames, and no doubt this promptness saved the valuable structure. Then after the firemen arrived on the scene there was considerable delay before sufficient force could be obtained to reach the burning portion of the building.

CAUSE OF FIRE.

The Times in an interview with Mr. Chas. Frost, who has operated the mill separator, which separates the dust from the grain kernal, obtained the information that the fire originated in the fifth story, the second from the top. He claims that some spark from the rapidly revolving machinery must have ignited the dry chaff from the kiln, with the result that it immediately went off like gunpowder. Before he could stop the machinery the place was aflame, and rapidly ascended to the top flat.

FIGHTING THE FIRE.

The Cereal Company's building is about 120 feet by 110 feet by 210 feet, and the great height was a considerable drawback to the firemen. A long line of hose was attached to the hydrant on the west side, and carried to the roof by way of the grain elevator. The mill pump with a pressure of 120 pounds was also brought into play, and the different dams along the river were all freed to prevent any shortage of water.

GRADUALLY CHECKED.

For about two hours nothing but immense clouds of smoke, emerging from the upper windows could be seen. But about 9.30 livid flames shot upwards and at this crisis it was thought that the entire building was doomed. A slight change of the wind confined the flames to the western side of the building, and the firemen and their assistants worked with renewed energy. Finally steady streams were brought to bear on the top of the buildings and the fire was gradually checked, till in another hour it was quite evident that the lower portion would be saved. The damage, owing to the great deluge of water in the lower flats will be considerable, but the company claims that operations will be resumed very soon.

A HEAVY LOSS.

The loss is reported as being in the neighborhood of one hundred thousand dollars but is wholly covered by insurance.

WILL NOT ACCEPT

The Boers will Not Now Locate in Cuba

Havana, February 12.—The Government has hoped to arrange to locate a number of Boer families upon Cuban lands in the interior districts; but, the credentials of the alleged representative of the South African Dutch that have been in Bermuda since the close of the Transvaal war proved unsatisfactory and negotiations were broken off, through the initiative of the Palace authorities, shortly after his arrival in Havana from Mexico. This individual, who styled himself "General Lombar de la Rey," it was discovered, could not speak a word of the Boer-Dutch dialect—so the Government here quickly sized him up as an imposter and ordered him out of the country. Now an effort is being made to direct the thousands of the Italians that are annually leaving the Old World for America, to the new Republic of Cuba; and, under the recent treaty negotiated between this Government and that of Rome, the Italian authorities are to favor Cuba as a port of destination for those emigrating to the New World.

JAPAN REJOICING

All Japan is Now Rejoicing Over Naval Victories

Tokio, February 13. — Japan is en fete. Today is the anniversary of the founding of the Empire and promulgation of the constitution. The reports of the Japanese naval successes have set the nation ablaze with excitement. All last night the streets of the capital and other cities were filled with processions of students with lanterns. Everywhere was heard the note of triumph. Today the streets are scenes of animated rejoicing. In the midst of it all is the movement of troops and the general air of a nation that has found itself and is determined and prepared to maintain its position to the death.

NEGROES BURNED

Mob Wreaks Awful Vengeance on a Colored Man and Wife

Doddsville, Miss., February 12.—Luther Hobert and his wife, negroes, were burned at the stake here today by a mob of 1,000 persons, for the killing of James Eastland, a prominent white planter and John Carr, a negro, on Wednesday, at the Eastland plantation, two miles from this city.

The burning is the crowning act of a tragedy that has cost eight lives, has engaged 200 men and two packs of bloodhounds in a four days' chase across four counties and has stirred this section of Mississippi almost to frenzy.

MOVEMENT OF RUSSIAN TROOPS

Copenhagen, February 13.—In a private letter from Siberia, the Danish Siberian Company, a large butter firm in this city, is informed that three trains with Russian troops pass daily. Each train conveys 300 men and horses. Each car carried eight horses or forty men. The strength of the line does not admit of heavier trains.

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Dell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.68 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $62.66 and $79.08 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet further it will come in contact a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Dell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1879, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

The PETERBOROUGH BROKERAGE CO., Fiscal Agts.
PETERBOROUGH, ONTARIO.

Equitabl Gold Mining Co.

R. C. LANE, President. S. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1903, and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 265-tunnell; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

THE PETERBOROUGH BROKERAGE CO.
FISCAL AGENTS

APPEARANCE

OFFICERS AND DIRECTORS

HON. W. A. SIMMONS, PRESIDENT, Formerly Collector of Customs, Port of Boston, Mass.	NEW YORK
A. EDWARD ROEBER, VICE-PRESIDENT, With the John J. Mitchell Company.	NEW YORK
M. K. GOLD, SECRETARY AND TREASURER, Formerly with the Clark syndicate Companies.	NEW YORK
HOWARD E. MARSH, CONSULTING ENGINEER, Marsh Manufacturing Company.	NEW YORK
FRED'K DALTON PARKER, LAWYER,	LOS ANGELES, CAL
GEORGE T. ORDWAY, COMMISSION BROKER,	CHICAGO, ILL.
EGBERT CHAMBERLAIN, Dry Placer Miner formerly of California.	NEW YORK

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house of sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

MEN AND WOMEN

JAPAN SACRIFICES A LARGE NUMCER OF LIVES

Japanese Entered the Harbor Disguised as Russians and Were Upon the Foe Before They Realized It

THE DISABLED BATTLESHIPS HAVE BEEN RAISED

London Feb. 13—A late despatch says Russia's loss may be even greater than was reported yesterday, but details are not given. The Japs are still playing havoc around Port Arthur. Several more prominent buildings have been destroyed.

London Feb. 13—An unconfirmed report gives the Russians another slight victory in North Corea. As so many similar reports have been pure speculation, this also might be untrue.

London. Feb. 13—The Manchurian railroad has been further blockaded, and another contingent of Russians blown up.

London Feb. 13—The Japanese army is reported to have landed troops at several points in Corea. A slight battle is said to have been fought in the northern part, but particulars have not been received.

London, Feb. 13—Japanese are reported to be strengthening a line of defence near Yalu, in order to keep back the Russians from Corea.

New York, Feb. 13—The Russians are reported to have attempted a raid on Corea but this is extremely doubtful, as a later despatch contradicts this. Even if it be true, it is quite certain that it did not result in much harm being done.

Berlin. Feb. 13—The foreigners have nearly all left Port Arthur, and preparations are reported as being made to attack with a land as well as a naval force.

New York, Feb. 12—The Herald has the following special from Chefoo, dated Thursday,—

"Out of four Japanese torpedo boats which made the first attack on Monday night at Port Arthur, three were sunk with great loss of life. The fourth was a 25-knot boat, and escaped.

"The Japanese torpedo boats effected an entrance to the outer harbor by using the Russian signal flashlights, consequently the Russians did not fire on them.

HOW THE RUSSIANS WERE SURPRISED.

The following account of the first surprise is given by Russian naval officers;—

"The cruiser Pallada was on the outside edge of the Russian fleet, and on duty that night. The chief artillery officer noticed four torpedo boats approaching with full lights, and in all respects like Russian torpedo boats.

"The officer informed his captain that the approaching boats were Japanese.

"The captain denied this, and said they were built in Port Arthur. The artillery officer insisted they were Japanese, and the captain became angry, saying; 'I am in command of this ship, sir.'

"Despite this, the artillery officer gave orders to prepare for action. Immediately after the Japanese launched a torpedo, but the Pallada was able to retaliate instantly, and the other Russian ships cleared for action.

RENEWED REPORTS OF ATTEMPTS TO LAND.

"It is now reported that the Japanese attempted a landing near Bedzero, Pei-Tse-Wo, eighty miles north of Port Arthur, but were repulsed with heavy loss. They again tried to affect a landing at Ta-Lein Wan, under the shelter of the fleet, but owing to strong fort firing they were unable to succeed.

It is said that one Japanese ship has been torpedoed.

"British merchant ships in Port Arthur have repeatedly applied for permission to leave port, but this has been refused.

"The Tsarevitch was towed into harbor at Port Arthur at 3 o'clock on Tuesday afternoon. It is said that only her outer bottom was penetrated by the torpedo, that the Russians are now busy repairing her and that she can be repaired in two or three days.

"The Palada is still outside and beached. She must be seriously injured, but she is now being repaired also. She is the only one of the torpedoed vessels now outside.

A HOSPITAL SHIP HIT BY A SHELL.

"A shell struck a hospital ship outside the basin during the bombardment. The captain's cabin and the chart-room were blown off, but there was no loss of life, as the ship was only recently purchased, and was unmanned.

"Foreigners in Port Arthur were notified at 7 o'clock on Monday night that they had 24 hours in which to clear out, but British steamers have been forbidden to leave. One German steamer arrived at Chefoo today, the first to get here from Port Arthur since the Columbia.

"On Wednesday, the Japanese tried to land at Pigeon's Bay, near Port Arthur. Thirty-six Japanese vessels were then there. It is not known if the attempt succeeded.

RUSSIANS FIRED UPON A BRITISH STEAMER

Four Members of the Crew Badly Wounded and and a Protest Has Been Filed With the British Commissioner

The American Consul has reported to United States Minister Conger, that the Russian authorities have refused to allow the American steamer Cliemdce to leave Port Arthur.

The Climdee sailed from Port Arthur on the 2nd of February with a cargo of flour.

"We Can't Stand for This."

A despatch says the British steamer Fuping, when leaving Port Arthur, where the recent naval conflicts have taken place, was fired upon by The Russian battleships in the harbor

FOUR MEMBERS OF THE CREW WERE WOUNDED.

The Russians afterwards apologized for firing on the British vessel.

The Fuping, upon its arrival at Wei-Hai-Wei filed a protest with the British Commissioners.

London Feb. 13—Baron Hayashi, the Japanese Minister here, has received a despatch from Tokio announcing that on February 11, two Japanese merchant steamers, the Nakanoviamaru and Zenshomaru on their way from Saakata to Otaru, on the island of Hokkaido was surrounded and shelled by Russian warships.

The warships are presumed to be those of the Vladivostock fleet.

The shelling took place off the coast of Heuimadiokumhari.

The Nakanoviamaru was sunk, but the Zenshomaru escaped and has arrived safely at Fukayama, island of Hokkaido

St. Petersburg, Feb. 13, 6 a.m.—A report has been received from Viceroy Alexieff saying that the Russian torpedo boat, transport Yonisein has been blown up as ~~the result of accidentally~~ striking a mine in the harbor of Port Arthur.

THE CAPTAIN OF THE YENISEIK AND 9 MEN WERE LOST.

Paris, Feb. 13—A Chefoo despatch says confirmation has been received there of a report that the forces of Japan have met north of Seoul, and are engaged in a fierce battle.

"Thousands of persons are leaving Port Arthur daily by train, so that there is not even standing room in cars.

"The Russian rouble has gone down 25 per cent. at Chefoo, among the Chinese merchants."

PROSPECTUS

THE COLORADO AND CONNECTICUT GOLD MINING COMPANY

(Incorporated under the laws of South Dakota.)

Main Office: MERIDEN, CONNECTICUT.

Capital $400 000 80,000 Shares at $5.00 each, full paid and non-assessable

OFFICERS

WILLIAM GARLICK, Wholesale and Retail Ice Dealer, Meriden, Conn., President
JOHN A. THOMPSON, Investment Securities, New York City, 1st Vice-President
GEORGE B. WILCOX, Retired Manufacturer, Meriden, Conn., 2nd Vice-President
B. F. BARNES, Manufacturer, Meriden, Conn., Treasurer
WILLIAM C. COEVER, Miner, Meriden, Conn., Superintendent
ARTHUR B. GARLICK, Meriden, Conn., Secretary

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE B. WILCOX, RICHARD F. DOBBIN
WILLIAM GARLICK, ARTHUR B. GARLICK, B. F. BARNES

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hindsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is 5x7 feet and is 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs.) is as follows: Copper, 16.05 per cent.; Gold 0.02 ozs.; Silver 92.42 ozs. Total value $92.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper, $6 40; Gold, $6.82; Silver, $254 31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatsoever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years. Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5,500,000 (now claimed to be worth $15,000,000). About six years have elapsed since he purchased it. The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado. New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN."

Mr. Edwin J. Hulbert, M. E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

B. F. BARNES, Fiscal Agent
Room 14, Wilcox Building, Meriden, Conn.

HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State o California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity.

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to the shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely cer- others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all.

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

J. W. BUTLER, PRESIDENT,
713 Market St., San Francisco, C l.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placers in the ages past.

The Pearl Gold Mining Co. of Idaho

owns seven groups of mines—thirty-seven mining claims—and is now working in ore in three of its mines.

The Treasury Stock is offered at a price that will unquestionably make money for those who invest. The Stock is non-assessable—no debts—all clear titles—safe, experienced and conservative management.

The Unpopularity of Whiskers

Commenting on the fact that Governor Alexander Monroe Dockery has just divested his countenance of a celebrated and almost immortal set of whiskers, the New York "Sun" says: "The twentieth century is beginning somewhat as the nineteenth century began, though, of course, not so strictly and universally smooth, but it is doubtful if it will run parallel through all its quarters with its predecessor. There were no mustaches, no beards, when the nineteenth century dawned. Side whiskers began to curl and sprout before it had run far in its course, and they grew bolder after a time and encircled the throat and chin, leaving bare the upper lip. The lip was submerged about 1800, and in the later years of destruction was last to yield to the assaults of the barber. The human countenance began to exhibit itself again not long after the war, and from that time down to the very recent past the unsupported mustache was the prevailing mode. Now fashion is changing again, so that the young men are commonly completely shaved, and their fathers have covered lips. The youth of to-day have the weight of civilized precedent with them. An examination of the family albums of the last four centuries will demonstrate that the unwhiskered have had by far the better of it. For nearly two hundred years of that time the beard was not permitted to sprout. A great deal of encouragement for the shaven but ambitious young man may be found in the Presidency of the United States. From the beginning with Washington down to Lincoln's time whiskers found lodgment in the White House only three times, and in every case they were of the remote variety known as sideboards, which offered no considerable obstruction to the observation of the faces to which they were linked. John Quincy Adams presented a stubborn pair. Martin Van Buren's were amiable in their moods, and Zachary Taylor's were evidently the unobtrusive expression of a fancy for trimmings. Lincoln inaugurated the bearded era, which was carried on by Grant, Hayes, Garfield, Arthur (with Dundrearys), and Harrison, though Harrison yielded not a little of his expanse before he retired from office. Cleveland was the first mustached President and Roosevelt the second, while McKinley preserved the tradition of the smooth face.

Already Provided.

A certain small village, far removed from the noise and bustle of commerce, boasts a female preacher, and the lady's duties are many. One day she may visit the sick, another attend a funeral, and the next baptize a baby. One afternoon she was preparing the sermon for the following Sabbath when she heard a timid knock at the parsonage door. Answering the summons she found a bashful young German standing on the step and twirling his straw hat in his hands.

"Good afternoon!" the preacheress remarked. "What do you wish?"

"Dey say der minister lifed in dis house, hey?"

"Yes, sir."

"Yaas? Vell, I vant me to kit married."

"All right; I can marry you," she said.

The lady's hair is beginning to silver and the German glanced at it. Then he jammed his hat on his head and hurried down the path. "What's the matter?" she called after him.

"You gits no chance mit me," he called back. "I don't vant you; I haf got me girl already."—"Modern Society."

A Lesson in Tact.

A few weeks ago, says James MacArthur in "Harper's Weekly," I quoted some passages in these columns from a correspondence between the Brownings in the days of their early acquaintance on Carlyle's strong dislike of poetry. I have just heard of a new story on the same theme which is told by Professor Goldwin Smith. It appears that Professor Smith was once a visitor with Carlyle at Lady Ashburton's house when Tennyson was one of the circle at "The Grange." Tennyson was asked to read one of his own poems aloud, but, to the surprise and disappointment of his gentle hostess and her company, he refused—a thing he was never apt to do. Looking across the room, Professor Smith saw the cause of the difficulty. Close to Tennyson sat Carlyle, who was wont to make a universal sweep of poetry in its relation to common sense when aroused by the proximity of the Muse. Professor Smith, devoting himself to the public good, and, we may add, in courteous consideration of his hostess, crossed the room, and invited Carlyle to take a stroll in the grounds. The Sage accepted the invitation, and, during the stroll, the poet brought off his reading.

Ropy Milk.

Concerning the trouble, which is caused by an outside germ which gets into the milk after it is drawn, Prof. Farrington recommends the following:—

The best way to overcome this trouble is to carefully wash the cow's udder and brush her legs, afterwards drying both with a clean towel; then the milker should wash his hands, thoroughly steam the pail into which he milks, and after throwing away the first streams of milk drawn, milk the cow with dry hands into this clean pail. The milk should be protected as carefully as possible from dust and then strained into the cans in which it is to be transported or in which it is set for cream rising. The strainer cloth, carrying cans and separator, if one is used, should be given an extra washing and scalding in order to destroy any of these germs which have been the cause of the ropy milk. There is no doubt that this trouble may be overcome in this way, and the success one has in doing it will depend entirely on how carefully he protects the milk from the germs, which must get into the milk after it is drawn from the cow.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00.
Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per Share

This company now owns the well-known Augusta mine and its extension for over 500 feet in addition to other claims approximating a total acreage of 200 acres. This property has produced over $350,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $15 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore, which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer
for a limited time
only a
SPECIAL BLOCK
OF 50,000
SHARES OF
THE TREASURY
STOCK
of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

and quickly, then let us
hear from you.

The Black Queen Gold Mining Co.

1,000,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is to-day giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 196 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 600 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*

C. L. ARZENO, General Manager. 603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

GORDON & CO,

SCAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL

The Peterborough Brokerage Co., Local Agents.

WANTED—GOOD AGENTS IN EVERY CITY.

Mr. Richard McCallum

A well known citizen of Stirling Ont., cured of Chronic Catarrh and Irritable Sore Throat by Catarrhozone.

A Remarkable Case Exciting Great Interest in Stirling, which, if possible adds to the Popularity of Catarrhozone as a cure for Catarrh, Bronchitis and Throat Trouble

Catarrh is one of the most disagreeable and at the same time hardest to cure disease. This has been Mr. McCallum's experience.

"For many years," he writes, "I have suffered from Catarrh and continually hawked and coughed, so that my throat was always in an inflamed irritable condition.

"Doctors' medicines did not help me in the least, and all other remedies I used were quite useless. In one case it was time wasted in snuffing powder up the nose; in another using a greasy ointment, and so on. Not one of them was the least bit of good.

"I heard Catarrhozone favorably spoken of, and tried a sample, and it really benefitted me more in a few hours than years of treatment with doctors' and other so called remedies.

"Receiving such immense benefit from the sample size I got the complete outfit, large Hard Rubber Inhaler, etc., and but a few weeks of its use completely cured me of Catarrh and throat trouble.

"I recommend Catarrhozone as the most satisfactory Catarrh remedy on the market. Every word said about it is true.

(Signed) "Richard McCallum."

Now perhaps you need a remedy like Catarrhozone. It is the only treatment that is applied locally as well as constitutionally. The Inhaler clears the air passages, stops hawking and spitting, and purifies the breath.

The Ferrozone Tablets which are used in conjunction with Catarrhozone Inhaler, drive all the poisons from the blood and build up the system to a healthy, vigorous condition.

The complete outfit costs $1, at all druggists; trial size 25c., by mail from N. C. Polson & Co., Kingston, Ont. Buy Catarrhozone to-day.
Out. Buy Catarrhozone to-day.

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

Real Estate Changes Hands

The store occupied by Mr. Helliwell, on Hunter street, belonging to Mr. Leplante, has been purchased by Mr. A. Cox.

A Popular Musician

Mr. Gilbert Markle, a brilliant student of the Toronto Conservatory of Music, was in town conducting his weekly classes on Friday and Saturday. Mr. Markle's specialty is the violin, and his wide reputation as an excellent player, both in Toronto and elsewhere bespeak for him a bright future. His city class is growing, and he also has many students from the neighboring villages.

Y. M. C. A. Social

On Saturday evening the Y.M.C.A. held a social for young men, and a goodly number were present. Interesting games were played, and everything done towards making all present enjoy themselves. These social evenings are a source of much good, and the young men, who interest themselves in getting them up, are to be congratulated on the success their efforts have met with.

LAKEFIELD CARNIVAL, TUESDAY, FEBRUARY 16

Tickets on sale at Ormond & Walsh's Drug Store.

—The C.G.E. Benefit Society will hold a concert and dance in Foresters Hall, Simcoe street, tomorrow evening. An excellent orchestra has been engaged and the best local talent will contribute to an A1 program.

The attendance at the
Peterboro' Business College
is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre [of] Canada.
Over 90% of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER
If you cannot attend our school write for particulars regarding our correspondence course
WM. PRINGLE,
Principal.

Obituary

The death of Mr. Robert Howden, aged 85 years, took place at his late residence, 678 Bethune street, on Saturday last. Mr. Howden was well and favorably known in town, and his many friends and acquaintances regret sincerely his sudden death. The funeral will take place today at 2.30 p.m., to Little Lake cemetery.

Farmers' Institute Report

Everybody will be interested in hearing that the proposed building for live stock exhibitions, in connection with the stock yards, at Toronto Junction, is a certainty. Mr. Pepper, has submitted his plans, and others will be asked for. In fact, it would not be surprising if tenders for the work were invited before a month has passed, and that April saw the building in course of construction. This, it must be understood, is not to be a city or municipal work, but one undertaken by enterprising people, who will push it to completion before the next Industrial Exhibition comes round.

Accident on Hunter Street

On Saturday evening about eight o'clock, while walking along Hunter street near the Postoffice, Mr. Thos. Boddy, C.P.R. ticket agent, received a bad fall. Owing to the icy condition of the sidewalks, he suddenly slipped on a slight grade, and in his fall received a nasty wound over the left eye, and the severe shock partially stunned him. Willing hands carried the injured man into Best's hardware store, where an obliging clerk quickly phoned for Dr Boucher. The Times extends its sympathies to Mr. Boddy, and express a hope that his injuries may not result seriously.

INCIDENTS OF THE DAY

Newsy Paragraphs Picked Up By Reporters on Their Rounds

—No police court again on Saturday morning.

—Yesterday was St. Valentine's Day. The postoffice help will no doubt be very busy today.

—The heavy fall of snow yesterday will keep the snow shovel brigade at work today.

—A tea and concert will be held at Auburn tomorrow night. Tea will be served from 6 to 8.

—At the Y.M.C.A. yesterday afternoon, Mr. Williamson, the secretary, spoke on "A Nation's Epitaph."

—The great amount of ice on the G.T.R. tracks cut off Lakefield's communication with the outside world, a few days last week.

—Tomorrow evening Mr. E. S. Williamson will deliver a lecture on "Dicken's Characters." Stereopticon views will also be introduced.

—Mr. Small, theatrical manager, has taken considerable stock in the Peterborough Academy of Music, and the building will be leased for ten years.

—The Review says; "A man with smallpox attended a card party at Niagara Falls. He has been quarantined and will play a lone hand for a while.' Better say solitaire.

—There was 100 pounds pressure to the square inch at the town pump house and seventy in the town, during the Cereal Company's fire on Friday.

—The following additional donations to the Minto Hospital Fund have been reported; Dr. Burnham, $5.00; G. E. Whitea, $1.00; Neil McAllister, $1.00; Mrs. McAllister, $20.

—A union meeting of St. Paul's and St. Andrew's Young People's Societies will be held in the lecture room of St. Paul's church. Mr. J. S. Ferguson will have charge of the meeting.

—It was made clear last week at the Berlin beet-sugar meeting that the growing of sugar beets is profitable enough to encourage the farmers to continue the industry. One farmer reported to have netted $1,150 from 25 acres, and another $750 from ten acres.

—Tonight Mr. H. R. H. Kenner will deliver a lecture on "Sunny Italy" at the monthly literary meeting of the George street Epworth League. Lantern views of scenes in Italy will be presented, and all are cordially invited to come and hear Mr. Kenner's interesting stories of his own experiences in "Sunny Italy."

LAKEFIELD CARNIVAL, TUESDAY, FEBRUARY 16

Tickets on sale at Ormond & Walsh's Drug Store.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mr. R. Ruddy, Millbrook, was in town Saturday.

—Mr. J. A. Sutcliffe has been visiting his brother in Lindsay.

—Mr. John Craig, Lakefield, favored The Times with a call on Saturday.

—Mr. J. J. Turner, sr., who has been ill for ten days with la grippe is able to be about again.

—Mr R. Roddick has been nominated to fill the vacancy at the Brock avenue school, Toronto.

—Mr. Fraser, of Hastings, called on Peterborough friends on Saturday, and left in the evening for Muskoka.

—Mr. R. N. Jolliffee and Miss Ruby Jolliffe, are visiting Toronto, and will attend the concerts of the Mendelssohn Choir.

—Mrs. C. B. McAllister leaves today on a visit to friends in Montreal, Ottawa and Renfrew.

—Mr. W. R. Beattie, of this city, has been recommended as assistant principal of Grace street school, Toronto.

—Mr. and Mrs. A. W. Daly left on Saturday for Kingston, where they will take up their abode in the future.

—Miss Pool, of the Barnardo Home, Peterborough, was in town yesterday, looking after the young girls from that institution, who are located in Hope and Port Hope. — Port Hope Guide.

—The many friends of Mr. J. O. Smith, teacher in the Central school, will regret to learn that he has been confined to his house with la grippe. He is now, we are pleased to say, recovering.

—At the Oriental; E. Johnston, Ottawa; R. J. Batfsfylder, Hamilton; Joseph Taylor, Montreal; C. Thompson, Warkworth; A. S. Purdy, Toronto; E. R. Dunk, Port Perry; Fred Shurley, Galt; John Stuart, Chicago; W. H. Hawkins, Toronto; O. B. Hallway, Chicago; E. W. Johnson, Ottawa; J. Greenburg, N.W.T.

—The marriage of Miss Mabel E. Howorth, eldest daughter of Mr. J. S. Howorth, to Mr. Robert U. Stone, son of Mr. W. H. Stone, took place in Sherbourne street Methodist church, Toronto, quietly on Wednesday evening. The bride wore her travelling dress. Only immediate relatives were present. Mr. and Mrs. Stone will spend their honeymoon in New York.—Globe.

JUDGMENT OF GOD

Member of Lord's Day Alliance Refer to Cereal Fire

The Toronto Star's report of the fire at the Cereal Company's premises, concludes as follows;

"The American Cereal Company's mill is a fine brick building, and was built about two years ago. It has been a great source of revenue generally to the town, and its name alone has helped to make Peterborough famous as a manufacturing center. A short time ago the Crown sued the company for an alleged breach of the Sabbath in making some of the men work. The case was, however, dismissed by the Police Magistrate, and the Lord's Day Alliance intend to take up the matter. When seen today a member of the Alliance deemed the fire the judgment of God.'

This may be so, but it is a little hard on the insurance companies, who pay the entire loss. The Cereal Company will not lose a dollar.

AN ELOPEMENT

Which was a Dismal Failure — Experience of a Peterborough Couple

He was a young man from Peterborough, so the story goes, and she was fair, very fair, but legally belonged to another. He, being so taken up with her charms, could not resist the temptation to attempt to gain possession of this object of his admiration. Of course, she was another man's wife, but conscience is often trampled upon, especially in affairs of the heart.

He was cunning, and possessed a handsome face, winning ways, and most interesting in his conversation. Perhaps she should not be censured too severely for lending a listening ear to his expressions of affection. At any rate, she was soon prevailed upon to distribute the children among the neighbors, and to dispose of her furniture. Of course, her husband would not need them any longer, as he was going to board out while his affectionate wife was going to accept a fine position in the Queen City of the West and later or send for him. She kissed him a fond farewell and hurried off to catch the train. Before going far He met her. They hurried off to the city mentioned and there he fitted her out in costly garments and housed her in luxurious apartments. No more household troubles for her. She was happy now. Later, He was called away out of town, but soon after returned to seek his beloved. Lo, she was gone! No trace of her could be found.

After many days he finally located her enjoying another happy home with another more monied man and in another finer set of apartments. She was happy but, finally, as the report goes returned to Peterborough, and He is never accused of having "the smile that won't come off."

JAPAN'S NEW MOVE

Japanese Land Force on East Coast of Corea

Tokio, February 13.—Japan has landed a large body of mixed troops at Wonsan a Japanese Colony half-way up the east coast of Corea. This force will co-operate with that already established at Pingyang on the opposite side of the peninsula. These two forces constitute Japan's second line of defence against the Russian troops seeking to envelope Corea from the north. The first line of defence is composed of troops dispatched to occupy positions which command Corea from the south bank of the Yalu River. Whether this army will reach its destination in time to intercept the invaders, remains to be seen.

Japan's military strategy even thus early is based on the assumption that its command of the sea on both sides of Corea is reasonably secure. Troop-laden transports are constantly leaving Japanese harbors bound for the north. The mobilization of the army has been effected without a hitch. The transportation of soldiers and supplies by rail from the interior to the coasts is proceeding with clock-like precision and the apppearance and behaviour of all arms of the service are ideal. The only signs of excitement are found among the women and children and the railway station inland where crowds assemble to exchange farewells. The officers maintain the strictest discipline and the rank and file look every inch the fighting men they are expected to prove. The eye encounters nothing in all this moving picture except the most impressive proofs that the nation is in deadly earnest.

EVERYBODY READS THE TIMES.

The Start
In married life is generally made on an equal footing of health in man and wife. But how soon, in many cases, the wife loses the advantage and fades in face and falls in flesh, while her husband grows even more rugged and robust.

There is one chief cause for this wifely failure and that is, the failure of the womanly health. When there is irregularity or an unhealthy drain, inflammation, ulceration or female weakness, the general health is soon impaired.

$500 REWARD! FOR WOMEN
WHO CANNOT BE CURED.

Proprietors and makers of Dr. Pierce's Favorite Prescription now feel fully warranted in offering to pay $500 in legal money of the United States for any case of Leucorrhea, Female Weakness, Prolapsus, or Falling of Womb, which they cannot cure. All they ask is a fair and reasonable trial of their means of cure.

"A little over a year ago I wrote to you for advice," says Mrs. Elizabeth J. Fisher, of Diana, W. Va. "You advised me to use Dr. Pierce's Favorite Prescription and 'Golden Medical Discovery,' which I did, and with the most happy result. I was troubled with female weakness and bearing-down pains. Had a very bad pain nearly all the time in my left side, nervousness and headache. Was so weak I could hardly walk across my room. Could not sit up only just a little while at a time. My husband got me some of Dr. Pierce's medicine and I began its use. Before I had taken two bottles I was able to help do my work. I used three bottles in all and it cured me. Now I do all my housework. It is the best medicine I ever used."

The Common Sense Medical Adviser, in paper covers, is sent *free* on receipt of 31 one-cent stamps to pay expense of customs and mailing *only*. Address Dr. R. V. Pierce, Buffalo, N. Y.

VLADIVOSTOCK FLEET SIGHTED SATURDAY

The Russian Squadron of Four Boats Said to Be Cruising In Sea of Japan

Russian Forts Sink Three Russian Boats, Were Fired on in Mistake

Chefoo, Feb. 15.—A reliable report says that three Russian *torpedo* boats have been sunk by guns from the forts. They were mistaken for Japanese vessels.

Tokio, Saturday, Feb. 15.—The Russian Vladivostock squadron is still in sight, cruising in the sea of Japan.

Tokio, Feb. 15.—A report, to the effect that Matsuyama, on the inlandsea, had been bombarded by the Russian squadron is untrue.

New Chwang, Feb. 15.—The constant telegraphic interruptions threaten to complete the isolation of the war zone, except by despatch boats. Admiral Alexieff has forbidden all ships to enter any of the ports of the Liao-Tung Peninsula. It is understood that his *object is to* carry out the defences of the coast, which hitherto have been neglected. Foreigners have not been permitted to move without military permits. The foreign missions at Mukden, apprehending a Chinese outbreak, are sending the missionaries with families away.

There are about 2,000 Russian troops now at New Chwang.

T.A.S. WIN FROM KEENE.

IN THE PLAY OFF OF THE TIE GAME PLAYED ON CHARLOTTE ST. RINK

It was an exciting *game*———at the finish! The long talked of, long advertised and long looked forward to Keene vs. T.A.S. hockey match was played last evening, at the Charlotte street rink. About 500 were present when the whistle blew and the teams lined up. The commencement was an exhibition of very slow work, but soon the boys warmed up and the T.A.S. began to show their metal. McCoy in goal was a winner. He stopped some of the hotest, and took the matter with a smile. In a few minutes things became warmer, and 'Billy' George broke his stick—the first break in the game. Then came a pretty piece of combination between McGrath and Parnell, with the result that the first goal was scored. Applause, deafening applause for three minutes, and the ladies joined in, with waving kerchiefs. A few minutes later another goal was scored by the T.A.S., and a third inside of five minutes. Meagher then stopped some hard shots from the black and yellow men, and Crowley occupied the vacant chair for a brief period.

Shortly later Keene scored and then—yes there were some strong-lunged Keene supporters there, and the applause was most prolonged.

Half time, 3 to 1.

Crowley commenced the second half with a fine shot which mixed with the net, and then the gallery songster struck up "*We'll roll the Old Chariot* along, etc.' Several T.A.S. supporters then expressed themselves freely and one spieler received quite a rebuff from a newsboy, who was evidently a Keene enthusiast, "I guess you'll bust," shouted the juvenile, and those who heard smiled.

Then came Billy George's fine shot. Another goal, and "the old chariot' went along faster than ever. Parnell scored soon after and the board read 6 to 1. Keene became busier and the chalk marked two in their favor. Here a pause came, Crowley was on top. But the referee soon interfered and the former was given his favorite seat again.

Crowley was soon on again with both feet and a mixup between George and Welsh resulted in Billy been thrown violently against the fence. He was carried off and will require about seven or eight inches of thread over his eye. Then Keene livened up, but allowed Parnell to drop in a hard shot. Welsh scored for the visitors, and just before time was up Jimmy Quinn made the score 7 to 4.

The teams lined up as follows;

Keene.		T.A.S
	Goal	
McIntyre		McCoy
	Point	
Dickson		Meagher
	Cover Point	
J. Quinn		Crowley
	Centre	
H. Quinn		Parnell
	Left Wing	
McCarthy		McGrath
	Right Wing	
Miller		Lynch
	Rover	
Welsh		George
	Timekeepers	
T. Wallace		Turycott

Referee
R. Glover

It took the Keene hockeyists about four and a half hours to reach Peterborough last night, owing to the bad condition of the country roads. They remained all night.

"If I only had one of those sticks,' exclaimed one of the fair sex (who by the way might possibly tip the scale at 95 pounds) as she walked home after the game last night. Who says Peterborough belles have no pluck!

At half-time, in the Peterborough—T.A.S. match last night, a prominent Keenite telephoned the standing to the suburban village. "3 to 1 in favor of the T.A.S.,' he shouted through the receiver. A long pause ensued. The other end of the line wouldn't work right. "Good chance of Keene beating,' he went on with a smile. The smile gradually wore off as the game went on.

NEW ASSESSMENT ACT.

HOW THE ACT WILL AFFECT DIFFERENT PEOPLE

It will Revolutionize the Present Method of Tax Collection

The Times has been requested to give some particulars as to the provisions of the new Assessment Bill, now before the Ontario Legislature.

The Act sweeps the field and will gather into the Assessor's net the most humble. The tax dodger will find himself *up against* a very serious proposition when confronted with its provisions.

The present personal property tax will not last longer than the introduction of the new Act. A business tax will be substituted and no tenant will escape.

Here is a synopsis of one portion of the Act that may startle some of our residents;

Every person carrying on the business of a retail merchant, or of a photographer, theatre, concert hall, curling or skating rink, or other place of amusement, or of a boarding stable or of a livery, or the renting or letting of vehicles or other property for hire, or of a restaurant, eating house or other house of public entertainment, or of any trade or commercial business not before in this section or in clause "g' *specially mentioned*, for a sum equal to 25 per cent. of the said assessed value.

Clause "G' relates principally to telegraph, telephone, street railway companies.

The effect of this will be to place a tax on all places of amusement. For instance, if the Peterborough Hockey Rink is assessed for $6,000, it will pay a business tax on an additional $1,500, that being 25 per cent. of its property valuation. The Curling Rink, Opera House, and all public halls will do likewise; and every livery stable, boarding stable and restaurant will also pay the business tax.

Professional men, lawyers, doctors, dentists, financiers, veterinarians, insurance agents, will not escape. The effect of the tax will be that every man engaged in business will pay a business tax. Persons will be assessed as low as $100, and this will bring in some contributions of $18 each to the Town Treasury, providing of course that the rate of taxation is 18 mills on the dollar.

Insurance, loan and trust companies will pay a business tax of 75 per cent. of the assessed value of their premises. Machinery is exempt from taxation. The business tax takes its place. The indication is that the new tax will produce more taxes for Peterborough.

The more home baking you do, the more you will appreciate

Cleveland's Baking Powder.

Using it in your biscuit and cake, you need not be an expert cook to get good results.

It never fails when used as directed.

Port Arthur Which Japan May Besiege

is the most important Russian naval station in the East. It was leased by Russia—Japan and other powers say it was seized—in 1898, and since that time the port and docks have been reconstructed, until now it is one of the best fortified places in the world.

It was Port Arthur toward which all the energies and ambition of the Japanese were bent during the war of 1894, and their final capture of the place after a brilliant victory over the Chinese was made memorable by a shocking massacre of the inhabitants

The port has a large refitting basin, with a depth of 25 feet at low water. Spacious wharves and bays border this basin and are connected with the workshops by a railway. Two docks, one 400 feet in length and the other smaller are ready for the repair of all classes of vessels, from battleships to torpedo boats. The foundries and workshops are constructed on the most improved models, and contain the best modern machinery. The harbor is protected on both the land and the sea sides by artillery of the most approved pattern and the outer and inner harbors are sown with submarine mines.

The sides of the dock basin would berth a dozen ocean liners, and this dock in itself is almost a fortress. On one side stands, like a monument of the purpose of the place, a huge pair of shears a modern piece of machinery high enough to dismast or enmast any vessel afloat. One might run his craft under it and no matter how high, or how heavy, the masts be, the shears will take them out like a monster dentist of the sea. Electric power runs all the machinery.

The naval port itself is located on what is called the Regent's Sword, a promontory nearly opposite Wei-Ha-Wei, and commands the entrance to the Gulf of Pechili, the gateway to the Chinese capital.

Under Russian rule the town has been built up rapidly. There are many handsome residents in Port Arthur, and the presence of late years of high officers of both the army and navy has enlivened the place. Admiral Alexieff, the viceroy of the East, practically holds court in Port Arthur, and only recently a grand ball was given in which his daughter led the cotillon. So far as social matters are concerned, Port Arthur has in recent months tried to emulate Paris, Vienna and St. Petersburg

how heavy, the masts

BRITONS REJOICE OVER WAR NEWS

THEY ARE TO A MAN WITH JAPAN IN WAR

CREATES UNEASY FEELINGS

Great Danger Should Japan Meet with Any Serious Reverse

London, February 16.—Englishmen had the good sense to avoid all violent explosions, but it is nevertheless true that nothing, since Lord Roberts's entry into Pretoria, has moved them, as last week's Japanese victories. They will not hear of Japanese treachery. Japan is right; Japan has war, and all Englishmen rejoice.

The British satisfaction, indeed, is more universal now than in Lord Roberts day of victory, for the so-called pro-Boers, who hung back then are foremost today in acclaiming the success of the power, whose fight is for commercial and political freedom. Moreover, the grievous wounds to British pride, suffered at the time of the South African war, make it some little consolation to Englishmen to find that Russia, for all her vaunted progress *in arms*, has also been caught napping, and, above all, caught napping by little Japan, whom Russia despised, but whom British statesmen had the foresight years ago to admit to the company of the great powers.

Nor can the British taxpayer in these days of almost unbearable naval expenditure feel quite disinterested at the destruction of the fleet of one of the two powers against whom his own stupendous and ever-growing naval votes have been directed.

Of course, there must come other feelings. The Spectator yesterday tried to anticipate the danger of a Japan domination by a rejuvenated China. The Spectator's general conclusion is that Russia's tremendous stake in the Far East compels her to go doggedly on to an ultimate victory, as Great Britain did in South Africa even if the fight costs five hundred million pounds and lasts five years.

CREATES UNEASY FEELING

It is this possibility which creates an uneasy feeling. The Saturday Review, which is under the directoral influence of Lord Hardwicke, Under Secretary for *India*, and may be assumed to speak with a certain authority, declares that it is imperative to muzzle the yellow press of England, though it discreetly refrained from saying how. Its argument runs briefly thus;— England cannot stand financially another great war. Even the panic which inevitably would follow its outbreak would work irreparable harm to British credit. A prolonged strain might mean a collapse. Hence John Bull, you must keep a cool head. You are no longer in "mafficking' trim.

$10—GRAND EXCURSION TO WASHINGTON AND RETURN—$10.

On February 26th the Lehigh Valley R.R. will run a special ten day excursion from Suspension Bridge to Washington and return for $10. Tickets good ten days. Stop over allowed at Philadelphia on return trip. Tickets good on all express trains, including "Black Diamond Express." For tickets, Guide to Washington, and further particulars, call on or address Robt. S. Lewis, Canadian Passenger Agent, 33 Yonge street, Toronto, Ont.

THE DEATH KNELL OF LABOR UNIONS

POWERFUL EMPLOYERS' ASSOCIATION TO MEET NEXT WEEK

WITH BILLIONS OF CAPITAL

Over 500 Branches in Leading Cities and Towns in the United States and Canada

New York, Feb. 16—Employers of the nation are preparing an object lesson in organization for the labor unions that have compelled them to band together for self-protection. This object lesson will be afforded when the national convention of the recently formed Citizens Industrial Association of America opens at Indianapolis on Feb. 22.

The convention is called for the purpose of enabling employers of the country to declare against the exactions of the union, and to protest against legislation demanded by organized labor. It is to afford an opportunity for discussing the various phases of the industrial situation and their bearing upon the employers.

While the convention will serve this principal object, it is apparent that it will also serve to show to the unions that their exactions have aroused public sentiment of such an extent that organization for the purpose of opposing them has been comparatively easy. Statistics furnished by the new federation of employers show that its growth has been unparalleled in the history of organizations of t·

At the convention to be held in Indianapolis there will be represented associations that have as members who employ 1,500,000 of the workers of the country and who control $3,000,000,000 of its capital. From 350 to 500 various associations of employers will be represented at the convention by from 500 to 1,000 delegates. Every state in the union, Hawaii, Mexico and the Dominion of Canada will send delegates to the convention

Practically the entire work of organizing the new association has been accomplished since October 30, of last year, when the convention at which it sprang into existence adjourned. Since that time nearly every important association of employers in the United States has joined the new federation and has declared for its principles, most important among which is the open shop.

New organizations have been formed at the rate of three and four a day. Many of these have been brought into existence without any assistance from the national association, while others have been organised by its agents.

When the convention meets fifty applications for assistance in the work of organization will be received from the employers of fifty cities In some of these cities the work of organisation has already been partially carried out.

The convention will be in session only two days. On these days the employers will discuss, in addition to the affairs of their organization, legislation that they desire, and also legislation which has been proposed by the *friends* of the labor unions. The eight-hour law, the anticonspiracy and the anti-injunction bills will also be considered.

In view of the approach of the national campaign attention will be paid at the convention to the claims of political influence made by the labor unions. Frederick W. Job, secretary of the employers' association of this city, will bring the political phase of the labor situation to the attention of the convention.

Mr. Job is to deliver an address on the "Inefficiency of the Labor Vote.' He has prepared statistics, which will show that when labor candidates are in the field they do not secure any large percentage of the votes of union men. The defeat of labor candidates in Chicago, where the unions claim to be stronger than in any city of the country, except San Francisco, will be utilized by him as an argument to refute the claims of the unions leaders that they can make candidates before the people feel the effects of ignoring their demands.

REMNANTS OF THE RUSSIAN FLEET ARE NOW IN THE HARBOR AT PORT ARTHUR.

The Steamer Wenchow, Arriving from Port Arthur Reports That Eleven Russian Ships Were Struck in Wednesday's Engagement---The Town Depends on Forts.

Chefoo, Feb. 15.—The steamer Wenchow, arriving from Port Arthur, reports that eleven Russian ships were struck in Wednesday's engagement.

The cruiser Askold, with a big hole at the water line, probably into the inner passage, was beached.

The battleship Sebastopol has a shell hole just above the waterline, and is useless in rough weather.

The cruiser Novik has a hole in afterport side.

The battleship Retvizan is on the beach and her bottom has fallen out.

The cruiser Pallada was torpedoed abaft the engine room.

The battleship Cesarovitch, which also was torpedoed, has been docked.

The whole fleet has been taken into the inner harbor, and Port Arthur is depending for protection on her forts, which have been reinforced. There is frequent firing, which is presumably drawn by Japanese torpedo boats. Firing was heard at midnight February 11 at intervals, also on the nights of the 12th and 13th. On Feb. 14th the firing continued until 5 o'clock in the afternoon.

An eye witness claims to have seen 18 dead landed from the Russian ships Wednesday.

It is understood that Admiral Stark has been reduced for his failure to repulse the Japanese attack.

The cruiser Novik was the only vessel to do effective work. She gave chase to the Japanese torpedo boats, and according to the Russians account, sank two and captured one.

The Wenchow had 400 Japanese refugees on board, and there was an exciting time during the battle of Wednesday as shells fell around the Wenchow. She was allowed to sail Feb. 14.

London, Feb. 16—Masampho is one of the points on the south-eastern coast of Corea which has been the chief bone of contention between Japan and Russia for the last two or three years and during the negotiations of the last six months. It is an island lying near the mouth of the Nak-Tong River, the chief inlet into the southern province of Corea.

It is close by Fusan, the port which for centuries has been the gateway for the Japanese crossing over from the coast of Japan, which at this point is nearest to Corea. Russia, to prevent Japan from closing the Corea Strait against her ships, military or trading, sought to establish herself at this spot, and for this purpose obtained hte concession of a lease from Corea of Masampho as a coaling station, which would be a place of call for ships passing from Vladivostock, which is a thousand miles to the northward in the Sea of Japan, round to Port Arthur or other points in the Yellow Sea.

In the recent negotiations Russia made a counter-demand, it is alleged from Japanese sources, that she should have the lease to Masampho confirmed to her, and it was clear from the start that the place would be one of the earliest objectives of the Japanese forces, as its possession in other hands would be a menace to Japan.

JEWS WOULD AID JAPAN

Mass Meeting Will Offer Money For Use Against Russia

Minneapolis, Minn., Feb. 16— Members of the Hebrew Order of Friends of Zion have called a mass meeting for next Sunday night to pledge their moral support and financial aid to Japan in her struggle against Russia. It is announced that this meeting and others called in all parts of the country will afford the Jews practical means of redress for the Kishineff massacre and hundreds of years of oppression by Russia.

KEEP UP THE FAIR PLAN

Japan Does Not Allow War to Effect St. Louis Fair

St. Louis, Mo., Feb 16 —Nanjime Ota, Japanese commissioner to the Louisiana purchase exposition today received a cablegram from Mr. Kiyoura, president of the Japanese commission, which announced that although peaceful relations between Japan and Russia were broken the war would make no difference with the exhibits of Japan at the world's fair.

Mr. Kiyoura is the minister of commerce and agriculture in Japan. The engagement at Port Arthur is looked upon by J. Kansaki, acting commissioner as a Japanese victory in the light of the present reports. "It makes no difference whether victory or defeat,' he said. "The Japanese will never give up. They will fight always to the end. We are a peculiar people, in that a victory encourages us much, while a defeat encourages us still more.'

JAPAN UNITED TO A MAN

Japanese People Take Great Interest in the War

Montreal, Feb. 16.— A gentlemen lately returned from Japan, where he spent a number of years in business, stated to a Times representative that the public could form no estimate of the interest taken by the Japanese people as a whole in the war with Japan.

"You see,' he said, "they have realised for a long time that it must come, and so have been straining every energy to prepare for the struggle. There is widespread interest everywhere in the politics of the nation, and you will find in the most out of the way parts of the country a grasp of the political situation, absolutely surprising. They display the greatest friendliness towards all Britishers, especially since the signing of the treaty between Japan and Great Britain.

"The very finest men of the country have been drafted into the navy, and in addition to dash, they possess the backbone to bear up if things should go against them.

Both army and navy are in a high degree of efficiency. Before the war they were constantly at target practice. I am not in the least surprised at their success.

"The war will have the effect of raising the price of tea, as rice, the stable article of diet in the country, will increase in price, and labor will consequently be higher.

18,000 MILES UNDER SEA

NEWS FROM THE SEAT OF WAR TRAVELS THIS DISTANCE

Route of the Cables and Wires—Across the Arabian Sea

London, Feb. 16—Word of the first shot fired in Far Eastern waters reached this country across 18,000 miles of ocean bed.

The tiny electric impetus put in motion by the key of the operator in far Nagasaki will instantly plunge under the eastern sea and come to land in China, near Shanghai, 476 miles away. Then that little throb will work southward round the China coast to Hong Kong, 945 miles. At Kong Kong (British) it will dive under the China sea to Saigon, in Anam (French), 951 miles; from Saigon it will cross the bed of the sea to Singapore (British) 628 miles. Or it might go by way of Labuan, Borneo (British) 1,971 miles.

Through the Malacca strait to Penang, 398 miles, and then a great plunge westward through the wild Nicobars and under the tropic sea of Bengal, 1,389 miles, to Madras. At Madras it will spring from the dark depths into the flaming Indian sunshine; on a thread of glinting wire it will span the Deccan, leap jungle and stream until it comes down to steaming Bombay.

ACROSS THE ARABIAN SEA.

Never resting, the brave little spark will take to the water again, traverse the broad Arabian sea to Aden, 1,850 miles, thread its way up the scorching Red Sea, flying ever westward, to Alexandria, 1,584 miles. And from Alexandria it will travel deep under the balmy Mediterranean to Malta, out to Lisbon, and so to London 8,206 miles. From London it will travel under the Atlantic to Canso and from there by wire to Montreal.

At Nagasaki the "taking off,' point for the mainland, messages are transferred from the Japanese Government Company, (Danish) and either cross to Shanghai or Vladivostock. From Vladivostock the Northern Company's line follows the railway track across frozen Siberia to Libau, on the Baltic. But few of the press messages will take that course although there is in existence a sort of promise by Russia that no messages will be interfered with.

At Shanghai begins the cable of the Eastern Extension Company, and the eastern cable takes up the thread at Bombay. From Bombay, also, the Indo-European line starts away and travels overland by Bushire and Teheran, Tiflis, Odessa and Warsaw, to Berlin, and so to England. The American Commerical Pacific cable goes to the Philippines and does not touch Japan. The possible routes for the direct transmission of news from Japan are, therefore, but two in number —the overland Russian route and the coast route, via India *and the Mediterranean or* India and Europe. In the event of war the bulk of the telegraphic work for the enlightment of the world in gener- would fall on the southern or coast route.

Local Sports

Mr. J. T. McCabe, of Peterborough, acted as referee in the match between Stratford and St. George's, played in Toronto on Saturday night. "Mac' seems to have come in for considerable unfavorable criticism, but, of course by the St. George's, who lost by 11, the score being 12 to 1.

The employees of the "Golden Lion' would like to meet the Best Stove Co.'s players in the near future.

The Pig Irons will evidently require to use all their metal, as Barrie's Bedelias have threatened to make tings hot for them at their first coming together.

The Examiner and Review teams will provide the public with a treat as soon as they can secure a date. So much has been written of this *proposed match* that it will no doubt arouse considerabel interest.

It seems almost impossible for a new team to obtain any practice dates at the Brock street rink, engagements being booked so far ahead.

The Burk's Falls team has been expelled from the O.H.A. for professionalism.

Owing to ilness, Mr. George Brown, of Port Hope, was unable to referee last night's game between the T.A.S. and Keene.

After the Keene—T.A.S. game last night McCurdy's Pets defeated a team from the Preparation Room of the Cordage Works by 3 to 0.

WEATHER NOTES

Decidedly cold.

Two Japaneses Transport Steamers were Sunk by the Russian Squadron off the Island of Yezoon

Special to THE TIMES;

St. Petersburg, Feb. 16.—Major General Oflug and Viceroy Alexieff, *chief* of State, telegraphed that the situation at Port Arthur was unchanged. Reports from Yinka, near New Thwang, he continues, state that the Japanese are preparing to ladn at Ofinjeuda. A message from the Frontier Guard says that several patrols, believed to be Japanese, were seen yesterday in the vicinity of Haing Mintung, north-west Mukden. No Japanese battleships have been seen in the roads Cacacumhka, at the mouth of the Yalu river. A despatch has been received here from Viceroy Alexieff, dated Feb. 15, saying Captain Reitzenstein, commander of the Russian cruiser division, telegraphs that his division destroyed a steamer in Sangari Tsugaru Strait. A violent storm, accompanied by heavy snow, has been raging for three days, and nine degrees of frost have been registered. The squadron referred to is the Vladivostock division. Stories have been current that this ship sank several Japanese transports.

Tokio, Feb. 16.—An official report from Tokio says that two Japanese transport steamers were shelled by four Russian cruisers, one of the merchant steamers being sunk.

Yokohama, Feb. 14.—*It is officially reported that* the Russian squadron sank the Japanese merchant steamer Akenra Maru off the Island of Yesso, on Feb. 11.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,
The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply Dr. S. Goldberg, 208 Woodward Ave., Room [illegible] Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

[illegible] paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at [illegible] per month, and to outside points at [illegible] per year strictly in advance

THE VALUE OF SEA POWER

This war is going to be another test of the value of sea power. If the command of the sea had remained in dispute, there would have been no means of comparing the effectiveness of superiority on the ocean with great power on land; but the early supremacy of the Japanese fleet has resulted in pitting a sea power against a land power in war for the possession of certain definite land areas, and we shall see what advantage the control of the sea confers.

One thing it must do, and that is to give the sea power the choice of the battlefield. It can land its troops where it likes; and there the troops of the land power must meet them. Another inevitable advantage will be the fact that the sea will serve the sea power as a supply route, and an ever open line of retreat. For the land power the sea shore is the edge of an abyss, out of which nothing comes but danger, and into which one can only go to die.

Capt. Mahan's extended argument to show that it is always the sea power which wears down the land power, was very comforting reading to the people of the British Isles, and gave a new impetus to naval construction in the United States. Now both countries will be able to see how well his theory fits modern facts. Some changes undoubtedly modern conditions of war have brought. The railway renders a land force much more mobile than it used to be on foot; and land operations are much slower than they were apt to be in the days of the pitched battle, and the cavalry charge. This latter change will give the land forces a better chance to bring up supplies and reinforcements, and to that extent reduce the advantage of the sea power. On the other hand, a steam transport service will be more rapid than one which must depend on the wind.

One element of this struggle which will somewhat vitiate it as a true test of sea power will be the circumstance that Japan is fighting within a few hours from its base, while Russia is almost separated from her's This tremendous superiority will so ingeniously blend itself with the benefits of the command of the sea that it will not be easy to separate them and to say just what Japan gains from her contiguity to the scene and what from her control of the sea. But experts will see more clearly into this problem than ordinary observers; and we may expect as an aftermath of the war many authoritative deductions as to the precise value of supremacy on the greatest of the highways.

A RESOLUTION ON BRITAIN'S FISCAL POLICY

A battle royal may be expected when the Associated Chambers of Commerce of the United Kingdom meet in March. The fiscal policy of Chamberlain will be attacked and defended on that occasion by horse, foot and artillery, so to speak. The programme for the meeting of 1904 has been issued. Lord Avebury (Sir John Lubbock), will preside. The British-Canadian Review tells us that thus far there are five resolutions presented for discussion on the fiscal policy, by the London, Dublin, Nottingham, South of Scotland, and the Paris (British) Chambers. The London Chamber's resolution is as under;

"That Great Britain has just cause of complaint of certain restrictions and unfair arrangements directed against the Commerce of the Empire, and that the Chambers of Commerce would support His Majesty's Government in measures of negotiation or retaliation, provided that before retaliation is adopted;

"1. Every effort had been previously made in the way of friendly representation and remonstrance

"2. That retaliation should afford a reasonable prospect of being effective for its purpose.

"3. That it should not seriously injure other branches of British manufacture or commerce; and

"4. That the specific mode of retaliation is in each case submitted to the consideration and subject to the assent of the House of Commons."

EDITORIAL COMMENT

President Eliot of Harvard University is advocating government control for labor unions and employers associations on the ground that they are getting together to the disadvantage of the general public. He is making an enormous mistake. If this process goes on long enough the general public will be included, and if prices are put up all around it is the same as if they were not put up at all. (This movement is one of the most hopeful signs of the times.

visions of the new Assessment Bill, Alexieff does not, in his dispatch to the Czar, "regret to report," but when he hears from St. Petersburg he'll probably regret he reported.

For an autocrat of about a third of the world, his nibs, the czar, is a good deal of a whiner.

Admiral Alexieff has succeeded in living up to his picture.

Russia seems to have been traveling on its size.

PREDICTS SHORT WAR

Shipbuilder Cramp Thinks Struggle will be Sharp, However

Philadelphia, Pa., February 15.—The early reports which later proved incorrect, that the Japanese had disabled the Retvizan, one of the most formidable of the Czar's fighting machines caused a stir here. The battle ship was turned out from the Cramps' shipyard as late as 1902. Charles H. Cramp, who made the contract with the Russian Government for the construction of the Retvizan, was inclined today to suspend judgment regarding the engagement at Port Arthur until full reports had been received. He was not disposed to believe that the Russian officers had been caught napping or that Japan's success can be taken as indicating in any way the outcome of a decisive engagement between fleets of the hostile nations. A short, sharp decisive struggle is looked for by Mr. Cramp, now that Japan and Russia have come to the actual trial of war. The result of the conflict on the sea he holds to be entirely problematical and dependent upon the unknown factor of present minute efficiency rather than on the bulk of navies. On land he believes Russia would overpower her antagonist.

"Only the actual test of battle," Mr. Cramp said, "will develop the relative fighting abilities of the Russian and Japanese fleets. We see very much nowadays in the way of comparative tables showing the numerical strength of the two nations' navies. These mean nothing at all. The experience of the Spanish war should show how misleading such comparisons may be."

LIPTON'S TEA

EXPECTS TO TAKE ACTIVE MEASURES

RUSSIAN REVOLUTIONARY BUND MAY UTILIZE ITS PRESENT OPPORTUNITY

OUTBREAK OF REBELLION

Prediction That It May Take Place as Soon as Troops Have Been Withdrawn

Montreal, Feb. 15.—Mr. De Zwirek, representative of the Russian Revolutionary Bund in this city, stated today that that organization expected to take active measures against the Government during the present war.

"If the war will only last, you will see uprisings all over the country," said Mr. De Zwirek this morning. "At present the regular army, which is dispersed throughout the country to overawe it, has not been withdrawn, but with its withdrawal, the whole land will break into insurrection.

"As to the ultimate result of the war I think that you will find that the Japanese arms will be successful everywhere. This, I think, will follow through the morale of the army. Japan has a constitutional Government and every soldier in the ranks feels that he is fighting for his own interests. That is not so in the case of Russia. You may take it as an accepted fact that with the exception of the nobles, no Russian fights willingly for his country; he is not fighting for his own interests, but against them, as with increased territories and wealth, the noble who is his natural foe, will the longer be able to grind him in the dust.

"You will notice that at the present time the Czar and his consellors are trying to awaken a patriotic spirit throughout Russia. This was done with great effect, at the time of the last war with Turkey. At that time the Government appealed to the people, asking them to respond in the interests of Russia, and in the interests of Russia. Since then through the work of the Revolutionary Bund the people have been enlightened and see that such a response would be against their own interests, as the Japanese are fighting not against the Russian people, but for them.

"I sincerely regret that Japan will not permit foreigners to enlist in her armies, as we have a great number of ex-army officers in our society who would gladly respond.

"At the opening of the present war, the society called upon a great number of its members who were serving in the ranks of the army to leave it and flee from Russia, and a great number not of private soldiers alone, but of officers also, responded.

"Japan has right on her side, and so will win out, though it may be a long fight, as the tyrant has a firm grip on the land, and will fight hard."

Bird Bread

COTTAM'S famous food for birds, formerly only sold with COTTAM SEED. Now sold separately at 10c. the package, two large cakes. The high reputation enjoyed by BIRD BREAD has caused us to make this departure after refusing for years to sell it apart from COTTAM SEED.

Send name of dealer not selling BIRD BREAD apart from COTTAM SEED, with 6c. in stamps and get free two large cakes. Feed your birds on the Standard [illegible]

No Matter When or Where You See a Bargain, There's a Better One For You At

GOUGH BROS.
GOOD-BYE SALE

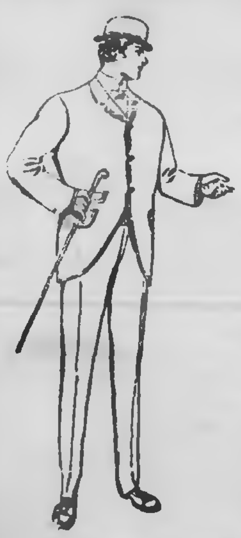
The second week adds to the intense interest of this sale. Its an occasion that warrants unbridled enthusiasm. Nothing can stop its progress.

Do you know how we're fixed? $68,000 worth of Suits, Overcoats, Furs, Boots, Shoes, Hats, Caps and Furnishings, must be slashed to pieces to bring down the stock. Are you thinking? Can't you see what this means? Can't you see that we must sell at a heavy loss in order to pull up stakes in time to let in the new firm.

WILL ANYBODY KINDLY RISE IN THE MEETING and say that Gough Bros. ever was or ever will be undersold. The fears of competitors and the frantic efforts of their bosses, cut no figure with us. No cast-iron "transformation" sale bulletin of reduced prices can side-track GOUGH'S GOOD-BYE SALE. We stand by the town and will issue new lists of cut prices every week that must beat the best markings of any other dealer by 25 per cent.

If anybody offers to sell Men's Overcoats and Suits worth $10 for $6.98, down goes Gough's prices to $5.98.
If anybody offers to sell Boys' Suits and Overcoats worth $6.00 for $4.48, down goes Gough's prices to $3.48.
If anybody offers to sell $3.00 Trousers for $2.48, down goes Gough's prices to $1 98. And so on all through the gamut.

Don't you see the logic in our slashing—we're pulling up stakes in Peterborough — necessity knows no law — the stock can't be moved or kept for another season.



MEN'S SUIT SLAUGHTER

Men's Black and Blue Worsted Serge Suits, Regular $10.00, for	$5 75

BLOOD DISEASED MEN

If you ever contracted any blood disease you are never safe unless the virus or poison has been eradicated from the system. *Have you any of the following symptoms?* Sore throat, ulcers on the tongue or in the mouth, hair falling out, aching pains, itchiness of the skin, sores or blotches on the body eyes red and smart, dyspeptic stomach, sexual weakness—indications of the secondary stage. Don't ruin your system with the old fogy treatment—mercury and potash—which only suppresses the symptoms *for a time* only to break out again when happy in domestic life. Don't let quacks experiment on you. Our *New Method* Treatment is guaranteed to cure you. Our guarantees are backed by bank bonds, that the disease will never return. Thousands of patients have been already cured by our New Method Treatment for over 20 years. No names used without written consent.

Mr. E. A. C. writes: "Your remedies have done me more good than Hot Springs and all the doctors and medicines I had previously tried. I have not felt any of those pains or seen any ulcers or blotches for over seven years and the outward symptoms of the loathsome disease have entirely disappeared. My hair has grown in fully again and I am married and happy."

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,
DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O.
The Prescott National Bank,
Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit,

Yours very truly,
R. N. FREDERICKS, Cashier

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,
KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of th ecountry. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment.

Respectfully,
D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-22-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock.

The president of the Bannie M. Co. is an old mining man of experience. We believe that *this company is mining* on a *strictly* business basis and is a good investment.

Yours truly,
SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section.

Yours very respectfully,
ED. BLOCK.

HAS RUSSIA DECLARED SUZERAINTY OVER THIBET?

If So Trouble Has Only Begun For the Great Northern Bear

Berlin, February 15.—Reports are current in German military quarters that Russia has declared a protectorate over Thibet. Count Taube, Swedish Minister at Berlin, is conferring with the Foreign Office with reference to Swedish fears of complications between Russia and Britain. On account of this anticipation King Oscar abandoned his trip to Riviera. Sweden expects the British would seize the island of Gotland, after a show of Swedish resistance. Thereupon Russia would be likely to declare that Sweden had violated its neutrality.

German naval experts regard Japan as having already proved its superiority over Russia at sea. Count von Reventlow said to a press correspondent today; "The final issue must be decided on land. Hence forth the main object of the Russian fleet should be to prevent the transportation of Japanese troops. That the Russians permitted themselves to be attacked at Port Arthur shows that their strategy is second rate, and their watch service inefficient. In other words, they are fatally unready for action. If the Japanese continue to disable the Russian battleships their command of the situation will be absolute, enabling them to land troops at will.

At the Admiralty here the officials are awaiting hourly tidings of a decisive engagement off the east coast of Corea between the Japanese and Russia's Vladivostock squadron, which is reported to have sailed to attempt a conjunction with the Port Arthur squadron.

EMPEROR IS BLAMED

Throwing Blame for Reverses on Czar Nicholas

Berlin, February 15.—No less a personage than the Czar himself is held responsible in the *highest* Russian circles for the lack of preparation on the part of the Russian forces which enabled the Japanese to begin the war with a series of brilliant victories. On the authority of a Muscovite statesman, in Berlin, the divulging of whose name would cause a sensation, a press correspondent is able to state that Nicholas is the scapegoat of Russian reverses. The statesman in question was not expressing himself for publication, and his remarks bear a sincerity not common in the utterances of Russian diplomats. "Practically," said the diplomat, "the Czar's war manifesto is an act of self-accusation. He cried 'peace, peace,' when everyone else knew there could be no peace. Only the roar of the Japanese torpedoes at Port Arthur the loss of magnificent ships, and the murder of brave sailors awakened him from his delusion that war was unavoidable. He stubbornly tied the hands of his naval and military leaders, who viewed the crisis dispassionately, knowing a crash was inevitable, and begged in vain for authority to act. Alexieff may be made the official scapegoat for the events that have plunged the Russian arms into unnecessary disgrace, but the blame in truth belongs to more exalted quarters.

London, February 15.—In April, 1902, an anonymous writer, who professed to have "had exceptional facilities for studying the case on the spot," contributed to the United Service Magazine, a British military periodical, a description of Port Arthur, which explains some of the recent happenings.

"The harbor," he wrote, "lies near the south-west corner of the Liao tung Peninsula, a strip of land jutting in a south-westerly direction from the Manchurian coast, between the Yellow Sea and the Gulf of Pe-chili, shaped roughly in a parallelogram of fifty miles in length by ten in breadth, and connected at its north-east angle with the mainland by a very narrow isthmus.

"The harbor itself is of insignificant proportions, little more, indeed, than a crack in the coast-line expanding inland into a shallow, salt-water lagoon, said to be rapidly silting up from the attrition and deposit of the surrounding hills.

"The space in which there is sufficient natural depth for large or even modern-sized ships is so restricted that there is only room for two or three at the most, and a fleet lying inside has therefore to be packed close in the artificial dockyard basin on the east side of the fairway leading from the entrance.

"The entrance is very narrow, and has, in consequence, the advantage of being easily defended by mines. It is flanked on both sides by commanding heights, crowned with forts, and dominating the direct approach from the southward, the hills on the east side also completely screening the basin and dockyard from any long-range indirect attack from that quarter.

"The basin is of moderate dimensions, only some twenty-five acres in extent, with insufficient depth at present for the largest vessels, although this will be doubtlessly remedies.

"When that has been done the entire capacity of the harbor, including both the natural and artificial deep-water spaces, might possibly be set down at a dozen heavy-draught ships if very closely berthed. There is one dry-dock opening off the basin.

"The workshops, factories, and storehouses stand close round the basin, and the whole plant and establishment, together with any squadron lying inside, unavoidably present a singularly compact massed target to long-range high-angle fire. Herein, it may be said at once, exists the very weak point of the place as a shelter and base for a fleet, the the object for which it was primarily, if not solely acquired. It can never have much value as a commercial seaport for want of space."

It is evident from this that the Russians had a reason for lying in the exposed outer harbor.

A VERY DANGEROUS POSITION.

The writer then points out the great weakness of the place.

"As pointed out, to use the place at all the vessels must lie huddled together in a very small space, and this space happens to be quite within high angle long range from several points on the neighboring coast, where attacking ships could anchor with impunity, quite invisible from the vessels inside and every fortress gun as things now stand.

"A glance at the range table of modern heavy breechloaders will show with what remarkable accuracy they can place shells up to even the longest ranges, and with what pulvering angle of descent the latter can be made to finish their flight.

"The case before us would afford exceptional facilities for executing this particular form of attack at an ideal target, a harbor crowded with ships and surrounded by inflammable buildings.

"The only preliminary necessity for the attacking fleet would be a smooth sea. Anchored then securely head and stern, at previously selected points, and knowing the range and bearing of their objective with the minutest exactitude they could open fire in perfect confidence that every shell was taking effect from the very commencement.

"Half a dozen battleships can bring between them twenty-four twelve-inch guns into action using their main armaments alone. Each gun can be fired at the rate of about one round a minute or, allowing for specially careful adjustment and laying say one round in two.

"The ships inside would, therefore, find themselves exposed to a plunging fire at the rate of about twelve 700-pound shells a minute, of which practically every one was striking and exploding on some point or another of the combined target, and to which they could make no sort of adequate reply. No fleet could stand that sort of usage for long. An hour would in all probability suffice to reduce it to flames and wreck."

-The life of a railway mail clerk is after every big wreck. Last year in the United States 18 were killed. 69 or less injured while on duty. made cripples for life and [illegible] more them in the list of dead or injured ways [illegible] the name of one or more of full of danger, and one almost al-

WILL CHINA HELP THE VICTORIOUR JAP

GRAVE CONDITIONS OF UNREST EXISTS AT CANTON.

Boxer Outbreak is Feared When War Gets Hard at It-- China Stands Pat.

Washington, Feb. 14.—A *cablegram* has been *received* at the Japanese Legation from Tokio, stating that, upon a request made through the British consul at Chemulpo, 34 of the Russians wounded in the recent *naval engagements* were put in *Japanese Nurses' Hospital* at Chemulpo, and are being treated by Japanese doctors.

Paris, Feb. 14.—The Russian Financial Agent here categorically denies the report that Russia is seeking to place another loan in Paris or elsewhere, and says the financial resources of Russia are such that she has no need to have recourse to a loan.

Paris, Feb. 14.—The semi-official Temps says the Cabinets of London, Paris and Berlin are in accord upon Secretary's note. In the response which the three powers will make to the United States, it will be suggested that the text of the American document be clarified and simplified.

London, Feb. 14.—A despatch to The Standard from Brussels says that Prince Louis Napoleon, who is visiting his mother at Geneva, has been appointed to the chief command of the cavalry in Manchuria.

New York, Feb. 14.—A despatch to The Herald from Washington says; The information received by the German government that an outbreak in China might be expected as soon as the present war *began is partly* confirmed by official advices received here, which are receiving careful consideration, because their vital effect on the present movement to assure the neutrality of China.

The State Department learns that there is a grave condition of unrest in Canton and the region adjacent thereto. Arms have been constantly imported. The Chinese are reported to be often officered by foreign officers, especially Japanese.

There has been an American warship generally a monitor, there for many months. Conditions in the northern provinces, which were devastated by the Boxer outbreak, are not so bad, becasuse of the severe lesson which the Chinese troops were given by the allies in 1900.

Germany has taken active steps to protect her interests in the interior by building gunboats similar to those used by *the British*.

Mr. Conger, at Pekin, constantly receives advices from missionaries in remote provinces and they constantly express apprehension of an outbreak.

CHINA STANDS PAT.

Tokio, Feb. 14—The Chinese government yesterday proclaimed the neutrality of China during the war between Russia and China

CHINA'S NEUTRALITY.

Washington, Feb. 13—Sir Chen Tung Liang Cheng, the Chinese minister here, called at the State Department today and formally notified Secretary Hay that the Emperor of China had issued a proclamation of neutrality. The minister's cablegram contained the further information that in issuing the proclamation the Emperor had the striongest terms enjoined upon the viceroys and the governors of the provinces to adopt every precaution for the protection of foreign life and property in their respective territories. The minister feels that there is now no danger to be apprehended of attacks upon foreigners in China, in view of the strong language of the proclamation and its speedy distribution.

St. Petersburg, Feb. 14.—A naval expert says that if the Hakodate story is true, Admiral Stackelberg and his squadron will be able to come south by the eastern coast of Japan and cause enormous havoc along the shore and to the shipping, and ultimately effect a juncture with Admiral Wirenius' squadron, on its way to the Far East from Europe.

SAW ONE SHIP SINK.

St Petersburg, Feb. 13.—Viceroy Alexieff's silence about the Vladivostock squadron is explained as follows; For strategical reasons, the viceroy, as commander-in-chief, is empowered to dispose of the ships and men without consulting headquarters. The enumeration of the Russian *ships engaged at Port Arthur* was purposely omitted in the official reports as it would have given a valuable clue to the enemy. A private telegram has been received from a resident of Port Arthur, in which the sender claims he saw one Japanese warship sink. The fact that no mention of this was made in the viceroy's dispatches does not disprove the story, because the viceroy is careful not to announce anything outside of personally established facts. It is pointed out on high authority that the Japanese are not likely to admit such a loss, and it is recalled that during the Chinese war they were most secretive about the casualties.

CALLED HOME TO WAR

Tokio Government Cables Its Citizens in Hawaiian Islands

Honolulu, February 15. — Numerous cables were received today by Japanese residents in Honolulu from their Government advising them that the reserves had been called out and instructing them to come home at once.

It is believed that there are a large number of reserves among the 60,000 Japanese in Honolulu, and that the war will probably deprive them of laborers. The present transportation facilities to Japan will be inadequate to carry the large number of Japanese that will go from here.

JAPAN WILL TRIUMPH

A Pekin View of Russian Prospects in the War

Pekin, February 15.—Official military men and diplomatists here are of opinion that the Russian position is almost hopeless. They say that the tides of diplomacy and war are steadily flowing against her and that she may decide more easily than any one can foresee to seek a pacific issue out of her trouble.

Japan appears to be mistress of the sea in every critical quarter and is landing troops in Corea without let or hindrance. These forces are being *promptly followed* by large quatities of war material, provisions and medical stores. There is, no doubt, that the Japanese will be able to land a force in Manchuria the moment they decide that it is strategically prudent to begin land operations against Port Arthur.

—Lent commences on February 17th. This is a trifle earlier than last year, and Easter Sunday will fall on April 3rd, which is nine days earlier than Easter of last year. Palm Sunday will fall on March 27th, and Good Friday on April 1st.

EVERYBODY READS THE TIMES

FOREST MINING CO.'S
Storm King Group of Mines
TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the *Alpine, the Imperial and the California* mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.68 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.70 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values, $12.50. This being a general sample taken from the dump. The other two assays are $62.66 and $79.08 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet [illegible] sect a quartzite reef (which is running north twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1879, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co., Fiscal Agents, Sumpter, Ore.

or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitabl Gold Mining Co.

R. C. LANE, President. S. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. *From this shaft, running along the vein matter,* east and west are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,350 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,050 feet of underground work—the most of which is in ore; Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore *body of at least* One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with *modern* cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the *Flowery* and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1902, and partial payments have since been made. The *Company* is entitled to $4.25 per ton as cost of mining and milling. One-half of all over and above this $4.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. *Its policy is to pay as it goes.* In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in *due time* will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 365-tunnel; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

PROSPECTUS

OF THE

U.S. Gold Mining and Milling Company

Incorporated under the laws of the State of Nevada

—Capitalization 200,000 Shares—

Par Value, $1.00

Officers:

J. R. CHAPTON,	President
E. P. CHAPTON,	Vice-President
A. J. SANBORN,	Secretary
ALEX. J. CHAPTON,	Treasurer

Trustees

J. R CHAPTON, E. P. CHAPTON. CHARLES REAUME,
A. J. SANBORN, ALEX. J. CHAPTON.

Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200.000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1 00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles. California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

GEORGE T. ORDWAY, COMMISSION BROKER,	CHICAGO, ILL.
EGBERT CHAMBERLAIN, Dry Placer Miner formerly of California.	NEW YORK

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house or sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

WHO OR WHAT IS YOUR MASTER

HUTCHENS C. BISHOP, Rector St. Philip's Church (P. E.), New York City

No man can serve two masters.—St. Mat., vi., 24.

It is always impressive and helpful to have a statement intended as a rule of life uttered with authority and in language so simple and direct that it cannot be misunderstood.

Jesus Christ, whose words these are, was not only the "Lord of Life," but the Master of living. He spoke not only as one having authority, but out of an experience that had tested in His own life the rules He gave for guidance of others.

That He exemplified both in letter and spirit the principle expressed in the text is so clearly a matter of history that even His most persistent critics have not been able to gainsay. Nor should anyone fail to understand the force of the axiom:—"No man can serve two masters." It is a universal negative and asserts an impossible condition of service. It does not destroy the free exercise of the human will, but it places a limitation upon the functions of that will.

We are so constituted that, though one may boast of his independence in thought and action, nevertheless there is a mastery to which every one is ever rendering an obedient service. We must serve some master, but "no man can serve two masters." Nevertheless we are confronted with the fact that the great majority of men are endeavoring to do the very thing which is here pronounced impossible and proved to be so by all experience. Alas! how many have fallen victims to this vain endeavor; how many are still engaged in the hopeless task of a dual service!

The proposition is as true in the affairs of everyday life, in the questions affecting political, civic, ethical, commercial and social relations and the numerous situations in which we are called upon to assume an attitude of service, as in the realm of religion and morals. The tendency of the age is to be non-committal, to straddle, to be on the fence, to serve two masters, when, as a matter of fact, such an effort is a delusion and a snare, and in the end subverts the best interests of the individual and of the common weal. Compromise is always a sign of weakness. Conservatism is a sort of fetich of the day. In questions of honor and dishonor, of good report and evil report, of right and wrong, there is no middle ground upon which honest men can afford to stand. In such we are at the "parting of the ways," and we must follow one or the other.

Especially is this true in matters of religion. Here the line of separation is so clearly defined that it cannot honestly be escaped. The Great Teacher gives a concrete example:—"Ye cannot serve God and Mammon." God, as representing the very highest, because most perfect, mastery, and Mammon, as demanding the very lowest, because the most degrading, service—each is an imperious and exacting master, and no man can be loyal to both. Their wills are so different, their commands so opposite and their ends so antagonistic that the occasion must frequently rise when one or the other will have to be despised and disobeyed if the other be honored and served. Try as we may to elude the difficulty of the situation, we are forced to enlist in the service of the one or the other. Beyond a doubt Mammon rule—Mammon worship—is one of the distinctive features of the day, and few realize how deep is the impress upon life and character.

There is an expression about "every man" or "everything" having its price, and the fact that it calls forth a resentment that steadily grows less pronounced indicates how far we have gone in this direction. However, there is no necessary conflict between God and Mammon, between the acquisition of wealth and the highest duty of life, but there is a necessary conflict between the mastership of wealth and the mastership of God. When men are so dominated by the love of gain that it becomes an absorbing passion and the higher claims of duty are made secondary they should at least be honest with themselves and know in what service they are enlisted, and not be deluded by the thought that they can "hold to the one" and not "despise the other." Unworthy service assumes other forms. Society, fashion, pleasure may be substituted for "Mammon," and we have identically the same situation. It is not a question of inconsistency or incongruity. It is not "ye ought," but "ye cannot."

If, therefore, every man must serve some master, and "no man can serve two masters," and every man really does serve one master, ought not each one to deal honestly and fairly with himself, and as an intelligent and responsible being demand an answer to this very pertinent question, "Who or what is my master?"

At the Rothamstead, England, Experimental Farm, conducted so long by Lawes and Gilbert, a field is this year carrying its sixteenth successive crop of wheat.

In estimating the profit from a butter cow something is due the cow for the skim milk and butter milk furnished the pigs. A lot of pigs should always be kept where cream is sold or butter sent to market. The pigs provide a source for the disposal of refuse milk, and a portion of the profit should be credited to the cow.

Mr. J. A. Kinsella, at one time a dairy instructor for eastern Ontario, has been appointed to take charge of the dairy work for the Transvaal Government. Mr. Kinsella came from Brockville and had a practical training in dairy work. Two years ago he was appointed a dairy instructor for New Zealand and upon the resignation of Mr. Ruddick was made superintendent in New Zealand

A minister doesn't have to know the marriage ceremony by heart, for if he forgets a word the woman can always prompt him.

The only thing which would punish a woman worse than having to say what she believed would be having to believe what she said.

The main difference between a cat and a woman is that the cat has whiskers.

Any man can go into a room ful of women and pick out the one that thinks she is "advanced."

If I Die Shall I Live Again?

"No, and I Don't Want To," answers Frederic Harrison.

Aroused by Mr. Myer's remarkable book on the survival of human personality after death, the Positivists or freethinkers of England are giving vent to their ridicule and contempt, and the chief of them, the eminent critic, Frederic Harrison, in the "Nineteenth Century" gives a brilliant description of his dream of the future life. He tells how he dreamed, and having cast aside his mortal body, passed into the Infinite, where, in his dream, he seemed to revel in the tornadoes of astral volcanoes, and to find rest in icy regions where the very ether had frozen into a liquid:—

"One seemed? who seemed? who felt? who saw? who passed? What, or who, was I? Individuality, personality, subjectivity, had slipped off as easily as the dried husk they were now laying out for burial. How childish, how brutish, how selfish did it seem now to conceive of any me! There was an end of Me, with its outlook of blind kitten or wriggling earth-worm. Should it be rather We—was I now a Gas, a Force, an Emanation? Should it be rather They?—was I an indefinite unit of a limitless Power extended in Space, and contemporaneous with all Time? The pettiness, the feebleness, the squalor of the sense of being Me was too evident. A more glorious We took the place of Me: and We in turn became They; and They in a flash became All.

"What a miserable insect should I have been in this immeasurable Universe if, by miracle hardly conceivable of Omnipotence, the individual Me had survived! Personality was all very well in the muddy speck men call Earth; dust to dust, ashes to ashes. But in the blaze of an Infinite Universe, scintillating in its every atom with unquenchable light, throbbing not with momentary sensations, but with ideas, ideas intercommunicable from one point in the boundless All to every other point, without need of language, and without effort, act, or delay—to drag up into this Immensity the soiled rags of 'human personality'—'twould be better to be the parasite of the anopheles gnat, spreading death and disease in its passion for blood. When the entire Universe is continuously and eternally apparent as a whole; when all its infinite and interminable ideas are simultaneously cognizable throughout its limitless field; when Motion is extinct, by reason that everything is everywhere, and Sound is swallowed up in one endless circumambient Harmony, then, assuredly, there is no place left for Sight, Hearing, Speech or Thought. The wretched makeshifts of human sensation are as meaningless and sterile as the eyes of a mole. In this new world the craving for Personality is seen to be a sordid lust of the flesh.

"The transition from the dusty cribbed and fetid prison of the Body to the radiant immensity of the Universe, wherein all the uses of bodily sense, and all the notions of terrestrial mind are meaningless and void, was a change so sudden and tremendous that it could not become familiar at first. Remnants of ideas and instincts belonging to the old world of sense still lingered in the new world of transcendence. On earth one had played with conundrums of a geometry of four dimensions. The new world presented dimensions at once infinite in number, at once infinite and infinitesimal in quantity; rather it had no dimensions at all; for everything was everything else; and also was nothing And so, too, in the world numeration was infinite—all numbers were at once infinity and zero. Two plus two now added up x millions raised to the nth power, and instantaneously flashed back into minus 0. Had shame been possible in the world of the Absolute, it would have been fit to mark this absurd attempt to count—this survival of gross materialism from the world of Relation and Matter.

"The dregs of consciousness, of some flickering sensation of an individual Me, would now and then break out, like a forgotten weed in a well-tended garden I tried to think of myself as Me. . . . Such petty egoisms belong only to a world of limitations, of parts, of relations, of organisms. They drop off like dead leaves in winter in a world of infinites, of absolutes, a world which knows neither structures, nor parts, nor limits, nor substances, nor organs.

"Once, whilst the sound of human voices had hardly faded from my memory, I essayed to communicate some vague idea to the world around me The stupidity of such a wish, its wild absurdity and gross animalism, was beamed forth in the myriad flashes of a circumambient Lightning. Millions after millions of electric welkins pulsated across the Heaven, amidst the joyous peal of infinite Thunder claps They had recognized my wish before it had been expressed; nay, before it had been formed. They were Me; I was They; We were It. The All now absorbed the Many; it had engulfed all individual entities, so that personality had ceased to have existence or meaning."

The Automobile and The Cart Horse.

A swift Automobile once swept proudly past a Tired Cart Horse.

"Hello, Old Stick-in-the-Mud!" it called, tauntingly. "Back to the Boneyard, you Dead One!" So saying, it disappeared in a Cloud of Steam.

A little farther down the Pike, the Tired Cart Horse came upon the Swift Automobile, now Busted.

"Aha!" said the Steed, with a Horse Laugh. "who is Stick-in-the-Mud now! You are indeed far from your Happy Home."

While the Cart Horse was thinking up other Biting Sarcasms of this Nature, they hitched him up to the Damaged Vehicle, and he was compelled to yank it laboriously to the stable, fourteen miles away on an Up Grade.

This fable teaches us that it is Wrong to gloat over the Downfall of our Enemies, until we are sure they can no longer injure us.—Ex.

The Unweaker Vessel.

"You are accused of mashing women," said the stranger.

"I know it," replied the street car conductor. "But 'tain't the women that gits mashed, so much as 'tis the small kids and old men, I s'pose on account of the women mostly wearin' corsets."

"Was his marriage a success?" "I should say it was. He has tried to secure a divorce in South Dakota, New York, Oklahoma, and England—and his marriage still holds."—Brooklyn "Life."

Little Emily Kingsbury, aged four, who attends the kindergarten and calls it the "kidney garden," was being examined as to the senses.

"What are your ears for, Emily?"

"To hear with," was the answer."

"And what are your eyes for?"

"To see with."

"And what is your nose for?"

"To blow," was the innocent answer. —Lippincott's Magazine.

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE B WILCOX, RICHARD F. DOBBIS
WILLIAM GARLICK, ARTHUR B GARLICK, B F BARNES

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hindsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is 5x7 feet and in 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs) is as follows: Copper, 16.05 per cent.; Gold 0.02 ozs.; Silver 92 40 ozs. Total value $90.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper, $6 40; Gold, $6.82; Silver, $254 31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatsoever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years. Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5.500,000 (now claimed to be worth $15,000,000). About six years have elapsed since he purchased it. The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN."

Mr. Edwin J, Hulbert, M E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

B. F. BARNES, Fiscal Agent
Room 14, Wilcox Building, Meriden, Conn.

HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

ncorporated Under the Laws of the State o California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber, it has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock; but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to its shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely certain to others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to.

A Groom's Voluntary.

Sir Frederick Bridge, the English musician, is a good story teller, according to T.A.T., and has a fund of amusing personal experiences to draw upon. One of the great musician's best stories is about a provincial church organist, who was once a pupil of his. This young man was appointed to an important church in the Midlands. In course of time he married. During his absence his voluntaries were much missed by the congregation. They had always been appreciated, and their renewal was looked forward to. "Imagine," says Sir Frederick Bridge, "the intense amusement of the people when the newly-married organist gave as his first voluntary, upon his return, Handel's 'Waft Her, Angels, to the Skies.'"

To Build Cruisers.

As a result of the recent naval manoeuvres the British authorities are considering the advisability of building some "dogging" cruisers, to pursue battleship fleets of the enemy and pounce on those which are forced to fall behind. The Bacchante and the Aboukir "dogged" Lord Charles Beresford's fleet in this way almost to the Azores. The flagship Majestic had something the matter with her engines. She was frequently compelled to slow down. Then the big, heavily armed cruisers of the pursuing fleet would swoop down on her. It was necessary to slow down the entire squadron several times for her protection.

"Another point of much interest is that of speed in battleships," writes a British naval authority. "Those who have been engaged in the manoeuvres would have done much better with a few knots more in hand. There are experienced flag officers who say that high speed in battleships is not essential. Yet if gun powder and protection go before it, speed is, in nine cases out of ten, the only thing that can enable a strong fleet to bring a weak one to action. It is the factor that enforces victory and will enable the British fleet to carry on its old policy of seeking out the enemy to destroy him wherever he may be found."

The Wrong Man.

They had been married only a few months, and the wife stood by the side of her husband looking into one of the department store windows. A handsome tailor-made dress took her fancy, and she left her husband to examine it more closely. Then she went back to him, still talking.

"You never look at anything I want to look at any more," she complained. "You don't care how I dress. You don't care for me any more. Why, you haven't kissed me for two weeks."

"Indeed, I am sorry, but it is not my fault," said the man.

Turning, the lady looked at him and gasped. She had taken the arm of the wrong man.—Philadelphia Ledger.

A Baloon Trip.

There is nothing exciting about a balloon voyage. You take your place in a shallow wicker basket; decide to take a picture of the crowd as you leave the earth; hear the order "let go," and before you can press the button the crowd has evaporated—sunk out of sight—and the rest is a moving picture show, with no sense of motion, the air delightfully cool and absolute silence. Presently a voice, apparently from another balloon a long way off, asks how you like the journey. You have exactly the same trouble with your hearing you had while in the caisson, but from an opposite cause—there pressure, here rarefaction. In this case, too, the act of swallowing brings relief. A balloon trip is for all the world like sitting in a dentist's chair and taking a whiff of gas, followed by a pleasant dream. But, of course, instead of taking gas, gas is taking you. Photography under these conditions is a very simple matter—pointing the lens over the edge of the basket, waiting until the desired object comes into view, and the snapshot is taken.—W. N. Jennings, in Booklovers' Magazine.

A Quiet Village.

It seems hardly credible, says The London Telegraph, that not more than thirty minutes from all the noise and bustle of Paris there lies a village that is so quiet, so peaceful and so old-fashioned that one would imagine one's self at least one hundred miles away from the gay capital. Here at this village, La Frette by name, and about fifteen minutes' walk from Cormeilles, preparations for midday and evening repasts have to be made very early in the morning, for no such thing as a good shop is anywhere near, and the walk to Cormeilles is one which one considers twice before taking, for it is up steep and rough roads. So daily butcher, baker and greengrocer pass this quaint little place, and the villagers gather round the various tradesmen and make their purchases for the day. They also buy their clothes in this way, and may often be seen trying on bonnets, dresses and boots in the middle of the street. From a scenic point of view, all artists have agreed that there is no place to equal La Frette between Paris and Havre. To the left of the village is the park of Maisons Laffitte, and facing the park is Sartrouville, while opposite lies the forest of St. Germain, in all its green splendor. To the right is Herblay, quite an important place, whose church is visible for miles along the Seine. La Frette itself has the quaintest villagers possible. Many of them speak worse French than those of the Midi, and it is an event indeed when one takes a journey up to the capital. They are thriftiest of the thrifty. Only a short time ago one of the peasants gave his daughter no less a sum than 20,000 francs on her wedding day, and another is to receive the same amount on her approaching marriage. And yet this man, who must be worth 4,000,000 or 5,000,000 francs at least, lives in a patched-up old house and digs in the fields from early morning till late at night.

Be Regular in Milking.

The cow is a creature of habit, and therefore the time and manner of milking should vary as little as possible from day to day. The yield of milk will sometimes vary by reason of matters of such small moment that we fail to reckon them. From our results a change in milkers showed a small average loss in yield. Some cows were not affected at all, while others gave a slightly reduced yield. This will depend, however, upon the ability of the milker. Carlyle found no appreciable difference in the frequent changing of milkers. Tracy found by a good milker following a careless one an increase with five cows of 244 pounds of milk in two weeks.

Cows fed at milking time are apt to hold their milk when the customary feed is withheld. This may occur even when the animals have access to abundant pasture. This is so noticeable with some of the station cows that it is advisable to give them a little grain through the summer season to induce them to give down their milk. Emery notes that a cow that gave over seven pounds of milk gave only two pounds when her customary feed was withheld at milking time.

Allowing cows to miss a milking has a tendency to dry them up, and is liable to cause an injury to the udder, some cows being affected much more than others in this respect.—(Bulletin No. 106, Kentucky Agricultural College.)

"To what do you attribute your longevity?" asked the reporter.

"My which?" queried the oldest inhabitant.

"Your longevity," repeated the reporter.

"Never had it. As far as I can remember I ain't never had no such complaint."—Puck.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA
—AND—
BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.
Capitalized at $2,000,000 00. Par value $1 00. Full Paid and Non-Assessable
At 75 Cents per share

This company now owns the well-known Augusta mine and its extension for over 1000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $15 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office.

Has immense bodies of these grades of ore which cannot be exhausted in five years, already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,000 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,130 feet, thereby permitting shipments during the entire year.

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.
1,500,000 Shares. Par value $1 00. Full Paid and Non-Assessable.
Selling at 75c a Share

Like its sister Company is to-day giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 196 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 300 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, FISCAL AGENTS,
C. L. ARZENO, General Manager.
603-604 Exchange Bldg., Denver, Colorado
ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble
but a
Good, Safe Investment

THE STOCK OF THE
BRET HARTE GOLD MINING COMPANY
IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

Deadly "La Grippe"

Or Epidemic Influenza is Caused by an Air Germ. The Most Scientific Remedy is Catarrhozone

Two years ago, the medical journals commented widely on the marvellous success of Catarrhozone, which assisted very largely in stamping out the epidemic raging at that time. Cases that had resisted all other treatment were at once relieved and through the great healing powers of Catarrhozone further progress of the malady was arrested.

It is doubtful whether in the whole range of medicine a more lasting cure can be found. If a patient has any warning of the approach of La Grippe he has only to inhale the germ killing vapor of Catarrhozone a few times daily and escape entirely.

Even as a preventive of colds and catarrh it is a wise precaution to always carry a Catarrhozone Inhaler in your pocket. At the first shiver or sneeze you can ward off an impending attack by merely inhaling a few breaths of Catarrhozone Fatal consequences can often be avoided in this way. The Inhaler is beautifully finished and made entirely of hard rubber. It can be conveniently carried in the vest pocket ready for use in church, at work, in the theatre, street car, anywhere, at any time. The complete Catarrhozone outfit contains a large bottle of inhalant, sufficient to keep recharging the inhaler for two months. It costs $1.00 and is guaranteed to cure. Sold by all druggists or sent direct to your home by mail if the price is forwarded to N. O. Polson & Co., Kingston, Ont., or Hartford, Conn. U.S.A.

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

A Blaze on Rubidge Street

The fire brigade was called out about 6.30 last evening, to extinguish a slight blaze at 148 Rubidge street. The chimney had caught fire, but the firemen soon remedied matters. No great damage was done.

Aged Citizen Passes Away

Death claimed another aged victim from our midst on Saturday evening last, when Mrs. Jane Morrison passed away at the ripe age of ninety. The funeral took place yesterday afternoon, from deceased's late residence, 138 Rubidge street, to the Little Lake cemetery.

Police Court

Magistrate Dumble, at this morning's police court, left over for a week a charge against a citizen of having done wilful damage to the property of which he was a tenant. Fact is, he took a board from an outhouse in order, as he claimed, to provide a fire for a sick wife.

Lizzie Feels the Cold Snap

Twas a cold day on the hands yesterday. Lizzie Smith thought so, and being very particular that they should retain their delicacy, she discovered that a muff belonging to Mrs. "Chill" Turner, Ward Five, was just what she needed. She took it. The policeman took Lizzie, and His Worship will take a look into affairs this morning.

Mr. Kenner's Interesting Address

"Sunny Italy" was the subject treated by Mr. H. R. H. Kenner, at last night's monthly literary meeting of the George street Epworth League. Mr. Kenner related many interesting experiences in this sunny land, and his vivid descriptions of the beauties of this foreign spot were such as only could be described by one who has seen the place for himself. His description and stories were the more vividly presented by the introduction of several beautiful lantern views.

For the Fishermen

The concert and entertainment held in St. John's school house last evening, in aid of the Deep Sea Fishermen of Labrador, was a decided success. Considering the many events in town last night, a goodly number was present. Miss Helen Davies, soloist in St. Paul's church, rendered several selections in her usual charming manner, and Miss Gamprecht's selections on the piano were as usual much appreciated. Miss Lilian Moore was well received, and Mr. J. Lawrence sang several excellent tenor solos. Miss Katie Graham acted as accompanist, and filled her part to the satisfaction of all present.

The attendance at the
Peterboro' Business College
is larger this year than ever
WHY?
Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre of Canada.
Over 90% of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.
NOW IS THE TIME TO ENTER
If you cannot attend our school write for particulars regarding our correspondence course
WM. PRINGLE,
Principal.

Funeral of Late Mr. Howden

The remains of the late Mr. Robt. Howden were interred in the Little Lake cemetery yesterday afternoon. The late Mr. Howden has resided in Peterborough for over twenty years, and in his death our city has lost one of its most respected citizens. Coming to Canada from Ireland when quite young, he settled with his parents in Cavan Township, near Springville, where he remained till 1885, when he left the old homestead and came to Peterborough. His brother is Major Howden, of Port Hope, and a sister, Mrs. Charles Ormond, resides in town.

Closed Down for Lack of Grain

Lindsay Post—The railway blockade has interferred with the output of at least one Lindsay industry —the Flavelle Milling Co. The flour mill has been closed down for some days owing to the non-arrival of a number of carloads of Manitoba wheat from Midland. Advantage has been taken of the stoppage to make some needed repairs, and it is hoped the missing cars will be on hand Monday morning. The blockade has been particularly unfortunate recently owing to the fact that there is a very brisk demand at the present time for the firm's output at rapidly advancing prices, while very few carloads have been taken away of late by the railway company. We understand that if empties could be secured the company is in a position to load 75 or 100 cars, for which they have had constant enquiries.

Committee of the Whole Council

A meeting of the Committee of the Whole Council was held on Saturday evening for the purpose of reconsidering the application of the Lock Company for a site, upon which to erect new factory buildings, and a fixed assessment. Hon. J. R. Stratton, representing the Company, was present. Upon discussion of the matter it was decided to recommend application for legislation authorizing the Commissioners fo the Town Trust, with the approval of the Council, and on such terms and conditions as the Council may impose, to convey to the Company lots 10 and 11, north of Perry street, lot 10, and the south half of of 11, south of Rink street, all west of George street, and to authorize the Council to pass a by-law without the assent of the electors to fix the assessment of the land, the buildings, erections and machinery to be placed thereon, at the sum of $12,000 for 10 years, on such terms as may be provided by the prepared bylaw.

MARK HANNA DEAD

Prominent American Statesman and Friend of Late President McKinley Passes Passes Away

Senator Marcus Hanna is dead. The great bosom friend of the late President William McKinley passed away yesterday. Some months ago the great Republican statesman contracted fever, and increased weakness followed. Dr. Oater was in constant attendance. The late Senator has for a number of years been a central figure in American political circles, and it is quite probable he might have received the Republican nomination for President.

FREE LIGHT FOR FRANCHISE

Here is a Valuable Pointer for Peterborough Just Now

It will be interesting for The Times readers to learn just now that Fredericton, N.B., is to have street light supplied absolutely free in exchange for a pole franchise of the streets. There is also a scale of charges to consumers, which is said to be very low.

The following is taken from the Monetary Times:—The People's Light and Power Company, Limited, Fredericton, N.B., have obtained the necessary authority from the council to erect poles and put up wires in the city. They are now making preparations, therefore, to instal a plant for generating and supplying electric light. The company agrees to furnish electric light for city buildings free of charge for ten years. Heretofore, Fredericton has been dependent both for gas and for electric lighting on the Fredericton Gas Company.

SUDDEN DEATH AT MILLBROOK

Popular Young Lady of that Place Passes Away

Sad we are to have to chronicle the death of Miss Lottie Cochrane, one of our most esteemed young ladies, which took place at Millbrook at 3 o'clock yesterday morning. The deceased was for over two years organist of St. John's church, and during this time, her pleasant manner, her cheerful disposition, and her wonderful musical abilities, won for her many staunch friends. Those more closely connected with her in church work, speak in the highest terms of her faithfulness in endeavoring to so perform her duties as organist, that the musical services should be most effective.

Miss Cochrane was the daughter of Mr. James Cochrane, G.T.R. agent at Millbrook, who with his two sons and two daughters survive her. The sons, Percy and Linden, reside in the North-West. As the result of an illness last spring it was found necessary that the late Miss Cochrane sould undergo an operation, which apparently proved successful, as she was enabled to resume her former duties. She officiated as organist at St. John's church on Sunday, Feb. 7th, but the following week her old malady again troubled her, and a second operation was performed, with the result that she suddenly died of heart failure yesterday morning.

To funeral will take place on Thursday at 2 o'clock.

VALENTINE SOCIAL

An Enjoyable Entertainment Under the Auspices of the Senior Girls Guild

The entertainment under the auspices of the Senior Girls Guild, of All Saints church, last evening was an extremely pleasant and successful affair and unique in its character. It was a Valentine social, and its characteristic feature consisted of the valentines being cut down through the center—each male getting a right half, and each female a left half indiscriminately, which they were required to match afterwards; and thus they became mated for the evening. It created considerable merriment and confusion, and added to the enjoyment of the evening's entertainment. Owing to the temporary vacancy in the rectorship, the Rev. Mr. Davidson presided as chairman. The Rev. Mr. Holah, rector, pro tem, of St. Luke's church, gave a short address, and referred humorously to his chaplaincy of the Penitentiary at one time, but wound up with a reference to the Lenten season now so near at hand. It was his first appearance at All Saints, and he made a good impression. Miss Free's recitation of "Jenny McNeil" and "The Progress of Madness," received well merited applause. Mr. Scott, with Miss Bullen as an accompanist, sang "Take a Seat Old Lady," and for an encore "Winding of the Yarn." A piano duet, entitled "Le Carillon" was beautifully rendered by Mrs. Greenslade and Miss Mulholland. The old favorite, Mr. Joseph Legg, with Miss Bullen as an accompanist, sang in his usual style "Out of my life forever." The song of the evening was by Miss Daisy Sowers entitled "For Love Alone." She was accompanied by Mrs. Halpany in her usual artistic style. The cornet solo by Mr. Rogers of "Alice, Where Art Thou," was rendered in a superb manner. The last, but not least, piece on the program was the Chrysanthemum song by a number of girls and boys, whose hats were elaborately decorated with flowers of that kind. It was a parody on "Annie Lawrie," and was much enjoyed. Miss Rickey was the accompanist. The church orchestra gave some fine selections under the leadership of Mr. Rogers. The whole concluded with refreshments, which for quality and quantity, spoke well for the liberality of the ladies.

BREEZY LOCAL BREVITIES.

Gathered by The Times Reporters on Their Daily Rounds

—Japan is doing a Russian business these days.

—A tea-meeting and concert will be held at Auburn this evening.

—The monthly meeting of St. John's branch of the Women's Auxiliary will be held in the Guild room this afternoon at 3.30.

—A concert and hop under the auspices of the C.G.E. Benefit Society will be held in Forester's Hall, Simcoe street, this evening.

—A report of the Epworth League Convention at Campbellford was presented by Mr. Lewis at the George street League meeting last night.

—The heavy snowfall has played great havoc with the railroad systems. The G.T.R. service was badly crippled today. The trains were much behind time.

—A Pancake Social will be held in St. Luke's school room this evening. A program consisting of literary and musical selections will be rendered.

—We are glad to learn that Mr. W. H. Moore, who sustained slight injuries while coming out of the Bradburn residence, on Friday last, expects to be at his desk again in a few days.

—"Oh, man, Oim sorry for ye," said Casey, sympathetically to Cassidy, who had just had an arm amputated. "Ah, well," replied Cassidy, "there some good in it. The ould woman can't expect me to walk the flure with the twins now."

—Mr. and Mrs. Firth sang "Abide With Me" at the evening service, last Sunday, at St. Luke's church. The duet was delightfully rendered and much appreciated by the congregation.

—A union meeting of St. Paul's and St. Andrew's Young People's Societies was held in the lecture room of St. Paul's church last evening. Mr. J. S. Ferguson, President of St. Andrew's Society, took the topic, and the discourse was most interesting and instructive.

—Mr. John Wilson, aged 18, a former resident of Peterborough, died at Detroit on Friday last. The body arrived from the west yesterday, and the funeral will take place today from the residence of deceased's sister, Mrs. Michael Halpin, to the Roman Catholic cemetery. Mrs. J. Sullivan, of Ward Five, is an aunt of deceased.

—An elderly lady of pronounced Irish extract visited one of Peterborough's stores the other day, and, on hearing one of the clerks complain of la grippe, expressed her sympathy and prescribed as follows; "Go up to —— drug store and get —— tablets, and, whatever you do, don't contract the disease too long."

—A suburban farmer was asked the other day concerning the new potato of which there is so much talk, and for which such fabulous prices are being paid. "How do they cook?" we asked. "Cook 'em! You don't cook 'em. Nobody cooks 'em. They are not to eat; htey are too dear!"

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Miss Campbell, of Truro, N.S., is here on a short visit.

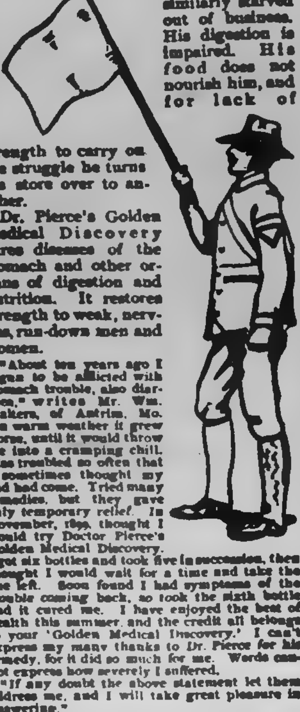
—Miss Ruby Jolliffe returned yesterday from a visit to Toronto friends.

—Major Howden, of Port Hope, was in town yesterday, attending his brothers, the late Robt. Howden's, funeral.

—Mrs. (Hon.) J. R. Stratton will give a ladies dinner at the Speaker's Chambers on Wednesday next, in honor of Mrs. Mortimer Clark.

—At the Snowden; M. Fraser, Soo; C. Pearson, Toronto; Wm. Lang, R. Rogers, W. H. Hedges, J. F. Buchard, G. Bilton, Thos. O'Brien and J. Brandon, Toronto; Jno. Smith, Regina; A. R. Taylor, Toronto.

EVERYBODY READS THE TIMES.



STARVED OUT.
Many a garrison has been forced to give up the fight and hang out the white flag of surrender, when lack of food has weakened the men past all power to continue the struggle.
Many a man is similarly starved out of business. His digestion is impaired. His food does not nourish him, and for lack of strength to carry on the struggle he turns his store over to another.
Dr. Pierce's Golden Medical Discovery cures diseases of the stomach and other organs of digestion and nutrition. It restores strength to weak, nervous, run-down men and women.
"About ten years ago I began to be afflicted with stomach trouble, also diarrhea," writes Mr. Wm. Wakers, of Antrim, Mo. "In warm weather it grew worse, until it would throw me into a cramping chill. Was troubled so often that I sometimes thought my end had come. Tried many remedies, but they gave only temporary relief. In November, 1899, thought I would try Doctor Pierce's Golden Medical Discovery. I got six bottles and took five in succession, then thought I would wait for a time and take the one left. Soon found I had symptoms of the trouble coming back, so took the sixth bottle and it cured me. I have enjoyed the best of health this summer, and the credit all belongs to your 'Golden Medical Discovery.' I can't express my many thanks to Dr. Pierce for his remedy, for it did so much for me. Words cannot express how severely I suffered.
"If any doubt the above statement let them address me, and I will take great pleasure in answering."
Dr. Pierce's Pleasant Pellets cleanse the bowels and stimulate the sluggish liver.

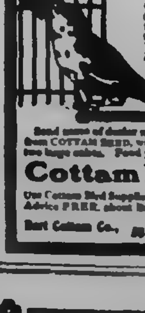
APPLICATION TO PARLIAMENT

Notice is hereby given that in addition to the application of which notice has already been given an application will be made on behalf of the Town of Peterborough to the Legislative Assembly of the Province of Ontario, at the present session thereof for legislation to authorize the Commissioners of the Peterborough Town Trust with the approval of the Council of the Town of Peterborough, and on such terms and conditions as the said Council may impose, to grant and convey for a nominal consideration to the Peterborough Lock Manufacturing Company, (Limited) Lots Numbers Ten and Eleven north of Perry Street and Lot number Ten and the south half of Lot number Eleven south of Rink Street all west of George Street in the Town of Peterborough and to authorize the Council of the said Town by By-law passed without the assent of the electors, to fix the assessment of the said land, and the buildings, erections and machinery to be erected or placed thereon at the sum of $12,000 for a term of ten years on such terms and conditions as may be provided in said By-Law and to authorize the said Council by By-Law passed without the assent of the electors to fix the assessment of any real estate in the said Town on which an Academy of Music or Opera House may hereafter be erected together with such portion of the buildings and erections thereon as are and while used for such a purpose at the sum paid for the said real estate for a term of ten years upon such terms and conditions as may be provided in said By-Law.

Dated at Peterborough this 15th day of February, 1904.

E. H. D. HALL,
Solicitor for the said Town.



Bird Bread
COTTAM'S famous food for birds, formerly only sold with COTTAM SEED. Now sold separately at 10c. the package, two large cakes. The high reputation enjoyed by BIRD BREAD has caused us to make this departure after refusing for years to sell it apart from COTTAM SEED.
Send name of dealer not selling BIRD BREAD apart from COTTAM SEED, with 6c. in stamps and get free two large cakes. Feed your birds on the standard seed.
Cottam Bird Seed
Use Cottam Bird Supplies and Remedies. All grocers. Advice FREE about Birds. Bird Book 25c. by post.

BLINDING, BEWLDERING EFFECT OF THE JAPANESE TIMEFUSE SHRAPNEL FIRE AT CHEMULPO

The Variag was Literary Peppered in Parts as Though She Had Been Played on At Exceedingly Close Quarters

THE FIRING LASTED ABOUT FIFTY-ONE OR TWO MINUTES

Russian Vladivostock Squadron Believed to Have Returned to Vladivostock.

London, Feb. 16.—In an interview with the Daily Mail's Seoul correspondent, Brig.-Gen. H. Tallan, of the Philippine Constabulary, who was appointed to accompany the Russian army, and who watched the naval fight at Chemulpo at close quarters, and afterwards rowed around the Russian ships, before they were destroyed, said; "I have never seen or heard anything resembling the effect of the shrapnel fire. The Variag was literally peppered in parts as though she had been played on at close quarters with machine guns. Evidently time-fuse shrapnel was used, with blinding, bewildering effect. The heavy artillery work emphasises the fact that you fire a tremendous lot and get little for it. The firing lasted fifty-two minutes, and there were ten shots a minute. Only two heavy shells struck the Variag's hull. One shot exploded on the bridge, and strikingly demonstrated the effect of shell fire, everything around being torn to tatters, and resembling the debris of a machine shop. All the torpedo tubes were filled after the fight, indicating that none had been fired. The Russians knew evidently that they were going to inevitable death, yet they fought until their ship was unmanageable. Their commander did well to bring the ship into the harbor. Further fighting would have been madness."

Washington, Feb. 17—A cablegram gation from Tokio, stating that upon a request made through the British consul at Chemulpo that thirty-four of the Russians wounded in the recent naval engagement should be placed in charge of some Japanese charitable institution, consent was readily given and they were put in the Japanese nurses hospital at Chemulpo and are being treated by Japanese doctors.

JAPAN NOT UNDULY ELATED

Tokio, Feb. 16—It would be a mistake to imagine that Japan's initial victories have unduly elated either the civil or military leaders. They are full of confidence as to the outcome, but still view the work in hand as serious beyond exaggeration. There is not the slightest sign of rejoicing in the army or navy. Grave reticence and devotion to duty are what one sees in every department of those services to the care of which the fate of the Empire have been committed. The Ministry of Marine exhibits no alarm at the news that Russia is about to start its Baltic squadron to the Far East. It is doubtful if the vessels would be able to accomplish the cruise, and, in any case, it is believed that long before they could arrive Admiral Togo's ships will have nothing to do, but to receive them.

There is good authority for the statement that Japan's troops in Corea up to date number 50,000 or 60,000. The Ministry of War expects information of decisive developments within a few days, possibly within a few hours.

ANOTHER WAR CLOUD

TURKEY TO INVADE BULGARIA THE END OF MARCH

Believed to be the Earliest Favorable Time for Move

Constantinople, Feb. 17—The better informed Turks here look forward to war with Bulgaria in the spring as inevitable. English residents share their conviction that Turkey will invade the principality towards the end of March. This would be the earliest favorable moment for a campaign. In event of a settlement of the war in the extreme east, however, the Sultan as likely as not, will drop his warlike plans.

Port Said, Feb. 17 — The native press is jubilant at the Japanese successes and urges Turkey to take advantage of Russia's predicament to declare war on Bulgaria, with the object of administering a lesson to that country, and recovering southern Roumelia.

Salonica, Feb. 17—Cases containing 15,000 cartridges and fifty-seven revolvers and rifles have been seized by the customs officials here. Ottoman postal authorities have intercepted a large package of blank passports, alleged to have been addressed to a Bulgarian merchant residing at Serres.

Russia Is Preparing For Action Against Britain

War with England is Almost Certain Over The Thibet Trouble

Special to THE TIMES;

Berlin, Feb. 17.—Nothing is known here officially of the report that the German cruiser Hausa, left to remove German subjects from Port Arthur, was fired upon by Japanese warships.

Washington, Feb. 17.—The Japanese Minister today received a despatch from Tokio stating that trustworthy information has reached the Japanese Government to the effect, as the result of the Japanese attack on the Russian squadron at Port Arthur, at midnight, on Feb. 8th, the Russian battleship, Retvizan, is still aground outside the fort. The Cesarevitch has been towed into the port, and the Polltada is still aground at the entrance to the port. All three, the despatch says, are disabled. The despatch says; As a result of the bombardment on the morning of the 9th, the Novik was seriously damaged, but the Askold and Poltava were only slightly damaged.

St. Petersburg, Feb. 16.—Lieutenant-General Ivanoff, Governor-General and commander of troops in Turkestan, has gone to Tashkend, with General Sakorff, chief of the staf of the military district of Turkestan. It is said in high military circles that Gen. Ivanoff has been instructed to prepare for the contingency of military action in the direction of India, in the event of Great Britain adopting an attitude openly hostile to Russia, or attempting to prejudice Russian interests in Persia or Thibet.

MAJORITY OF THE BYE-ELECTIONS GO LIBERAL

Five Constituencies Go Liberal and Three Goes Conservative

Special to THE TIMES;

St. John, N.B., Feb. 16.—The bye-election campaign here today, was conducted in a blinding snow-storm, which seriously interfered with the bringing out of the vote in the suburban districts. Both sides claimed victory, until the result was known, the Government party conceding that Mr. Blair's majority of 997 would be be cut down to one or two hundred, and the Opposition looked for a margin of one to four hundred in their favor.

The following is the result in the above and other constituencies;

St. James, Gervais, Liberal, over 600 majority.

Hochelaga, Rivet, Liberal, small majority.

St. Hyacinthe, Blanchet, Liberal, elected.

Montmagny, Lavergne, Liberal, 300 majority.

St. John, Daniels, Conservative, 298 majority.

Queens, P. E. I., Hazzard, Liberal, 300 majority.

East Lambton, Armstrong, Conservative, over 300 majority.

East Bruce, Stanley, Conservative, 150 majority.

WEATHER NOTES

Fine and continuing very cold.

SEE A YELLOW PERIL AT HAND

Russians Look For Union of Two Big Races

BREAK CZAR'S PRESTIGE

Campaign Being Waged to Break the Czar's Prestige in China

St. Petersburg, Feb. 17 — It is thought here that the action of the Japanese in flooding Pekin with posters relating their victories is a part of a well-laid campaign projected from the beginning to break down Russia's prestige in China for the purpose of ultimately effecting the union of the two races, which would make the "yellow peril" a reality.

Russia is evidently not prepared at this time to give an answer to the United States to Secretary Hay's note on the subject of the neutrality of China. Hostilities having begun, the military authorities must be consulted and the czar doubtless will refer the matter to Viceroy Alexieff, if he has not already done so. Russia, it can be said, is certainly as anxious as the United States that the war cause no risings or disorders in China, indeed, the attitude of China is already causing some misgivings here, as she has not declared her neutrality. Russia has already learned of the position taken by several powers regarding Secretary Hay's note.

Germany and Great Britain, it is understood, both express sympathy with its purpose, but with an important reservation concerning Manchuria which is now the theatre of war. Germany's views in this respect were anticipated, but Great Britain's failure to give Secretary Hay unqualified support has caused surprise here.

France Delays her Answer.

Paris, Feb. 17—Instructions have been sent by the ministers of marine foreign affairs, and of the colonies, to their respective agents abroad to observe strict neutrality during the war.

The council of ministers discussed today the situation in the far east including Siam. It is understood that Foreign Minister Delcasse presented the United States note on the subject of the neutrality of China, but it is not expected that the formal reply of France will be handed to the American Ambassador for some days. The intention of the cabinet seems to be to obtain the views of the other powers before acting.

Favored by Denmark.

Copenhagen, Denmark, Feb. 17 — United States Minister Swenson delivered Secretary Hay's note to the Danish Government yesterday. It is understood that the government regards the note with favor.

Austria Little Concerned.

Vienna Feb. 17—United States Ambassador Storer today presented Secretary Hay's note on the subject of China to the foreign office and afterward had a long interview with Count Goluchowski, the Austro-Hungarian minister of foreign affairs. Well-informed persons believe the policy of Austria-Hungary in the far east will be entire acquiescence with that of the most interested powers it is not considered likely that Austria Hungary will take any steps in the matter, her inetrests in the far east being slight.

Discussed at Washington

Washington, Feb, 17—The situation in the far east was referred to only incidentally at the cabinet meeting While some comments were made on the reception by the powers of Secretary Hay's note looking to a limitation of the scene of war and to the preservation of the integraty of China, there was no general discussion of this subject. Individual members of the cabinet took up with the president matters of concern in their departments, but they were of no considerable importance.

CHAMBERLAIN IS VERY SICK MAN

Strain of Campaign Too Great For Him

MUST SEEK A LONG REST

Condition Due to Sunstroke Suffered Last Year in the Tropics

London, Feb. 17—Joseph Chamberlain looked to be a very sick man when he left London last Thursday for Egypt. Orders were given that no communication of any kind but personal and private be forwarded to him.

He would never think of leaving the country at a time when the government may go to pieces any day except under positive compulsion.

His physical condition has given rise to the gravest rumors in parliamentary circles, which his appearance only too fully bears out. His color is livid, his face worn, his look has lost its keenness and his step its elasticity.

Suffers from Brain Fag.

It is officially admitted that he is suffering from brain fag, but it is explained that it is too soon to definitely diagnose his complaint.

Ever since his cab accident during coronation week he has suffered from headache. Since his return from his trip to Uganda and South Africa this trouble has grown worse and has been accompanied by insomnia, followed by nervous exhaustion and irritability.

These symptoms, it is feared, are a consequence of his having got a touch of the tropical sun while either in Uganda or South Africa, symptoms which are likely to be followed by most serious results in the case of a man who has received an injury to his head.

Mr. Chamberlain's speech last week on the war commission was much below his standard, and the tragic death of his faithful benchman Powell Williams, completely prostrated him.

More than that, the story comes from the Colonial Office that after his return from South Africa Imperialism became almost a monomania with him. He talked of nothing else, and became testy when compelled to consider subjects into which it could not be introduced.

The correspondent of The Times heard only yesterday that a young Canadian who recently took luncheon at Highbury with the Chamberlains noticed that every time politics was referred to some member of the family changed the subject, but despite this Mr. Chamberlain eventually became excited and delivered a harangue, as if addressing a public meeting, to the manifest discomfort of those around.

THE BLACK SEA FLEET

RUSSIA IN DANGER OF PROVOKING OTHER POWERS

Naval Forces in the Baltic Weak and Reported Movement is Discredited

St. Petersburg, Feb. 17—The report that Russia is negotiating for permission to bring her Black Sea fleet through the Dardanelles cannot be confirmed here. In diplomatic circles, while it is not believed that the porte would offer objections to this the impression is that such an attempt would precipitate grave complications with the powers signatory to the Dardanelles convention.

Berlin, Feb. 16—It is officially announced here that nothing is known of the alleged passage or impending passage of the Russian Baltic fleet through the Kaiser Wilhelm (Baltic North Sea) canal. The best denial of the statement that Russia wishes to send fifteen warships through the Kaiser Wilhelm canal was made at the navy department, where it is said that Russia has not fifteen ships in the Baltic that could readily be sent to the far east, seven or eight being all she has there, according to the intelligence here, that could be made serviceable against Japan, and as many more coaling-ships might have to go with them the German naval opinion is that so small a fleet could do nothing alone.

Bluff to Satisfy Public.

Movements of the Russian Baltic fleet are in reality a bluff intended to satisfy the demands of the public. The Baltic fleet has, to begin with, small coal capacity. When the ships arrive at Gibraltar the British would give them enough coal to carry them back to Kronstadt under the distinct understanding that they obtain no more fuel at any British coaling-station for three months. If they had any intention to deceive and use coal to proceed down the Mediterranean they could obtain sufficient supplies at Bizerta, a French station, but from that point they would be met by insuperable difficulties.

If they did not touch at a British coaling station they would have to make for Jibouti and thence to Saigon, where the French might grant them the fuel they needed. On the other hand, they might attempt to take colliers with them, but that would mean that the rate of progress would be very slow and that they would be hampered in every way.

In regard to the Black sea fleet, the same objection applies, even if permission is granted to pass the Dardanelles.

Squadron Now at Jibutil.

Island of Perim, Red Sea, Feb. 17—Mail advices here from Jibutil, French Somaliland, say that the Russian squadron while passed Perim Jan 27, has coaled at Jibutil and will wait there until Feb. 18 for the Russian warships due at Jibutil from Suez.

Port Said, Egypt, Feb. 16—The Austrian collier Java, chartered by Russia to proceed to Port Arthur with coal, has been ordered by the Egyptian ministry of foreign affairs to leave here immediately.

New York, Feb. 17—With loud and long-continued cheers for the mikado the Japanese army and navy, the success of the war against Russia and with a sonorous singing of their national anthem the Japanese of New York brought to a close an enthusiastic mass meeting which had lasted most of yesterday afternoon in the Chamber Music Hall in Carnegie Hall. The object of the meeting was to consider means for raising $5,000,000 at least to help the home government in the war. Of the 500 present fully a quarter were Americans.

Although no funds were actually subscribed at the meeting it was unofficially announced that nearly $200,000 had already been privately pledged.

Rome, Feb. 17—In the last 6 months more than 900 cases of violent assault took place in the city of Rome, seventy-nine of which had a fatal termination. Of the wounded only about 100 would give any information as to their assailant, all the others keeping the secret for fear of the "Malavita," a local organization, which is becoming as much feared in Rome as the Mafia is in other societies. All the members of the society are pledged to take personal revenge on a victim or his friends when the name of his assailant is given to the police.

LOCAL - NEWS

RUMOR NOT TRUE

Mrs. Thos. Eastwood's Reported Death a Mistake

A rumor reached town yesterday to the effect that Mrs. Thomas Eastwood, of Buckhorn, had died suddenly. The Times made enquiries at Lakefield, and was informed that there is no truth in the report. A Mrs. Mitchell, an aunt of Mrs. Eastwood, whose home is in Marmora, and who was on a visit to her neice, died suddenly there yesterday at noon. This, no doubt, gave currency to the report.

MR. WARREN HALL'S LOSS

Disastrous Fire in Douro Destroys Valuable Property

On Monday morning a rather disastrous fire occurred in Douro, with the result that considerable damage was done. The barn and stable on the farm occupied by Mr. R. Thompson, but owned by Mr. W. Hall, of Peterborough, caught fire and with their contents were completely destroyed. Four horses, two cows, three heifers, eight pigs, and a considerable quantity of grain were destroyed. The loss was about $1000, only partly covered by insurance.

FUN AT FORESTERS' HALL

C. G. E. Benefit Society Concert a Decided Success

The Benefit Society in connection with the Canadian General Electric Co. held an entertainment and concert in the Foresters Hall, Simcoe street, last night. About 200 were present and the program consisted of interesting vocal and literary selections. Mr. McCoy, with his instrumental selections, was much appreciated. Mr. J. Legg sang several solos which produced warm hands, and Mr. Dunslow's recitations pleased all. The comic songster of the evening was Mr. J. Cole, who sang several English songs, which produced general laughter. Special mention might be made of Miss M. Clancy, who sang most beautifully, and Miss Kennealy, whose elocution displayed more than ordinary ability. Mr. Bert Cranfield attempted a display of hypnotic power and succeeded in making much fun. Bert wanted more lady subjects on the platform but well his "want ad" is out yet. At more than ordinary ability., Mr. Bert the conclusion of the program the young folks tipped the light fantastic till midnight, and all left with light hearts.

EVERYBODY READS THE TIMES

FRANCE WILL STAND FIRMLY BY THE RUSSIANS

Sentiment in France Strongly Opposed to Japan's Policy

TEST WILL COME WHEN LAND BATTLES BEGIN

Cost of Pending Conflict Will Be Ruinous to Both Parties—Issues are Such That They Must Fight to The Death

Paris, Feb. 17—"The battle between the elephant and the whale" as the French press characterizes the Russian-Japanese war, paraphrasing Bismarck's allusion to what a contest between England and Germany would be, is exciting the greatest interest and comment here.

The first success of the Japanese admirals is attributed to their knowledge of the sinuosities of the coasts and the formation of the entrances to the harbors which enabled them to escape all incidents.

A Costly Conflict.

The cost of such a war is specially dwelt upon. The cost of the bombarding of Port Arthur, lasting two hours, is estimated at $650,000, each shell of heavy caliber costing, according to French artillery experts, $200. To this must be added the cost of coal consumed.

The press representing the nationalist party is divided as to what France's attitude should be at the moment. Deroulede and the more more moderate nationalist newspapers favor a policy of the strictest nonintervention while the more violent section believes in strict adherence to the alliance.

The Temps asserts that Japan's first pyrotechnic success will have no effect unless it is supplemented by a solid victory on land, where there will be the crucial test. The sterling qualities of the Japanese infantry are admitted, but the cavalry is scoffed at. It is related that the Japanese religion involves certain reverence for the horse and that a Japanese cavalryman never mounts without apologizing to his steed.

Could Not Prevent War.

The Japanese legation in Paris has given for publication a card setting forth that Japan could not prevent war without losing self-respect and incidentally Corea and all rights in Manchuria. In regard to criticisms about the attack on the Russian fleet before a formal declaration of war, the reply is that this was due to Russia's failure to reply to Japan's last note, the report being denied that Russia's note was really received, and its reception concealed when the attack was made. The card says Russia's reply and the last word from Japan crossed each other in transit.

According to the statement for the Japanese legation Japan made definite propositions, Oct. 13, offering to establish a neutral zone in Manchuria, thirty miles on each side of the Corean frontier; that December 11, Russia replied, ignoring the Manchurian proposition and renewing simply the original claims in Corea.

This note, vague in terms and evidently to give Russia time for preparation, was dated Jan. 6.

Russia's Dilatory Tactics.

Japan sent a new and more insistent note Jan. 13, the answer to which was persistently delayed by Russia, while warlike preparations continued, which caused Japan to withdraw her representative from St. Petersburg, in itself practically a declaration of war.

The French press, which saw no outrage in Spain's blowing up the Maine, is making a great howl about Japan's torpedoing Russian war vessels before a formal declaration of war.

Cassagnac says in the Autorite; "This semibarbaric nation has proved itself worthy of its traitorous allies, the English, who destroyed a Danish fleet by a similiarly cowardly stroke. Imbued with ideas of the English school, it is not strange that in conjunction with her own barbaric proclivities Japan has acted in this manner."

A Fight to the Death.

Other writers regard the contest as a life and death struggle. It is believed that if Japan fails to get Corea she would be ruled by Japan in the Yellow Sea as effectively as she is by Germany in the Baltic. Japan in possession of Corea would away the sea in the far east permanently, for if settled on both sides of the strait of Corea she could cut communications between Vladivostock and Port Arthur at will Moreover, if installed in North Corea, Japan would be close upon the flank of the Manchurian railway and would have the best chance of permanent supremacy in the far east.

New York, Feb 17—Michael Davitt, who arrived from Ireland on Saturday, says that Ireland is in sympathy with Russia, because she is Britain's foe. Mr. Davitt scouted the idea of England or France being drawn into the struggle between Japan and Russia, and deplored any attempt to influence public opinion in this country to take sides against the czar and his people in the present conflict. "When I left the other side," said Mr Davitt, "it was fully expected that war would be averted. Sober opinion everywhere was that there was no need for war, and I am sure it is a matter of regret over there that hostilities have begun.

"In England the prevailing sentiment is in favor of Japan, and as can be imagined, Ireland is for Russia. Naturally enough, you may say, because Ireland sometimes disagrees with England. But justice in not with the Japanese side of the case.

"This it is which is at the root of the whole matter. It was easy enough for the Japanese to find a pretext."

Memphis, Tenn., Feb 17 —Jockey Winkfield under contract to M. Lazareff, a Russian owner, to ride in Russia this year, may not report there on account of the war with Japan. Lazareff today cabled to J. O. Keene, who made the contract, asking that Winkfield be sent at once. Winkfield is holding off, as it is reported that in the event of the United States interfering in any way, all Americans in Russia will be escorted to the frontier and banished from that country.

MR. ROBINSON HONORED

Superintendent of George Street Church Presented with a Purse of Gold

George street church, last night, was the scene of a most interesting and happy gathering, the event being the Sunday school anniversary. The children of the school were all admitted free, and a throng of little ones was present. One always feels a certain degree happier when surrounded by light-hearted, laughing little ones, who have yet to face the cares and trials of life, and last night the scene was such as would cause the hardest heart to again feel that childhood is indeed one's happiest time of life. Mr. Stubbs pleased the children with some very fine lime-light views, and several presentations were made to the most regular attendants in each class. The earnest efforts of Supt. Robinson have produced most satisfactory results, and as a tangible evidence of his many co-workers appreciation of his services, he was presented with a beautiful chair and a purse of gold. Rev. Mr Wilson, pastor of the church, officiated as chairman.

THE HAT THAT BESSIE WORE

Yesterday Morning Police Court Livelier Than Usual

The scene in yesterday morning's police court was livelier than usual, owing to the chatty disposition of one Lizzie Dawson. She was defendant in a charge of assault laid by Bessie Richards. The affair happened on Sunday evening, when Lizzie met complainant on George street, and used considerable ornamental language. Bessie was shocked and commenced to run. Lizzie, in company with several boon companions, gave chase, and at the corner of Brock and Water streets a slight skirmish took place. Bessie's bonnet was captured by defendant, and the former explained matters to P. C. McGinty, and finally a charge was laid. Magistrate Dumble strongly condemned such conduct on the Sabbath, and expressed himself as determined to put an end to so much disorderliness on the part of this class of young women. Lizzie's smile wore away as she heard, "$5 or 10 days, the fine to be paid forthwith." A witness immediately left for Lizzie's bank-book, and in the interval [illegible] passed through the bars downstairs. "I won't pay $5 for nothing," was her parting salute as she went below. Mr. D. O'Connell for defendant and Mr. R. F. McWilliams for complainant were the counsels.

The came the case of Lizzie Smith, accused of stealing a muff from her employer, Mrs. Turner, Fifth Ward. Accused pleaded guilty, and explained how she had simply "borrowed" the muff previous to going on a sleighing party to Lakefield. During the drive the muff was lost, and Lizzie was charged with theft. It was her first offence, but His Worship does not approve of the liberty servants take with their employers, and the costs of the court, together with the value of the muff, $23.40 in all, must be paid in a week or sentence will follow.

A driver for the Stevenson Coal Co. was charged with driving on the sidewalks contrary to law. He was allowed to go, and shortly after the good-natured face of Mr. J. Stevenson appeared and asked to be permitted to pay any fine imposed. His Worship saw a chance for a little fun and remarked, "You wish me to change the judgment then." "Yes," was the reply. "Very well, then," added the Magistrate. He has been discharged, but at your wish I shall change the verdict." Mr Stevenson reconsidered the matter, and let matters stand as they were.

ST. PAUL'S CHURCH SOCIAL

A Pleasant Social Evening Spent—Excellent Program Presented

A church social or perhaps it might be more properly termed a family gathering, was held in St. Paul's Presbyterian church last evening. Several musical and literary selections were rendered by popular local artists, and five minute addresses were delivered by prominent citizens. Miss Davies vocal selections were, as usual, well received, and Miss Moore received merited applause. Mr. Lawrence's efforts were appreciated, and Mr. Brown, elocutionist, also helped to make the evening a pleasant one. Among those who spoke were Rev. Wilson, the Mayor, Mr. Ross Cameron, and Mr. J. Coyle Brown. The social was simply a gathering of the members, in order to draw them closer together socially, and the general good feeling noticeable during the evening, is ample evidence of the harmony that exists throughout the congregation.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,
The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says. Dr Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up, so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room [illegible] Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

This paper is the only Morning Daily published between Toronto and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month and to outside points at $5 a year, strictly in advance.

PETERBOROUGH, FEBRUARY 17, 1904

RESTRICTING THE EXTENT OF THE WAR

No mediation for which the world has yet provided the mechanism, and no influence which any individual power has been in a position to exert, could have prevented the outbreak of war between Japan and Russia. When it comes, however, to intervention for the purpose of confining the war to the two belligerent powers, and for restricting the territory over which it is waged, there is good prospect of practical results. It is with this object in view, as well as for the preservation of China's territorial integrity, that U.S. Secretary Hay has addressed his note to the powers on the subject of Chinese neutrality.

Until last summer Russian influence was predominant at Pekin. Since then Japan has been in the ascendant. If China should take sides now it would surely be for Japan. But China's first hostilities might possibly bring France into the war as an ally of Russia. And France's appearance would at once bring in England, in accordance with treaty pledge.

If the neutral powers—the United States, Great Britain, Germany and France—can now establish Chinese neutrality, and can make both Japan and Russia understand that they are expected to keep off Chinese soil—except of course Manchuria—they will accomplish much for world peace and they will in addition make less complicated the negotiations which will take place when a treaty of peace comes to be arranged between victor and vanquished.

Outside of China the region which is most apt to produce trouble between the European powers as an incidental result of the war is Macedonia. With Russian reverses the sublime porte will surely become more reluctant than ever to push forward the prescribed reform programme. The Macedonians will see their opportunities for revolution utterly regardless of the effect on Europe. If Austria alone cannot accomplish what Austria and Russia have had poor success in attempting, the outlook will be very black. It may be expected that Germany, France and Great Britain will take vigorous steps to preserve peace in the Balkans, and it is of vast importance to the world that they succeed.

IMPROVED SUNDAY SCHOOLS

There are many evidences going to show that the desultory hit-or-miss methods of the old Sunday schools are going out and an improved order is coming in. There is a promise of trained teachers and a doing away with chance volunteers. Religious instruction is no less important than that of the day school, but hitherto there has been by no means the intelligent inspection given to the one that there has been to the other.

In a few Sunday schools in New York city teachers are now selected according to their ability and are paid for their services. There is no reason why the teacher should not be paid as well as the minister, the organist and the choir. It is true this would add considerably to the expenses of the church, but intelligent parents can hardly be expected to send their children to Sunday school merely from sense of duty, regardless of the character and quality of instruction the children may receive. The time will doubtless come when the Sunday school shall be as well equipped for its special purpose as the day school is, when it shall have modern devices for the better understanding of things and object lessons which make facts real instead of the vague, shadowy instruction that was almost wholly apart from matters of actual life. When that time does come there will be far more interest in the Sunday school than there is today. Parents will not need to be urged to send their children, nor will children need to be bribed to attend. The worth of the school will be apparent and its advantages will be appreciated as they cannot be under present circumstances.

EDITORIAL COMMENT

Bulletin—The rumor that the Japs have taken St. Petersburg is not yet confirmed.

• • •

European authorities put forth the statement that there is no such thing as etiquette in war. This disposes of the foolish idea that the Jap is required before operating to say to the Russian: "Excuse me, sir. I am very sorry to disturb you, but I am about to bump you with a torpedo."

• • •

Though Japan is the latest country to enter the circle of world powers, her emperor surpasses all sovereigns in the length of his pedigree, according to the London Chronicle. He is the 122d member in direct, unbroken descent of his family who sat on the throne of Japan. The founder of his house was in Japanese legend, a goddess of the sun, and contemporary with Nebuchadnezzar 666 years before the Christian era. On the other hand, the Romanoffs have been royal only since 1601, when they succeeded to the sovereignty of the then extinct house of Rurik. As for other European rulers, King Edward can go back to Cedric, 495 A.D. the Hapsburgs to 952 A.D., and the Hohenzollerns to the eighth century, but as kings only to 1701.

Hobbled Six Years

Cured in Six Weeks of Chronic Rheumatism By Ferrozone

Hundreds, aye thousands of cures have been put on the market for Rheumatism during the past few years, but a remedy with power to cure Chronic Rheumatism, Ferrozone excepted, in the estimation of Mr. Cullen, of Sturgeon Bay, does not exist.

Mr. Cullen says: "As everyone knows I have been simply tortured for years with Muscular Rheumatism, not the ordinary kind that bothers most people, but the kind that ties one up so that they can't move.

"For six years I hobbled about like a cripple, unable to move without crutches and canes. I used quantities of medicines, special baths and so forth, but they didn't help me very much.

"On the advice of a Presbyterian minister I used Ferrozone, gave it a good trial at first and when I saw it was helping, I bought six boxes and took one tablet at the close of each meal. I am perfectly cured and am today as spry as a youngster of ten. I am convinced that my recovery is entirely due to the marvellous action of Ferrozone."

Mr. Cullen's case is a fair example of the kind of cures that Ferrozone is effecting every day. In severe cases of Neuralgia, Sciatica, Rheumatism, and Lumbago, it acts with surprising alacrity, and no case is recorded where it failed.

Ferrozone cures these diseases because it is a solvent for uric acid in the blood. It removes all traces of it and other poisons from the blood in from two to ten days. Then it builds up and invigorates the system, and makes weak, sickly people strong and well enough to resist and ward off disease.

The best Rheumatism remedy that one can buy is Ferrozone. It relieves quickly and cures so perfectly that the disease never again returns. After all other remedies fail, it cures, and that is the sort of medicine you want. Ferrozone price 50c. per box, or three boxes for $1.25. Sent to you address by mail if price is forwarded to N. C. Polson & Co., Kingston, Ont.

JAPAN AND RUSSIA

One Is Despotic and Other an Absolute Monarchy

The Times is in receipt of an inquiry from an esteemed subscriber, asking for facts regarding Russia and Japan. We have great pleasure in supplying the desired information.

The Government of Japan is an absolute one, tempered by the advice of Cabinet ministers and the legislation of an Imperial Diet or Parliament, consisting of a House of Peers of 300 and a House of Representatives of [illegible]. The latter house is elected by the people by ballot. The franchise is very wide, extending to all Japanese subjects 25 years of age, and paying not less than $15 taxes per year.

The Russian Government is a pure despotism. There is no Parliament or Legislature, and no franchise or voting. The affairs of the empire are nominally administered by four large councils (council of state, council of justice, council of the church, and a committee of ministers) all of whose members are appointed by the Czar or his representatives.

Blame Alexieff

Chee Foo, February 12.—Russian officers who reached this port on the Colombia, strongly condemn Admiral Alexieff's lack of foresight. They pronounce him a drawing room commander and say that General Kuropatkin the veteran of Plevna and the organizer of the Skobeleff's expeditions, is the only man in Russia capable of offering successful resistance to the energetic daring of the well-armed Japanese. They further state that public indignation in St. Petersburg over the Port Arthur disaster is certain to be violent. Admiral Alexieff is nick-named the "Grand Duke's pet." The Russian officers admit that the losses already inflicted on the Russian fleet amount to a national disaster.

PULLING UP STAKES
IN PETERBOROUGH

No Matter When or Where You See a Bargain, There's a Better One For You At

GOUGH BROS.

GOOD-BYE SALE

The second week adds to the intense interest of this sale. Its an occasion that warrants unbridled enthusiasm. Nothing can stop its progress.

Do you know how we're fixed? $68,000 worth of Suits, Overcoats, Furs, Boots, Shoes, Hats, Caps and Furnishings, must be slashed to pieces to bring down the stock. Are you thinking? Can't you see what this means? Can't you see that we must sell at a heavy loss in order to pull up stakes in time to let in the new firm.

WILL ANYBODY KINDLY RISE IN THE MEETING and say that Gough Bros. ever was or ever will be undersold. The fears of competitors and the frantic efforts of their bosses, cut no figure with us. No cast-iron "transformation" sale bulletin of reduced prices can side-track GOUGH'S GOOD-BYE SALE. We stand by the town and will issue new lists of cut prices every week that must beat the best markings of any other dealer by 25 per cent.

If anybody offers to sell Men's Overcoats and Suits worth $10 for $6.98, down goes Gough's prices to $5.98.

If anybody offers to sell Boys' Suits and Overcoats worth $6.00 for $4.48, down goes Gough's prices to $3.48.

If anybody offers to sell $3.00 Trousers for $2.48, down goes Gough's prices to $1.98. And so on all through the gamut.

Don't you see the logic in our slashing—we're pulling up stakes in Peterborough—necessity knows no law;—the stock can't be moved or kept for another season.

Clune Gold Mine Stock Advances

An Extension of 15 Days at 5 Cents

Stock advances Jan. 15th from 5 cents to 10 cents per share. This company owns 6 claims, 600 x 1500 each. A 90 foot shaft on the Martha claim shows a vein of $30,83 ore 5 feet across, the vein is a true fissure vein. On the Maud claim a tunnel 100 feet in shows a rich body of ore. Ore assays from $20.83 to $19,000 per ton. With the property developed and mill running a 4 per cent. monthly dividend is expected. Even 1 per cent. per month on the par value is 240 per cent. on your money invested now, every $100 invested at 5 cents per share will pay them $240 in monthly dividends. The price of this stock will be $1.00 in less than one year.

This is the best investment we ever handled or saw. For prospectus and particulars address.

Letters from prominent people regarding the Bannie Mine

KROHN BROS, Cincinnati, O. Prescott, Ariz., 7-30-03.

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,

DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier.

D. LEVY & CO., (Inc.)
Wholesale and Retail Dealers in General Merchandise,

KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Prest.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-28-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis, and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 21, 1903.

Gentlemen— * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

BO. BLOCK.

BRITONS REJOICE OVER WAR NEWS

THEY ARE TO A MAN WITH JAPAN IN WAR

CREATES UNEASY FEELINGS

Great Danger Should Japan Meet with Any Serious Reverse

London, February 16 —Englishmen had the good sense to avoid all violent explosions, but it is nevertheless true that nothing, since Lord Roberts entry into Pretoria, has moved them, as last week's Japanese victories. They will not hear of Japanese treachery. Japan is right; Japan has war, and all Englishmen rejoice.

The British satisfaction, indeed, is more universal now than in Lord Roberts day of victory, for the so-called pro-Boers, who hung back then are foremost today in acclaiming the success of the power, whose fight is for commercial and political freedom. Moreover, the grevious wounds to British pride, suffered at the time of the South African war, make it some little consolation to Englishmen to find that Russia, for all her vaunted progress in arms, has also been caught napping, and, above all, caught napping by little Japan, whom Russia despised, but whom British statesman had the fore sight years ago to admit to the company of the great powers.

Nor can the British taxpayer in these days of almost unbearable naval expenditure feel quite disinterested at the destruction of the fleet of one of the two powers against whom his own stupendous and ever-growing naval votes have been directed.

Of course, there must come other feelings. The Spectator yesterday tried to anticipate the danger of a Japan domination by a rejuvenated China. The Spectator's general conclusion is that Russia's tremendous stake in the Far East compels her to go doggedly on to an ultimate victory, as Great Britain did in South Africa even if the fight costs five hundred million pounds and lasts five years.

CREATES UNEASY FEELING

It is this possibility which creates an uneasy feeling. The Saturday Review, which is under the directoral influence of Lord Hardwicke, Under Secretary for India, and may be assumed to speak with a certain authority, declares that it is imperative to muzzle the yellow press of England, though it discreetly refrained from saying how. Its argument runs briefly thus;— England cannot stand financially another great war. Even the panic which inevitably would follow its outbreak would work irreparable harm to British credit. A prolonged strain might mean a collapse. Hence John Bull, you must keep a cool head. You are no longer in "mafficking" trim.

18,000 MILES UNDER SEA

NEWS FROM THE SEAT OF WAR TRAVELS THIS DISTANCE

Route of the Cables and Wires—Across the Arabian Sea

London, Feb. 16—Word of the first shot fired in Far Eastern waters reached this country across 18,000 miles of ocean bed.

The tiny electric impetus put in motion by the key of the operator in far Nagasaki will instantly plunge under the eastern sea and come to land in China, near Shanghai, 476 miles away. Then that little throb will work southward round the China coast to Hong Kong, 945 miles. At Kong Kong (British) it will dive under the China sea to Saigon, in Anam (French), 951 miles; from Saigon it will cross the bed of the sea to Singapore (British) 628 miles. Or it might go by way of Labuan, Borneo (British) 1,971 miles.

Through the Malacca strait to Penang, 398 miles, and then a great plunge westward through the wild Nicobars and under the tropic sea of Bengal, 1,389 miles, to Madras. At Madras it will spring from the dark depths into the flaming Indian sunshine; on a thread of glinting wire it will span the Deccan, leap jungle and stream until it comes down to steaming Bombay.

ACROSS THE ARABIAN SEA.

Never resting, the brave little spark will take to the water again, traverse the broad Arabian sea to Aden, 1,850 miles, thread its way up the scorching Red Sea, flying ever westward, to Alexandria, 1,584 miles. And from Alexandria it will travel deep under the balmy Mediterranean to Malta, out to Lisbon, and so to London 3,205 miles. From London it will travel under the Atlantic to Canso and from there by wire to Montreal.

At Nagasaki the "taking off," point for the mainland, messages are transferred from the Japanese Govern Company, (Danish) and either cross to Shanghai or Vladivostock. From Vladivostock the Northern Company's line follows the railway track across frozen Siberia to Libau, on the Baltic. But few of the press messages will take that course although there is in existence a sort of promise by Russia that no messages will be interfered with.

At Shanghai begins the cable of the Eastern Extension Company, and the eastern cable takes up the thread at Bombay. From Bombay, also, the Indo-European line starts away and travels overland by Bushire and Teheran, Tiflis, Odessa and Warsaw, to Berlin, and so to England. The American Commercial Pacific cable goes to the Philippines and does not touch Japan. The possible routes for the direct transmission of news from Japan are, therefore, but two in number—the overland Russian route and the coast route, via India and the Mediterranean or India and Europe. In the event of war the bulk of the telegraphic work for the enlightment of the world in gener- would fall on the southern or coast route.

JAPAN UNITED TO A MAN

Japanese People Take Great Interest in the War

Montreal, Feb. 16 — A gentlemen lately returned from Japan, where he spent a number of years in business, stated to a Times representative that the public could form no estimate of the interest taken by the Japanese people as a whole in the war with Japan.

"You see," he said, "they have realised for a long time that it must come, and so have been straining every energy to prepare for the struggle. There is widespread interest everywhere in the politics of the nation, and you will find in the most out of the way parts of the country a grasp of the political situation, absolutely surprising. They display the greatest friendliness towards all Britishers, especially since the signing of the treaty between Japan and Great Britain.

"The very finest men of the country have been drafted into the navy, and in addition to dash, they possess the backbone to bear up if things should go against them.

Both army and navy are in a high degree of efficiency. Before the war they were constantly at target practice. I am not in the least surprised at their success.

"The war will have the effect of raising the price of tea, as rice, the stable article of diet in the country, will increase in price, and labor will consequently be higher.

JEWS WOULD AID JAPAN

Mass Meeting Will Offer Money For Us Against Russia

Minneapolis, Minn., Feb. 16— Members of the Hebrew Order of Friends of Zion have called a mass meeting for next Sunday night to pledge their moral support and financial aid to Japan in her struggle against Russia. It is announced that 'this meeting and others called in all parts of the country will afford the Jews practical means of redress for the Kishineff massacre and hundreds of years of oppression by Russia.

EVERYBODY READS THE TIMES.

Fort Arthur Which Japan May Besiege

is the most important Russian naval station in the East. It was leased by Russia—Japan and other powers say it was seized—in 1898, and since that time the port and docks have been reconstructed, until now it is one of the best fortified places in the world.

It was Port Arthur toward which all the energies and ambition of the Japanese were bent during the war of 1894, and their final capture of the place after a brilliant victory over the Chinese was made memorable by a shocking massacre of the inhabitants

The port has a large refitting basin, with a depth of 25 feet at low water. Spacious wharves and bays border this basin and are connected with the workshops by a railway. Two docks, one 400 feet in length and the other smaller are ready for the repair of all classes of vessels, from battleships to torpedo boats. The foundries and workshops are constructed on the most improved models, and contain the best modern machinery. The harbor is protected on both the land and the sea sides by artillery of the most approved pattern and the outer and inner harbors are sown with submarine mines.

The sides of the dock basin would berth a dozen ocean liners, and this dock in itself is almost a fortress. On one side stands, like a monument of the purpose of the place, a huge pair of shears a modern piece of machinery high enough to dismast or enmast any vessel afloat. One might run his craft under it and no matter how high, or how heavy, the masts be, the shears will take them out like a monster dentist of the sea. Electric power runs all the machinery.

The naval port itself is located on what is called the Regent's Sword, a promontory nearly opposite Wei-Hai-Wei, and commands the entrance to the Gulf of Pechili, the gateway to the Chinese capital.

Under Russian rule the town has been built up rapidly. There are many handsome residents in Port Arthur, and the presence of late years of high officers of both the army and navy has enlivened the place. Admiral Alexieff, the viceroy of the East, practically holds court in Port Arthur, and only recently a grand ball was given in which his daughter led the cotillion. So far as social matters are concerned, Port Arthur has in recent months tried to emulate Paris, Vienna and St. Petersburg.

[illegible]

THE DEATH KNELL OF LABOR UNIONS

POWERFUL EMPLOYERS' ASSOCIATION TO MEET NEXT WEEK

WITH BILLIONS OF CAPITAL

Over 500 Branches in Leading Cities and Towns in the United States and Canada

New York, Feb. 16—Employers of the nation are preparing an object lesson in organization for the labor unions that have compelled them to band together for self-protection. This object lesson will be afforded when the national convention of the recently formed Citizens Industrial Association of America opens at Indianapolis on Feb. 22.

The convention is called for the purpose of enabling employers of the country to declare against the exactions of the union, and to protest against legislation demanded by organized labor. It is to afford an opportunity for discussing the various phases of the industrial situation and their bearing upon the employers.

While the convention will serve this principal object, it is apparent that it will also serve to show to the unions that their exactions have aroused public sentiment to such an extent that organization for the purpose of opposing them has been comparatively easy. Statistics furnished by the new federation of employers show that its growth has been unparalleled in the history of organizations of its kind.

At the convention to be held in Indianapolis there will be represented associations that have as members who employ 1,500,000 of the workers of the country and who control $3,000,000,000 of its capital. From 350 to 500 various associations of employers will be represented at the convention by from 500 to 1,000 delegates. Every state in the union, Hawaii, Mexico and the Dominion of Canada will send delegates to the convention.

Practically the entire work of organizing the new association has been accomplished since October 30, of last year, when the convention at which it sprang into existence adjourned. Since that time nearly every important association of employers in the United States has joined the new federation and has declared for its principles, most important among which is the open shop.

New organizations have been formed at the rate of three and four a day. Many of these have been brought into existence without any assistance from the national association, while others have been organized by its agents.

When the convention meets fifty applications for assistance in the work of organization will be received from the employers of fifty cities In some of these cities the work of organization has already been partially carried out.

The convention will be in session only two days. On these days the employers will discuss, in addition to the affairs of their organization, legislation that they desire, and also legislation which has been proposed by the friends of the labor unions. The eight-hour law, the anticonspiracy and the anti-injunction bills will also be considered.

In view of the approach of the national campaign attention will be paid at the convention to the claims of political influence made by the labor unions. Frederick W. Job, secretary of the employers- association of this city, will bring the political phase of the labor situation to the attention of the convention.

Mr. Job is to deliver an address on the "Inefficiancy of the Labor Vote." He has prepared statistics, which will show that when labor candidates are in the field they do not secure any large percentage of the votes of union men. The defeat of labor candidates in Chicago, where the unions claim to be stronger than in any city of the country, except San Francisco, will be utilized by him as an argument to refute the claims of the unions leaders that they can make candidates before the people feel the effects of ignoring their demands.

KEEP UP THE FAIR PLAN

Japan Does Not Allow War to Effect St. Louis Fair

St. Louis, Mo., Feb. 16 —Nanjime Ota, Japanese commissioner to the Louisana purchase exposition today received a cablegram from Mr. Kiyoura, president of the Japanese commission, which announced that although peaceful relations between Japan and Russia were broken the war would make no difference with the exhibits of Japan at the world's fair.

Mr. Kiyoura is the minister of commerce and agriculture in Japan.

The engagement at Port Arthur is looked upon by J. Kansaki, acting commissioner as a Japanese victory in the light of the present reports. "It makes no difference whether victory or defeat," he said. "The Japanese will never give up. They will fight always to the end. We are a peculiar people, in that a victory encourages us much, while a defeat encourages us still more.'

Notes Sent to Teacher.

These notes are declared by the Chicago "Inter-Ocean" to be authentic:

Teacher—What shall I do mit Charley? Me and my man can't nothing make of him. When we want to lick der little imp he gets the bed under where we can't reach for him and must put a hook on her bedroom door to hold him for his licking. Please soak him in school about as often as you got time.

Teacher—If Louis is bad please lick him until his eyes are blue. He is very stubborn. He has a good deal of the mule in him. He takes after his father.

Teacher—I dink you are a fool. You want my boy to read when he don't no alferbite. Please teach him some.

Miss Brown—You must stop teach my Lizzie fiscal torture she needs yet reading and figers mit sums more as that, if I want her to do jumpin I can make her home.

FOREST MINING CO.'S
Storm King Group of Mines
TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.85 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $3.96 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, this, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $42.80 and $79.00 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite) and by driving this tunnel five or six hundred feet on the present course, that it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore, at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district,

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co., Fiscal Agents, Sumpter, Ore.

or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Ontario.

Equitable Gold Mining Co.

R. C. LANE, President, H. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thous and dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down seven hundred feet. From this shaft, running along the vein matter, east and west, are four drifts, at different levels, having a combined length (including the Rule winze and the tunnel) of 2,850 feet.

In addition to the above there are four small shafts, with a combined depth of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, upraises, etc.

All told, there is 4,650 feet of underground work—the most of which is in ore. Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and practical miners that there is developed an ore body of at least One Million Five Hundred Thousand Tons!

As a further evidence of the large amount of work done there is from 75,000 to 100,000 tons of ore on the dumps at the different surface openings—ore that, with modern cheapened processes, can be converted into gold bullion at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the United States government, while the title of the Kimbark is by location and possession.

The Equitable Company obtained the Flowery and North Bonanza mines, both of which are patented, by purchase—the payments therefore to be made out of a share of the net proceeds of the mines. The Company has a written contract, duly recorded, for a deed, and is in possession of the properties, and is now operating them. The sum of $2,000 was paid on the contract, September 30th, 1902; and partial payments have since been made. The Company is entitled to $6.25 per ton as cost of mining and milling. One-half of all over and above this $6.25 per ton goes to the former owners till they receive the total sum of $105,000, without interest. There is no stipulation as to amount of work to be done within any specified time—and no proceeds, no pay. The Company can therefore pay it in one year or it can pay it in ten years. With this exception the Company is free from debt. Its policy is to pay as it goes. In this way it has no fear of financial embarrassments. The title to the Kimbark is by "location," under the mining laws of the United States. Work enough has already been done to entitle the Company to a patent, which in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires for a distance of one mile for the transmission of electric power from the Truckee River Electric Power Plant. By this means unlimited power for mining, hoisting and milling is obtained.

It has built a dwelling house for the manager, a large boarding house for the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 365-tunnell; has purchased ore cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North Bonanza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 tons of ore—realizing therefrom about $10,000 worth of gold bullion. The out-put is constantly increasing and all the Company needs is more mill capacity to handle its ore.

THE PETERBOROUGH BROKERAGE CO.
FISCAL AGENTS!

APPEARANCE

Is such an important feature on the table It makes a heap of difference to the pleasure of the meal whether you have a good or a poor looking Sugar on the table

St. Lawrence Extra Granulated Sugar

is the whitest and best looking Sugar to be had, and besides, it has the advantage of being the best quality and greatest strength.

PROSPECTUS

OF THE

U.S. Gold Mining and Milling Company

Incorporated under the laws of the State of Nevada

——Capitalization 200,000 Shares——

Par Value, $1.00

Officers:

J. R. CHAPTON,	President
E. P. CHAPTON,	Vice-President
A. J. SANBORN,	Secretary
ALEX. J. CHAPTON,	Treasurer

Trustees

J. R. CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX. J. CHAPTON.

Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under the laws of the State of Nevada with a capital of $200,000, divided into 200,000 shares of the par value of $1 each, fully paid and forever non-assessable.

Every safeguard to the stockholders which the most eminent legal talent could suggest has been taken advantage of in the organization of this company, so that the private property of the stockholders can never become liable for the debts of the corporation, and that every stockholder may feel secure in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 shares have been issued in part payment for the mines. This left 120,000 shares in the treasury, 37,000 of which have been sold, leaving 83,000 shares in the treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at $1.00 per share. The sale of this 50,000 shares will place in the treasury sufficient funds to finish the construction of a 50-ton plant and leave several thousand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide plant as soon as treasury will permit from the sale of the 500,00 shares of the guaranteed stock.

When the above plant is finished, which we expect to accomplish before April 1st, 1904, and with ore now in sight sufficient to run our plant for many years, the holders of our stock can rest assured that they will have an investment as safe as United States bonds with an income on their investments that must necessarily be large on account of the high grade ores that are now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by ten years non interest bearing bond of the "Granite Securities Company," of Los Angeles, California, with twenty interest coupons attached thereto for the payment of the interest guaranteed by the U. S. GOLD MINING AND MILLING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained from Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and George Street, Peterborough, or to

OFFICERS AND DIRECTORS

HON. W. A. SIMMONS, PRESIDENT, Formerly Collector of Customs, Port of Boston, Mass.	NEW YORK
A. EDWARD ROEBER, VICE-PRESIDENT, With the John J. Mitchell Company.	NEW YORK
M. K. GOLD, SECRETARY AND TREASURER, Formerly with the Clark Syndicate Companies.	NEW YORK
HOWARD E. MARSH, CONSULTING ENGINEER, Marsh Manufacturing Company.	NEW YORK
FRED'K DALTON PARKER, LAWYER,	LOS ANGELES, CAL
GEORGE T. ORDWAY, COMMISSION BROKER,	CHICAGO, ILL.
EGBERT CHAMBERLAIN, Dry Placer Miner formerly of California.	NEW YORK

This company has the right, without royalty payments, to use the new patent machine upon all the land it may own, acquire by lease, or operate, in Arizona. We invite special attention to the great commercial value and profit of this machine, and what can be accomplished by it.

What This Machine Will Do.

For the first time in the history of gold mining a machine has been invented which will handle the dry placer gold gravel without water, and in large quantities. This machine will save 98 per cent of all the gold in the gravel, and will do it at a lower working cost than by any existing process. It is operated by a small, compact engine, using crude oil as fuel. A complete plant, capable of handling 300 tons per day will weigh less than 1,200 pounds.

To secure the gold only those placer lands could be worked, which could command large supplies of water, hence the immense bodies of dry placer lands remote from water have never been worked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in gold, of which fifteen hundred millions—or more than 75 per cent.—were the product of its placers.

Ninety per cent. of the world's total gold supply has been taken from placers by processes which have admittedly lost the bulk of the values.

Simplicity of Machine—Its Method of Operation

The machine is so extremely simple in construction and operation that any intending investor can operate it instantly. He can take a peck or more of sand, either ordinary house of sea sand, or such as is found in the placer lands of Arizona and California, put into this sand ten or a hundred pieces of gold as small as the point of a toothpick, and from that to the head of an ordinary pin, mix the sand and the gold thoroughly, turn them into the hopper or feed of the machine, and in a few seconds the machine will separate the gold from the gravel and recover from 98 to 100 per cent of the gold. It is an absolute, infallible, ocular demonstration of the merits of the machine. It has solved the problem of handling sand or gravel containing gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be easily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard publications that a laborer can shovel horizontally, 12 feet, vertically 6 feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at Sandy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost of 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards of gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

Anecdotal.

A Western Congressman was asked if he did not think President Roosevelt certain to be re-elected, barring any "big mistake" the candidate might make. "Yes," was the reply, "but let me tell you that the biggest mistake he possibly could make would be to allow the crops to fail next year."

A friend of Edward MacDowell attended a recital given by a mediocre teacher's pupils, and when he met the American composer he remarked: "I heard one of the pupils, a little girl of eight, play your 'To a Wild Rose.'" The composer sighed dejectedly. "I suppose," MacDowell remarked, "that she pulled it up by the roots."

During the protracted sessions of the Parnell commission, Justice Day habitually sat with closed eyes. It was commonly supposed that his lordship was sleeping, and the late Sir Frank Lockwood, observing that the learned judge was very much awakened by a little tiff between the president and Sir Charles Russell, exclaimed, quite audibly: "This is the dawn of Day!"

Chauncey M. Depew declares that when King Edward, as Prince of Wales, visited the United States, the old Duke of Newcastle used to scan the accounts of expenditure. At the end of one hotel bill he one day found a charge which he couldn't make out. "What's that charge for?" asked the Duke of the hotel proprietor. "For making such a damned fuss," was the immediate reply.

General Nelson A. Miles says that during the Civil War there was one conscription fakir who made thousands of dollars before the authorities restrained him. This rascal would send letters broadcast, wherein he said he would communicate for two dollars a sure means of escaping the conscription. Letters, enclosing two-dollar notes, poured in on him, and in reply to each letter he would send a printed slip reading: "Join the nearest volunteer regiment."

An old negro living in Carrollton was taken ill recently, and called in a physician of his race to prescribe for him. But the old man did not seem to be getting any better, and finally a white physician was called. Soon after arriving, Dr. S.—— felt the darkey's pulse for a moment, and then examined his tongue. "Did your other doctor take your temperature?" he asked. "I don't know, sah," he answered, feebly; "I hain't missed anything but my watch as yit, boss."

One of Pere Ollivier's flock, a very beautiful and handsomely dressed woman, coming very late to church one Sunday morning, caused some disturbance and stir among the worshippers by her entrance, and interrupted the flow of eloquence of the worthy father, who, very irritable and easily put out, said: "Madame perhaps waited to take her chocolate before coming to church?" To this, madame, by no means abashed, graciously replied: "Yes, mon pere; and two rolls with it."

It is related that the American commissioner of fine arts at a Paris exposition once wrote to several artists—to Whistler among them—saying that he would be in Paris shortly, and mentioning the time at which, and the place where he would like them to call upon him. Whistler was asked to call at four-thirty precisely. He wrote: "Dear Sir — I have received your letter announcing that you will be in Paris on the —th. I congratulate you. I have never been able and never shall be able to be anywhere at 'four-thirty precisely.' Yours most faithfully, J. McN. Whistler."

By his tact and amiability Sir Thomas Lipton has made thousands of friends during his visit in New York City. One day recently on the "Erin" he was watching the "Shamrock" from the bridge, and his guests, among whom were some pretty girls, were on the deck below, screened from the sun by awnings. Sir Thomas went down to chat with them for a few minutes, and then said: "I think I'll have the awning taken down." "Don't, Sir Thomas," the women all exclaimed in chorus, "we'll roast here." "But," tactfully replied the baronet, "I'm lonely on the bridge, and I miss your pretty faces." No one objected to the awning coming in after that.

Here is one of Lew Dockstader's latest stories: Two brothers had more or less trouble with the boy next door, and hadn't always come out victors. In fact, the boy next door was so much bigger that he seemed to have the best of it invariably. So it wasn't an unusual thing when one of the boys came into the house with a badly bruised eye. Moreover, he was crying when his aunt stopped him in the hall. "Hush, Willie," she said; "you mustn't make any noise." "What — what's the ma-matter?" he asked, between his sobs. "You may disturb your new brother," said his aunt, soothingly. He dried his eyes in a minute. "Have I got a new brother?" he asked. His aunt nodded. "One besides Jim?" She nodded again. "Bully!" he exclaimed. "You're glad of it?" she asked. "You bet!" Willie fairly shouted; "if Jim and me and the new one can't lick that feller next door, we'd better move."

A pretty story, illustrative of the change of feeling which has come over the Irish peasant toward King Edward since the recent royal visit, appears in the English press. Two London journalists, on their way from Dublin to Cork, accosted a shaggy, farmer-looking native at a Queen's County station with the words: "Well, Pat, what do you think of the King of England now?" "King of England, is it?" replied the Irishman, and there stole over his face an inimitable expression of drollery as he went on in a stage whisper: "Sure, avic, ye'll want a viceroy over there, I'm thinkin'. Himself an' herself are not goin' back to yez at all!" An old dame in Galway who had spoken with the King was questioned as to what she thought of his Majesty. She delivered herself of a long and enthusiastic eulogy, to the effect that "Edward the First of Ireland" was "a grand man entirely," closing with the remark that she had "only wan thrifling fault to find with him," and that was that "they keep the poor man so long in the Phaynix Park beyant that they have him talkin' with a strong Dublin accent."

Scribbler—I've got a winner this time, Friend—New historical novel? Scribbler—No; it's a book of excuses for borrowing money. They're all catalogued. Five for every day in the year.—Chicago "Daily News."

Larry—Phwat are yez doin' wid thim dog-biscuit, Pat?

Pat—Sure, the doctor said I needed more animal food.—Philadelphia "Record."

Privileged.

The Honorable Colonel William J. Bryan appears to believe that the constitutional provision regarding free speech was inserted for his especial benefit.

Fired.

"I understand Blankley was ejected from Jones's house, where he went to pay a visit."

"Yes, he was an old flame of Mrs. Jones, and Jones put him out."

Individualities.

Sir Frederick Treves, the famous English surgeon, who has just retired, established a record in performing one thousand consecutive operations for appendicitis without a death.

Great interest has been aroused in London by the announcement that the Marchese Karlo di Rudini, son of the former Italian Premier, is to marry Dora Labouchere, daughter of Henry Labouchere, the noted editor of "Truth."

During his lifetime Gordon McKay, the wealthy inventor of the machine that revolutionized shoemaking, who died at Newport lately, deeded all his property, valued at four millions of dollars, to Harvard University, retaining an income for life.

Mark Twain and his wife have leased the Villa Papiniano, which belonged originally to the sculptor Baccio Bandinelli, a contemporary and rival of Michael Angelo. The villa is pleasantly located about halfway between Florence and Tiesole, and connected with the modern town and the old Etruscan stronghold by a line of electric cars.

That much-quoted superstition, "three times a bridesmaid never a bride," seems to have no terrors for Alice Roosevelt, who has accepted an invitation to serve in this capacity at the approaching marriage of Miss Lilia McCauley and Mr. Wolcott Tuckerman, which will take place in Washington, D.C., November 25. Miss Roosevelt was a bridesmaid at the wedding of Miss Ruth Pruyn and Mr. David M. Goodrich, in Albany, last June, and also at the marriage of Miss Madeline Jackson to Mr. George C. Lee, jr., in Boston, several years ago.

Pope Pius has appointed Mgr. Merry del Val to be Papal secretary of state. It is reported that the nomination, however, will not be made officially until the next consistory, when the monsignor will also be made a cardinal. Mgr. Del Val is under forty years of age, and is descended from one of Spain's noblest families. His mother was an Englishwoman, and he was born in England, receiving his early education from the Jesuit fathers in Stonyhurst College. His higher education was received in the Academy of Nobles, in Rome, the institution of which he is president.

New York clubmen are going in for politics with a vengeance. It is evidently the intention of both Democratic and Republican parties to have representative men as aldermen. Eddie Crowninshield, who is a member of the Knickerbocker Club, one of the Rough Riders and a leading spirit in a great many social and other enterprises, is to run on the Tammany ticket for alderman in the "kid-glove" district. In the Republican camp, there is Beverley R. Robinson, son of Dr. Beverley Robinson, who is to be the candidate in the twenty-ninth aldermanic district, which comprises the territory on Fifth avenue, between Fifty-second and Fifty-fourth streets.

Helen Keller has just begun her senior year at Radcliffe. Her studies this year will consist of Professor Kittredge's Shakespearian course, Dr. Neilson's English literature, Professor Moore's course in Plautus, Cicero and Lucretius, and Professor Morgan and Dr. Rand's course in Latin, which covers the annals of Tacitus, the satires and epistles of Horace, and selections from Catullus. Up to the present time Miss Keller has passed with credit all her college examinations. When she has completed this year's work, as outlined, she will have accomplished more in the way of scholarship than any other person who has been handicapped with the loss of sight, hearing and speech.

When Eleanor Calhoun, the California actress, was married, a few months ago, to Lazarovitch, the Servian leader, she announced to her friends that she might some day return to the stage. She has now, however, abandoned all such ambitions, and has thrown herself enthusiastically into assisting her husband with his political writings and into looking after his three children. It will be remembered that Lazarovitch, according to his own statement, was approached by certain Servians prior to the massacre of King Alexander and Queen Draga, and asked to accept the throne as next in line of succession should the plot prosper. Lazarovitch, however, having no desire to rule the kingdom, not only refused to be a candidate, but left the country. It was then he came to London, met the California actress, and married her.

When the Duke of Devonshire and the present Duke of Manchester's grandfather were young they loved Louisa, daughter of the Count d'Alten of Hanover. Devonshire, then known as Lord Hartington, was a laggard in his love affairs, as he has been in everything else, and so the lady became Duchess of Manchester in 1852, and duchess she remained for forty years. But, though she married the other man, her devotion to Lord Hartington and his devotion to her were famous. She counseled him in all the important affairs of his public life, spurred him on, and was his nearest friend. Nobody thought of inviting one without the other. At last Manchester died, Hartington himself shortly afterward succeeded to a dukedom, and in 1892 the widow, still one of the beautiful women of England, became a bride and a duchess again.

Inexcusable Stupidity.

"I noticed," said the druggist to his assistant, "that a gentleman came in with a prescription, and that you took it and gave him the stuff in about three minutes. What do you mean by that? When a prescription for salt and water or peppermint and cough syrup is handed to you, you must look at it doubtfully, as if it were very hard to make up. Then you must bring it to me, and we will both read it and shake our heads. After that you go back to the customer and ask him if he wants it to-day. When he says he does, you answer that you'll make a special effort. A patient appreciates a prescription that there has been so much trouble over, and when he takes it he derives some benefit from it. But don't you do any more of that three-minute prescription business, my boy, if you want to become a first-class druggist."

A Small Favor.

Farmer (to lady)—Have you seen my bull? Lady—Mercy no! Where is he? Farmer—He got loose. And if you should see him, will you please keep on that there red coat and run this way?—"Life."

Counsel (to witness)—How can you prove that the prisoner stole six of your handkerchiefs? "Why, because they were my handkerchiefs that were found on him. Look at them for yourself. They are exactly the same as mine." "That proves nothing. I have some handkerchiefs like those." "That's quite possible," replied the witness, "several more of mine are missing."—Ex.

PROSPFCTUS

THE COLORADO AND CONNECTICUT GOLD MINING COMPANY

(Incorporated under the laws of South Dakota)

Main Office: MERIDEN, CONNECTICUT.

Capital $400.000 80,000 Shares at $5.00 each, full paid and non-assessable

OFFICERS

WILLIAM GARLICK, Wholesale and Retail Ice Dealer, Meriden, Conn., President.
JOHN A THOMPSON, Investment Securities, New York City, 1st Vice-President
GEORGE S WILCOX, Retired Manufacturer, Meriden, Conn., 2nd Vice-President.
B. F BARNES, Manufacturer, Meriden, Conn., Treasurer
WILLIAM O. CORVES, Miner, Meriden, Conn., Superintendent
ARTHUR S GARLICK, Meriden, Conn., Secretary

BOARD OF DIRECTORS

JOHN A THOMPSON, GEORGE S WILCOX, RICHARD F. DOSSIN
WILLIAM GARLICK, ARTHUR S. GARLICK, B F BARNES

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hindsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is 5x, [illegible] feet and in 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs) is as follows: Copper, 16.05 per cent.; Gold 0.02 ozs; Silver 92 40 ozs. Total value $9?.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper. $6 40; Gold, $6 82; Silver, $254 31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatsoever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5,500,000 (now claimed to be worth $15,000,000). About six years have elapsed since he purchased it The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN."

Mr. Edwin J, Hulbert, M E., formerly of Middletown, Conn,, who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

B. F. BARNES, Fiscal Agent

or ROLAND KIDD, Fiscal Agent, Peterborough and Toronto.

HIGH CLASS INVESTMENT

LA ZACUALPA RUBBER PLANTATION COMPANY

Incorporated Under the Laws of the State o California.

La Zacualpa Rubber Plantation is situated in the best location in Mexico for the cultivation of rubber. It has been known for a great many years as a very choice strip of rubber land and subsequent experience has shown that it is equal to all that has been claimed for it. The affairs of the company are in the hands of men of undoubted integrity and high reputation as successful men of business. To those seeking a safe investment which will secure a good income for life, this proposition offers a favorable opportunity

Shares in La Zacualpa Rubber Plantation are not capital stock of a corporation, and carry none of the responsibilities and obligations, or liability to assessment of capital stock, but represent an undivided interest in the plantation itself.

The twelve thousand acres comprising the plantation are divided into twelve thousand shares, each share representing one acre of land, and the holders of shares in La Zacualpa Rubber Plantation are the actual owners of one undivided acre of land, for each share held, with a guarantee expressed upon the certificate by La Zacualpa Rubber Plantation Company, under its official seal, to plant two hundred or more rubber trees per acre for each share sold, and to care for same for a period of five years, and at the expiration of that time to gather the first harvest and deliver the net proceeds thereof to the shareholder.

In other words, La Zacualpa Rubber Plantation Company sells to each shareholder one undivided acre of land in La Zacualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to its shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely certain to others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to

J. W. BUTLER, PRESIDENT,
713 Market St., San Francisco, C l.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placer in the ages past.

New Story of Pius X.

The following story of the Pope is told in the foreign papers. A deputation of the monks of some Order had obtained an interview with him. According to the etiquette of the Vatican, only Cardinals are allowed to sit in the Pope's presence, and an invitation from him to do so is deemed equivalent to the promise of a Cardinalate. Pope Pius X. is a plain man, utterly indifferent to the etiquette of the Papal Court. He, therefore, begged the monks to take seats. They hardly knew whether they could venture to do so, and whilst they stood hesitating he said to them, "You do not, I suppose, expect me to draw your chairs forward for you?"

Would that all other Sovereigns had strength of mind to put an end to the ceremonial tomfooleries of former ages that encircle them! devoutly exclaims "Truth" All the bowing and scraping, the kissing of hands, the retiring backward, and such like antics are out of date. I recognize the ditty of every citizen to treat his official head with respect, whatever be the title by which he is known. But all such tricks only befit a performing dog, and are out of place when the performers are human beings. Court uniforms, to my thinking, are equally absurd. What can be more ridiculous than some peaceful citizen, fat and scant of breath, masquerading as a deputy lieutenant in a military uniform, or some worthy father of a family in a velvet coat, knee-breeches, and ruffles? Yet so silly and so little sense of humor have these guys that I have seen many of them disporting themselves in clubs in this array, and I am credibly informed that they actually exhibit themselves to their admiring families, as proud of their appearance as a barn door cock is of his feathers.

A Despiser of Letters.

"Sigma" in his reminiscences in "Blackwood's Magazine" (by the way, can "Sigma" be Goldwin Smith?) says that excepting Justin McCarthy, he has met in his time only two individuals who knew Thackeray personally—"one of whom certainly deserves immortality, though unfortunately I am unable to record his name, having forgotten it in the march of time. I met this individual at dinner nearly thirty years ago, when in my first 'Thackeray' enthusiasm. He was a gray-headed, square-jawed 'diner-out,' apparently of about sixty eight or seventy, with an assertive nisi-prius manner, and one of those rasping voices that seem to dominate the dinner-table. After dinner, on the departure of an intervening lady, I found myself compelled to 'close-up' to this objectionable fellow-guest. As it happened, a minute or two previously I had heard him allude to the Charterhouse as his former public school. 'Why,' thought I, 'this old gentleman was most probably at the Charterhouse with Thackeray; suppose I break the ice by enquiring.' Accordingly, after an uncomfortable moment in which he seemed to be considering whether I was worth talking to or not, I timidly ventured to remark that I had heard him alluding to the Charterhouse, and wondered if by any chance he was there with Thackeray. 'Thackeray, sir; what Thackeray?' he answered with a contemptuous stare. 'I mean the great Thackeray,' I rejoined, rather astonished. 'What!' he rejoined; 'the fellow who wrote books? Oh yes, he was my fag, and a sniveling little beggar I thought him; often have I given him a sound kick for a false quantity in his Latin verses. I thought nothing of him, sir—nothing. I can assure you!' 'Ah, but,' I exclaimed, 'you have changed your opinion since, of course?' 'Not at all,' he growled, 'not at all; why should I?' 'Why, on account of his books,' I retorted fairly staggered. 'Never read a syllable of them. I give you my word!' he growled with magnificent complacency; then, turning his back with a gesture of infinite disdain, he proceeded to tackle his neighbor on the other side. When I told this to Mr. McCarthy, he felicitously observed, 'What wouldn't Thackeray have given to have known that man!'"

FEMININE OBSERVER.

IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA —AND— BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00. Par value $1.00. Full Paid and Non-Assessable

At 75 Cents per share

This company now owns the well-known Augusta mine and its extension for over 1000 feet in addition to other claims approximating a total acreage of 200 acres. This property has produced over $350,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office

Has immense bodies of these grades of ore, which cannot be exhausted in five years already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,600 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par value $1.00. Full Paid and Non-Assessable.

Selling at 75c a [illegible]

Like its sister Company is today giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 115 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 900 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*

C. L. ARZENO, General Manager. 603-604 Exchange Bldg., Denver, Colorado

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of mody companies selling stock at 50 cents a share, and will stand a thorough investigation.

SCAL AGENTS, 379-80-81 Wilcox Bldg., LOS ANGELES, CAL

The Peterborough Brokerage Co., Local Agents.

WANTED—GOOD AGENTS IN EVERY CITY.

You Take It Mixed With Air

A Powerful Destroyer of Disease Germs Which Cures Every Type of Catarrh Bronchitis and Throat Trouble.

Ever since Adam the air of the Pine woods has been known to possess marvellous healing properties. In fact doctors claim that people living in the balsamic atmosphere of the woods never contract consumption or catarrh.

A new remedy that embraces all the healing curative powers of the pine woods has at last been realized. It contains the balsams, the ozone and many other antiseptics that make it an absolute cure for all catarrhal diseases.

For years doctors have been looking for just such a remedy and claim the newly discovered Catarrhozone is the most effectual, the most scientific cure for catarrh, bronchitis and winter ills, they have ever met.

So powerfully healing is Catarrhozone that simple colds in the head and coughs can be cured in less than an hour. Chronic catarrh is erradicated from the system in the most thorough manner. It doesn't matter whether the catarrh affects the nose, throat or stomach, it can be completely driven from the system by using fragrant healing Catarrhozone.

The remotest parts of the lungs and air passages often contain germs of catarrh and consumption which cannot be reached by ordinary treatments. But the searching vapor of Catarrhozone carries its antiseptic healing power direct to those isolated spots. So thoroughly does Catarrhozone reach all diseased surfaces that it cures for all time, and no relapse need ever be feared.

"My nose was so stuffed up from catarrh that I could not breathe except through my mouth," writes John D. Perkins, a well known merchant in Hamburg. "My breath was horribly offensive and my digestion was completely knocked out. I used Catarrhozone and was cured in two weeks. I wouldn't take five thousand dollars for the benefit and good health I received from Catarrhozone which I can recommend as a certain, absolute cure for catarrh."

Two months treatment costs $1.00; sample size, 25c. At druggists or by mail from N. C. Polson & Co. Hartford Conn., U.S.A. and Kingston, Ont. Catarrhozone always cures—refuse a substitute, and insist on getting Catarrhozone when you ask for it.

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

Mr. R. B. Rogers will Speak

A lecture will be delivered in the Y.M.C.A. Hall on Saturday evening, by Mr. Rogers, the Superintending Engineer of the Trent Valley Canal. The subject will be "The Canadian Pulp Industry," and lantern views will be introduced. The general public is invited.

Sad News from Rochester

The sad news of the death of his mother reached Mr. Archie Moore yesterday. Mrs. Moore has been an invalid for a number of years, and resided with her two daughters, *Misses Fannie and Jennie, of Rochester*. She died in a Rochester hospital at the ripe age of 70, and the remains will be interred here. Mr. Moore's many friends extend their sympathy.

Lecturer Did Not Come

About four hundred had gathered in the local opera house last evening to hear Mr. E. S. Williamson lecture on "Pickwick." The hour for commencement drew nigh, when Ald. O-Connell mounted the platform and announced that the lecturer would be unable to get here in time, as the train was an hour late on leaving Toronto, and was still losing time.

BIRTHS

On Monday, Feb. 15th, wife of Mr. J. Reynolds, of a son.

—A number of our young folks, notwithstanding the inclement weather, journeyed to Lakefield last night to attend the Fancy Dress Carnival.

The attendance at the

Peterboro' Business College

is larger this year than ever

WHY?

Because we are keeping up with the growth of Peterborough, the "Electric City," which is fast becoming a leading manufacturing centre [illegible] Canada.

Over [illegible] of those graduating are placed in good positions in Peterborough. Attend school where you have such prospects.

NOW IS THE TIME TO ENTER

If you cannot attend our school write for particulars regarding our correspondence course

WM. PRINGLE,
Principal.

Overcrowded

The number of children without shelter at the Children's Home is greater than the home can accomodate. A number of little ones are on hand for adoption if foster parents can be obtained for them. The matron, Mrs. Henry, is always pleased to explain the conditions upon which children are allowed to be taken out of the Shelter.

Around the Fire Hall

A representative of the Fire Underwriters visited Peterborough yesterday, to investigate the recent fire at the American Cereal Company's works. He expressed surprise that the building was saved, remarking that it was a very rare case that a building of such dimensions should be saved. The excellence of the fire system alone averted such a catastrophe. The local brigade was highly complimented on its general proficiency.

Hot Pancakes

The St. Luke's mothers' meeting held in the school room last night, was their second annual sale of aprons and fancy articles. Many pretty little exhibits of fancy work were there, and those who purchased received their money's worth. An excellent literary and musical program was presented, and then came the pan-cakes. They were simply delicious, and lovers of this particular dish were most profuse in their praises of the St. Luke's mothers' cooking.

A Young Girl on "Men.

The following was handed The Times yesterday for publication. It is a young girl's composition on "Men," which shows that the seed of the women's club is sown in Peterborough: "Men are what women marry. They drink, and smoke, and swear and have ever so many pockets, but they won't go to church. Perhaps if they wore bonnets they would. They are more logical than women, and always more zoological. Both men and women have sprung from monkeys, but the women certainly sprung further than the men."

He Didn't Mean It

A young lady called at a departmental store on George street this morning, when the thermometer was registering low, and, of course, the genial clerk's first observation was concerning the weather. "Yes," said the young lady, "I believe if the old country people knew of our Canadian winter, there would be no more emigrants." The young man, of course, was of this opinion also, and thinking that his fair customer had suffered from the cold, remarked sympathetically, "Have you been long out." She blushed, and the obliging clerk saw his error.

That Toronto Fire

A practical joker is, at times, a menace to society. Their opinion of their own ability is stronger perhaps than that expressed by the parties on whom the joke is perpetuated. Early this morning a prominent figure around town, thought he would warm things up by circulating a report that a furious fire was raging in Toronto. Then as the yarn sped around he walked leisurely around with a broad smile, as he noted the various anxious queries. The Times called up Toronto early yesterday morning, and soon reported on their daily bulletin that the story was a farce.

The Trent Valley Canal

The Toronto Globe has the following: A formal request has been made to the Dominion Government by Mr. J. Alexr. Culverwell, of Peterborough, intimating that there is a general desire existing among the interested public for the necessity of having the Transportation Commission examine into the advisability of completing the construction of the Trent Valley Canal—largely a natural link in the transportation system of Canada—and if favorably decided upon, to take prompt action in the matter. General petitions will be forthcoming if required. This waterway will next summer have a completed navigation between Orillia, on Lake Couchiching, on the north, and Rice Lake on the south, some 160 miles, but the outlets north and south are still to be completed.

THE OLD PLEA

He "Didn't Know It Was Loaded."

The coffee drinker seldom realizes that coffee contains the drug Caffeine, a serious poison to the heart and nerves thereby causing many other forms of disease noticeably dyspepsia.

"I was a lover of coffee and used it for many years and did not realize the bad effects I was suffering from its use.

"At first I was troubled with indigestion but did not attribute the trouble to the use of coffee but thought it arose from other causes. With these attacks I had sick headaches, nausea and vomiting. Finally my stomach was in such a condition I could scarcely retain any food.

"I consulted a physician; was told all my troubles came from indigestion but was not informed what caused the indigestion, so I kept on with the coffee and kept on with the troubles too and my case continued to grow worse from year to year until it developed into chronic diarrhoea, nausea and severe attacks of vomiting so I could keep nothing on my stomach and became a mere shadow reduced from 159 to 128 pounds.

"A specialist informed me I had a very severe case of catarrh of the stomach which had got so bad he could do nothing for me and I became convinced that my days were numbered.

"Then I chanced to see an article setting forth the good qualities of Postum and explaining how coffee injures people so I concluded to give Postum a trial. I soon saw the good effects—my headaches were less frequent, nausea and vomiting only came on at long intervals, and I was soon a changed man, feeling much better.

"Then I thought I could stand coffee again, but as soon as I tried it my old troubles returned and I again turned to Postum. Would you believe it I did this three times before I had sense enough to quit coffee for good and keep on with the Postum; the result is I am now a well man with no more headaches, sick stomach, or vomiting, and have already gained back to 147 pounds." Name given by Postum Co., Battle Creek, Mich.

Look in each pkg. for the famous little book, "The Road to Wellville."

BREEZY LOCAL BREVITIES.

Gathered by The Times Reporters on Their Daily Rounds

—Today is the first day of the Lenten season.

—Mr. W. Laing, of Keene, fractured a bone in his leg by falling on the ice, on Monday evening.

—The funeral of the late Miss Lottie Cochrane will take place tomorrow afternoon at Millbrook.

—A meeting of St. John's choir was held in the Guild room last evening, and a goodly number were present.

—Prof. Dorenwend, of Toronto, will visit Peterborough tomorrow, and will stay at the Oriental.

—December was the coldest in 27 years, January the worst in 60 years, and February is likely to make it 100 years.

—A burning chimney on Sherbrooke street, called out the brigade yesterday morning, but no serious damage was done.

—A concert and tea was held at Auburn last night. A programme consisting of selections from the best local talent was rendered.

—There will be an auction sale of hardwood and bush land, at the Murto House this afternoon, commencing at 2 o'clock. Mr. John Haggart will act as auctioneer.

—The remains of the late Alexander Robertson, of Springville, who died at that place on Monday, will be interred in the Little Lake cemetery this afternoon at 1.30 o'clock.

Lindsay Post—Driver Moffatt, of the G.T.R. staff, town, is at present off duty, having scalded the under part of his right arm rather severely while repairing a steam pipe on his engine one day last week.

—Mr. Jas. Kendry has been reported as about to tender his resignation as manager of the Canada Woollen Mills. A latter report however denies the truth of the statement.

—It is stated that as a result of the severe weather, the G.T.R. has been compelled to throw up its hands and declare an embargo on all freight except live stock and perishable goods.

—To-day is Ash Wednesday and service will be held in St. John's at 11 a.m. This evening a course of lectures will commence, the general subject for which will be, "Present Day Calls to Churchmen."

—Mr. Percy Pearson, son of Mr. W. J. Pearson, the well-known Montreal horse buyer, is stopping at the White House, and during the next two weeks is prepared to purchase a consignment of fine, sound horses, at the highest market prices.

—A Peterborough county man weighed three cubic feet of snow taken from the roof of his stable, and the weight was 42 pounds. Taking this as a standard a cubic yard of snow would weigh 126 pounds. No wonder the roof of the Norwood rink has threatened to collapse.

—The oldest resident of Peterborough can scarcely remember anything to compare with the present winter this side of thirty years ago. And yet he is quite cheery over it, for he cites the old tradition that a heavy covering of snow is the forerunner of a proportionately heavy crop the following season, and he is looking for the heaviest crop on record next summer.

—Mr. Jos. Bell, who is about to open up business for himself, in Mr. Hawley's old stand, Hunter street, is busy decorating the interior of his store. He wishes to announce that he has purchased the entire stock of groceries and provisions from the above mentioned Mr. Hawley, and that a large and varied stock of vegetables from Cedar Park Gardens, will also be always kept on hand.

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mr. H. and Misses Bell, of Keene, were in town yesterday.

—Mrs. Kane, of New York, and Mr. Jackson, of Rochester, are the guests of Mrs. Pilling, Bolivar street.

—Miss Minnie McGee, of Parry Sound, is the guest of her aunt, Mrs. A. Garlick, Water street.

—The many friends of Mr. A. R. Kidd will be sorry to learn that he has suffered a slight relapse, and is again confined to his bed.

—Mr. G. W. Prescott, representing the Hudson Hebert Co., wholesale grocers, of Montreal, is in town, and will call on his Peterborough customers today.

—At the National;—J. Golden, Toronto; N. H. Barker, Midland; H. L. Carter, Toronto; C. F. Barker, Midland; D. N. Watson, Listowel; F. T. Mercer, Belleville; W. C. Perry, Belleville.

—At the Oriental;—D. D. Fletcher, Hamilton; W. H. Hawkins, Toronto; J. Greenburg, New York; B. McBurney, Toronto; F. W. Fraser, London; N. Duperow, E. Spragge, and J. J. Johnston, Toronto; W. Kitchen, Montreal; F. G. Soper and F. Northcote, Toronto; J. Rankin, Montreal; A. Carson, Toronto; A. Byron, Montreal; G. Stewart, Chicago; R. Gammell, Toronto; J. A. Vandervoort, Kingston; F. G. Soper, Jenner, R. Brownlee, and E. L. McLean, Toronto; J. Taylor, Montreal; C. H. Dodd, Chicago; R. G. Maggridge, Hamilton; J. G. Wallace, Montreal; H. Hudson, Toronto; A. H. Rogers, Toronto; E. Huff, Campbellford; T. W. Wood, Campbellford; G. W. Prescott, Toronto; E. Williamson, Toronto.

Can Anyone Beat It?

A Le Sueur, Miss., man met with an accident recently which shows the perils of cat hunting at 35 degrees below zero. The cat was on a framework supporting a water tank when the shot was fired. The bullet killed the cat and pierced the bottom of the tank, and in an instant the water, gushing out, surrounded Mr. Wilte with a complete shower bath, in a temperature of 35 degrees below zero. Instantly his overshoes froze to the stone foundation on which he was standing, and, stooping to unbuckle them, he was changed by the spray, freezing in the terrible cold as fast as it fell, into a helpless statue of ice, stiff and immovable as a stone. Only by his stooping posture, which kept his face free from the ice, was he saved from suffocation. Soon the flow of the water was stopped by the sediment in the tank flowing into the bullet hole, and a little son of Mr. Wilte, who had seen the whole affair, ran for assistance. It was necessary to loosen the unfortunate man's feet with chisels, and when he had been carried into the house by three strong men the ice had to be broken from him with clubs. He was badly frightened by the experience, but otherwise unharmed. The body of the cat was found frozen to his back. The last sentence shows the painstaking attention of the correspondent to the veracious details of his story.

To Make a Bride

Many a woman would make a beautiful bride but she is deterred from entering the married state because of ill-health.

$500 REWARD FOR WOMEN WHO CANNOT BE CURED.

The proprietors and makers of Dr. Pierce's Favorite Prescription now feel fully warranted in offering to pay $500 in legal money of the United States, for any case of Leucorrhea, Female Weakness, Prolapsus, or Falling of Womb which they cannot cure. All they ask is a fair and reasonable trial of their means of cure.

"If women would study the laws of health and use a little more common sense there would not be such a large number to-day suffering with the ills peculiar to our sex," writes Mrs. Sallie Martin (President Mutual Social Science Club), of 186 South Halstead Street, Chicago, Ill. "Then when medicine is needed if they would take the 'Favorite Prescription,' they would have a chance to get well. I used Dr. Pierce's Favorite Prescription three years ago and it cured me of female weakness of several years' standing, so I know what I am talking about when I praise it and always know what the result will be where it is used."

Dr. Pierce's Pleasant Pellets should be used with "Favorite Prescription" whenever a laxative is required.

$10—GRAND EXCURSION TO WASHINGTON AND RETURN—$10.

On February 26th the Lehigh Valley R.R. will run a special ten day excursion from Suspension Bridge to Washington and return for $10. Tickets good ten days. Stop over allowed at Philadelphia on return trip. Tickets good on all express trains, including "Black Diamond Express." For tickets, Guide to Washington, and further particulars, call on or address Robt. S. Lewis, Canadian Passenger Agent, 33 Yonge street, Toronto, Ont.

WILL THE WAR SPREAD? IS NOW BEING DEBATED

Danger in the Balkans Becoming More Acut Than Ever Before

INSURRECTION IN THE BALKANS NOW CERTAIN

This is Believed to be the Forerunner of a General World-Wide War Which Would Be Very Disastrous

Special to The Times.

Paris, Feb. 18. — The news from Macedonia is not at all assuring. It is an open secret that a rebellion of gigantic proportions is under way, in which Europe must take a hand.

The organ of the French foreign office views the outlook as most serious. It says;

"Now that one of the mandatories of the powers in adjusting the Balkan situation is incapacitated by having to attend to its own affairs, it is desirable that the collective powers recover their liberty of action and together use their own initiative."

It is admitted that should Russia sustain further reverse, Abdul Hamid would openly cast off all schemes directed at controlling his European provinces. The Macedonian committee has now ample funds. They have agents in London buying arms on a large scale. An Austrian firm has just secured a contract to carry 200 truck loads of guns, rifles and cartridges of French manufacture for the Bulgarian government, which has called out the reserves of three classes, giving as a reason the violence of the Turkish troops on the frontier.

Turkey has promptly made Russia's military necessities the occasion for repudiating the only operative port of the Russo-Austrian reform scheme for Macedonia. The Italian general Georgis, who was recently appointed to the command of the Turkish gendarmerie, has been practically superseded, the sultan making him only an inspector-general under Pustapha Pasha. As commander-in-chief of all three provinces in Macedonia, Mustapha is ready to assume the aggressive against Bulgaria the moment the annual sorties across the Macedonian frontier commence. The Bulgarians are not less eager to fight. They say that this is the best year within the memory of those living to free their countrymen across the border. Since the failure of the rising last spring they have been collecting war funds and armaments. Support for their cause from disinterested friends of freedom is now more cordial, since the situation precludes Russia from playing a masterful hand in the near East.

WAR WILL SPREAD

This, of course, is based on the assumption that the war will be confined to Russia and Japan. The consensus of European opinion on this point is that Japanese success will tend to reduce the danger of a further spread of the war. It would be absurd for France to go to Russia's assistance if the latter is unable to withstand Japan's assaults, even if Japan should drive her opponent from Manchuria. In the latter event indeed, it would be most probable that the powers would endeavor to arrange peace.

On the other hand, the contingency of a swift Japanese success in the far east is beginning to give rise to some apprehensions. Even Japanese sympathizers do not see an unmixed blessing in the wholesale defeat of Muscovite power. It would mean Japanese supremacy in China in all but technical sovereignty and the rapid development of the latent military power of the Chinese. A revival of the apprehension of the domination of the yellow races would follow. Europe, on the whole, therefore, hardly desiring the overwhelming success of either belligerent.

MAY FORCE AN EARLY PEACE.

Already there is talk that Japan will follow up her present advantage at such a terrific pace that Russia will seize upon the outbreak of hostilities in the Balkans and impending domestic uprising as an excuse to make early peace, with the intention to renew the struggle when she is really prepared, which at the present moment she certainly is not. Political circles scout the idea, saying that it would involve the confession that Russia is now only a third-rate power, whose vast bulk is scarcely a greater element of strength than that of China. Diplomatists argue that Russia must retrieve her reputation as a fighting force at any expense of men and treasure.

It is necessary, to have a full understanding of the great importance of Secretary Hay's proposals to the powers, to make clear the whole purpose of the Russian war party, which deceived and forced the czar into hostilities. It was and still is their purpose to conduct the campaign with the sole object of gaining Pekin before it is ended. The policy will be, at some point during the war, to incite and manoeuver China into some action which can be construed into a violation of neutrality. Then the troops will march on to Pekin and depend upon Germany and France to co-operate against any diplomatic efforts to displace them.

This secret purpose is so well understood in diplomatic circles that Secretary Hay's note was warmly welcomed in all except pro-Russian quarters. Mr. Hay's note is recognised as the most effective method of offsetting that conspiracy, and is one which Russia herself will have the greatest difficulty in finding plausible grounds for opposing. The impression prevails, however, that it will be impossible to prevent both Corea and Manchuria from becoming virtually the prize of the victor. Prompt and definite action by the powers at the present moment, should, however, suffice to prevent any further dismemberment of China.

FOR HUSBAND'S DEATH

Mrs. Cameron Hagersville Suing Mr. A. C. Douglas for $5,000 Damages

Hamilton, Feb. 18—Mrs. Mary Cameron, of Hagersville, has through Staunton & O'Heir, her solicitors, issued a writ against A. C. Douglas, a contractor, for $5,000 damages for the death of her husband. On Oct. 15 last John Cameron was working in an underground tunnel when a heavy piece of rock fell, injuring him so severely that he died on Oct. 25. His widow claims that his employer, Mr. Douglas, or his servants, were negligent, and for that reason is asking for heavy damages. The writ was issued here yesterday morning.

STORM ON LAKE BAIKAL

Transportation of Russian Troops Seriously Delayed

London, Feb. 18—A dispatch to the Daily Telegraph from St. Petersburg states that a message from Missovia says that one of the dreaded storms which are the terror of Lake Baikal, has broken out. This is most unfortunate, as the ice on the lake, over which the rails are being laid, is splitting. It has broken for several versts from Tanhoi, leaving open gaps several yards wide. These will have to be filled in with blocks of ice. The shortage of wood for sleepers delays the completion of the work.

Cleveland's Baking Powder adds to the value of food in which it is used. It makes it more appetizing, palatable and nutritious.

RUSSIANS LASHED INTO A FURY

Populace Now Resembles a Wounded Bear

PATRIOTIC DEMONSTRATION

St. Petersburg Going Wild Over the War With Japan

St. Petersburg, Feb. 18—For the first time since the beginning of hostilities in the far east, the government last night gave the Russian newspapers permission to publish the accounts received abroad of the naval engagement off Chemulpo, in which the warships Variag and Korietz were destroyed. The war fever which has been aroused here, and apparently all over the Empire, or at least, all over European Russia, in a single week is truly remarkable. Such patriotic demonstrations as have been witnessed in St. Petersburg since hostilities began have been all the more astonishing, because of the public indifference during the period of negotiations, and almost up to the hour when Japan struck the first blow at Port Arthur. But now, like a flash, the whole empire seems to have been lashed into fury be defeat and, like a bear when it is wounded and angered, is prepared to fight to the bitter end. The dreamy Russian character has been stirred to depths of resentment which it will be difficult to understand abroad.

PATRIOTIC DEMONSTRATIONS

The patriotic demonstrations here have been also entirely spontaneous. Some of them were extraordinary in character. Yesterday the school boys and students of the city, numbering thousands, marched bareheaded for for hours up and down the Nevsky Prospect, bearing flags, shouting and singing patriotic airs. They were followed by an enormous crowd. Like previous processions, this one went first to the Anichkoff palace, where the dowager empress, who is very popular with the people, showed herself. Later the boys and students surrounded the Winter Palace, and in response to their enthusiastic cheers, the Czar and the Czarina made their appearance. When the Czarina blew kisses to to the boys, a vast shout went up which waked the echoes across the Neva.

At the French embassy, which was next visited by the procession Madam Bompard was compelled, in the absence of the ambassador, to appear at a balcony and acknowledge the cheers for Russia's ally. In front of the barracks the various regimental bands in the city played the National Anthem to the hurrahing of the crowds.

There were demonstrations at night outside the theaters, and the performances going on inside were stopped while the orchestras came out to the street to play the folksongs of the soldiers. The fact that the poorhouse porters pay their last cent for the extra editions of the newspapers, and that the cab drivers do not charge military men for carrying them around shows the deep feeling of the people.

Telegrams from almost every town in European Russia tell the same story of popular demonstrations. At Moscow there were great manifestations in front of the palace of Grand Duke Serge, and before the Iberian chapel, where stands the sacred image of Our Lady of Iberia, before which the Czar invokes blessings when he goes to Moscow. Thousands of persons knelt for hours in the snow in front of the chapel, praying for victory.

AROUND THE FIRE HALL

Chief Rutherford Expresses Himself— Some Good Suggestions

The Times spent a pleasant half hour with the genial chief of the town fire brigade yesterday, and during the conversation the latter expressed himself as favorable to an improvement of the present system. In regard to improved fire alarms and appliances, the chief claimed "what we want here is the Gamwell system." After a brief explanation he went on,—"We want a large bell striker and also about 15 boxes covering the whole corporation of the town of Peterborough. Every box should be connected with an electric gong on the large bell, and the result would be that every fireman would then know the exact location of any fire, as soon as the large bell rang.

"As regards the present fire station, it is too small to hold the requirements of a fire brigade for any town of this size. A new fire station should be built with accommodation for three teams, as the present premises are so small. No fault is to be found of course with our volunteer system, as it has proven itself to be one of the best in Canada, but these improvements must be made in the near future," concluded the Chief as we shook hands.

FEARS A GENERAL WAR

DR. TOYOKICHI IYENAGA SAYS HAY'S PROPOSAL SHOULD BE ACCEPTED

Japan He Declares Is Not After the Capture of Port Arthur At Present

Chicago, Feb. 17—Prediction that a world-war, in which the United States would be involved, was an almost certain outgrowth of the conflict between Russia and Japan, was made yesterday by Dr. Toyokichi Iyenaga, formerly a secretary in the foreign department of the Japanese government, and at present a lecturer upon the political problems of the Orient. He said;

"I have always maintained that the United States and England should join with Japan in settling the eastern question in the interests of civilization. The United States has already taken a strong stand in the affair, and has done just what Japan wanted.

MAY FORCE TO ACTION.

"If the proposal which has been made by the United States is not accepted by Russia, it is probable that she—and in the end each of the great powers—will be forced to take up arms in the Orient.

"The real significance of Japan's naval campaign has not yet been pointed out in the press of this country. Japan has not been trying to capture Port Arthur, but only to bottle up the Russian fleet in the Port Arthur harbor, so that troops can be poured into Corea and Manchuria, without molestation from Russian ships.

JAPANESE WELL POSTED.

"The Japanese generals and soldiers know every inch of the ground in these two countries and perfect maps of the district which is destined to be the theatre of war are in possession of the Japanese war department."

Toyokichi Iyenaga has just completed a series of lectures at the university of Chicago and will soon leave this city for Brooklyn, where he will lecture upon the eastern problem before the Institute of Arts and Sciences.

London, Feb. 18—A telegram received in Lodnon yesterday afternoon reports that the Russians bombarded the town of Fukuyama, at the southwestern extremity of the Island of Yezo. The vessels which did the bombarding are supposed to have been the cruisers that have been sunk by Japanese torpedoes in Tsurga straits.

The Straits of Tsurga are between the Island of Hokkaido, the northern of the three Japanese islands, and Nippon, the central island.

WEATHER NOTES

Thursday: Rising temperature. westerly winds, snow before night.

THE JAPANESE BEGIN A FORMIDABLE MOVEMENT A VAST ARMY IS READY TO INVADE MANCHURIA

Very Laige Force Going on Transports--Their Destination is Kept Secret--About Sixty Thousand Are Being Landed at Wonson, on the East Coast of Korea

The Blow Is Irreparable

Pekin, Feb. 117—The universal opinion here is that Russia's position is almost hopeless. The events of the last ten days are regarded as having given Russian prestige a blow that is almost irreparable. It is believed that Russia will have to submit to the indignity of seeking a pacific issue from the present troubles. Japan seems to be mistress of the sea in every quarter which can be regarded as critical or important.

Tokio, Feb. 17—Admiral Togo is the popular idol of the hour. The people are delighted at his great victory and are parading the streets of Tokio and shouting his name with enthusiasm. The victor of Chemulpo also comes in for a share of the applause, but Admiral Togo is undoubtedly the first favorite. Up to today Japan successfully landed from 75,000 to 150,000 of her troops in various parts of Corea. Japan's victories have not unduly elated either the civil or military leaders. They have full confidence in the ultimate issue, but regard the work still in hand as serious beyond all power of exaggeration.

JAPS ILL-TREATED AT PORT ARTHUR

Brutal Conduct of Russiars at Manchuria

MANY SEVERLY BEATEN

Women and Children Abused by Russian Officers and Mob

New Chwang, Feb. 18—About fifty Japanese men on their way to Tientsin were arrested at Tai Hsh Chou on Feb. 12, with their women, and arrived here in custody. The American consul, Henry B. Miller, procured the release of the women, but Viceroy Alexieff ordered their re-arrest and transportation, together with all the Japanese in Manchuria, to Port Arthur. Mr. Miller based his action on assurances the Russians gave the Japanese consul that all Japanese subjects would be protected and permitted to leave when they desired. There are numerous Japanese complaints of Russian ill-treatment. It is said 400 Japanese refugees from Harbin, who arrived at Mukden, were arrested, and many of them were severely beaten and detained until they purchased their release. When they were liberated the Japanese were sent in open trucks, to Tai Hih Chou, where they were again maltreated and sent on to Port Arthur. Some of their women were sent to New Chwang. Consul Miller took the women under his protection and sent them to Shan Hai Kwan. Mr. Miller protested to the civil administrator against the cruel treatment of the Japanese refugees by Russian soldiers and requests a census of all Japanese transported to Port Arthur.

The consul himself was menaced by a Cossack without provocation, and the officer commanding at New Chwang pressed his regrets and promised to severely punish the Cossack. The civil administrator promised to afford better protection to the refugees.

Independent officers say the Czarevitch, Retvizan, Pallada and Novik, damaged in the first naval battle off Port Arthur, cannot be repaired in time to decide the command of the sea. They also say the Russian land forces are demoralised. They are trying to watch the entire coast. The constant telegraphic interruptions threaten to complete the isolation of the war zone, except by dispatch boats. Admiral Alexieff has forbidden all ships to enter any of the ports of the Liao Tung peninsula. It is understood that his object is to carry out the defenses of the harbors which hitherto have been neglected. Foreigners are not permitted to move without military permits. The foreigners at Mukden, apprehending a Chinese outbreak, were sending missionaries with families away. There are about 2,000 Chinese now at New Chwang.

Local Sports

The T.A.S. and Bobcaygeon are not likely to come together till about Tuesday of next week.

Geo. Kennedy, accompanied by his manager, will arrive here on Saturday, and will complete training here for his match with Wiley on Tuesday night. Mr. G. N. Graham, the stakeholder, has received the forfeit money.

The Toronto office staff will play the Works Department of the C.G.E. Saturday.

What promises to be a most interesting game of hockey will be played on the Brock street rink, Saturday evening, between the Toronto office staff of the C.G.E. and the Works Department of this place. The Toronto boys have been practising hard all winter, and some fine players are among their number, so that we may expect a warm time. The Works will play the following; Goal, Fitzpatrick; point, Ford; cover point Crowley; forwards, Whitcroft, (captain), Renton, Lee, McGrath.

A local sport is discussing the day evening, etebween the Toronto ing, made bold to say that he considered the game was sold. Any onlook could easily see that such was not the case. Perhaps this critic was a heavy loser.

Nowood has dropped out now, leaving the Warkworth team in the lead. The latter will play the winners of the T.A.S. vs. Bobcaygeon match for the championship of the three districts.

The C.D.A. will play the Echo Camp hockey club this evening.

Another match will be played at the Brock street rink between 10 and 11 o'clock this evening, when the Davis-Thompson's team will battle with the Cressman seven.

The game of hockey played at Charlotte street rink Monday night was certainly not a Keene one.

Sutcliffe & Son's hockeyists will meet the Richard Hall & Son's aggregation this evening.

The protest against "Reddy" McMillan, of Belleville, came up at the O.H.A. Executive meeting Monday night, and was thrown out. It was decided that "Red" had not violated the "residence" rule.

Andy Gorman, Philadelphia boxer, who was to have met Jack Mason, of Montreal, sent a message through his manager to the effect that illness will prevent his meeting Mason here next Tuesday.

NEUTRAL SHIPS RELEASED AT LAST

Russian Authorities at Port Arthur Forced to Act

ARE SEIZING SUPPLIES

The War is Likely to Involve Other Nations

Yingkow, February 18. — The administrative authorities at Port Arthur have formally notified the American and British consuls of the release of the neutral ships which had been seized. Both consuls had asked for explanations. The civil administration at Port Arthur has intimated that Viceroy Alexieff will not recognise the consuls in matters relating to Port Arthur and Manchuria.

In answer to the demand of the British government for an explanation of why British ships were held up by the Russians at Port Arthur, Viceroy Alexieff replied that the vessels were detained because they had Japanese on board. The shots fired on the British steamer Fu Ping by the Russian guardship at Port Arthur as the Fu Ping was leaving that port last Tuesday were, the viceroy says, due to a misunderstanding on the part of the officers of the guardship.

The Russians are seizing supplies at New Chwang and the Chinese are alarmed and are closing their shops and placing their possessions under foreign protection. The Russian residents of New Chwang, fearing that the army will be unable to protect them and their property, are depositing their treasure under the jurisdiction of foreign flags. The Russians freely admit that their unpreparedness of the Japanese attack to have been a terrible blunder. Only half the ships were in line of battle and their officers were ashore celebrating the anniversary of Viceroy Alexieff's birthday. A stirring episode was the re-entrance into the harbor of the warships Czarevitch and Novik, after the fight. They came under their own steam, with bands playing and men cheering. Throughout the afternoon and night of Feb. 9 wounded men were being removed to the shore.

Russian Warships Torpedoed, The Attack was Made in a Blinding Snowstorm At Port Arthur

Special to THE TIMES.

London, Feb. 17.—A despatch to the St. James Gazette, from Kobe, Japan, in reporting the Japanese naval attack on Port Arthur, February 14, says the Russian guardship in the harbor and another Russian warship lying outside the harbor were torpedoed, and that the Japanese retired without sustaining any injury.

Paris, Feb. 17.—An official despatch received here this morning from Tokio announces that one of the most important movements of Japanese troops yet made is occurring today. One of the main branches of the army, consisting of three divisions and including a division of guards, is now going on board transports. The previous landings of Japanese forces in Korea and elsewhere are said here to have been small compared with this simultaneous sailing of three divisions, aggregating approximately an army of 30,000 to 50,000 men. The Japanese authorities, it is added, had taken every precaution to prevent information from going out concerning the embarkation and the destination of this army.

It is believed, but this is not sure, that the destination of this force is a point near the mouth of the Talu River, or a spot on the Liao Tung Peninsula, flanking Port Arthur.

Port Arthur, Feb 17.—The reports that the Japanese have concentrated about 60,000 troops at Wonson (on the coast of Korea) with the ob-object of entering manchuria, are confirmed.

WILL RETURN TO TOWN

Mr. Jas. Kendry Resigns Management of Canada Woolen Mills

Toronto Star; An important change will soon take place in one of the largest industries of the Dominion when James Kendry, M.P., will resign the management of the Canada Woolen Mills Company and return to the management of the Auburn Woolen Mills, Peterborough, in which he is interested. The facts of the change in the head of the Woolen Mills Company were given to The Star this morning by one of the heads of the company.

When Mr. Kendry left Peterborough to take charge of the Canada Woolen Mills properties, he appointed a manager to take his place as manager of the Auburn Mills, being the largest shareholder in the mills. The directoirs of the Peterborough mill have not been satisfied with the results since Mr. Kendry left, and they have insisted upon his giving his whole attention to the Auburn mill. Mr. Kendry will remain with the Canada Woolen Mills Company as manager until the new head takes charge.

He will remain long enough to post his successor who will be Mr. Charles Moore, for many years a successful wool manager, and for the past four years in charge of the Excelsior Mills at Montreal. Mr. Moore will take charge of the mills on Monday, the 22nd of February. He is a young man, just about forty, but he commenced as a lad of twelve, working his way up the ladder till he has reached the top. The financial headquarters of the Canada Woolen Mills Company is in Hespeler, and Mr. Moore will take up his residence there.

ONLY 75 TONS OF COAL IN PETERBOROUGH.

Mayor Telegraphs C.P.R. to Rush All Consignments for This Town

Wood Selling at Eight and Nine Dollars a Cord—Owing to Condition of Roads None is Coming In

The coal famine in Peterborough is daily assuming a more serious aspect, and yesterday the Mayor sent the dollowing dispatch to Mr. W. B. Bullen, General Traffic Manager of the C.P.R., as follows;

"Hard coal famine in Peterborough. Please have all coal consigned to Peterborough, on your road, rushed."

A prominent coal merchant informed The Times that, at present, there is not more than 50 or 75 tons of coal in stock among all the dealers. So great has been the scarcity, that one city merchant has been supplying about 130 customers with one or two bags at a time. The roads are so blocked that the farmers find it impossible to haul in their produce, and, in consequence, wood is almost as scarce as coal. Among the dealers it is selling as high as eight and nine dollars a cord. The McClellan Coal Company have 16 cars of coal snowbound at various points along the line, between Niagara Falls and Peterborough. Some of this has been on the road for over a month and part of it crossed the Suspension Bridge as far back as Jan. 19th. It is to be hoped the consignments will arrive, before the town supply is completely exhausted.

—Service was held in St. John's church yesterday morning and evening.

It Is Feared That the British Steamer, Hsi Ting Has Been Sunk or Captured

Special to THE TIMES.

Copenhagen, Feb. 17.—A dispatch has been received here from Wisty Island of Gothland, saying that six Russian warships passed the Island Feb. 15, going south.

Special to THE TIMES.

Tien Tsin, Feb. 17.—The Russians explained that the wholesale arrest of Japanese at Harbin and elsewhere aws due to the discovery that Japan has upwards of 100 spies, of whom 60 belong to the Japanese staff. It is feared that the British steamer Hsi Ting, bound from Chin Wang Tao for Shang Hai with passengers and bullion, has been captured. She is five days overdue, and was last seen in Port Arthur roads.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,

The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured, prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply Dr. S. Goldberg, 208 Woodward Ave., Room [illegible] Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month and to outside points at $5 per year, strictly in advance.

PETERBOROUGH, FEBRUARY 18, 1904

STRIKING THE FIRST BLOW

For months past in her diplomatic intercourse with Japan the evident intention of Russia has been to tease exasperate and insult Japan into declaring war and striking the first blow.

The main reason, perhaps, for adopting this policy has been that the czar of Russia, since the Hague conference has prided himself on being the leading champion and exponent of peace principles in all the world. His government, ever since the days of Peter the Great, has been, to be sure, a system, of territorial aggrandizement, conducted always in the spirit of autocratic despotism and by means of numerous bloody and inexcusable wars. This, however, is the identical reason why the czar wishes now to shine as the "czar of peace," but to pursue at the same time, the course of robbery and bloodshed for which his ancestors have been notorious.

Accordingly the programme in the present case has been to persevere in the encroachments on China and to treat Japan with contempt. The plan was to travel round and round in a diplomatic circle that would confuse the Japanese mind and consume time and when Russian preparations were complete make no reply whatever to the Japanese notes until Japan should be stung by the insult, declare war and fire the first gun. Then the czar would conduct another bloody war without discrediting himself as the "czar of peace."

The plan worked smoothly until Monday of last week, when the Japanese struck the first blow by sending out a few torpedo vessels and wrecked three of the finest vessels in the Russian navy without receiving so much as a scratch themselves. This was the purport of Alexieff's dispatch, which was handed to the czar immediately after he had returned from Moscow, where he had been praying for the destruction of the Japanese fleets. The dispatch might have been appropriately headed, "Pride goeth before a fall."

Russia will receive little sympathy in any part of the civilized world under the staggering and humiliating "first blow." In the eviction of Russia from Manchuria every country on the globe is interested more or less, but with Japan it is a question of life and death. For Russia to remain in Manchuria means the absorption of Corea and the fall of Corea means the subjugation of Japan.

MARRIAGE IS THE CAUSE

All over the land there is a dearth of schoolmistresses. Even in the east where women are superabundant and the schoolmaam was always noted for her staying qualities, there is now a cry for more teachers. School agencies say that never before were so few well-trained women instructors obtainable. All give marriage as the cause.

Time was when the schoolmistress was a drug on the matrimonal market. A woman put off as far as possible the evil day of entering the schoolroom, knowing that it meant for her a lonely life with no hopes of marriage. "Old maid schoolteacher" was the offensive phrase which labeled her social status. All that is now changed and the schoolmistress is having her own way. Her college education, her vacation trips abroad, her leadership in clubs have made her a most delightful companion. Fitted for any social station. She has free scope for the development of her talents and is using her opportunities to advantage.

Men have been quick to see the change and have learned that now the schoolmistress is the most companionable and efficient of women. She is skilled in household arts and in kindergartening as well as in the ancient and modern languages. She understands how to keep the home sanitary and how to make the purse serve the best interests of the entire family. What wonder, then, that boards of education and school superintendents are at their wits ends to secure teachers willing to sign a contract containing an anti-marriage clause covering a specified period. They will soon have to be thankful if they can get them on any terms which the women themselves are pleased to make, for just now the way to the schoolhouse seems to be on the direct road to matrimony.

SCIENCE AND PNEUMONIA

Has modern medical science no word of hope with respect to the pneumonia plague?

We have been told during the last ten years that bacteriology afforded the reasonable expectation that all diseases due to pathogenic germs, would eventually be conquered, or, at least, reduced to a minimum of mortality. We have been assured that the isolation of any germs was substantial assurance of the production of an antitoxin which would render that micro-organism innocuous.

Yet these assurances have proved distinctly disappointing with respect to many germ diseases and entirely empty as to pneumonia. The pneumococcus has been differentiated for many reasons. If it be true true that micro-organism produces pneumonia, instead of pneumonia producing the pneumococcus—a question by no means settled—then the production of an antitoxin with which to combat pneumonia ought to have been announced long ago—that is, if the theories of bacteriologists are correct.

In point of fact, however, there is no such therapeutic agent, and pneumonia instead of diminishing in virulence and mortality, has now overtaken and passed pulmonary tuberculosis in the race for mortuary effectiveness. In the cities, at all events, more people are now dying from pneumonia than from consumption.

Medical science stands helpless despite all the boasted triumphs of bacteriology. The circumstance justifies a suspicion that the triumphs may be more apparent than real after all.

THE ILLS OF WOMEN

A RELIABLE AND SAFE CURE FOR WOMANLY ILLS IS FOUND IN FARROZONE. A REMEDY THAT ALWAYS GIVES SATISFACTION AND NEVER DISAPPOINTS

If troubled with painful irregularities, dizziness, faintness, exhaustibility, nervousness, remember there is a remedy that if regularly and persistently used, will cure all these ills. Its name is Ferrozone.

It is used by thousands of women who have experienced its great strengthening powers, and they would not be without it for ten times its price.

Ferrozone is primarily a blood maker. It drives all impurities from the crimson fluid, makes it strong and capable of supplying nourishment to the body. It quiets the nerves, banishes excitability and headache.

By taking Ferrozone regularly you can keep free from those dreadful backaches, and monthly sickness will pass off regularly and without pain or distress. Being prepared in tablet form, Ferrozone is both convenient and simple to use, and no uncertainty as to the proper quantity or dose can ever arise.

A Montreal hospital nurse who has used Ferrozone herself, and has seen also the benefit that other suffering women have derived from it, writes: "I have nursed and treated all form of female disorders, and from my personal experience, must say that Ferrozone is a remedy about which all womankind should know. It is reliable and sure, and will give prompt and satisfactory results. As a builder of muscle and tissue, I know nothing to equal Ferrozone. I have found it good to build up a weak appetite, and consider it a splendid medicine for the blood and nerves. I have no hesitancy in endorsing Ferrozone."

Don't continue to exist in a state of misery and weakness any longer. Ferrozone will make you strong and well just as it has done for thousands before you. All druggists recommend and sell Ferrozone, at 50c. a box, or 6 boxes for [illegible]. Get a box to-day from your druggist, or N. C. Polson & Co., Kingston, Ont.

CURE FOR APPENDICITIS

Patient Has But to Walk on All Fours Four Times Daily

Berlin, Feb. 17—The medical journals report some remarkable cures of mild cases of appendicitis are being made by a new method of treating the disease before the knife is needed. Certainly it is an original —almost an aboriginal—method.

It is nothing less than to require the patient to walk on all fours for twenty minutes four times a day. It is claimed that certain muscles around the vermiform appendix are brought into play and strengthened by this quadrupedal cure, which are unused when a biped walks erect. Others are relaxed and the localized inflammation has opportunity to subside.

A well-known diplomat, celebrated for his haughtiness and punctiliousness, was cured of beginning appendicitis by this method lately. His associates and the fashionables are laughing in their sleeves when their imaginations conjure up his proud excellency's posture while undergoing treatment. The four-footed dose is recommended in dyspepsia, too, but, of course, it should be taken before meals.

William Nelson Cromwell, representative of the French Panama canal commission, recently called on President Roosevelt in Washington. Mr. Cromwell is something of a sportsman and during the interview he told the President a sporting anecdote.

"Some years ago," he said, "I spent a week in Germany shooting small game. To a German acquaintance I happened to remark that I preferred to shoot in Africa, because there was a spice of danger in the sport there."

"'Ach,' said my friend, 'you like a spice of danger mit your sport, eh? Den you go oud shooting mit me. De last time I go I shoot mine bruder-in-law in the leg.'"—Boston Post.

A certain hotel proprietor chanced to glance out of a rear window and saw his new waiter chasing a chicken about the yard.

"What have you in that bowl?" demanded the hotel man.

"Mushrooms," responded the new waiter. "Der's a gentleman dat wants chicken smothered wid mushrooms, en Ah'm tryin' to smother him, sah."—Chicago News.

PULLING UP STAKES
IN PETERBOROUGH

No Matter When or Where You See a Bargain, There's a Better One For You At

GOUGH BROS.
GOOD-BYE SALE

The second week adds to the intense interest of this sale. Its an occasion that warrants unbridled enthusiasm. Nothing can stop its progress.

Do you know how we're fixed? $68,000 worth of Suits, Overcoats, Furs, Boots, Shoes, Hats, Caps and Furnishings, must be slashed to pieces to bring down the stock. Are you thinking? Can't you see what this means? Can't you see that we must sell at a heavy loss in order to pull up stakes in time to let in the new firm.

WILL ANYBODY KINDLY RISE IN THE MEETING and say that Gough Bros. ever was or ever will be undersold. The fears of competitors and the frantic efforts of their bosses, cut no figure with us. No cast-iron "transformation" sale bulletin of reduced prices can side-track GOUGH'S GOOD-BYE SALE. We stand by the town and will issue new lists of cut prices every week that must beat the best markings of any other dealer by 25 per cent.

If anybody offers to sell Men's Overcoats and Suits worth $10 for $6.98, down goes Gough's prices to $5.98.

If anybody offers to sell Boys' Suits and Overcoats worth $6.00 for $4.48, down goes Gough's prices to $3.48.

If anybody offers to sell $3.00 Trousers for $2.48, down goes Gough's prices to $1.98. And so on all through the gamut.

Don't you see the logic in our slashing—we're pulling up stakes in Peterborough—necessity knows no law—the stock can't be moved or kept for another season.

PROSPECTUS
OF THE
S. Gold Mining and Milling Company
Incorporated under the laws of the State of Nevada
—Capitalization 200,000 Shares—
Par Value, $1.00

Officers:

J. R. CHAPTON,	President
E. P. CHAPTON,	Vice-President
A. J. SANBORN,	Secretary
ALEX. J. CHAPTON,	Treasurer

Trustees
J. R. CHAPTON, E. P. CHAPTON, CHARLES REAUME,
A. J. SANBORN, ALEX. J. CHAPTON.
Principal Office and Place of Business
Los Angeles, California

The U. S. Gold Mining and Milling Company is incorporated under laws of the State of Nevada with a capital of $200,000, divided 200,000 shares of the par value of $1 each, fully paid and forever non sable.

Every safeguard to the stockholders which the most eminent legal at could suggest has been taken advantage of in the organization of this pany, so that the private property of the stockholders can never become e for the debts of the corporation, and that every stockholder may feel re in his interest, no matter how small.

OUR PLAN

There are 200,000 Shares of capital stock. Of this amount 80,000 es have been issued in part payment for the mines. This left 120,000 es in the treasury, 37,000 of which have been sold, leaving 83,000 shares e treasury unsold at this date.

The Trustees propose to sell 50,000 shares of the underwritten stock at n per share. The sale of this 50,000 shares will place in the treasury cient funds to finish the construction of a 50-ton plant and leave several sand dollars in the treasury.

We have contracted for and will erect on our property a 50-ton cyanide t as soon as treasury will permit from the sale of the 500,00 shares of uaranteed stock.

When the above plant is finished, which we expect to accomplish before l 1st, 1904, and with ore now in sight sufficient to run our plant for many s, the holders of our stock can rest assured that they will have an inent as safe as United States bonds with an income on their investts that must necessarily be large on account of the high grade ores that now proven to exist in the mines.

The Guaranteed Stock to the amount of 50,000 shares is protected by years non interest bearing bond of the "Granite Securities Company," of Angeles, California, with twenty interest coupons attached thereto for payment of the interest guaranteed by the U. S. GOLD MINING AND LING COMPANY; also a guarantee of dividends.

We invite the fullest investigation. Full particulars may be obtained Roland Kidd, Canadian Fiscal Agent, Temperance Street, Toronto and rge Street, Peterborough, or to

RGE T. ORDWAY, COMMISSION BROKER,	CHICAGO, ILL.
ERT CHAMBERLAIN, Dry Placer Miner formerly of California.	NEW YORK

This company has the right, without royalty payments, to use new patent machine upon all the land it may own, acquire by e, or operate, in Arizona. We invite special attention to the at commercial value and profit of this machine, and what can accomplished by it.

What This Machine Will Do

For the first time in the history of gold mining a machine has n invented which will handle the dry placer gold gravel without ter, and in large quantities. This machine will save 98 per cent all the gold in the gravel, and will do it at a lower working cost n by any existing process. It is operated by a small, compact ine, using crude oil as fuel. A complete plant, capable of handl 300 tons per day will weigh less than 1,200 pounds.

To secure this gold only those placer lands could be worked, ich could command large supplies of water, hence the immense ies of dry placer lands remote from water have never been rked.

Fifteen Hundred Millions in Gold

The United States has yielded nineteen hundred millions in ld, of which fifteen hundred millions—or more than 75 per cent.—re the product of its placers.

Ninety per cent. of the world's total gold supply has been tak from placers by processes which have admittedly lost the bulk of values.

Simplicity of Machine — Its Method of Operation

The machine is so extremely simple in construction and operathat any intending investor can operate it instantly. He can ke a peck or more of sand, either ordinary house of sea sand, or ch as is found in the placer lands of Arizona and California, put to this sand ten or a hundred pieces of gold as small as the point a toothpick, and from that to the head of an ordinary pin, mix the nd and the gold thoroughly, turn them into the hopper or feed of e machine, and in a few seconds the machine will separate the gold om the gravel and recover from 98 to 100 per cent of the gold. It an absolute, infallible, ocular demonstration of the merits of the achine. It has solved the problem of handling sand or gravel conaining gold in regions remote from water.

Cost of Handling Material

Each plant is portable, weighs less than 1,200 pounds and can be ily moved by a few laborers.

The two greatest authorities in the world on the moving of material are "Haswell" and "Trautwine." They say in their standard ublications that a laborer can shovel horizontally, 12 feet, vertically feet for 50 feet haul 17 cubic yards in 10 hours.

A well known engineer in his work for the U. S. Government at ndy Hook, moved 18 cubic yards, 100 feet haul in 10 hours at a cost f 10 cents per cubic yard, paying laborers $1.75 per day.

The dry placer gold-bearing sands of California, Arizona and New Mexico are handled quite as easily as those of Sandy Hook.

Ten laborers can easily supply one machine with 204 cubic yards f gravel in 12 hours, working at the same speed as shown by Haswell, Trautwine or at Sandy Hook.

Placer work on above basis would cost about 11 1-2c. per cubic yard.

Do You Want Monthly Dividends?

We make a special offer of a limited number of shares of stock at this time, because the company requires immediately sufficient to build several machines to operate in the field.

Every machine at work will increase the intrinsic value of the stock.

Twenty machines in the field will increase the price and value of the stock more than double the present offering, and every additional machine means a further increase in price and value.

The Company intends to divide its net earnings every month, so that the stockholders may count absolutely on receiving monthly dividends in proportion to monthly earnings.

EFFECT OF SHRAPNEL SHELLS AT CHEMULPO

THE FIRING LASTED ABOUT FIFTY-ONE OR TWO MINUTES

Russian Vladivostock Squadron Believed to Have Returned to Vladivostock.

London, Feb. 16—In an interview with the Daily Mail Seoul correspondent, Brig.-Gen. H. Tallan, of the Philippine Constabulary, who was appointed to accompany the Russian army, and who watched the naval fight at Chemulpo at close quarters, and afterwards rowed around the Russian ships, before they were destroyed, said: "I have never seen or heard anything resembling the effect of the shrapnel fire. The Varing was literally peppered in parts as though she had been played on at close quarters with machine guns. Evidently time-fuse shrapnel was used, with blinding, bewildering effect. The heavy artillery work emphasizes the fact that you fire a tremendous lot and get little for it. The firing lasted fifty-two minutes, and there were ten shots a minute. Only two heavy shells struck the Varing's hull. One shot exploded on the bridge, and strikingly demonstrated the effect of shell fire, everything around being torn to tatters, and resembling the debris of a mechanic shop. All the torpedo tubes were filled after the fight, indicating that none had been fired. The Russians knew evidently that they were going to inevitable death, yet they fought until their ship was unmanageable. Their commander did well to bring the ship into the harbor. Further fighting would have been madness."

Washington, Feb. 17—A cablegram gation from Tokio stating that upon a request made through the British consul at Chemulpo that thirty-four of the Russians wounded in the recent naval engagement should be placed in charge of some Japanese charitable institution, consent was readily given and they were put in the Japanese nurses hospital at Chemulpo and are being treated by Japanese doctors.

JAPAN NOT UNDULY ELATED

Tokio, Feb. 16—It would be a mistake to imagine that Japan initial victories have unduly elated either the civil or military leaders. They are full of confidence as to the outcome, but still view the work in hand as serious beyond exaggeration. There is not the slightest sign of rejoicing in the army or navy. Grave reticence and devotion to duty are what one sees in every department of those services to the care of which the fate of the Empire have been committed. The Ministry of Marine exhibits no alarm at the news that Russia is about to start its Baltic squadron to the Far East. It is doubtful if the vessels would be able to accomplish the cruise, and, in any case, it is believed that long before they could arrive Admiral Togo's ships will have nothing to do, but to receive them.

There is good authority for the statement that Japan's troops in Corea up to date number 50,000 or 60,000. The Ministry of War expects information of decisive developments within a few days, possibly within a few hours.

CHAMBERLAIN IS VERY SICK MAN

Strain of Campaign Too Great For Him

MUST SEEK A LONG REST

Condition Due to Sunstroke Suffered Last Year in the Tropics

London, Feb. 17—Joseph Chamberlain looked to be a very sick man when he left London last Thursday for Egypt. Orders were given that no communication of any kind but personal and private is forwarded to him.

He would never think of leaving the country at a time when the government may go to pieces any day except under positive compulsion.

His physical condition has given rise to the gravest rumors in [illegible]

[illegible] from Brain Fag.

It is officially admitted that he is suffering from brain fag, but it is explained that it is too soon to accurately diagnose his complaint.

Ever since his cab accident during coronation week he has suffered from headache. Since his return from his trip to Uganda and South Africa this trouble has grown worse and has been accompanied by insomnia, followed by nervous exhaustion and irritability.

These symptoms, it is feared, are a consequence of his having got a touch of the tropical sun while either in Uganda or South Africa, symptoms which are likely to be followed by most serious results in the case of a man who has received an injury to his head.

Mr. Chamberlain's speech last week on the war commission was much below his standard, and the tragic death of his faithful henchman, Powell Williams, completely prostrated him.

More than that, the story comes from the Colonial Office that after his return from South Africa Imperialism became almost a monomania with him. He talked of nothing else, and became testy when compelled to consider subjects into which it could not be introduced.

The correspondent of The Times heard only yesterday that a young Canadian who recently took luncheon at Highbury with the Chamberlains noticed that every time politics was referred to some member of the family changed the subject, but despite this Mr. Chamberlain eventually became excited and delivered a harangue, as if addressing a public meeting, to the manifest discomfort of those around.

ANOTHER WAR CLOUD

TURKEY TO INVADE BULGARIA THE END OF MARCH

Believed to be the Earliest Favorable Time for Move

Constantinople, Feb. 17—The better informed Turks here look forward to war with Bulgaria in the spring as inevitable. English residents share their conviction that Turkey will invade the principality towards the end of March. This would be the earliest favorable moment for a campaign. In event of a settlement of the war in the extreme east, however, the Sultan as likely as not, will drop his warlike plans.

Port Said, Feb. 17 — The native press is jubilant at the Japanese successes and urges Turkey to take advantage of Russia's predicament to declare war on Bulgaria, with the object of administering a lesson to that country, and recovering southern Roumelia.

Salonica, Feb. 17—Cases containing 15,000 cartridges and fifty-seven revolvers and rifles have been seized by the customs officials here. Ottoman postal authorities have intercepted a large package of blank passports, alleged to have been addressed to a Bulgarian merchant residing at Serres.

"A volcano — what is a volcano" asked the teacher.

"A mountain with a fire inside," said one.

A smile of comprehension spread over the puzzled face of the smallest scholar as she asked, surprisedly, "Is that a mountain range?"—Harper's Magazine.

Reeder—Scott said a clever thing today; said that luck is a good bit like lightning, for it seldom strikes twice in the same place.

Heeder—Yes, and as a rule neither of them needs to.—Pennsylvania Punch Bowl.

"Do you think you could ever marry for money?"

"No. But I'm sure I could soon learn to love a girl who had a million or two."—Chicago Record Herald.

"I told you she would dismiss you if I came in between."

"Yes, she has, all right, but you're a dead one, too."

"Why?"

"She told me everything between us was at an end."—Cincinnati Commercial Tribune.

"There is something," he said, "that I have wanted to tell you for a long time, but——"

"Oh, Bertie," she said, blushing sweetly, "not here in the car before all these people. Wait. Come this evening."

"It's merely that you have a streak of soot down the middle of your nose, but I couldn't for the life of me get a word in till just now."—Chicago Record-Herald.

The money obtained from this sale is to be used for development and equipment purposes

Letters from prominent people regarding the Bannie Mine

KROHN BROS. Cincinnati, O. Prescott, Ariz., 7-30-03

Gentlemen—On inquiry from those whom I consider reliable, I am informed that the Bannie mine is among the very best prospective properties in this country, and well worthy of investment.

Very respectfully,

DENNIS A. BURKE, Mayor of Prescott, Ariz.

MESSRS. KROHN BROS, Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear the property well and favorably spoken of by parties who have been on the ground and whose opinion should carry considerable weight; and the fact that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property possesses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier

D. LEVY & CO., (Inc.)

Wholesale and Retail Dealers in General Merchandise,

KROHN BROS, Cincinnati, O. Prescott, Ariz., July 30th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. The Bannie mine is considered by all mining men here to be one of the best prospects for a big mine in this part of the country. The officers are all men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for itself. We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Pres.

KROHN BROS, Cincinnati, O. Prescott, Ariz, 7-28-03

Gents—Replying to your wire of today, we have heard a great many good, very good, reports of the Bannie mine, and have never heard a man say anything against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. We believe that this company is mining on a strictly business basis and is a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

MESSRS. KROHN BROS, Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * * The nature of the ore is a heavy iron, lead and copper sulphide, which carries very good gold, silver and copper values. The ore bodies, as far as they have been explored, are quite large and well defined, which indicates permanence. My information is principally from practical miners who have been working in the property, therefore I consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

Address all communications to Robert Kidd, Fiscal Agent, Peterborough, or to W. J. WILSEY, Prescott, Arizona.

THE

STONY PASS MINING CO.

OF SILVERTON, COLORADO

FRANCE WILL STAND FIRMLY BY THE RUSSIANS

Sentiment in France Strongly Opposed to Japan's Policy

TEST WILL COME WHEN LAND BATTLES BEGIN

Cost of Pending Conflict Will Be Ruinous to Both Parties—Issues are Such that They Must Fight to the Death

Paris, Feb. 17—"The battle between the elephant and the whale" as the French press characterizes the Russian-Japanese war, paraphrasing Bismarck's allusion to what a contest between England and Germany would be, is exciting the greatest interest and comment here.

The first success of the Japanese admirals is attributed to their knowledge of the sinuosities of the coasts and the formation of the entrances to the harbors which enabled them to escape all incidents.

A Costly Conflict.

The cost of such a war is specially dwelt upon. The cost of the bombarding of Port Arthur, lasting two hours, is estimated at $60,000, each shell of heavy caliber costing, according to French artillery experts, $200. To this must be added the cost of coal consumed.

The press representing the nationalist party is divided as to what France's attitude should be at the moment. Deroulede and the more more moderate nationalist newspapers favor a policy of the strictest nonintervention while the more violent section believes in strict adherence to the alliance.

The Temps asserts that Japan's first pyrotechnic success will have no effect unless it is supplemented by a solid victory on land, where there will be the crucial test. The sterling qualities of the Japanese infantry are admitted, but the cavalry is scoffed at. It is related that the Japanese religion involves certain reverence for the horse and that a Japanese cavalryman never mounts without apologizing to his steed.

Could Not Prevent War.

The Japanese legation in Paris has given for publication a card setting forth that Japan could not prevent war without losing self-respect and incidentally Corea and all rights in Manchuria. In regard to criticisms about the attack on the Russian fleet before a formal declaration of war, the reply is that this was due to Russia's failure to reply to Japan's last note, the report being denied that Russia's note was really received and its reception concealed when the attack was made. The card says Russia's reply and the last word from Japan crossed each other in transit.

According to the statement for the Japanese legation Japan made definite propositions, Oct 13, offering to establish a neutral zone in Manchuria, thirty miles on each side of the Corean frontier, that December 11, Russia replied, ignoring the Manchurian proposition and renewing simply the original claims in Corea.

This note, vague in terms and evidently to give Russia time for preparation, was dated Jan. 6.

Russia's Dilatory Tactics.

Japan sent a new and more insistent note Jan. 13, the answer to which was persistently delayed by Russia, while warlike preparations continued, which caused Japan to withdraw her representative from St. Petersburg, in itself practically a declaration of war.

The French press, which saw no outrage in Spain's blowing up the Maine, is making a great howl about Japan's torpedoing Russian war vessels before a formal declaration of war.

Cassagnac says in the Autorite, "This semibarbaric nation has proved itself worthy of its traitorous allies, the English, who destroyed a Danish fleet by a similarly cowardly stroke. Imbued with ideas of the English school, it is not strange that in conjunction with her own barbaric proclivities Japan has acted in this manner."

A Fight to the Death.

Other writers regard the contest as a life and death struggle. It is believed that if Japan fails to get Corea she would be ruled by Japan in the Yellow Sea as effectively as she is by Germany in the Baltic. Japan in possession of Corea would sway the sea in the far east permanently, for if settled on both sides of the strait of Corea she would cut communications between Vladivostock and Port Arthur at will. Moreover, if installed in North Corea, Japan would be close upon the flank of the Manchurian railway and would have the best chance of permanent supremacy in the far east.

New York, Feb. 17—Michael Davitt, who arrived from Ireland on Saturday, says that Ireland is in sympathy with Russia, because she is Britain's foe. Mr Davitt scouted the idea of England or France being drawn into the struggle between between Japan and Russia, and deplored any attempt to influence public opinion in this country to take sides against the czar and his people in the present conflict. "When I left the other side," said Mr Davitt, "it was fully expected that war would be averted. Sober opinion everywhere was that there was no need for war, and I am sure it is a matter of regret over there that hostilities have begun.

"In England the prevailing sentiment is in favor of Japan, and as can be imagined, Ireland is for Russia. Naturally enough, you may say, because Ireland sometimes disagrees with England. But justice is not with the Japanese side of the case.

"This it is which is at the root of the whole matter. It was easy enough for the Japanese to find a pretext."

Memphis, Tenn., Feb 17.—Jockey Winkfield under contract to M. Lazareff, a Russian owner, to ride in Russia this year, may not report there on account of the war with Japan. Lazareff today cabled to J. O. Keene, who made the contract, asking that Winkfield be sent at once. Winkfield is holding off, as it is reported that in the event of the United States interfering in any way, all Americans in Russia will be escorted to the frontier and banished from that country.

Russia Is Preparing For Action Against Britain

War with England is Almost Certain Over the Thibet Trouble

Special to THE TIMES;

Berlin, Feb. 17—Nothing is known here officially of the report that the German cruiser Hansa, left to remove German subjects from Port Arthur, was fired upon by Japanese warships.

Washington, Feb. 17.—The Japanese Minister today received a despatch from Tokio stating that trustworthy information has reached the Japanese Government to the effect, as the result of the Japanese attack on the Russian squadron at Port Arthur, at midnight, on Feb. 8th, the Russian battleship Retvizan, is still aground outside the fort. The Cesarevitch has been towed into the port, and the Pollada is still aground at the entrance to the port. All three, the despatch says, are disabled. The despatch says; As a result of the bombardment on the morning of the 9th, the Novik was seriously damaged, but the Askold and Poltava were only slightly damaged.

St. Petersburg, Feb. 16.—Lieutenant-General Ivanoff, Governor-General and commander of troops in Turkestan, has gone to Tashkend, with General Sakoff, chief of the staf of the military district of Turkestan. It is said in high military circles that Gen. Ivanoff has been instructed to prepare for the contingency of military action in the direction of India, in the event of Great Britain adopting an attitude openly hostile to Russia, or attempting to prejudice Russian interests in Persia or Thibet.

THE BLACK SEA FLEET

RUSSIA IN DANGER OF PROVOKING OTHER POWERS

Naval Forces in the Baltic Weak and Reported Movement is Discredited

St. Petersburg, Feb. 17—The report that Russia is negotiating for permission to bring her Black Sea fleet through the Dardanelles cannot be confirmed here. In diplomatic circles, while it is not believed that the porte would offer objections to this the impression is that such an attempt would precipitate grave complications with the powers signatory to the Dardanelles convention.

Berlin, Feb. 16—It is officially announced here that nothing is known of the alleged passage or impending passage of the Russian Baltic fleet through the Kaiser Wilhelm (Baltic North Sea) canal. The best denial of the statement that Russia wishes to send fifteen warships through the Kaiser Wilhelm canal was made at the navy department, where it is said that Russia has not fifteen ships in the Baltic that could readily be sent to the far east, seven or eight being all she has there, according to the intelligence here, that could be made serviceable against Japan, and as many more coaling-ships might have to go with them the German naval opinion is that so small a fleet could do *nothing alone*.

Bluff to Satisfy Public.

Movements of the Russian Baltic fleet are in reality a bluff intended to satisfy the demands of the public. The Baltic fleet has, to begin with, small coal capacity. When the ships arrive at Gibraltar the British would give them enough coal to carry them back to Kronstadt under the distinct understanding that they obtain no more fuel at any British coaling-station for three months. If they had any intention to derove and use coal to proceed down the Mediterranean they could obtain sufficient supplies at Bizerta, a French station, but from that point they would be met by insuperable difficulties.

If they did not touch at a British coaling station they would have to make for Jibutil and thence to Saigon, where the French might grant them the fuel they needed. On the other hand they might attempt to take colliers with them, but that would mean that the rate of progress would be very slow and that they would be hampered in every way.

In regard to the Black sea fleet the same objection applies, even if permission is granted to pass the Dardanelles.

Squadron Now at Jibutil.

Island of Perim, Red Sea, Feb. 17—Mail advices here from Jibutil, French Somaliland, say that the Russian squadron which passed Perim Jan 27, has coaled at Jibutil and will wait there until Feb. 18 for the Russian warships due at Jibutil from Suez.

Port Said, Egypt, Feb. 16—The Austrian collier Java, chartered by Russia to proceed to Port Arthur with coal, has been ordered by the Egyptian ministry of foreign affairs to leave here immediately.

New York, Feb. 17—With loud and long-continued cheers for the mikado the Japanese army and navy, the success of the war against Russia and with a sonorous singing of their national anthem the Japanese of New York brought to a close an enthusiastic mass meeting which had lasted most of yesterday afternoon in the Chamber Music Hall in Carnegie Hall. The object of the meeting was to consider means for raising $5,000,000 at least to help the home government in the war. Of the 500 present fully a quarter were Americans.

Although no funds were actually subscribed at the meeting it was unofficially announced that nearly $200,000 had already been privately pledged.

Rome, Feb. 17—In the last 6 months more than 900 cases of violent assault took place in the city of Rome, seventy-nine of which had a fatal termination. Of the wounded only about 100 would give any information as to their assailant, all the others keeping the secret for fear of the "Malavita," a local organization, which is becoming as much feared in Rome as the Mafia is in other societies. All the members of the society are pledged to take personal revenge on a victim or his friends when the name of his assailant is given to the police.

SEE A YELLOW PERIL AT HAND

Russians Look For Union of Two Big Races

BREAK CZAR'S PRESTIGE

Campaign Being Waged to Break the Czar's Prestige in China

St. Petersburg, Feb 17 — It is thought here that the action of the Japanese in flooding Pekin with posters relating their victories is a part of a well-laid campaign projected from the beginning to break down Russia's prestige in China for the purpose of ultimately effecting the union of the two races, which would make the "yellow peril" a reality.

Russia is evidently not prepared at this time to give an answer to the United States to Secretary Hay's note on the subject of the neutrality of China. Hostilities having begun, the military authorities must be consulted and the czar doubtless will refer the matter to Viceroy Alexieff, if he has not already done so. Russia, it can be said, is certainly as anxious as the United States that the war cause no risings or disorders in China, indeed, the attitude of China is already causing some misgivings here, as she has not declared her neutrality. Russia has already learned of the position taken by several powers regarding Secretary Hay's note.

Germany and Great Britain, it is understood, both express sympathy with its purpose, but with an important reservation concerning Manchuria which is now the theatre of war. Germany's views in this respect were anticipated, but Great Britain's failure to give Secretary Hay unqualified support has caused surprise here.

France Delays her Answer.

Paris, Feb. 17—Instructions have been sent by the ministers of marine foreign affairs, and of the colonies, to their respective agents abroad to observe strict neutrality during the war.

The council of ministers discussed today the situation in the far east including Siam. It is understood that Foreign Minister Delcasse presented the United States note on the subject of the neutrality of China, but it is not expected that the formal reply of France will be handed to the American Ambassador for some days. The intention of the cabinet seems to be to obtain the views of the other powers before acting.

Favored by Denmark.

Copenhagen, Denmark, Feb. 17 — United States Minister Swenson delivered Secretary Hay's note to the Danish Government yesterday. It is understood that the government regards the note with favor.

Austria Little Concerned.

Vienna, Feb. 17—United States Ambassador Storer today presented Secretary Hay's note on the subject of China to the foreign office and afterward had a long interview with Count Goluchowski, the Austro-Hungarian minister of foreign affairs. Well-informed persons believe the policy of Austria-Hungary in the far east will be entire acquiescence with that of the most interested powers. It is not considered likely that Austria Hungary will take any steps in the matter, her interests in the far east being slight.

EVERYBODY READS THE TIMES.

FOREST MINING CO.'S

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.68 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been ver little work done upon these tw claims, there being one discover shaft ten feet deep, showing ore o all sides of the shaft, and runnin in value of from $4 upwards. It i my opinion that with developmen these, too, will prove valuable proper ty.

The work on the Storm King an Ozone consists of a tunnel near th point of discovery and is driven alon the vein for a distance of one hun dred and eighty feet, showing or all the way from the surface to th face of the tunnel, and averagin in width from six to eighteen inche Three assays give the following va ues, $12.50. This being a gener sample taken from the dump. Th other two assays are $62.68 and $19, respectively, thus being the assorte ore for shipment. The course of th tunnel and vein are north, ten d grees west, and the vein cuts th trend of the formation oblique (which is granite, and by drivi this tunnel five or six hundred fe further the tunnel will i ect a quartzite reef (which is ru ning north, twenty degrees eas which would make this a conta vein between granite and quartzi and should produce a large body ore at the intersection of the co tact.

The only work done upon the Sha non Bell, the last claim of th group is the location work, and not enough to allow of a report b ing made.

There is water for power purpos one mile from the property, and tim ber on the ground, of a very fi quality, sufficient to run the mi for many years to come.

All the assays mentioned in th report were made by the assaye of the Imperial mine at my reque and the ore was taken by me fro the properties mentioned.

I will state that I have been a pra tical miner since 1870, and am no the manager and superintendent the Imperial mine in this district,

(Signed) CAPTAIN A. M. PAUL

Advance Mining Co., Fiscal Agents, Sumpter, Ore.

or the PETERBOROUGH BROKERAGE COMPANY, Peterborough, Onta

Equitable Gold Mining C

R. C. LANE, President. E. F. NORTON, Secretary and Treasure

Over $300,000 of development work already done. Main shaft 9 x 16 feet, 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore

Destined to become large and continuous dividend pay

The Equitable Gold Mining Co.'s properties consist of three mines, k as the North Bonanza, Flowery and Kimbark. They are located in Six Canon, less than four miles from Virginia City, Nevada, which is the nea railroad station.

Years ago, over three hundred thousand dollars of development work done upon the mines—so they are not mere "prospects" but actual mines. work was done under the personal supervision of competent engineers, was paid for by the owners of the mines themselves; thus giving double surance that the work was well done and that the expenditure was tified.

The Main Shaft (triple compartment, 9x16 feet in the clear) is down hundred feet. From this shaft, running along the vein matter, east and are four drifts at different levels, having a combined length (including Rule winze and the tunnel) of 2,550 feet.

In addition to the above there are four small shafts, with a combined of about 300 feet; 535 feet of tunnels, and at least 500 feet of cross-cuts, rises, etc.

All told, there is 4,050 feet of underground work—the most of which is Here is nearly one mile of openings in mineralized rock.

It is conservatively estimated by competent and reliable engineers and tical miners that there is developed an ore body of at least One Million Hundred Thousand Tons!

As a further evidence of the large amount of work done there is 75,000 to 100,000 tons of ore on the dumps at the different surface openings that, with modern cheapened processes, can be converted into gold at a profit.

THE TITLE

Title to the Flowery and North Bonanza mines is by patent from the U States government, while the title of the Kimbark is by location and pos sion.

The Equitable Company obtained the Flowery and North Bonanza m both of which are patented, by purchase—the payments therefore to be out of a share of the net proceeds of the mines. The Company has written contract, duly recorded, for a deed, and is in possession of the perties, and is now operating them. The sum of $2,000 was paid on the tract, September 30th, 1902, and partial payments have since been made. Company is entitled to $6.25 per ton as cost of mining and milling. One-ha all over and above this $6.25 per ton goes to the former owners till they re the total sum of $105,000, without interest. There is no stipulation as to am of work to be done within any specified time—and no proceeds, no pay. The C pany can therefore pay it in one year or it can pay it in ten years. this exception the Company is free from debt. Its policy is to pay as it g In this way it has no fear of financial embarrassments. The title to the K bark is by "location," under the mining laws of the United States. W enough has already been done to entitle the Company to a patent, w in due time will be obtained.

Recent Development Work

Since the Company acquired the property, it has put up poles and wires a distance of one mile for the transmission of electric power from the Tru River Electric Power Plant. By this means unlimited power for mining, ho ing and milling is obtained.

It has built a dwelling house for the manager, a large boarding house the miners, a barn, a power house and blacksmith shop.

It has put an electric hoist and skip into the 200-tunnell; has purchased cars and the necessary tools for mining purposes.

It has acquired the Kimbark ground, adjoining the Flowery and North B nza mines, and is now developing the property by driving a tunnel.

Within the last few months the Company has mined and milled over 800 of ore—realizing therefrom about $10,000 worth of gold bullion. The out-p constantly increasing and all the Company needs is more mill capacity to h its ore.

ARTHUR S. GARLICK, Meriden, Conn., Secretary

BOARD OF DIRECTORS

JOHN A. THOMPSON, GEORGE S. WILCOX, RICHARD F. DOSSEY
WILLIAM GARLICK, ARTHUR S. GARLICK, B F BARNES

We have bought the famous "DOLLY VARDEN MINE," which comprises three claims located in the San Juan District, Hindsdale County, Colorado.

Over $25,000 has been spent on this property in getting it in its present condition, which is as follows:—Private wagon road from main road up to mouth of tunnel, and up to shaft and houses. Tunnel is 5x7 feet and in 711 feet—it would be hard to find a better made tunnel in the whole state of Colorado. Two good houses large enough to accommodate fifty men. There are 375 feet track in the tunnel.

In driving the Tunnel in three spur veins were cut 527 feet from mouth of tunnel, and all three are in a space of less than four feet. Mining experts claim these spur veins lead into one of the main veins.

Value of the ore in these veins per ton (2000 lbs) is as follows: Copper, 16.05 per cent.; Gold 6.02 ozs; Silver 92 40 ozs. Total value $93.00. Value of ore in main vein in the shaft and growing richer as depth is attained. Copper. $6 40; Gold, $6 82; Silver, $254 31. Total, $267.53.

Our president and treasurer visited the property in July, 1903, and found everything as above. We have had the property surveyed, and are now working on the spur vein in the tunnel, taking out high grade ore. We shall also continue the tunnel so as to cut at depth the above immensely rich vein as soon as possible.

The property is fully paid for; in fact, there is no indebtedness whatsoever. The ore is of such grade that it does not need milling, as it is already concentrated.

RICHNESS OF ORE

The great richness of ore gave the property a name and fame second to no other mine in Lower Colorado. The first class ore having a value of $800.00 per ton, as it was assorted and sold. We believe a little money judiciously expended upon the property will prove it to be as valuable as it was ever claimed to be, and possibly of very much greater value.

It is a notorious fact that some of the largest producers in the San Juan District to-day (and most valuable mines) were abandoned about the same time work was discontinued upon this property and that they remained so for years Notably the old "Hotchkiss" and the "Camp Bird" owned by Thos. Walsh, recently sold for $5 500,000 (now claimed to be worth $15,000,000). About six years have elapsed since he purchased it The old "Hotchkiss" now the "Golden Fleece," while not as valuable, has been one of the great producing mines of Colorado New men are taking hold of all the old mines and meeting with great success and with a smaller outlay as they avail themselves of the benefit of the money already expended. We do not know of anything in the shape of a promising property in the whole state of Colorado where the same thing can be done to as good an advantage as in the old "DOLLY VARDEN."

Mr. Edwin J. Hulbert, M E., formerly of Middletown, Conn., who was the original discoverer of the Calumet and Hecla mine of Lake Superior, made a very thorough and critical examination of the DOLLY VARDEN.

We again impress upon you the merits of this enterprise, hoping that you will co-operate with us in developing same, in the way of producing a dividend-paying mine in the near future.

IGH CLASS INVESTMENT

ZACUALPA RUBBER PLANTATION COMPA

orporated Under the Laws of the State o California.

Zaluaipa Rubber Plantation is sit- l in the best location in Mexico for cultivation of rubber. It has been n for a great many years as a choice strip of rubber land and succes- experience has shown that it is to all that has been claimed for The affairs of the company are in hands of men of undoubted integrity high reputation as successful men siness. To those seeking a safe in- ent which will secure a good in- for life, this proposition offers a able opportunity

ares in La Zacualpa Rubber Planta- are not capital stock of a corpora- and carry none of the responsi- es and obligations, or liability to essment of capital stock; but repre- an undivided interest in the planta- itself.

e twelve thousand acres comprising plantation are divided into twelve usand shares, each share represent- one acre of land, and the holders shares in La Zacualpa Rubber Plan- are the actual owners of one un- ded acre of land, for each share held, a guarantee expressed upon the ficate by La Zacualpa Rubber Plan- on Company, under its official seal, plant two hundred or more rubber s per acre for each share sold, and care for same for a period of five s, and at the expiration of that time gather the first harvest and deliver net proceeds thereof to the share- der.

other words, La Zacualpa Rubber tation Company sells to each share- der one undivided acre of land in La ualpa Rubber Plantation, with two hundred or more rubber trees five years old, and their profits for all time, for each share sold, and agrees to plant so that the first harvest belonging to its shareholder is the one to be gathered from La Zacualpa Rubber Plantation during the sixth year from the date of the certificate.

After the delivery of the first harvest La Zacualpa Rubber Plantation Company will care for the plantation, and harvest and market the crop for ten per cent. of the net proceeds therefrom. Out of this commission the Company agrees to pay all costs of administration, including maintenance of its home and branch offices.

This plan gives the purchaser of shares an interest of definite acreage, and his proportionate share in the total yield of rubber from the entire plantation forever, making it absolutely certain that the interest of each shareholder will receive the same care and attention forever, making it absolutely certain others, no matter how large or small, for the success of the plantation will be the mutual gain of all.

The foregoing state of facts makes it impossible for any person or persons to combine against or injure the individual interest of the smallest shareholder in the plantation, or to encumber the same, and it can be readily seen that the success of one means the success of all

All persons have some money, but more time. A little money and five years of time, if applied to the cultivation of rubber, will produce large profits.

Full information will be supplied on application to Mr. Roland Kidd, Fiscal Agent for Ontario, or to

J. W. BUTLER, PRESIDENT,
13 Market St., San Francisco, C l.

Attention Investors

FROM THE PLACERS OF THE BOISE BASIN, IDAHO, FOUR HUNDRED MILLIONS OF DOLLARS IN GOLD HAVE BEEN TAKEN.

We are now developing the ledges that fed those placer in the ages past.

CRUISERS BLOWN UP

Operations in the East Becoming More Serious

St. Petersburg, Feb. 16.—The Russian second-class cruiser Boyarin was blown up by a mine on Feb. 13, in the same manner as was the Russian torpedo transport Yenisei.

She had on board 197 officers and men, all of whom, it is understood, were lost.

No details of the disaster have been given out.

THE REPORT CONFIRMED.

St. Petersburg, Feb. 16.—The report circulated here today that the Russian cruiser Boyarin was blown up last Saturday, and that all her officers and crew, 197 in number, were lost, is confirmed from a private source.

The Boyarin was 318 feet long, 41 feet beam, and 16 feet draught. She was 3,200 tons displacement, and her trial speed was 25 knots. Her armament consisted of six 4.7 inch guns, eight 1.8 inch guns, two 1.4 inch guns and three machine guns. She was also fitted with six torpedo tubes. The Boyarin was last reported as having taken part in the engagement of Feb. 9 at Port Arthur.

She arrived at Port Arthur from Chemulpo with plans of the Korean coast, just before the outbreak of hostilities.

NEW SHIPS SAFE.

Yokohama, Feb. 16.—The cruiser Nisshin arrived safely at Yokohama at 9 o'clock this morning, and the cruiser Kasuga at 11 o'clock.

These two vessels, recently purchased from the Argentine Republic, will increase the preponderance of the Japanese naval strength.

Rome, Feb. 16.—The Japanese Minister here, M. Ohyama, today received a cablegram despatch, informing him that the Japanese warships, Nishin and Kasuga, (built at Genoa for the Argentine Republic, but sold to Japan shortly before the outbreak of war with Russia), arrived at Yokosuka, Japan, today, reached their destination in perfect condition.

The despatch adds that the work of completing their preparation for active service was continued at sea, so that they will be able to take part in the hostilities almost immediately.

Yokosuka is the naval station of Yokohama, and consequently the new vessels will have to travel half-way round the island Empire—about 1 500 miles—before they can get into the fighting area.

RUSSIA ON THE DEFENSIVE

A Waiting Policy Until Reinforcements Arrive

St. Petersburg, Feb. 16. — Military and naval officers are recovering from teir first amazement at their defeat at the hands of Japan, and are rapidly rearranging their plan of campaign.

It is recognized that Russia, until heavily reinforced, must act on the defensive.

Port Arthur is regarded as impregnable, so that when its approaches and neighboring coasts are secure it is believed Japan will waste herself vainly against it.

The next step in advance will be the movement of the main Russian army from the Yalu River into Corea.

A despatch from Port Arthur dated Monday says;

The work of repairing the damaged Russian battleships is progressing rapidly.

The city and fortress were undamaged by the Japanese attack. The people are anxious, and business is at a standstill, but tranquility prevails.

After the religious service today there was a military review before the Viceroy, Admiral Alexeff, who denounced the action of the Japanese as barbarous and expressed confidence that the Russian soldiers would fully avenge themselves.

Reports from the interior indicate that the Cossacks are mobilizing with great enthusiasm. In the Amur district they are riding in squads from village to village waving Russian flags and demanding an early chance to meet the enemy.

ODD FREAKS OF TIME

War in East Illustrates Unique Difference in Hours and Days

When the Russian fleet off Port Arthur was aroused at 11.30 o'clock Monday night, Feb. 8 by an alarm from Japanese torpedo boats, late risers in Peterborough were eating their Monday morning breakfast at 10 o'clock. On the opposite side of the world the crash of war had awakened sleepers in the last hour of a day that was only beginning in Peterborough. Thus, had telegraphic communication been immediate the Peterborough merchant at his luncheon on Monday night might have read in the noon paper an account of a just engagement that, according to the paper, happened nearly half a day later.

This seeming paradox is perhaps the most confusing feature of the Asiatic situation to any person not familiar with the mathematical mysteries of "absolute" and "relative" time. At a certain moment of "absolute" time Port Arthur shuddered with the impact of Japanese wrath made concrete. Taking as the Standard Greenwich (or London), the accepted base for time calculation throughout the civilized world, the "absolute" time was 3.25 p.m. Monday, with the Monday morning sun just above the horizon at Vancouver.

KLONDIKE COAL FIELDS

Mattoon, Ill., Feb. 17—Oliver Ames of this city has returned from the Klondike, where he made a strike which will place him in the front rank of millionaires. He is half owner of a coal mine which he discovered and has at least $100,000,000 in sight. With coal in that country selling at $25 a ton the shaft is better than a gold mine.

Mr. Ames has leased the property and will receive a bounty of $1 on every ton of coal taken from the mine. The contract entered into is that the syndicate shall mine at least 50,000 tons a year.

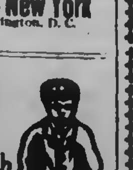
135 CHURCH ST. TORONTO



IN DOLLARS AND CENTS

No two other mines in Colorado can show as much actual value in ore as can the well known

AUGUSTA

AND

BLACK QUEEN

These Mines are Located near Pittsburg, Colorado.

The Augusta Metal Mining Co.

Capitalized at $2,000,000 00. Par value $1 00. Full Paid and Non-Assessable

At 75 Cents per share

This company now owns the well-known Augusta mine and its extension for over 1000 feet in addition to other claims approximating a total acreage of 300 acres. This property has produced over $250,000 in gold, silver and lead ores and is a producer to-day. Has shipped ores of an average net value of $40 per ton for first class and $18 per ton for second class, all the past summer and the summer before smelter and mill returns of which are on file in our office

Has immense bodies of these grades of ore which cannot be exhausted in five years already opened up and its main working tunnel is nearing completion, cutting the apex of the vein at a depth of 1,600 feet.

This block of shares is offered to enable the Company to connect the above tunnel with its concentrating mill and projected terminus of railroad by tramway, a distance of 11,120 feet, thereby permitting shipments during the entire year

A production of at least 125 tons daily will be maintained when these improvements are made, and if completed in the early summer, dividends can be paid from ore settlements before this fall.

We offer for a limited time only a SPECIAL BLOCK OF 50,000 SHARES OF THE TREASURY STOCK of these Companies.

We reserve the right to reject subscriptions over and above the 50,000 shares offered. Each subscription to be booked as received.

Investigate to your heart's content, and quickly, then let us hear from you.

The Black Queen Gold Mining Co.

1,500,000 Shares. Par-value $1 00. Full Paid and Non-Assessable.

Selling at 75c a Share

Like its sister Company is to day giving the best value for the money of any share offered.

This Company owns and controls over 300 acres of good mineral-producing ground, including the well-known Excelsior and Yankee Blade, which have produced upward of $175,000.

Tunnel B of the Black Queen Company is now going in at a rate of 196 feet per month, and early spring will see this work vieing with Tunnel A of the Augusta Company in its record of production.

Will cut known proven ore bodies 1100 feet from Apex, and open sufficient stoping ground to make an output of 100 tons daily.

Has already cut through a cross vein two feet in width of good marketable Galena ore, the point of intersection being 400 feet beneath the surface. We have 800 feet of this vein in length.

We can show you these facts and ask that you ask us to do so.

If your investment becomes profitable you will tell others; therefore it is much to our interest to have you make money on your investment.

THE STANDARD MINING INVESTMENT COMPANY, *FISCAL AGENTS,*

C. L. ARZENO, General Manager.

ROLAND KIDD, Fiscal Agent, Peterborough and Lindsay.

Not a Gamble but a Good, Safe Investment

THE STOCK OF THE

BRET HARTE GOLD MINING COMPANY

IS THE BEST MINING INVESTMENT TO-DAY

This is a strong statement, but facts substantiate it. The work on the mine has proven its value. The promoters have shown their confidence in it by using their own money for development work.

The Company's Property is Six Claims, Patented Land

$60,000 worth of ore blocked out and mine ready for mill.

Mine can be cheaply and economically worked.

Dividends positively guaranteed in sixty days after mill is in operation.

Treasury Stock only for sale, and only sufficient stock will be sold to supply machinery.

The mine lacks but one thing—machinery, and to purchase this a small block of stock will be sold at 15 cents per share. When machinery is paid for no more stock will be sold.

PROSPECTUS INFORMATION FREELY GIVEN

This proposition is better than that of many companies selling stock at 50 cents a share, and will stand a thorough investigation.

WANTED—GOOD AGENTS IN EVERY CITY,

Lung, Throat and Catarrhal Troubles

Cold in the Head Cured Quickly if You Breathe Fragrant, Healing

Catarrhozone

The ordinary method of treating catarrh by the stomach is a very indirect way and, as experience has demonstrated, a very useless method to employ.

Fragrant, healing Catarrhozone, is breathed the air, laden with minute particles of this healing balsamic liquid, spreads itself over the whole area of inflammation.

It reaches the very root of disease instantly destroying by its antiseptic properties the germ life which excites and maintains the disease. Its soothing and healing action is at once apparent to the whole diseased surfaces. It cures quickly and it cures permanently.

We affirm that no proprietory medicine has ever brought forth from the people as many voluntary testimonials as Catarrhozone has received.

MRS. M. J. WHITNEY, Clay Street, Topeca, Kan., was cured of nasal catarrh, and say, "I owe Catarrhozone an immense debt of gratitude. It cured me of the most disagreeable catarrh after many doctors had pronounced my case incurable. I do not cough any more, my breath is sweet, and my respiration regular since using Catarrhozone.'

MRS. JAMES TWEEDIE, of Jay Bridge, says; "For years my daughter doctored for catarrh. She had dropping in the throat, hawking, nausea, and could not sleep at night. The first day's use of Catarrhozone benefitted and it cured so the catarrh never returned.'

MR. R. SHELDON, of Leamington, Ont., says; "For two years I unsuccessfully sought a remedy to cure my son of catarrh but permanent results were not attained until Catarrhozone was used. It cured my little boy like magic and he has been quite free from catarrh ever since.'

REV. D. R. SMITH, of Whitehead, N.S., says; "Catarrhozone permanently cured me of chronic catarrh of the nose and throat from which I suffered for many years. I heartily recommend Catarrhozone.'

MR. R. McCALLUM, of Spring Brook, Ont., says; "A sample of Catarrhozone benefitted me more than years of treatment with doctors, and by using the dollar outfit I was completely cured in a few weeks. I recommend Catarrhozone as the most satisfactory cure for catarrh on the market. Every word said for it is true.'

MR. S. T. WRIGHT of Skeads Mills Ont., says; "I had a bad attack of sore throat, with inflamed tonsils and sore chest. I inhaled Catarrhozone and it cured my trouble. I greatly admire its pleasant and soothing effect.'

MR. JAMES FERGUSON, of Perth, Ont., writes;—"I have used Catarrhozone for sore throat and cold in the head and find it is a good remedy. I highly recommend it.'

MISS CLARA B. COLBY, of London, Ont., writes;—"I had a continuous cold in the head for years, and never used anything giving such quick results as Catarrhozone. I am delighted at last to find a remedy that positively cures colds. I strongly advocate Catarrhozone; it cures every time.'

Catarrhozone cures without drugs and disagreeable medicine. It is Nature's cure—soothing, healing and pleasant to use. You simply inhale the medicated vapor of Catarrhozone through a Catarrhozone Inhaler and get cured quickly. Two months treatment costs only one dollar. It can be sent by mail and used right at home any time during the night or day. Sold by druggists or by mail from N. C. Polson & Co, Kingston, Ont., or Hartford, Conn, U.S.A.

TOWN AND COUNTY NEWS

DASHES HERE AND THERE BY TIMES' REPORTERS

Died in the Hospital

Mr. M. D Sullivan, of Emily township, took ill about a week ago, and was sent to Toronto Hospital, where his death took place. His remains arrived here on the 5.30 train last night. He was a son of the late Andrew Sullivan, of Emily.

To Our Readers

We would ask our subscribers to bear with us during the cold snap, as we are greatly handicapped in getting out our paper, owing to insufficient power. We are ready for the press at 4 a.m., but, as our machines are operated by electric power, and this having been shut off for some days, we find it impossible to get our paper around as early as usual.

Should Women Smoke?

The London Chronicle is discussing the question, "Should women smoke," and we select the opinion of a prominent English physician on the subject;

Mr. William Henry, D.Sc., says that when smoking agrees, and is judiciously practised, it does a woman good, soothes her nerves, refreshes her brain, aids her digestion, allays her bodily fatigue, and acts as a useful aperient. But she should not inhale or drink alcohol, while she is smoking. At clubs, she often does both. Women, adds the writer, should eschew the pernicious cigaret, both for the sake of their eyes and their teeth, or use a "holder." Better still, they should smoke a long clay pipe. The old-fashioned "churchwarden" is the most healthy of all pipes. I suggest the founding of a "Woman's Churchwarden Club." A pretty woman emitting occasional graceful whiffs from such a pipe and in intervals daintily toying with its stem would present a charming sight.

Perhaps some of The Times readers would like to express themselves on this subject.

HANDS AND FEET FROZEN

Mr. Kelly and Son, of Trenton, Suffer from the Cold

Mr. Kelly and son, of Trenton, who have been at a lumber camp back of Lakefield, while on their way to town yesterday, suffered much with the intense cold, and as a result the father had his foot badly frozen, and the son his both hands. They were conveyed to St. Joseph's hospital, where medical attention was given them. The son may lose both hands.

INJURED BY FALLING TREE

Accident of Two Weeks Ago Results in Victims Death

As a result of injuries received at a Burleigh camp about two weeks ago, Mr. John Robinson, of Ashburnham, passed away yesterday. The deceased was felling a tree when it swerved and fell on him with the result that he has been gradually sinking ever since. A wife and one child in its second year, are left to mourn his loss, and the heartfelt sympathy of the entire community is extended to the bereaved ones in this, their hour of trial.

WEDDING BELLS

Miss Lizzie O'Donnell and Mr. Frank Greig United in Marriage

Another addition to the list of pretty Peterborough weddings was made on Tuesday last, when Miss Lizzie Donnell, of Ennismore, and Mr. Frank Grey, of Buffalo, were quietly wedded in St. Peter's cathedral. The bride looked charming in a suit of pearl grey venetian, with white silk applique trimmings, and wore a picture hat. Miss Annie Conway, of Bridgenorth, assisted the bride, her dress being of steel grey with white satin trimmings. The groom was supported by his brother, and after the ceremony a dainty wedding dinner was partaken of at the Smith street residence of Mr. Edward Phalen.

The happy couple left by the G.T.R. for Toronto, where they will reside.

MR. EARDLEY-WILMOT ELECTED

Central Industrial Exhibition Association Appoint a Secretary-Treasurer

At a meeting of the Directors of the Central Exhibition Association Mr. K. Eardley-Wilmot was elected Sec.-Treas. for the ensuing year, in place of Mr. W. J. Green, who has occupied the position for a number of years. The directors purpose making special endeavor to make this year's exhibition the most successful ever held here. It is expected that the street cars will be running to the grounds, which will, of course, be a great convenience. Mr. Hughes-Charles, the enterprising President of the Association, is determined to make the exhibition one of the best in the Province, outside of the large cities.

SCHOOL TEACHER IN TROUBLE

Accused of Making Little Girl Stand Out in Cold for Two Hours

Mr. George Stevens, of the Fifth Ward, is a vexed man these days and if his story to The Times this morning be true, he has a very excellent reason for his vexation. Mr Stevens wishes The Times to state that a certain young lady, a school teacher here, made his little girl stand outside of the school room door for a certain time, as a punishment for some misdemeanor. The teacher evidently forgot the child, and she had to stand there in the cold for two hours. He also states that information has been sent to the inspector. If this be as he states it certainly was nothing less than barbarism to cause a child to stand outside, for such a length of time, with the mercury below zero.

The Marlboros Here

The C.P.R. train from Perth was delayed here yesterday morning, and great praise is due the company for the courteous manner in which they looked after the comforts of their belated passengers. Nearly fifty were provided with breakfast at the National, the Marlboro hockey team, of Toronto, being among this number. The latter played at Perth on Tuesday night.

IN SAMAR'S WILDS

Our Soldier Boys Have Many Hardships

A Surgeon in the United States Volunteers serving in the wilds of Samar, Philippine Islands, scouting every other day and being shot into every night by way of variety, says; "Scouting through dense forests overgrown by luxuriant vines was like entering each day into a tunnel.

"The foliage was so dense, no light of the sun ever penetrated or breath of wind ever entered and there were miles and miles of this trail, the monotony being broken only by bolo attacks upon us by the insurgents.

"Without water—and no one knows what that means to a thirsty soldier unless he has travelled miles without one drop in his canteen —we marched, on food unsuited to the climate. These things and the violent work, broke many of us down physically, some with fevers, some with dysentery and others with organic troubles.

"My mitral valve finally refused to perform its work and when my skin turned blue with both my limbs swollen to twice their natural size and I saw two people where there was only one I was sent home to die. But I fooled some of the best surgeons in the service by simply adopting Grape-Nuts as a food.

"Nothing would remain on my stomach, not even water, and ice was an unknown product in Samar. Everything had been tried and every food had failed, until, coming home to die, one of my companions on the trans-continental train advised me to try Grape-Nuts.

"I did not know what they were, but I looked over the menu once again and noticed Grape-Nuts on the bill of fare. Some were ordered and with nice thick cream the food seemed to strike the right place, and from that day to this I have been a user of Grape-Nuts. It solved the problem and brought me back to health and now I have it on my table twice a day.

"As a medical officer I have recommended Grape-Nuts food wherever I had a weak stomach to treat and the results have always been splendid.' Name given by Postum Co., Battle Creek, Mich.

Look in each pkg. for the famous little book, "The Road to Wellville."

BREEZY LOCAL BREVITIES.

Gathered by The Times Reporters on Their Daily Rounds

—The High Court of Justice meets on March 14.

—The Board of Works met last night.

—Tuesday evening's Toronto papers did not arrive till last night.

—The Times wants a good circulation canvasser, to whom good wages will be paid.

—Work on Roy's new studio is progressing satisfactorily, notwithstanding the cold weather.

—No mail reached Peterborough from the east yesterday, and no western mail came in till 5.30

—The excitement at Tuesday's police court was evidently a rare thing. There was no court again this morning.

—The funeral of the late Miss Lottie Cochrane, of Millbrook, has been postponed until tomorrow afternoon owing to the heavy roads.

—About four quarters of beef constituted the display at the Peterbrough market this morning. Few buyers were around.

—The official board of the George street Methodist church met last night and discussed church matters.

—Ping pong! At half price! A consignment of fine sets has been purchased at reduced rates and they will go while they last at half price. At the Times Bookstore.

—Tonight the annual dinner of the Peterborough Rugby Club will be held at the popular restaurant kept by W. McCallum, George street.

—Mr. W Jemison, of Manvers, disposed of his dairy supplies, farm stock, etc., by public auction yesterday.

—"About a hundred travellers are stalled in town,' remarked a drummer at the Oriental yesterday. The commercial men are certainly enjoying the cold snap.

—Several water pipes were frozen up around town yesterday and the Light and Power Co.'s men were kept busy. A freeze up at Brock street rink delayed matters for a short time.

—The Separate school teachers held a convention yesterday, as the schools were given a holiday. Some interesting discussions, on Educational subjects, were enjoyed by those present.

—The auction sale of hardwood and bush land, which was advertised to take place at the Munro House yesterday afternoon, was postponed till Saturday 27th. Owing to the impassable roads few were able to get here, even the owners of the estate being absent.

—The midnight train was detained at Locust Hill on Tuesday night, and the morning trains from Toronto were delayed so that no Toronto papers arrived, and the popular Morning Times sought by all with more than usual eagerness. Our late night despatches are direct from headquarters and the news conveyed through this medium is the first to reach Peterborough. A prominent business man remarked yesterday afternoon "the first news of the New Brunswick elections was the report in this Morning's Times."

SOCIAL AND PERSONAL

Movements of the People—What They Are Doing and Saying

—Mrs. Nugent is spending a few days in Toronto.

—Col. J. Z. Rogers, of the Fifth Ward, General Manager of the Peterborough Canoe Company, is suffering from an attack of rheumatism.

—Arrivals at the National; W. D. Fox, Toronto; W. C. Percy, J. T. Mercer, Belleville; H. McDougal, Fenelon Falls; Capt. A Stalker, Campbellford; J. Golden, Toronto.

—Mr. A. W. Cressman left yesterday for Montreal. It is to be hoped that he took a couple of days provisions with him, as his chances of being stalled in a snow bank en ruote, are good.

—Mr. Lou Brooks, of the Palace Hotel, has been visiting Port Perry friends for the past few days, and was expected home last evening, but the irregularity of the trains has no doubt delayed him.

—At the Oriental; J. H Hunter, T. Christie, Toronto; D Duggan, Toronto; H. McMillan, Calgary; W. H. Heron, Hamilton; G. F Forster, Toronto; J. S. Fry, St. Thomas; G. W. Woodland, Toronto; G. J. Sherry, Norwood, T. J. Wilkins, Stratford; C. L. Turnbaine, Toronto; B. Leeser, Montreal; G. Gilbert, New York; W Haugh, Montreal; W. Smythe, Pembroke; J. McLaughlin, H. Griffith, J. Fitzgerald, W. Anderson, A. McBride, J. Ryan, F. Armstrong, A. McBurney, D. Carpenter, Toronto.

CURE FOR APPENDICITIS

Patient Has But to Walk on All Fours Four Times Daily

Berlin, Feb. 17—The medical journals report some remarkable cures of mild cases of appendicitis are being made by a new method of treating the disease before the knife is needed. Certainly it is an original —almost an aboriginal—method.

It is nothing less than to require the patient to walk on all fours for twenty minutes four times a day. It is claimed that certain muscles around the vermiform appendix are brought into play and strengthened by this quadrupedal cure, which are unused when a biped walks erect. Others are relaxed, and the localised inflammation has opportunity to subside.

A well-known diplomat, celebrated for his haughtiness and punctiliousness, was cured of beginning appendicitis by this method lately. His associates and the fashionables are laughing in their sleeves when their imaginations conjure up his proud excellency's posture while undergoing treatment. The four-footed dose is recommended in dyspepsia, too, but, of course, it should be taken before meals.

It pays to advertise in The Morning Times.

$3000 FORFEIT

Will be paid by the World's Dispensary Medical Association, Buffalo, N. Y., if they cannot show the original signature of the individual volunteering the testimonial below, and also of the writers of every testimonial among the thousands which they are constantly publishing, thus proving their genuineness.

"For about two years I suffered from a very obstinate case of dyspepsia," writes E. E. Secord, Esq., of 13 Eastern Ave., Toronto, Ontario. "I tried a great number of remedies without success. I finally lost faith in them all. I was so far gone that I could not for a long time bear any solid food in my stomach; felt melancholy and depressed. Some four months ago a friend recommended your 'Golden Medical Discovery.' After a week's treatment I had derived so much benefit that I continued the medicine. I have taken three bottles and am convinced it has in my case accomplished a permanent cure. I can conscientiously recommend it to the thousands of dyspeptics throughout the land."

A man can succeed and be strong if he heeds Nature's warnings. When there is indigestion, loss of appetite, ringing in the ears, dizziness, spots before the eyes or palpitation of the heart; any or all of these symptoms point to weakness and loss of nutrition. Dr. Pierce's Golden Medical Discovery is the medicine to turn to.

"Golden Medical Discovery" contains no alcohol and is entirely free from opium, cocaine and all other narcotics. It is strictly a temperance medicine.

Accept no substitute for "Golden Medical Discovery." There is nothing "just as good" for diseases of the stomach.

The "Common Sense Medical Adviser," 1008 pages, in paper covers, is sent *free* on receipt of 31 one-cent stamps, to pay expense of customs and mailing *only*. Address Dr. R. V. Pierce, Buffalo, N. Y.

FRANCE WILL FIGHT TO HELP SAVE RUSSIA.

Opinion in Favor of the Russian Growing Throughout France

Paris, Feb. 19—One of the most notable events of the first fortnight of the war has been the steady increase of sentiment here, favorably to giving Russia every possible moral and sympathetic support. At the outset the French officials and public generally maintained that the interests of France demanded that she keep clear of the possibility of any war entanglements growing out of the Franco-Russian alliance. This led some newspapers to assert that France was placing self-interest before duty, and deserting her best friend in the hour of greatest need. A gradual reaction has occurred until official and public opinion runs very very strongly in favor of strengthening Russia in every way short of actual participation in the war. It was thought that the large Dreyfus element would antagonize Russia, owing to the latter's attitude towards the Jews; but, on the contrary, Joseph Reinach, the friend and biographer of Dreyfus, has published a letter declaring the honor and interest of France command her to affirm her sympathy for Russia and to loyally hold up the alliance. However, French feeling, which is usually demonstrative, has not shown any wild enthusiasm on behalf of Russia. This is rather marked contrast with the uproarious manifestations at the time of the Czar's visit to Paris and other recent events. Two popular subscriptions have been opened for the wounded, one by the Russo-Chinese bank, and the other by the French newspapermen. The Russian ambassador, M. Nellidoff, heads the former with a subscription of $100. Many individuals are showing personal sympathy and are offering their services. The Russian embassy receives about one hundred offers daily.

Much interest is manifested here in the parts Prince Louis Napoleon and Prince Jaime de Durbon are taking in the military service of Russia. The reports that the former who is an officer of high rank in the Russian cavalry, who was in France recently to attend the obsequies of Princess Mathilde, and who left hurriedly for St. Petersburg at the outbreak of the war, is to be given command of the entire cavalry force operating in Manchuria, is said to be well founded.

Prince Jaime, who is an officer of Russian volunteers, under the Governmenor-General of Russian Poland, wrote at the outbreak of the war requesting an assignment to the first detachment of volunteers to be sent to the theatre of operations, an he has since telegraphed an earnest request to be assigned to immediate duty at the front. Both menare of the Napoleonic type, which a large French element devotedly admires.

It is not intended by the French Government to issue a formal proclamation of neutrality similar to that of the United States and Great Britain. The officials here say that usage does not require that; the neutral course of the government has been sufficiently defined by the instructions sent to the French foreign, colonial and marine Ministry's representatives abroad. It is specifically asserted that the absence of a proclamation has not the slightest significance as indicating a desire to avoid exciting Russian susceptibilities. It is merely compliance with the French custom regarding the observance of neutrality.

MMIGRANTS HERE IN LARGE NUMBER

lundreds are Staying in the City Until Arrival of Spring

ANY LOOKING FOR WORK

sh of People to This Country Has Begun Very Early This Year

ontreal, Feb. 19—The cold snap is ng felt severely among the newly ived immigrants, many of whom making Montreal their headquars until the spring comes and they either go West or go into the ricultural districts in Quebec. The ployment bureaus are thronged ry day with men, and occasionally rk is supplied, but the supply is so ch in excess of the demand that ay have to be turned away with- the work for which they look Times representative went into of the bureaus yesterday and nd a horde of men including Engmen, Italians, Greeks, Scotchmen, fact all races represented. There re some vacancies in the lumber mps on the Ottawa and northern tricts, not many, for the season advancing, and the men that could crowd into the small office conted themselves by standing on pavement and looking at the n "Men wanted." A few of these wcomers have been able to get rk around the city, but the life is various and the intense cold has d upon them, especially such as il fromt he Southern lands, where nter is a thing unknown and pertual sunshine reigns.

The head man of the employment fice said that he had been deluged th men looking for work, but in ny cases it had to be refused, and men went away willing for the rk that was not. He was of the inion that more immigrants than er had come to Canada this winter ason and that the majority of ese had found a resting place in ontreal for the time being. In rent years it had been the custom for bulk of the immigrants to der their arrival until the back of the inter was broken, so that they uld go straight out west to Mania and Ontario. This year, however, the influx had come much earr and as an old fashioned winter Montreal as well as the rest of Dominion in its grip, much hardip was being experienced by the wcomers.

There are many of these little employment bureaus scattered throught the city. Some look after the alian portion of the immigrant nd. Others are more cosmopolitan nd number among their callers men nd sometimes women of all nations. t the fact remains that there is no ork for those who seek it, and until e snow melts and the spring comes rom the south, the lot of the imigrant will not be one of luxury nd ease.

—The notorious John Alexander Dowie was recently mobbed at Sydey, New South Wales. Rowdy scenes ave characterised his meetings and t one time he was compelled to ee in a cab. Poor Elijah II, hadn't ime to ring for a chariot of fire.

LABOR TROUBLES GALORE

Laborers Want Nine Hours and Bricklayers Eight Hours Per Day

Hamilton, Feb. 19—Some time ago the bricklayers decided to work but 8 hours a day and demanded 50 cents an hour for their time. The contractors accepted, and it looked as if the matter was settled, until the bricklayers laborers announced that they would work nine hours a day or not at all.

RUSSIANS NOT UNITED

Government Bitterly Attacked and as Enthusiastically Supported

St. Petersburg, Feb. 19—The demonstrations of patriotism have not been without manifestations against the government. There was one such yesterday at the funeral of Nokolai Michailovski, the well-known historian of Russian literature. Many thousands of the most talented Russians, steeped in the literature of western Europe, thought and followers of Spencer and Darwin, made strong speeches against the government which has plunged the country into a war that will cost untold wealth and blood. As the crowd was very great, strong forces of police were notable to prevent these inflammatory speeches.

Great demonstrations of patriotism were made here yesterday. Huge crowds singing the national anthem, presented themselves at the palace of the czar and czarewitz and from there marched to the Anitchkoff palace. Afterward the enthusiastic body marched to the French embassy and sang national songs.

A number of additional battalions from each guard regiment have been entrained at Nicholas station on their way to the far east. As the soldiers marched to the station the passersby poured out the contents of their purses into their hands. Ladies gave them jewels they were wearing and tradesmen swarmed out of their shops and showered tobacco and provisions upon them.

KEENE.

—Two rinks of Peterborough curlers came down on Thursday last and played a friendly game with the home curlers, with the result that Keene was defeated by 12 shots.

R McCamus, 19	G W Ferguson, 15

—The annual ball of the Hockey Club was one of the most enjoyable events of the season. There were about 65 couples present. Butcher's orchestra supplied excellent music, and Archie Moore was floor manager.

—Mr. Wm Laing had the misfortune to have his leg broken, while skating at the rink on Monday evening. Dr. Shaw reduced the fracture and it is healing nicely.

—Mr. D. Esson, of Peterborough, spent a couple of days at home this week.

At the home of Mr. James Mcneill the marriage of his neice, Miss Matilda Mcneill to Mr. Preston, of Bethany, took place on Monday afternoon, Rev. D. D. McDonald officiating.

—Keene is out of the T. V. League for this season, having been defeated by the T.A.S. on Monday evening by a score of 7—4.

HAS ENGINE SIZE OF WATCH

Canadian Shows Minute Invention That Runs Big Saw

New York, Feb. 19—The national outoboat exposition will begin its second week tomorrow. The marvel of the exposition, it is said, is a new steam engine invented by a man named Weeks, from Canada. Mr. Weeks has a six-horse powersteam engine which is about the size of a dollar watch. It is made of old boiler tubing and is applied to a ten inch circular saw, which cuts through cypress or oak several inches thick. A fifty-horse power engine, if made of nickel steel, Mr. Weeks says, could be held in a boy's hand, or carried in the pocket of a sack coat.

STILL NEED FOR LABOR

County Councils and Farmers' Institutes Ask for More Men

During the last visit of Hon. Clifford Sifton to Toronto, a labor deputation called upon him to urge that the policy of encouraging the immigration of farm laborers and mechanics be revised. They held that there was no need in Canada for more labor, and that native Canadians were being discriminated against. That their contention is hardly justified by the facts, appears from the number of communications received by the Provincial Minister of Crown Lands from County Councils and Farmers Institutes asking for farm laborers. So far representative bodies from the following counties have made such representations;—Brant, North Oxford, Halton, Algoma, Norfolk, East Durham, Carleton, Parry Sound, Renfrew, Kent, Ontario and Frontenac.

WRATHY RUSSIAN ENTERS PROTEST

Thinks That Canadian Press Treats his Country Unfairly

TWO SIDES TO QUESTION

But the Only Side Presented to the Public Here is That of Japan

Montreal, Feb. 19.—Mr. Charles W Dublin, a Russian gentlemen, who has been resident in this city for some time, is of the opinion that his native land is not receiving fair treatment at the hands of the Canadian press. There are, he says, two sides to the present difficulty between Japan and Russia, and that thus far only one side has been presented—that of the Japanese.

"A great deal," he remarked, "has been made of the absolute form of government which obtains in Russia, but in reality that is the only form of government which would be suitable to the opinions of ignorant peasantry. For centuries they have been in the absolute control of the nobles and to give them any large degree of liberty at the present time would be disastrous.

"Born and educated in St. Petersburg, I occupied a Government post for four years, at the end of which time I was threatened with exile to Siberia for too great liberty of thought and speech. I have come to Canada to work up trade with the Doukhobors.

"Everywhere I go I find the sympathies of the people are with Japan and only the other day one of the few Russian gentlemen in Canada ventured the opinion that all Russians who had been maltreated by the Government were anxious for the success of the Japanese arms. Personally I do not think that is the case. Reforms have undoubtedly to be worked along certain lines in Russia, but they will not necessarily be more speedily effected by the humiliation of my native land. So that when any Russian says any considerable number of my fellow-countrymen, no matter how badly treated, are favorable to the cause of Japan, he grossly misrepresents the true condition of affairs.

"I have nothing to say regarding the merits of the dispute which has now been submitted to the arbitrament of war. These may or may not be favorable to Russia. Possibly Russia should not have promised to evacuate Manchuria if she did not intend to do so. For my own part, I do not think that she ever had the slightest intention of getting out once she had got in. But these considerations have nothing to do with the war, now it has commenced, and all Russians, no matter where found, will take pride in the victory of Russian arms, which must ultimately come."

THE WAR NEWS FAKIR

Fantastic Tales of Battles Published in London Papers

New York, February 19 — The Tribune's London correspondent says —"Rumor mongers are still plying their trade and newspapers are filled with fantastic tales and contradictions. Messages from war correspondents are deferred until the information in them is stale, even when the harmlessness of the disclosures is apparent. Military writers are suspending critical articles on the progress of the war until official bulletins can supply trustworthy intelligence without the intervention of the censorship. The operations of the land campaign are screened from view, and the concentration of the Japanese army on the line of the Lower Yalu River, with a flanking column in the direction of Mukden, is a favorite theory of the armchair strategists. Seizure and condemnation by Japanese warships of cargoes of coal under neutral flags is sanctioned by the British Foreign Office, and the practice of including coal in the list of contraband of war whether connected with the belligerent fleet or not, seems likely to become a settled practice among maritime nations. Experts on international law assert that this practice will tend to shorten naval wars."

A BARBOROUS ARMY

Outrages Committed by Russians on the March

London, Feb. 19.—Unpleasant stories of Russian brutality come from several quarters, like the outrages upon Japanese women and the looting of Japanese property in Vladivostock, the massacre of unresisting Chinamen somewhere near Dalny, and the repeated reports of outrages upon Japanese refugees from other Russian cities. Ordinarily these might be taken as a part of the mutual exaggeration of war, but in this case it cannot be forgotten that the Russians have a bad reputation. The outrages of Russian troops upon women and children in the march to Pekin made the blood of the more civilized allies run cold. It is not quite fair either to attribute this brutality to lack of civilization, because the highly cultured German troops were little behind the Russians in slaughtering and torturing innocent non-combatants. The world knows little of the worst performances of the half savage Cossacks in 1900 when they choked the current of Manchurian streams with massacred villagers. This sort of thing generally brings its own retribution. We suspect that the "Boxers" who are gathering to break the Siberian railway and harass the rear of Russia in Manchuria have not forgotten the the bloody dragonnade of 1900.

WAR TROPHIES ARRIVE IN JAPAN

Flag of the Variag will be Presented to Emperor

NEWS FROM VLADIVOSTOCK

Ten Torpedo Boats Frozen Up in Harbor—Fleet Probably in Port

Tokio, Feb. 19— The flag of the Russian cruiser Variag, recently sunk off the harbor of Chemulpo, which will be presented to the Emperor as the first trophy of the war, reached Susebo yesterday on the cruiser Chiyoda, together with the anchor, a gun and other souvenirs of the destroyed warship. The captain of the cruiser Chiyoda has been summoned to Tokio to recount to the Emperor the story of the engagement. He will present the flag to the Emperor.

The German steamer Batavia has just reached Moji, from Vladivostock, with 1,500 Japanese refugees on board including the commercial agent of Japan at Vladivostock. The latter reports that ten Russian torpedo boats are frozen up at that port, unable to move. The commander of the garrison and the local authorities at Vladivostock called on the departing agent and complained that the Japanese had opened hostilities wiothout having declared war.

When news of the opening of the war reached Vladivostock the squadron there was hastily painted and cleared for action, leaving port on the afternoon of February 9. He believed that it returned to Vladivostock after sinking the Nakonoura Maru.

There are no torpedoes nor mines sunk at Vladivostock and the place is totally unprepared to resist attack. Massing of troops on the right bank of the Yalu continues, the Russians evidently believing that the Japanese intend to make their main attack there with the object in view of forcing their way through the Russian lines and destroying the railway, thereby cutting off all communication with Port Arthur and Vladivostock.

The Japanese are again agitating the construction of the Fusan-Seoul Railway and great quantities of material used on the Russian-Seoul Rail way are available. In the event of a prolonged war a railway between these points would be of immense advantage.

THE NAVAL OUTLOOK.

BRITISH EXPERTS BELIEVE RUSSIA IS DOOMED

Japan Now Practical Master of the Sea—Secret Movements of Japan's Fleet

London, Feb. 19—W H Wilson, the naval expert says: "The news from Hakodite that the Vladivostock squadron was seen entering the Tsugaru Straits on Friday shows that the squadron has been in that locality for three days, and this suggests that the Japanese now have had time to concentrate a sufficient force to deal with it in the naval battle stated to be imminent, on February 12. This is an indication that there is a Japanese squadron in these waters. Firing has since been heard. There are obvious reasons why the Japanese wish to destroy these four vessels or drive them back to port, because they may attempt to work toward the south and attack the transports now passing between Japan and some point unknown—possibly the Corean coast, possibly the Liao Tung Promontory. The absence of news concerning the whereabouts of the main Japanese fleet suggests some decided move, the results of which will be unknown for a few days although Admiral Togo may be cruising between Wei-Hai-Wei and Chemulpo, where he effectively blocks Port Arthur, or he may be at a temporary base at Blonde Islands, but he would hardly leave the Russian ships at Port Arthur unmolested unless his services were required in some other quarter."

RUSSIA'S ARMY FAR FROM BEING READY--AN OFFICIAL STATEMENT

Confesses That Much Time Must Elapse Before Military Operations Can Be Commenced--A Boast That a Blow will be Struck

St. Petersburg, Feb. 18.—An official proclamation, explaining the unpreparedness of Russia for war, and the necessity for the exercise of patience by her people, has been issued here. It is as follows;

"Eight days have now elapsed since all Russia was shaken with profound indignation against an enemy who suddenly broke off negotiations, and by a treacherous attack, endeavored to obtain an easy success in a war long desired. The Russian nation, with natural impatience, desires prompt vengeance, and awaits, feverishly, news from the Far East.

A MODEST BOAST.

"The unity and strength of the Russian people leave no room for doubt that Japan will receive the chastisement she deserves for her treachery and provocation to war at a time when our beloved sovereign desired to maintain peace among the nations. The conditions under which hostilities are being carried on compel us to await with patience news of the success of our troops, which cannot occur before decisive actions are fought by the Russian army.

"The distance of the territory and the desire of the Emperor to maintain peace were the causes of the impossibility of more complete and earlier preparations for war. Much time is now necessary, in order to strike at Japan blows worthy of the dignity and might of Russia, and, while sparing as much as possible the shedding of blood of her children, to inflict just chastisement upon the nation which has provoked the struggle, Russia must await the event in patience, being sure that our army will avenge an hundredfold that provocation.

"Operations on land must not be expected for some time yet, and we cannot obtain early news from the theater of war. The useless shedding of blood is unworthy the greatness and power of Russia.

NEW GOLD ZONE IN ALASKA

Miners Report Discoveries Extending Over 2,000 Miles

Tacoma, Wash., Feb. 19—New gold discoveries prove the existence of a second gold zone traversing the British Yukno and Alaska and lying considerably southward of the first discovered zone, which crops out at Klondike, Kuyukuk and Name. The first strike in the new zone comprises the Tanana gold fields. Last summer new rich placers were found in the Alsek country, west of White Horse. Reports are now being received of placer creeks in hitherto barren country at the head of White river, west of Tanana.

Gold has been discovered in the Susitina and other streams of western Alaska, while still other placers are being worked on Bristol bay.

The second gold zone apparently extends from near White Horse, at the head of Yukon navigation, along the northern foot hills of McKinley mountain range and thence westward to Cook inlet and Bristol bay, a distance of 2,000 miles.

BRITAIN HELPS JAPAN

Japan Gets British Money as Well as Sympathy

London, Feb. 19—British sympathy for the Japanese has been manifested in a remarkable response to the appeal recently made for the soldiers and sailors widows and families fund. Japanese are accosted in all parts of London by persons desiring to contribute to the fund. At a cafe in Leicester square, a Japanese gentleman, while dining, was approached by a party of nine, who had occupied an adjoining table, and asked to forward ten pounds ten shillings to the fund as a token of real British regard.

A contribution of twenty-eight shillings, entirely in farthings, was received by an old woman, who handed it to a member of the legation. A little girl sent eight pence explaining it was a month's savings. She wished it to go to the poor little Japanese orphans. A poor working man brought a shilling, remarking. "You are our pals, Japs, and a good sort you are." In many strange ways money is pouring in.

A member of the Japanese legation expressing his great gratification, remarked that England was certainly practising a benevolent neutrality.

Local Sports

Opera House, Tuesday, Feb. 23rd, 135 lb. championship of America, Geo Kennedy, of Montreal, and Max. Wiley, of Rochester, N.Y. 12-round boxing. 133 championship of Canada Jack Mason, Montreal, vs. "Hockey" Jones, of Hamilton. Two fast preliminaries.

An Eko Camp member informed us last night that they are seriously thinking of claiming their game with the C.D.A. by default. The C.D.A wants to wake up or they will have to put up the oysters.

The following rinks, who have not as yet played the first draw for the Kendry Cup, are requested to do so before six o'clock this evening, or drop out of the running for same;

1. Davidson vs. Waddell.
2. Frost vs. C. Rutherford.
3. Ferguson vs. Connal.
4. Clegg vs. Jeffries.
5. Whiten vs. Crane.
6. Ray vs. Blade.

The following are requested to play today, or not later than Saturday, the 20th inst.;

No. of ice.

1. Winners of 1 vs. winners of 2
2. Winners of 3 vs. winners of 4.
3. Neill vs. Kerr.
5. Knapman vs winners of Ray-Blade.

On Wednesday evening the local curlers engaged in a series of games in the Kendry Cup competition. No. 1, E B Edwards lost to W. J. Thompson by 13 to 11. W. G. Morrow was defeated by R. Kerr by 16 to 11; R. Neill won from Dr. Eastwood by 12 to 8; and Geo Giroux won from C. N. Brown by 14 to 8. There were some close finishes. In the Neill-Eastwood game, the score was a tie up to the 13th end. A scratch game between S. Clegg and R. J Frost resulted 8 to 7 in favor of the former.

WEATHER NOTES

Snow flurries; milder.

ANNUAL RUGBY DINNER.

MEMBERS AND FRIENDS OF THE CLUB SPEND A PLEASANT EVENING

At M'Callum's Banquetting Hall—A Sumptuous Repast was Spread

The annual dinner of the Peterborough Rugby Club was held at Mecallum's restaurant, last evening, and about twenty officers, members and visitors were present. It was a jolly gathering, brimming with witticism and hearty laughter, and no one need hesitate in thinking that the Rugby boys of this place are as fine a lot of fellows as ever faced a ball. The spread prepared by our popular caterer consisted of the choicest viands, and the pretty floral decorations added to the beauty of the daintily set tables.

The Peterborough Quintette, which consisted of Messrs. J Halpuny, K. Halpuny, J. Gardiner, L A Haly and A Seward, provided music throughout the evening, and Mr. Jolliffe, a well-known local singer, rendered a selection which received well-merited applause.

The genial president, Mr. E. S Clarry, acted as master of ceremonies, and previous to entering upon the toast list, gave a brief outline of the history of Rugby in the Midland metropolis. He was pleased to see so many rugby enthusiasts present, and remarked the marked tendency of gatherings of this kind to promote a friendly feeling among the different athletic clubs. The young men of the various clubs were to be complimented on the earnestness which they all displayed in endeavoring to uphold the honor of Peterborough in the world of sports. Although the Rugby team was not successful in capturing the championship last season, he felt that they should not be discouraged as the odds against which they had to contend were most unfavorable. Mr Crowley, the energetic captain, had shown himself worthy of his position, and his success in forming as strong a team as he did, under the adverse circumstances, was without equal in the history of the club. Mr. Chris. Graham had rendered most valuable assistance as secretary-treasurer, and never had more faithfulness been displayed than that shown by the secretary. During the past three years the make-up of the team had experienced many changes, Mr. Crowley being the only veteran player.

The captain and the secretary responded, and the former very modestly explained how he had produced a team from players who, at the beginning of the season had received a "chalk talk" on rugby before they even knew the rules. "We are good losers here in Peterborough" remarked the speaker, and then Mr. Graham arose to read his report. The year had been a successful one financially, the receipts, including $107 membership fees, amounted to $512, while the disbursements were $135, leaving a good balance in the treasury.

Mr. R. H. Kenner proposed "Sister Sports." "No club in town has had more to go up against than the P. R. C." said Mr. Kenner, "but they have displayed an excellent sporting spirit." Mr. F. Kerr, in the interests of lawn tennis, Mr. Glover for the Hockey Club, and Mr. Clarke for lacrosse, made able responses. Mr. Rickey's "Ladies" came next, and they were "jolly good fellows" too. Messrs. Noble and Ford supported him. The president then proposed "The Press," which was replied to by Messrs. Jolliffe, Littledale and Anderson. The meeting was then brought to a close with the National Anthem.

A PRESENTATION

Mr. Robt. Henderson Received a Locket from Friends of Eko Camp

On Wednesday evening Mr. R. H. Henderson was waited on by a number of members of Eko Camp, and presented him with a handsome locket, previous to his departure for Barrie. The departing citizen was closely allied with military matters here and was a color-sergeant in No. 8 company. The following address was presented to him;

Peterborough, Feb. 17, 1904.

Mr. Robt Henderson;

Dear Bob,—The members of Eko Camp have learned with regret of your intention of shortly leaving Peterborough. We regret very much your going away as you have always been an enthusiast for the success of the club, and exceedingly pleasant companion, and our gatherings have never been complete unless you were present. We have always found you up and up in every way, and no member who has left town will be more missed than yourself.

We ask you to accept this little gift, which we hope will serve to draw to your memory the many happy times the members of Eko Camp have spent together during your residence in Peterborough.

Our very best wishes are for your future success in your new home.

Fred A. Clarke, W. Comstock, J. M. Watt, J. Comstock, H. A. Gillespie, Jos. Gibson, M. Comstock, G. M. Jackson, W. Alf Smith, R. M. Glover, W. R. G Higgins, President, Robt. Cottrell, Robert Matchett, J. M. Gemmell, R. H. Elliott, W. Cavanah, R. P Watt, Sec.-Treasurer.

There is a suddenness about Japanese methods which must jar the leisurely diplomatists of Russia.

AUSTRIA HAS 30,000 MEN READY TO INVADE ALBANIA

The Situation in the Balkans is Considered Very Serious in Rome

Special to THE TIMES;

Rome, Feb. 18.—The situation in the Balkans, especially since the revolt of the Albanians in the distric of Kiakova, Province of Ipek, is considered here to be serious. It is declared that Austria has 30,000 men ready to invade Albani, hu if such a move were made Italy would consider it as disturbing the balance of power on the Adriatic and most detrimental to her interests there.

St. Petersburg, Feb. 18—A telegram received here from Port Arthur, says the Japanese have captured the Okhosk Kamchatka Company's steamers Kolik and Vorik.

Special to THE TIMES;

London, Feb. 18.—The Japanese Legation here received an official dispatch from Tokio tonight saying it was not true that any Japanese vessels had been destroyed so far in any of the various naval engagements, and that all necessary re fleet remains impact. This mess pairs had been made. The Japanessage also denies the report that the Japanese were driven from the neighborhood of Kinchau, after a scrimmage in which 150 Japanese were taken prisoners, and declares that they made no attempt to land at Pigeon Bay. It says Japan's forces have, up to the present time, made no attempt to land at any point where they would come in contact with the Russians, and that consequently, all reports of land actions and Japanese losses are untrue.

CAN MAKE MEN SOUND AND STRONG.

Detroit Specialist Discovers Something Entirely New for the Cure of Men's Diseases in Their Own Homes.

You Pay Only if Cured

Expects No Money Unless He Cures You—Method and Full Particulars Sent Free—Write For It This Very Day

A Detroit specialist who has 14 certificates and diplomas from medical colleges and boards, has perfected a startling method of curing the diseases of men in their own homes; so that there may be no doubt in the mind of any man that he has

DR. S. GOLDBERG,
The Possessor of 14 Diplomas and Certificates Who Wants No Money That He Does Not Earn.

both the method and the ability to do as he says Dr. Goldberg, the discoverer, will send the method entirely free to all men who send him their name and address. He wants to hear from men who have stricture that they have been unable to get cured; prostatic trouble, sexual weakness, varicocele, lost manhood, blood poison, hydrocele, emaciation of parts, impotence, etc. His wonderful method not only cures the condition itself, but likewise all the complications, such as rheumatism, bladder or kidney trouble, heart disease, nervous debility, etc.

The doctor realizes that it is one thing to make claims and another thing to back them up so he has made it a rule not to ask for money unless he cures you, and when you are cured he feels sure that you will willingly pay him a small fee. It would seem, therefore, that it is to the best interest of every man who suffers in this way to write the doctor confidentially and lay your case before him. He sends the method, as well as many booklets on the subject, including the one that contains the 14 diplomas and certificates, entirely free. Address him simply

Dr. S. Goldberg, 208 Woodward Ave., Room [illegible] Detroit, Mich., and it will all immediately be sent you free.

This is something entirely new and well worth knowing more about. Write at once.

Morning Times

This paper is the only Morning Daily published between Toronto and Ottawa and is largely read throughout Eastern Ontario.

Strangers visiting Peterborough are cordially invited to make their headquarters at the Times Office, where they will be provided with writing material.

The Times is a member of the Associated Press and receives telegraphic news each morning up to four o'clock.

The Times will be sent to subscribers in the district at 25c per month and to outside points at $5 per year, strictly in advance.

PETERBOROUGH, FEBRUARY 18, 1904

NAVY OF THE FUTURE

Nothing that can happen hereafter in the Russo-Japanese war will have a tithe of the effect on international politics, the advance of civilization and the development of the human race that will result from the success fo the torpedo boat, as demonstrated in the assault on the Russian fleet last Monday night.

This engagement at Port Arthur was a crucial test. The Russian vessels were surrounded by wire nets, which were supposed to arrest torpedoes; they were well provided with searchlights and duly guarded by a patrol. Yet the Japanese torpedo boats came close enough to them to wreck three of them, including the largest and strongest vessel in the Russian navy, and got away not only without losing a man, but without wasting a torpedo. The torpedo-boat therefore, has come to stay and improve.

Indeed, it has already been improved by making it a submarine boat. Every large navy now includes several torpedo-boats of this type and it is said, that the Russians have at Port Arthur, two of them, that were carried overland in sections. Although the submarines have not yet reached their highest development, there is every reason to believe that they will soon be the only kind of torpedo-boat is use.

The significance of the demonstrated success of the torpedo boat lies in its cheapness and its adaption to harbor defense. For the money now spent on one first-class warship, probably fifty torpedo-boats can be built, which will be a greater protection to a harbor than a fleet of ten or fifteen vessels. Apparently this will make coast defense so cheap and easy that anything like invasion by water will be impossible and the peace of the world will be immeasurably promoted. Of all countries the United States, with their interminable coast lines on two disconnected oceans, ought to experience relief.

The next step will be to adapt the torpedo-boat to the high seas. Already it is proposed that men of war carry submarine torpedo-boats on their decks, with machinery for launching them when needed. When this becomes practicable naval warfare ought, according to the lessons of the past, to be abandoned on account of its destructiveness.

There is a strong probability that war on land may come to end from a similar case. It is only on account of an international agreement entered into at The Hague conference, that explosives are not delivered from balloons, and the inclination to use balloons for this purpose was so strong in 1899 that the agreement not to use them had to be limited to July, 1905, before the powers would enter into it.

To all appearances, therefore, international and universal peace is in sight, and the torpedo, not The Hague conference, is the peacemaker.

A RETURN TO NATURE

Ernest Seton Thompson is to make an experiment with his young daughter which will interest the civilized world. The child, now three weeks old, is to be brought up in Indian fashion, without the frills of convention. In other words, she is to have the combined advantages of the barbarous and the civilized life.

The Seton home will be at Wyndygoul, Conn., and surrounded by the forest primeval. Little Ann is to sleep outdoors whenever the weather will permit, and will run wild as soon as she is able to run. She will not be shut up in an ill-ventilated schoolroom and will be kept out of the way of truant officers. Nature will be her primary teacher and he companions will be those harmless, wild animals of whose morals and manners her father approves. In this way it is expected that Ann will escape the ills incident to civilization and that she will have the strength, grace and beauty of a Diana and the wisdom of Minerva.

With all this in prospect there is no reason why Ann should not live to a healthy, happy, old age. In fact, 200 years from now admiring throngs may look on the marvelously fresh face of the healthy woman and ask with an expression of doubt, "How old is Ann?"

ALVERSTONE AND THE ALASKA AWARD

A notable statement concerning the Alaska award is made in the Canadian Magazine for February, just out, by F. C. Wade, K.C., who was one of the Canadian lawyers engaged in the case on the British side. It is the first definite public satement made from the inner offical knowledge, that Lord Alverstone after all argument was concluded personally and directly held that all four disputed islands in the Portland Channel were British—and then without consultation with his colleagues or explanation to them gave two of them to the United States.

The protest which Sir Louis Jette and Mr. Aylesworth made on this point used the following language:

"When the members of the Tribunal met after the argument and considered this question, the view of the three British Commissioners was that the Canadian contention was absolutely unanswerable. A memorandum was prepared and read to the Commissioners, embodying our views and showing it to be beyond dispute that the Canadian contention on this branch of the case should prevail, and that the boundary line should run to the northward of the four islands, thus giving them to Canada."

THE ANAEMIC YOUNG GIRL

Easily Noticed by Her Blanched Cheeks, Bloodless Lips and Dull Eye

Perhaps she is sixteen. Suddenly she seems to lose strength. Her beauty fades because her vitality is steadily decreasing. Dark circles appear under the eyes which become listreless and dull. Her spirits droop, for no girl can be contented and happy in such condition.

This may be quickly corrected by taking Ferrozone. It supplies what is lacking in the blood, purifies and strengthens it, and keeps it in perfect order. Ferrozone makes plenty of red corpuscles that manifest themselves in a healthy ruddy complexion. It aids the stomach to do all its work, and creates a natural healthy relish for food.

Every organ of the body is benefited by Ferrozone. It rebuilds the entire system, makes new tissue, strengthens weak flabby muscles, makes thin people fat and sick people well.

No case of Anaemia is too chronic for Ferrozone. It may take time, but if persistently used will cure in the end. It will give you a well developed form, clear complexion, pure breath and will restore the bloom to faded cheeks and color to the lips more quickly than any other remedy.

Every woman who desire a vigorous constitution, and the good looks that come with good health, should take Ferrozone after each meal regularly. It is a wonderful tonic for the brain, the nerves and the blood, and acts also as an efficient but harmless regulator of the menstrual flow. In fact for all diseases peculiar to women and growing girls, Ferrozone has no equal as your druggist can tell you.

Three weeks treatment costs 50c., or three boxes for $1.25. Sold by druggists and dealers in medicine everywhere, or sent by mail if price is forwarded to N. C. Polson & Co., Kingston, Ont.

EDITORIAL COMMENT

There is a suddenness about Japanese methods which must jar the leisurely diplomatists of Russia.

* * *

Russia has the best possible excuse for pressing her overdue war indemnity claim against Turkey. She needs the money.

* * *

The Japanese programme at present is to whip the Japanese by July next, but it should be remembered that this programme has been prepared without consulting the Czar's government, and like the railroad time tables, is subject to change without notice.

* * *

When one reads of J. J. Hill being victimized by two bogus Boer agents who were looking for lands along Mr. Hill's roads on which to plant an immense boer colony one wonders why anyone should ever waste his time on swindling poor people when it is so much easier and so much more profitable to swindle rich people and great financiers.

* * *

The pickets of the Machinists union now on a strike in Joliet, Ill., have struck against the union for higher wages, and the same thing happened in San Francisco. There is no more tyrannical employer in this world than a labor union, and no one is so unmerciful to labor as a laborite. In several instances the labor unions have adopted co-operation and become employers of labor. Then they join the employers associations and act just like other employers, except a little worse.

LONDON POLICE KILL A BURGULAR

Shot in Desperate Encounte with Detectives

OTHER THIEF CAPTURED

A Search for Stolen Goods Has Unexpected Results

London, Ont., 17.—In an encounter yesterday afternoon between two of the local detectives and two desperate characters, known as "Shorty Billy" and "Texas" who are suspected of having committed a series of burglaries in and around London during the past week, "Shorty Billy" was fatally shot. "Texas" is now in the police cells, charged with burglary.

An Epidemic of Burglaries.

During the past couple of months a number of midnight housebreakings and robberies have been perpetrated in the city. The cracksmen as a rule have shosen hotels as their places of operations, and Saturday night as the time, and the local detectives have been on a still hunt for the petrators ever since. The latest robbery took place on Saturday night last, when Cole's turning factory on Batirst street, was broken into and a quantity of tools stolen. On Monday two brothers named Frank and James Watson and Fred Moselly were arrested on suspicion of being concerned in this last crime. Yesterday morning two of the prisoners, Moselly and Frank Watson, pleaded guilty to housebreaking, and a quantity of the stolen tools were recovered. Detectives Nickle and Egelton were then told off to search Moselly's home on Ridout street.

An Unexpected Visit.

Their knock on the door of thhe house not being answered, the officers entered unbidden, and were confronted by Moselly's mother, Mrs. Richardson. The woman accompanied Egelton upstairs, Nickle remaining below. The latter had not waited long when in walked "Texas." As Nickle gave no evidence that he recognised the newcomer, the latter was taken off his guard. Shortly afterwards Egelton came down stairs, and Nickle imparted to him in a whisper the information that "Texas" was in the house, and the two approached the room where "Texas" was putting fuel in the stove. When "Texas" saw the two officers coming, he realized that he had been trapped, and instantly he whipped out a revolver from his left hip pocket. But the officers were too quick for him. They knocked the weapon from his hand, and soon had him upon the floor. The struggle was a strenuous one. Blood on the floor, on the man's clothing, on the officers' hats, and the crushed condition of these are among the proofs that the fight was desperate.

"Billy" Appears."

"Texas" caled to a confederate known as "Billy" for help, and a moment later the shutters on the kitchen window were torn open and two revolvers were thrust through the panes of glass. The man on the outside immediately opened fire on the detectives, each of whom replied with one shot, when the fellow drew back from the window and disappeared. Nickle thought he was coming in by the front door to help his pal, and started in that direction to meet him, when "Texas," who was struggling with Egelton on the kitchen floor secured another revolver, which he had secreted inside of his vest, and attempted to use it on the officer.

"Billy" Fatally Shot.

A search was then made for "Billy," and he was found lying in the snow near the frotn of the house. He had been shot in two places. One ball entered below the left ear, and lodged at the base of the brain, and the other pierced the breast, close to the heart. The man was still alive, but unconscious, and died in a few minutes. Either wound was sufficient to cause death. Egelton's escape was nothing short of wonderful. The desperado on the outside of the house fired two shots or more through the window, and one of these pierced the rim of the Christy worn by Egelton. The latter, however, did not receive a scratch. The dead man is supposed to have been one of the worst characters ever met by the local police. Sewn in his shirt were a number of fine saws, such as would be used cutting through the iron bars of a prison. He also had a number of diamonds which were stolen from a hotel here a few weeks ago, and tied around his waist was a belt containing fifty cartridges. He also carried an electric flashlight and other burglars appliances. "Texas" escaped from jail here a few years ago, and he also succeeded one getting away from Bailiff English.

William Nelson Cromwell, representative of the French Panama canal commission, recently called on President Roosevelt in Washington. Mr. Cromwell is something of a sportsman and during the interview he told the President a sporting anecdote.

"Some years ago," he said, "I spent a week in Germany shooting small game. To a German acquaintance I happened to remark that I preferred to shoot in Africa, because there was a spice of danger in the sport there."

"'Ach,' said my friend, 'you like a spice of danger mit your sport, eh? Den you go oud shooting mit me. De last time I go I shoot mine bruder-in-law in the leg.'"—Boston Post.

A certain hotel proprietor chanced to glance out of a rear window and saw his new waiter chasing a chicken about the yard.

"What have you in that bowl?" demanded the hotel man.

"Mushrooms," responded the new waiter. "Der's a gentleman dat wants chicken smothered wid mushrooms, en Ah'm tryin' to smother him, sah."—Chicago News.

PULLING UP STAKES
IN PETERBOROUGH

No Matter When or Where You See a Bargain, There's a Better One For You At

GOUGH BROS.
GOOD-BYE SALE

The second week adds to the intense interest of this sale. Its an occasion that warrants unbridled enthusiasm. Nothing can stop its progress.

Do you know how we're fixed? $68,000 worth of Suits, Overcoats, Furs, Boots, Shoes, Hats, Caps and Furnishings, must be slashed to pieces to bring down the stock. Are you thinking? Can't you see what this means? Can't you see that we must sell at a heavy loss in order to pull up stakes in time to let in the new firm.

WILL ANYBODY KINDLY RISE IN THE MEETING and say that Gough Bros. ever was or ever will be undersold. The fears of competitors and the frantic efforts of their bosses, cut no figure with us. No cast-iron "transformation" sale bulletin of reduced prices can side-track GOUGH'S GOOD-BYE SALE. We stand by the town and will issue new lists of cut prices every week that must beat the best markings of any other dealer by 25 per cent.

If anybody offers to sell Men's Overcoats and Suits worth $10, for $6.98, down goes Gough's prices to $5.98.

If anybody offers to sell Boys' Suits and Overcoats worth $6.00 for $4.48, down goes Gough's prices to $3.48.

If anybody offers to sell $3.00 Trousers for $2.48, down goes Gough's prices to $1 98. And so on all through the gamut.

Don't you see the logic in our slashing—we're pulling up stakes in Peterborough—necessity knows no law—the stock can't be moved or kept for another season.

MEN'S SUIT SLAUGHTER

entlemen—On inquiry from those whom I consider reliable, I am ind that the Bannie mine is among the very best prospective proper in this country, and well worthy of investment.

Very respectfully,

DENNIS A. BURKE, Mayor of Prescott, Ariz.

RS. KROHN BROS. Cincinnati, O. The Prescott National Bank, Prescott, Ariz., July 29, 1903.

Gentlemen—While we never personally visited the Bannie Group, we hear property well and favorably spoken of by parties who have been on ground and whose opinion should carry considerable weight, and the that the miners who work in said mines are, according to reliable information, investing in Bannie stock, would indicate that the property posses a good deal of merit. Yours very truly,

R. N. FREDERICKS, Cashier

D. LEVY & CO., (Inc.)

Wholesale and Retail Dealers in General Merchandise,

OHN BROS. Cincinnati, O. Prescott, Ariz., July 28th, 1903.

Gentlemen—Your telegram asking for report on Bannie mine, to hand. Bannie mine is considered by all mining men here to be one of the prospects for a big mine in this part of the country. The officers are men of standing and good, conservative business men. The miners working in the mine are taking one-half their wages in stock, which speaks for We consider stock a good investment. Respectfully,

D. LEVY & CO., (Inc.) by N. Levy, Pres.

OHN BROS. Cincinnati, O. Prescott, Ariz., 7-28-03

Gents—Replying to your wire of today, we have heard a great many good, good, reports of the Bannie mine, and have never heard a man say against it. Miners who are working there are buying the stock. The president of the Bannie M. Co. is an old mining man of experience. e believe that this company is mining on a strictly business basis and a good investment. Yours truly,

SAM'L HILL HARDWARE CO., Ray Hill, Pres.

KROHN BROS. Cincinnati, O. Prescott, Ariz., July 31, 1903.

Gentlemen— * * * * * * The nature of the ore is a heavy iron, and copper sulphide, which carries very good gold, silver and copper. The ore bodies, as far as they have been explored, are quite large well defined, which indicates permanence. My information is principal from practical miners who have been working in the property, therefore consider it pretty substantial information.

In conclusion will say that this is considered one of the most promising prospects in this section. Yours very respectfully,

ED. BLOCK.

WILL THE WAR SPREAD? IS NOW BEING DEBATED

Dager in the Balkans Becoming More Acute Than Ever Before

INSURRECTION IN THE BALKANS NOW CERTAIN

This is Believed to be the Forerunner of a General World-Wide War Which Would Be Very Disastrous

Special to The Times.

Paris, Feb. 18. — The news from Macedonia is not at all assuring. It is an open secret that a rebellion of gigantic proportions is under way, in which Europe must take a hand.

The organ of the French foreign office views the outlook as most serious. It says;

"Now that one of the mandatories of the powers in adjusting the Balkan situation is incapacitated by having to attend to its own affairs, it is desirable that the collective powers recover their liberty of action and together use their own initiative."

It is admitted that should Russia sustain further reverse, Abdul Hamid would openly cast off all schemes directed at controlling his European provinces. The Macedonian committee has now ample funds. They have agents in London buying arms on a large scale. An Austrian firm has just secured a contract to carry 200 truck loads of guns, rifles and cartridges of French manufacture for the Bulgarian government, which has called out the reserves of three classes, giving as a reason the violence of the Turkish troops on the frontier.

Turkey has promptly made Russia's military necessities the occasion for repudiating the only operative port of the Russo-Austrian reform scheme for Macedonia. The Italian general Georgis, who was recently appointed to the command of the Turkish gendarmerie, has been practically superseded, the sultan making him only an inspector-general under Pustapha Pasha. As commander-in-chief of all three provinces in Macedonia, Mustapha is ready to assume the aggressive against Bulgaria the moment the annual sorties across the Macedonian frontier commence. The Bulgarians are not less eager to fight. They say that this is the best year within the memory of those living, to free their countrymen across the border. Since the failure of the rising last spring they have been collecting war funds and armaments. Support for their cause from disinterested friends of freedom is now more cordial, since the situation precludes Russia from playing a masterful hand in the near east.

WAR WILL SPREAD

This, of course, is based on the assumption that the war will be confined to Russia and Japan. The consensus of European opinion on this point is that Japanese success will tend to reduce the danger of a further spread of the war. It would be absurd for France to go to Russia's assistance if the latter is unable to withstand Japan's assaults, even if Japan should drive her opponent from Manchuria. In the latter event indeed, it would be most probable that the powers would endeavor to arrange peace.

On the other hand, the contingency of a swift Japanese success in the far east is beginning to give rise to some apprehensions. Even Japanese sympathizers do not see an unmixed blessing in the wholesale defeat of Muscovite power. It would mean Japanese supremacy in China in all but technical sovereignty and the rapid development of the latent military power of the Chinese. A revival of the apprehension of the domination of the yellow races would follow. Europe, on the whole, therefore, hardly desiring the overwhelming success of either belligerent.

MAY FORCE AN EARLY PEACE.

Already there is talk that Japan will follow up her present advantage at such a terrific pace that Russia will seize upon the outbreak of hostilities in the Balkans and impending domestic uprising as an excuse to make early peace, with the intention to renew the struggle when she is really prepared, which at the present moment she certainly is not. Political circles scout the idea, saying that it would involve the confession that Russia is now only a third-rate power, whose vast bulk is scarcely a greater element of strength than that of China. Diplomatists argue that Russia must retrieve her reputation as a fighting force at any expense of men and treasure.

It is necessary, to have a full understanding of the great importance of Secretary Hay's proposals to the powers, to make clear the whole purpose of the Russian war party, which deceived and forced the czar into hostilities. It was and still is their purpose to conduct the campaign with the sole object of gaining Pekin before it is ended. The policy will be, at some point during the war, to incite and manoeuver China into some action which can be construed into a violation of neutrality. Then the troops will march on to Pekin and depend upon Germany and France to co-operate against any diplomatic efforts to displace them.

This secret purpose is so well understood in diplomatic circles that Secretary Hay's note was warmly welcomed in all except pro-Russian quarters. Mr. Hay's note is recognised as the most effective method of offsetting that conspiracy, and is one which Russia herself will have the greatest difficulty in finding plausible grounds for opposing. The impression prevails, however, that it will be impossible to prevent both Corea and Manchuria from becoming virtually the prize of the victor. Prompt and definite action by the powers at the present moment, should, however, suffice to prevent any further dismemberment of China.

FOR HUSBAND'S DEATH

Mrs. Cameron Hagersville Suing Mr. A. C. Douglas for $5,000 Damages

Hamilton, Feb. 18—Mrs. Mary Cameron, of Hagersville, has through Staunton & O'Heir, her solicitors, issued a writ against A. C. Douglas, a contractor, for $5,000 damages for the death of her husband. On Oct. 15 last John Cameron was working in an underground tunnel when a heavy piece of rock fell, injuring him so severely that he died on Oct. 25. His widow claims that his employer, Mr. Douglas, or his servants, were negligent, and for that reason is asking for heavy damages. The writ was issued here yesterday morning.

STORM ON LAKE BAIKAL

Transportation of Russian Troops Seriously Delayed

London, Feb. 18—A dispatch to the Daily Telegraph from St. Petersburg states that a message from Missovia says that one of the dreaded storms which are the terror of Lake Baikal, has broken out. This is most unfortunate, as the ice on the lake, over which the rails are being laid, is splitting. It has broken for several versts from Tanhoi, leaving open gaps several yards wide. These will have to be filled in with blocks of ice. The shortage of wood for sleepers delays the completion of the work.

CURE FOR APPENDICITIS

Patient Has But to Walk on All Fours Four Times Daily

Berlin, Feb. 17—The medical journals report some remarkable cures of mild cases of appendicitis are being made by a new method of treating the disease before the knife is needed. Certainly it is an original —almost an aboriginal—method.

It is nothing less than to require the patient to walk on all fours for twenty minutes four times a day. It is claimed that certain muscles around the vermiform appendix are brought into play and strengthened by this quadrupedal cure, which are unused when a biped walks erect. Others are relaxed, and the localized inflammation has opportunity to subside.

A well-known diplomat, celebrated for his haughtiness and punctiliousness, was cured of beginning appendicitis by this method lately. His associates and the fashionables are laughing in their sleeves when their imaginations conjure up his proud excellency's posture while undergoing treatment. The four-footed dose is recommended in dyspepsia, too, but, of course, it should be taken before meals.

RUSSIANS LASHED INTO A FURY

Populace Now Resembles a Wounded Bear

PATRIOTIC DEMONSTRATION

St. Petersburg Going Wild Over the War With Japan

St. Petersburg, Feb 18—For the first time since the beginning of hostilities in the far east, the government last night gave the Russian newspapers permission to publish the accounts received abroad of the naval engagement off Chemulpo, in which the warships Variag and Koreetz were destroyed. The war fever which has been aroused here, and apparently all over the Empire, or at least, all over European Russia, in a single week is truly remarkable. Such patriotic demonstrations as have been witnessed in St. Petersburg since hostilities began have been all the more astonishing, because of the public indifference during the period of negotiations, and almost up to the hour when Japan struck the first blow at Port Arthur. But now, like a flash, the whole empire seems to have been lashed into fury by defeat and, like a bear when it is wounded and angered, is prepared to fight to the bitter end. The dreamy Russian character has been stirred to depths of resentment which it will be difficult to understand abroad.

PATRIOTIC DEMONSTRATIONS

The patriotic demonstrations here have been also entirely spontaneous. Some of them were extraordinary in character. Yesterday the school boys and students of the city, numbering thousands, marched bareheaded for for hours up and down the Nevsky Prospect, bearing flags, shouting and singing patriotic airs. They were followed by an enormous crowd. Like previous processions, this one went first to the Anichkoff palace, where the dowager empress, who is very popular with the people, showed herself. Later the boys and students surrounded the Winter Palace, and in response to their enthusiastic cheers, the Czar and the Czarina made their appearance. When the Czarina blew kisses to to the boys, a vast shout went up which waked the echoes across the Neva.

At the French embassy, which was next visited by the procession Madam Bompard was compelled, in the absence of the ambassador, to appear at a balcony and acknowledge the cheers for Russia's ally. In front of the barracks the various regimental bands in the city played the National Anthem to the hurrahing of the crowds.

There were demonstrations at night outside the theaters, and the performances going on inside were stopped while the orchestras came out to the street to play the folksongs of the soldiers. The fact that the poorhouse porters pay their last cent for the extra editions of the newspapers, and that the cab drivers do not charge military men for carrying them around shows the deep feeling of the people.

Telegrams from almost every town in European Russia tell the same story of popular demonstrations. At Moscow there were great manifestations in front of the palace of Grand Duke Serge, and before the Iberian chapel, where stands the sacred image of Our Lady of Iberia, before which the Czar invokes blessings when he goes to Moscow. Thousands of persons knelt for hours in the snow in front of the chapel praying for victory.

FEARS A GENERAL WAR

DR. TOYOKICHI IYENAGA SAYS HAY'S PROPOSAL SHOULD BE ACCEPTED

Japan He Declares Is Not After the Capture of Port Arthur At Present

Chicago, Feb. 17—Prediction that a world-war, in which the United States would be involved, was an almost certain outgrowth of the conflict between Russia and Japan, was made yesterday by Dr. Toyokichi Iyenaga, formerly a secretary in the foreign department of the Japanese government, and at present a lecturer upon the political problems of the Orient. He said;

"I have always maintained that the United States and England should join with Japan in settling the eastern question in the interests of civilization. The United States has already taken a strong stand in the affair, and has done just what Japan wanted.

MAY FORCE TO ACTION.

"If the proposal which has been made by the United States is not accepted by Russia, it is probable that she—and in the end each of the great powers—will be forced to take up arms in the Orient.

"The real significance of Japan's naval campaign has not yet been pointed out in the press of this country. Japan has not been trying to capture Port Arthur, but only to bottle up the Russian fleet in the Port Arthur harbor, so that troops can be poured into Corea and Manchuria without molestation from Russian ships.

JAPANESE WELL POSTED.

"The Japanese generals and soldiers know every inch of the ground in these two countries and perfect maps of the district which is destined to be the theatre of war are in possession of the Japanese war department."

Toyokichi Iyenaga has just completed a series of lectures at the university of Chicago and will soon leave this city for Brooklyn, where he will lecture upon the eastern problem before the Institute of Arts and Sciences.

London, Feb. 18—A telegram received in London yesterday afternoon reports that the Russians bombarded the town of Fukuyama, at the southwestern extremity of the Island of Yezo. The vessels which did the bombarding are supposed to have been the cruisers that have been sunk by Japanese torpedoes in Tsurga straits.

The Straits of Tsurga are between the Island of Hokkaido, the northern of the three Japanese islands, and Nippon, the central island.

Died in the Hospital

Mr. M. D. Sullivan, of Emily township, took ill about a week ago, and was sent to Toronto Hospital, where his death took place. His remains arrived here on the 5.30 train Wednesday. He was a son of the late Andrew Sullivan, of Emily.

To Our Readers

We would ask our subscribers to bear with us during the cold snap, as we are greatly handicapped in getting out our paper, owing to insufficient power. We are ready for the press at 4 a.m., but, as our machines are operated by electric power, and this having been shut off for some days, we find it impossible to get our paper around as early as usual.

Should Women Smoke?

The London Chronicle is discussing the question, "Should women smoke," and we select the opinion of a prominent English physician on the subject;

Mr. William Henry, D.Sc., says that when smoking agrees, and is judiciously practised, it does a woman good, soothes her nerves, refreshes her brain, aids her digestion, allays her bodily fatigue, and acts as a useful aperient. But she should not inhale or drink alcohol, while she is smoking. At clubs, she often does both. Women, adds the writer, should eschew the pernicious cigaret, both for the sake of their eyes and their teeth, or use a "holder." Better still, they should smoke a long clay pipe. The old-fashioned "churchwarden" is the most healthy of all pipes. I suggest the founding of a "Woman's Churchwarden Club." A pretty woman emitting occasional graceful whiffs from such a pipe and in intervals daintily toying with its stem would present a charming sight.

Perhaps some of The Times readers would like to express themselves on this subject.

—Work on Roy's new studio is progressing satisfactorily, notwithstanding the cold weather.

—Ping pong! At half price! A consignment of fine sets has been purchased at reduced rates and they will go while they last at half price. At the Times Bookstore.

FOREST MINING CO.'S

Storm King Group of Mines

TO CANADIAN INVESTORS

The property comprising what is known as the STORM KING GROUP OF MINES offers an attractive and safe investment. The property is the richest in the country and we believe it would be difficult to secure an investment that promises better returns. The following is a description of the mines written by Capt. A. M. Paul, whose reputation as an expert in mining matters is known far and near.

These properties are situated in the Cable Cove Mining District, about fifteen miles north of Sumpter, Oregon, and about one mile northwest of the Baby McKee mine, about two miles northwest of the Last Chance, the Alpine, the Imperial and the California mines.

The properties in this report consist of seven claims. The names of the seven claims being as follows: The Eureka and the Honest Dollar. These two claims are on the same vein. Adjoining these two claims and paralleling them on the northwest is another vein upon which there are two claims known as the Jessie and Golden Rule, and paralleling them on the northwest there is another vein upon which there are two claims, known as the Storm King and the Ozone. The last claim of this group lies to the northwest of the last two named, and is adjoining them. This claim is the Shannon Bell.

In making my report I will commence with the two first named claims of the group, the Eureka and Honest Dollar. The development on these claims consists of a tunnel ninety-seven feet in length, running along the course of the vein, showing two feet ten inches of ore in the top of the tunnel and a little over three feet in the bottom, which assays giving values of from $9.68 to $70 per ton in gold. About four hundred feet in a southwesterly direction there is a shaft on the vein ten feet deep, showing the vein to be from one to two inches wide on the surface and about twelve inches wide in the bottom of the shaft, in which assays give values of from $9.76 to $40 per ton in free milling gold ore.

This vein is exposed by small shafts and open cuts for a distance of fifteen hundred feet, and the course of this vein is north, ten degrees east, and the vein cuts the formation, showing it to be a true fissure, and the formation is granite. This vein shows in places a width of from ten to fifteen feet of mineralized matter, commonly called vein matter, but which is caused by hot solutions from below.

I will now pass to the Jessie and Golden Rule. There has been very little work done upon these two claims, there being one discovery shaft ten feet deep, showing ore on all sides of the shaft, and running in value of from $4 upwards. It is my opinion that with development, thus, too, will prove valuable property.

The work on the Storm King and Ozone consists of a tunnel near the point of discovery and is driven along the vein for a distance of one hundred and eighty feet, showing ore all the way from the surface to the face of the tunnel, and averaging in width from six to eighteen inches. Three assays give the following values. $12.50. This being a general sample taken from the dump. The other two assays are $62.60 and $79.00 respectively, this being the assorted ore for shipment. The course of this tunnel and vein are north, ten degrees west, and the vein cuts the trend of the formation obliquely (which is granite), and by driving this tunnel five or six hundred feet further it will intersect a quartzite reef (which is running north, twenty degrees east) which would make this a contact vein between granite and quartzite, and should produce a large body of ore at the intersection of the contact.

The only work done upon the Shannon Bell, the last claim of this group is the location work, and is not enough to allow of a report being made.

There is water for power purposes one mile from the property, and timber on the ground, of a very fine quality, sufficient to run the mine for many years to come.

All the assays mentioned in this report were made by the assayer, of the Imperial mine at my request, and the ore was taken by me from the properties mentioned.

I will state that I have been a practical miner since 1870, and am now the manager and superintendent of the Imperial mine in this district.

(Signed) CAPTAIN A. M. PAUL.

Advance Mining Co., Fiscal Agents, Sumpter, Ore.

Equitable Gold Mining Co.

R. C. LANE, President. S. F. NORTON, Secretary and Treasurer.

Over $300,000 of development work already done. Main shaft 9 x 16 feet, down 700 feet. Over 3,000 feet of drifts, tunels and shafts showing immense ore body

Destined to become large and continuous dividend payer.

The Equitable Gold Mining Co.'s properties consist of three mines, known as the North Bonanza, Flowery and Kimbark. They are located in Six Mile Canon, less than four miles from Virginia City, Nevada, which is the nearest railroad station.

Years ago, over three hundred thousand dollars of development work was done upon the mines—so they are not mere "prospects" but actual mines. This work was done under the personal supervision of competent engineers, and was paid for by the owners of the mines themselves; thus giving double assurance that the work was well done and that the expenditure was justified.
